SUPPLEMENT TO  
**The Gazette of India.**

No. 1. CALCUTTA, SATURDAY, JANUARY 7, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may be useful or otherwise known. The Decrees of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the only of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, December 24th, 1898.**

The principal feature of the weather of the week was the cold weather disturbance which was approaching the north-west frontier from the Persian region at the close of the previous week. It crossed the frontier into Upper Sind on the early morning of the 18th and drifted eastwards through North Rajputana and the South-East Punjab on the 19th, East Rajputana on the 20th, the North-Western Provinces and the eastern districts of Central India on the 21st, Chota Nagpur on the 22nd, and Bengal on the 23rd, where it died out during the next 24 hours. The disturbance was throughout its existence very diffused and ill-defined, but it gave a moderate fall of snow in Kashmir and the higher elevations of the Punjab Himalayas from the 18th to the 20th, and numerous light showers of rain in the North-Western Provinces and some showers in the North Punjab and the Punjab Hills on the 21st and 22nd. Fine weather obtained generally over the remainder of India throughout the week except in South Madras and the South Coromandel Coast districts, where some local thundershowers were received on the 21st and 22nd.

The variations of the mean temperature from the normal were small and unimportant, except in Chota Nagpur, Central India, the Central Provinces, Berar, the Bombay Deccan and Madras coast, where the weather was from  $2\frac{1}{2}^{\circ}$  to  $5\frac{1}{2}^{\circ}$  warmer than usual.

*Sunday, December 18th.*—Pressure had given way over the whole of the Indian area with the exception of Burma where it was practically stationary. The fall was brisk to rapid in North-Western and Central India and slight elsewhere. Pressure was in moderate defect in Ceylon and in moderate to large defect in North-Western India and Baluchistan. The deficiency was most marked in Upper Sind, where it slightly exceeded a seventh of an inch in amount. The feeble wave of low pressure which was approaching the north-west frontier at the close of the previous week was passing through Upper Sind. Winds were very light and unsteady over the greater part of Northern and Central India except in Upper Sind and the neighbouring districts of Rajputana and the Punjab where they were feebly cyclonic. Winds were strong in Southern India, the Bombay Deccan and the Konkan where gradients were steep. Skies were partially clouded in the North-Western Provinces, Rajputana and Southern India, and overcast in Sind, the Punjab and the North-West Himalayas. Light to moderate snow had occurred in Kashmir and light thundershowers at Trincomalee and Madras. Temperature was in slight defect in Bengal, Assam, Bihar and Mysore, normal in Burma, Chota Nagpur, the North-Western Provinces and Southern India, and more or less above the normal over the remainder of India and Baluchistan. The excess was most marked in Baluchistan ( $7^{\circ}$ ), Gujarat ( $5^{\circ}$ ) and Rajputana and Berar (each  $4^{\circ}$ ), due chiefly to much higher day temperature than usual.

*Monday, December 19th.*—The barometric changes were generally small and unimportant except in Rajputana and the South-East Punjab, where pressure had given way briskly to rapidly, due to the transfer into that area of the depression which lay over Upper Sind on the previous day. Pressure was more or less below the normal throughout India. The deficiency was least in North-Eastern India and greatest in the area of depression where it ranged between  $13''$  and  $17''$ . The depression was diffused and ill-defined, and the winds in Upper India, although cyclonic in direction, were very light at the level of the plains. Winds were very strong at Cherat where they were blowing at the rate of 28 miles per hour at 8 A.M. The air movement was somewhat less strong in the Konkan than on the previous day. Skies were overcast in the South-East Punjab, Rajputana, the western districts of the North-West Provinces and Kashmir and moderately clouded in Southern India. Moderate snow had again been received in Kashmir. Temperature had decreased largely in Baluchistan and was now normal in that area. Temperature had fallen to normal also in Orissa. Temperature had, on the other hand, increased  $2\frac{1}{2}^{\circ}$  in Rajputana, where it averaged  $6\frac{1}{2}^{\circ}$  above the normal during the previous 24 hours. Elsewhere the temperature conditions were practically unchanged.

*Tuesday, December 20th.*—The barometric changes were again small over nearly the whole of the country except locally in the areas affected by the depression. Pressure had increased briskly in Baluchistan and briskly to rapidly in Upper India, and had fallen very slightly in the eastern states of Central India and the neighbouring districts of the North-Western Provinces. The disturbance had shifted east-south-eastwards and filled up to some extent. It apparently lay over East Rajputana and the neighbouring districts at 8 A.M. The chief features of the air movement were unaltered. Cloud had increased in Baluchistan and Southern India and decreased in the Punjab. Snow in moderate amounts had again fallen in Kashmir. The temperature conditions were again unchanged over the greater part of the country. Temperature had fallen  $2^{\circ}$  in Rajputana and increased rapidly in Orissa and Chota Nagpur. The mean temperature of the previous 24 hours was  $5^{\circ}$  above the normal in Rajputana and Central India,  $4^{\circ}$  in Berar and the Central Provinces,  $3^{\circ}$  in Gujarat, and  $2^{\circ}$  in the North-West Provinces and Punjab, due chiefly to very high night temperature.

*Wednesday, December 21st.*—Pressure had increased in Baluchistan and Upper India and given way slightly to briskly over the remainder of the Indian area. The shallow diffused depression in East Rajputana on the 20th had been transferred eastwards to the area defined by the stations of Agra, Cawnpore,

Allahabad and Nowgong, in which pressure was about a tenth of an inch below the normal. Gradients were steep over the southern half of the Bay and Southern India. Pressure was, on the other hand, uniform over the greater part of Northern and Central India and the Deccan. Winds were cyclonic in direction in the Gangetic Plain, but were very feeble. Winds continued strong at Cherat. Skies were densely clouded in Southern India and partially clouded in the North-Western Provinces and Bengal and at some stations in the Central Provinces. Light to moderate rain had occurred in the extreme south of Madras and light rain or snow in the East Punjab and Kumaon Hills. The temperature conditions did not differ to any important extent from the normal, except in the tract lying between East Rajputana and Bihar, in which temperature was from  $2^{\circ}$  to  $10^{\circ}$  above the normal, due chiefly to much higher night temperature than usual. Temperature of the previous 24 hours was  $4\frac{1}{2}^{\circ}$  below the normal at Quetta.

*Thursday, December 22nd.*—Pressure had again increased briskly to rapidly in North-Western and Central India and was now in slight to moderate excess in the former and normal in the latter area. The depression in the North-Western Provinces on the preceding day had apparently advanced into Chota Nagpur, where pressure had given way very slightly. It had, however, filled up very largely and was no longer of any importance. Winds tended to circulate cyclonically in South Bihar, Chota Nagpur and the adjacent districts of the North-Western Provinces, but were very light. Skies continued densely clouded in Southern India, and some light thundershowers had fallen in that area. Light snow had occurred in the Kumaon Himalayas and several rain or hail showers in the North-Western Provinces. The distribution of temperature with respect to the normal was practically unchanged.

*Friday, December 23rd.*—Pressure had given way briskly to rapidly in Baluchistan and slightly in Sind, Kathiawar and the North Konkan. It had, on the other hand, increased slightly to briskly in the Gangetic Plain, the Central Provinces and Bengal, and was practically stationary elsewhere. Pressure differed but little from the normal except in Ceylon, Southern India and the Konkan where it was in slight to moderate defect, and in North-Western and Central India where it was equally in excess. Gradients were considerably above their normal intensity over the Peninsula and the Bay of Bengal. Winds were of the anti-cyclonic type in North-Western and Central India. They were unusually strong at Cherat, where they had a velocity of 30 miles per hour at 8 A.M. Skies were moderately clouded in Baluchistan and the West Punjab and lightly clouded in Southern India. Temperature was steady except in Central India, the North-Western Provinces and Rajputana, where it had decreased briskly to very rapidly. The mean temperature of the previous 24 hours was  $3^{\circ}$  below the normal in Rajputana and from  $2^{\circ}$  to  $6^{\circ}$  in excess in Orissa, Bihar, Chota Nagpur, the Central Provinces, Berar, the West Coast the Bombay Deccan and Mysore. The night temperature was much more largely in excess in these areas than the day temperature.

*Saturday, December 24th.*—Pressure had given way almost everywhere. The fall was brisk to rapid in Baluchistan and North-Western India and slight elsewhere. Pressure was in general defect. The deficiency was greatest in Kathiawar where it was considerable. Feeble south-east winds obtained at Chaman and Quetta. A strong northerly gale was blowing at Cherat. Skies were overcast in Baluchistan and Kashmir, more or less heavily clouded in Upper India. There was also much cloud in Southern India. No rain had fallen anywhere beyond a moderate shower at Trincomalee. Temperature had risen fast in Baluchistan and was during the previous 24 hours  $9^{\circ}$  above the normal at Quetta. The excess was much more marked in the night than in the day temperature. Temperature was approximately normal in Assam, the North-Western Provinces, Sind, the Punjab, Central India and the southern half of the Peninsula, in moderate defect in Rajputana, and more or less considerably above the average in other districts. The excess was most marked in Berar where it averaged  $6^{\circ}$  in amount. The night temperature was much

more largely in excess in the area of increased temperature than the day temperature.

**Temperature.**—The temperature conditions of the week varied to a much less extent from the normal than was the case during the preceding four or five weeks. The mean temperature exceeded the normal all over the country with the exception of Assam and Bengal where it was in very slight defect. The excess was, however, small and less than  $2^{\circ}$ , except in Chota Nagpur, Central India, the Central Provinces, Berar, the Bombay Deccan and Madras coast, in which it ranged between  $2\frac{1}{2}^{\circ}$  and  $6^{\circ}$ . The area of greatest excess lay over Berar throughout the week. The increased temperature was due chiefly to much higher night temperature than usual.

The following table gives temperature variation data for the week :—

PROVINCE.	DECEMBER 1898.							Mean variation of week.
	18th.	19th.	20th.	21st.	22nd.	23rd.	24th.	
Burma . . . . .	0	0	0	0	0	0	0	0
Assam . . . . .	-0.9	-0.9	-0.5	-0.4	+0.8	+1.9	+3.5	+0.5
Bengal . . . . .	-1.7	-1.5	-1.1	-1.4	-1.7	-0.6	+0.8	-1.0
Orissa . . . . .	-2.0	-2.0	-1.2	+0.3	+0.7	+1.1	+2.1	-0.1
Bihar . . . . .	+2.1	+0.1	+0.1	+1.6	+2.5	+3.8	+4.0	+2.0
Chota Nagpur . . . . .	-1.6	-0.4	+1.7	+2.4	+3.4	+4.2	+1.5	+1.6
North-Western Provinces and Oudh . . . . .	-0.4	-1.2	+1.8	+3.2	+5.7	+6.0	+3.2	+2.6
Punjab . . . . .	0	+1.7	+2.1	+4.6	+4.3	+1.7	-0.5	+2.0
Sind . . . . .	+1.1	+1.6	+2.4	+1.2	+0.5	+0.4	+0.6	+1.1
Rajputana . . . . .	+2.3	+1.8	+1.5	-1.1	-1.5	-0.7	+1.0	+0.5
Gujarat . . . . .	+4.1	+6.6	+4.6	+3.1	+4.2	-2.7	-2.0	+2.0
Central India . . . . .	+5.2	+4.5	+3.0	-0.2	-2.0	-1.7	+2.0	+1.0
Central Provinces . . . . .	+2.0	+3.1	+4.9	+6.8	+4.5	-0.9	-0.5	+2.8
Berar . . . . .	+1.2	+2.6	+4.4	+5.8	+6.4	+5.0	+3.2	+4.1
West Coast . . . . .	+3.9	+4.1	+4.4	+7.6	+6.8	+6.4	+5.8	+5.6
Bombay Deccan . . . . .	+0.7	+1.1	+0.6	+1.1	+1.5	+2.4	+2.4	+1.4
Mysore . . . . .	+2.6	+3.1	+3.0	+2.4	+1.7	+2.2	+2.5	+2.5
Madras Coast . . . . .	-1.5	-0.6	+0.1	+2.8	+2.1	+2.7	+0.1	+0.8
Madras Deccan . . . . .	+2.5	+2.8	+3.3	+1.3	+1.4	+1.3	+2.5	+2.2
South India . . . . .	+2.5	+2.3	+1.8	+0.4	+1.8	+1.7	+1.9	+1.8
	+0.3	+0.9	+1.6	+1.9	+1.2	+0.7	+1.0	+1.1
Mean for whole of India . . . . .	+1.1	+1.5	+1.9	+2.2	+2.0	+1.7	+1.8	+1.7

The preceding table shows that the mean temperature of the whole of India and Burma was above the average on each day of the week, and that the amount of variation fluctuated between  $1^{\circ}1$  and  $2^{\circ}2$ .

**Rain.**—A feeble cold weather depression appeared in Upper Sind at the beginning of the week and marching eastwards passed into Bengal on the 23rd. It gave numerous light showers in the North-Western Provinces and some showers in the North Punjab and the Simla and Kangra Hills on the 21st and 22nd. The largest fall in these areas was 1.34 inches at Dharamsala on the 21st. Moderate snow fell in Kashmir and the higher elevations of the Punjab Himalayas from the 18th to the 20th. Weather was fine and settled over the remainder of the country throughout the week except in South Madras and the the South Coromandal Coast districts where some showers were received on the 21st and 22nd.

The accompanying rainfall statement shows that more or less rain was received in seventeen of the rainfall divisions and that in ten of these divisions the total fall of the week was less than a tenth of an inch in amount. The divisions which obtained effective rain, *i.e.*, average fall of over a tenth of an inch,

were North Punjab, Punjab hills, North-Western Provinces hills, North-Western Provinces West Submontane, North Oudh, East Coast South and Madras South. The rainfall in these divisions ranged between 0'11" and 0'78" and was very slightly above the average in the first three divisions.

The seasonal rainfall up to date shows some improvement in the case of the North Punjab and the Punjab Hills.

The more noteworthy totals were :—

Punjab (hill districts)	.	.	.	Kangra, Dharmsala, 1'61 inches.
East Coast (South)	.	.	.	S. Arcot, Chidambaram, 1'26 inches.
Ditto	.	.	.	Tanjore, Vedaranyam, 2'53 inches.
Madras (South)	.	.	.	Tinnevely, Keranur, 1'19 inches.

HEM RAJ,

Off. Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 29th December 1898.

T. W. HOLDERNESS,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 31st December.*—Heavy rain has fallen in the Carnatic, the Southern and parts of the Central districts and some in the adjoining tracts. The water-supply is generally ample. Sowings still continue. The standing crops are thriving generally, but the heavy rain has caused damage in parts. The harvest outturn is almost normal. Pasturage is sufficient. Cattle are in normal condition. Prices are falling generally.

**Bombay.**—*For week ending 4th January.*—Slight rain fell in parts of Sind; more is wanted for the late crops in parts of Poona and Satara. The standing crops have been damaged by rats, blight or excessive cold in parts of Hyderabad, Thar and Parkar, Bijapur and Dharwar, and are withering in parts of Khandesh and Ahmednagar. Harvesting of the early crops continues in six districts. Cotton-picking is progressing in parts of Khandesh and Gujarat. Preparations for next season have commenced in four districts. Fodder is sufficient except in parts of Sind. Agricultural stock is generally healthy. Prices have slightly risen in three and fallen in seven districts.

**Bengal.**—*For week ending 2nd January.*—There were slight scattered showers of rain in several districts during the week. The harvesting of winter rice is approaching completion, and a good outturn is generally expected. The spring crops and poppy are in good condition. The earlier spring crops are maturing, and in some places pulses are being gathered. The pressing of sugarcane is in progress. There is plenty of fodder in every district. There was a slight fall in the price of rice in some districts, but on the whole prices were stationary.

**North-Western Provinces and Oudh.**—*For week ending 4th January.*—The rainfall has been almost general during the week and has benefited the standing spring crops, which are reported to be in a flourishing state. The pressing of sugarcane continues. Prospects are favourable. The markets are well supplied. Fodder is plentiful. Prices are almost stationary.

**Punjab.**—*For week ending 4th January.*—Rain, ranging from  $\frac{1}{4}$ th of an inch to  $3\frac{1}{4}$  inches, has fallen in all districts except Shahpur. Harvesting of the autumn crops is over. Pressing of sugarcane and sowing of spring crops still continue in some districts. The spring crops have been benefited by the recent rain throughout the province, but more is wanted. The rape and gram crops are being damaged by caterpillars in parts of Ferozepore. Cattle are generally in good condition. Fodder is sufficient in all districts except Delhi, Shahpur, and parts of Rawalpindi and Dera Ismail Khan. Prices are rising in Dera Ismail Khan, falling in Shahpur and are unchanged elsewhere. Wheat is selling from  $15\frac{1}{2}$  to  $21\frac{1}{2}$ , gram  $20\frac{1}{2}$  to 24, barley 32, bulrush millet 19 to 24, maize  $27\frac{1}{2}$  to  $32\frac{1}{2}$ , great millet 26, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 3rd January.*—Slight showers of rain fell in Damoh, Jubbulpore and Mandla. The weather is occasionally cloudy and very cold, except in Chanda where it is reported to be hot and unseasonable. The cloudy weather has affected the linseed and *tur* (*Cajanus indicus*) crops in the Bhandara district and the former alone in Bilaspur. The winter crops are in urgent need of rain. In the Hatta tahsil, Damoh district, the prospects of the winter crops are gloomy. The reaping and threshing of the autumn crops and the picking of cotton continue. Pressing of sugarcane is also in progress. The cheapest prices are wheat 19, gram 32, rice 26, and *juar* 31 seers per rupee. The dearest prices are wheat 12, gram 13, rice  $10\frac{1}{2}$  and

*juar* 22 seers per rupee. Wheat is selling above the normal rate in the south, east and west of the Province, and the price of gram is still low in the Northern Districts.

**Burma.**—*For week ending 31st December.*—In Lower Burma reaping and threshing are progressing. The crops in Akyab, Thongwa, Bassein, Thaton and Amherst are average or above average, but in the remaining principal districts they are in defect. In Upper Burma the crops on the whole are in fair condition. It is reported that considerable remissions of water-rate will be necessary in the Yameihin Sub-Division owing to the failure of crops. The fluctuations in the price of paddy are unimportant.

**Assam.**—*For week ending 3rd January.*—Slight rain has fallen in most districts. Harvesting of late rice, gathering of pulses, sowing of mustard, and pruning of tea are in progress. Pressing of sugarcane continues in Sylhet and Lakhimpur. Prospects of late rice, pulses and sugarcane are generally good. Prices—common rice, Silchar and Dhubri 16, Sylhet 14½, Gauhati 15, Tezpur and Nowgong 13, Sibsagar and Dibrugarh 12 seers per rupee.

**Mysore and Coorg.**—*For week ending 4th January.*—**MYSORE:** Slight rain has fallen in parts. The standing crops are in good condition. Prices have slightly fallen in Tumkur, Shimoga, Kadur, Kolar and Hassan. Paddy and *ragi* (*Eleusine coracana*) have been harvested in parts.

**COORG:** Harvesting of rice, threshing of *ragi* (*Eleusine coracana*), and coffee-picking continue. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 4th January.*—**BERAR:** The weather is cool. Picking of cotton and cutting of *juar* are almost completed. The winter crops are in fair condition. The land is being prepared for the ensuing rain crop in parts of the Province. Fodder is sufficient, but the water-supply is inadequate in parts of the Akola and Amraoti districts. Prices are almost stationary.

**Hyderabad.**—No rain fell during the week. The autumn harvest is almost over. The winter rice sowings are in progress. The rice crop is still being harvested. The standing spring crops are doing well, but rain is wanted in a few taluks of the Aurangabad Division. Agricultural prospects continue favourable. Prices—wheat 8½, coarse rice 10, and *jawari* 21 seers per current sicca rupee.

**Central India.**—*For week ending 4th January.*—There has been a slight fall of rain in Bundelkhand during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The condition of the standing crops, agricultural stock and pasturage, is good. Prices of food-grains are falling slightly in Bundelkhand and Baghelkhand, but are steady elsewhere. The condition of opium is fair in Indore and Bhopal.

**Rajputana.**—*For week ending 4th January.*—Slight rain fell at Abu and showers at Alwar, but none elsewhere. Sowing of the spring crops and irrigation continue. The state of the crops is generally good. In Merwara some tracts have been seriously affected through failure of the rains. Twenty-two villages are reported as distressed. Cattle are generally in good condition; considerable numbers have migrated from Ajmere-Merwara and Marwar. Fodder is scarce in parts of Kherwara, Meywar, Baraoti, Ajmere, Jeypore, Bikanir and Marwar. Prices are rising in Jhallawar and are steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 365 persons emigrated during the week. The number employed on relief works was 326 in Ajmere; 2,012 in Merwara and 994 in Marwar. Prices—Ajmere 20, Beawar 22 and Marwar 14½ seers per rupee.

**Kashmir.**—*For week ending 3rd January.*—The weather is snowy. Prices continue below normal. Rice 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 4th January.*—Slight rain fell during the week. Sowing of spring crops is in progress and the condition of the standing crops is fair. Fodder is sufficient. Prices are generally stationary: wheat 19 and maize 23 seers per rupee.

**Nepal.**—*For week ending 31st December.*—Rainfall '08. The weather is cold and foggy. Rice  $8\frac{1}{2}$  seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

RULE REGULATING THE PROMOTION OF OFFICERS BELONGING TO THE  
GRADED AND INDIAN EDUCATIONAL SERVICES.

No. 9-19.

*Extract from the Proceedings of the Government of India in the Home  
Department (Education), dated the 6th January 1899.*

READ—

Home Department Resolution on the subject of the re-organization of the Educational  
Services in India, No. <sup>4 (Education)</sup><sub>200-214</sub>, dated the 23rd July 1898.

Read also—

Paragraph 5 of a letter from the Government of Bengal, No. 2088, dated 28th July 1897, suggesting a rule for the regulation of promotions to the first two classes of the graded service of the Educational Department and admission to the special allowances in the Indian Educational Service.

Letter to the Government of Bengal, No. 341, dated the 11th December 1897 (paragraph 5) on the same subject.

Circular to Local Governments and Administrations, Nos. 343—347, dated the 11th December 1897, and the replies to that circular.

RESOLUTION.

In paragraph 15 of Home Department Resolution No. <sup>4 (Education)</sup><sub>200-214</sub>, dated the 23rd July 1898, prescribing the re-organization of the Educational Services in India, it was stated that no officer in the Graded Educational Service should suffer by the re-organization of the Department, and that every European officer who had been permanently appointed to the graded list would be given the option of coming under the new scheme or of continuing on the graded list and obtaining promotion as vacancies occur in it, subject to the condition that only those considered fit for promotion would be promoted. In accordance with the option granted to them many officers have elected to come under the new scheme whilst others have preferred to remain in the Graded Service. There thus exist side by side the new Indian Educational Service and the old Graded Service, the latter being composed of such officers of that service as did not elect the new scheme. Some doubt has been expressed as to how the co-existence of the two services should affect the promotion and emoluments of the officers belonging to each of them.

2. Prior to the constitution of the Indian Educational Service the officers of the Graded Educational Service were classed as follows:—

1st class on	.	.	.	.	.	.	R1,250—50—1,500
2nd "	.	.	.	.	.	.	" 1,000—50—1,250
3rd "	.	.	.	.	.	.	" 750—50—1,000
4th "	.	.	.	.	.	.	" 500—50—750

The salaries and allowances of officers of the Indian Educational Service are prescribed in paragraphs 8—10 of the Resolution of the 23rd July 1898, viz.:—

- (a) First or probationary period of five years, R500—50—750.
- (b) Second period, R750—50—1,000, the maximum being attained at the end of ten years from first appointment.
- (c) After fifteen years' service a special allowance of R100 to officers whose total salary does not exceed R1,000 and who are considered by the Local Government to merit this increase of pay.

- (d) Two classes of special personal allowances of Rs 200—10—250 and Rs 250—50—500, respectively, to correspond with the higher rates of pay in the Graded Service. These allowances are—
- (i) attached to specified offices, e.g., the allowance granted to the Principal of the Presidency College, Madras; and
  - (ii) granted to the senior officer of a class (whether given solely by seniority, or by seniority tempered by considerations of merit), e.g., the allowances given to senior Inspectors, senior Principals, etc.

3. In a letter of the 29th July 1897, the Government of Bengal suggested the following rule for regulating the promotion both of the officers remaining in the Graded Service and of the officers electing the Indian Service :—

No officer to whichever service he may belong will have any claim to permanent promotion, be it to class I or II of the Graded Service, or to one of the staff allowances in the Indian Educational Service, till such time as he would have had a legitimate expectation of preferment on the supposition that all the Educational Department officers, who were in the graded list on the 1st August 1896, had elected for the particular service to which he belongs.

The Government of India consulted the other Local Governments and Administrations on this proposal and also enquired how the rules had in practice been worked in other provinces.

4. After considering the replies the Governor General in Council has come to the conclusion that the principle of the rule proposed by the Government of Bengal is equitable. It would not be reasonable that an officer of the Graded Service should be granted promotion before it would in ordinary course have come to his turn because his seniors have elected to enter the Indian Service. Nor would it be reasonable that an officer of the Indian Service should be granted one of the special allowances which is given by seniority whilst there remain officers senior to him who would have been granted the allowances had they not elected to remain in the Graded Service. His Excellency in Council is therefore pleased to prescribe the general adoption of the rule proposed by the Government of Bengal, subject to the exception stated in the next paragraph.

5. In Bengal all the special allowances granted under paragraph 10 of the Resolution of the 23rd July 1896 to officers of the Indian Educational Service are ordinarily given by seniority, but as is stated in paragraph 2 above, this is not everywhere the case. In other Provinces special allowances are attached to particular appointments such as the Principalships of Colleges. Allowances which are thus attached to particular appointments should be drawn by the officers of the Indian Educational Service who hold those appointments, irrespective of whether there may be officers senior to them on the Graded List.

6. In giving effect to the orders contained in this Resolution no refunds should be ordered in cases in which excess payments may have already been made up to this date, and in order to prevent any sense of injustice from past misunderstanding, an officer on the Graded List whose position may be affected by the orders should again be given the option of electing for the Indian Educational Service.

ORDER.—Ordered, that a copy of this Resolution be circulated to Local Governments and Administrations for information and guidance and to the Department of Finance and Commerce for information.

Ordered also, that the Resolution be published in the *Supplement to the Gazette of India*.

[True Extract.]

A. H. L. FRASER,

*Offg. Secretary to the Government of India.*

SUPPLEMENT TO  
**The Gazette of India.**

No. 2.] CALCUTTA, SATURDAY, JANUARY 14, 1899.

**OFFICIAL PAPERS.**

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may be useful to the business of the Government. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

In Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the copy of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weekly Report on the state of the Season and Prospects of the Crops.**

**Madras.**—*For week ending 7th January.*—Light showers of rain fell in the southern districts and along the Malabar Coast. The water-supply is ample except in parts of the Deccan. Sowings still continue in parts. The standing crops are generally in good condition. The harvest outturn is almost normal. Pasturage is generally sufficient. Cattle are in normal condition. Prices continue to fall.

**Bombay.**—*For week ending 11th January.*—No rain fell during the week: more is still wanted for the late crops in parts of Shikarpur and Satara. The standing crops have been damaged by rats, blight and frost in parts of Sind, Ahmedabad, Bijapur and Dharwar, and are withering in parts of Khandesh, Ahmednagar and Poona. Harvesting of the early crops continues in five and sowing of the late crops in two districts. Reaping of the late crops has commenced in two districts. Cotton-picking is progressing in parts of Khandesh and Gujarat. Preparations for next season continue in five districts. Fodder is sufficient except in parts of Sind. Agricultural stock is healthy. Prices have slightly risen in five and fallen in six districts.

**Bengal.**—*For week ending 9th January.*—Rain was general during the week, but was heavier in Bihar than in other parts of the province. It has

benefited the standing spring crops, which are generally reported to be in a flourishing state. The poppy and other spring crops are also progressing satisfactorily. The rice crop is nearly all harvested and pulses are being gathered. The pressing of sugarcane continues in some districts. The fodder-supply is everywhere plentiful. Prices of common rice remain almost stationary.

**North-Western Provinces and Oudh.**—*For week ending 11th January.*—Good rain has fallen in all but a few districts in the provinces during the week. The standing crops are doing well. Supplies and fodder are plentiful and prices are practically stationary.

**Punjab.**—*For week ending 11th January.*—Slight rain has fallen in parts of the Delhi and Rawalpindi districts. Pressing of sugarcane and sowing of certain spring crops still continue in some districts. Weeding has commenced in Jullundur. The standing crops are being irrigated. The condition and prospects of the standing irrigated crops are generally reported to be good to average; but the dry land crops are for the most part in need of more rain. The rape seed crop is being damaged by caterpillars in parts of Ferozepore. Cattle are generally in good condition. Fodder is scarce in Delhi, Shahpur and parts of Lahore and Dera Ismail Khan. Prices, especially of wheat, are rising in Jullundur, falling in Dera Ismail Khan, and are unchanged elsewhere. Wheat is selling from 15½ to 21, gram 20½ to 24, barley 32, bulrush millet 19 to 26½, maize 28 to 32, great millet 26, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 10th January.*—Slight showers of rain fell in Damoh, Raipur, Bilaspur and in parts of Jubbulpore, but more is wanted in these districts and in Saugor. The weather is generally clear and in most districts very cold. The prospects of the spring crops are fair to good in all districts except Bilaspur, Saugor and Damoh, where they are poor to gloomy. Crops are reported to have been somewhat damaged by frost in Saugor, Damoh, Narsingpur and the Harsud tahsil of Nimar, and through cloudy weather in Raipur, Bhandara and Balaghat. Reaping and threshing of the autumn crops and pressing of sugarcane continue. The cheapest prices are—wheat 19, gram 32, rice 26, and *juar* 30 seers per rupee. The dearest prices are, wheat 12, gram 14, rice 11, and *juar* 20½ seers per rupee. Wheat continues to sell above the normal price in the south, east and west of the provinces, and the price of gram is still low in the northern districts.

**Burma.**—*For week ending 7th January.*—In Lower Burma reaping has been completed in several districts and is approaching completion elsewhere. In Upper Burma prospects are unchanged. The sesamum, *juar* and pea crops in Razi township, Meiktila district, have withered from want of rain. The price of paddy has risen slightly in Rangoon, Tharrawaddy, Thongwa, Tavoy, and Pakokku and considerably in Mandalay; while it has fallen considerably in Akyab and slightly in Minbu. Prices are stationary elsewhere.

**Assam.**—*For week ending 10th January.*—Rain has fallen in all districts. Harvesting of late rice, gathering of pulses, and pruning of tea are in progress. Pressing of sugarcane continues in Sylhet and Lakhimpur. The outturn of the late rice crop and prospects of pulses, mustard, and sugarcane are generally good. Prices—common rice—Silchar 15, Sylhet 16½, Dhubri 16, Gauhati 18, Tezpur, Nowgong and Dibrugarh 13, and Sibsagar 10 seers per rupee.

**Mysore and Coorg.**—*For week ending 11th January.*—**MYSORE:** The standing crops are in fair condition. Prices have slightly risen in Hassan, and fallen in Bangalore, Kolar, and Kadur. Ragi (*Eleusine coracana*) has been harvested in parts of Bangalore, Kolar, Chitaldrug, and Shimoga.

**COORG:** Harvesting of rice, threshing of ragi (*Eleusine coracana*), and coffee-picking continue. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 11th January.*—**BERAR :** The weather is cool. The winter crops are doing fairly well, but more rain is needed. Ploughing for the ensuing monsoon crops is in progress in Basim and Buldana. Fodder is sufficient, but water continues to be scarce in parts of Akola and Amraoti. Prices are normal.

**HYDERABAD:** No rain fell during the week. The autumn rice harvest is almost completed. The standing spring crops are in fair condition, but rain is wanted in a few talukas of the Aurangabad division. The fastor seed crop is being injured by insects in three talukas of the Nalgundah district, while rats are harming the spring crops in talukas Parbhani, Andgola and Mahagaon. The winter rice sowings are progressing. Prices of grain continue to fall. Prices—wheat 9, coarse rice 10½, and *jawari* 21½ seers per current sicca rupee.

**Central India.**—*For week ending 11th January.*—Rainfall during the week 1·55 in Bundelkhand. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The condition of the standing crops and their probable outturn are reported to be good. Agricultural stock and pasturage are in good condition. Prices of food-grains are steady throughout Central India. The condition of opium is good in Bhopal and fair in Malwa and Indore.

**Rajputana.**—*For week ending 11th January.*—Good rain fell in Bikanir during the week, but none elsewhere. Irrigation of the spring crops continues. The state of the crops is generally good. In Merwara some tracts have been seriously affected through failure of the rains. Twenty-two villages are reported as distressed. Cattle are generally in good condition, but are suffering from a scarcity of fodder in Merwara, and considerable numbers have migrated from Ajmer-Merwara. Fodder is also scarce in parts of Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypore, and Bikanir. Prices are rising in Jhallawar, falling in two States, and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 57 persons emigrated during the week. The numbers employed on relief works were—322 in Ajmere; 1,784 in Merwara; and 1,189 in Marwar. Prices—Ajmere 20, Beawar 22, and Marwar 14½ seers per rupee.

**Kashmir.**—*For week ending 10th January.*—The weather has been snowy and cloudy. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—Report not received.

**Nepal.**—*For week ending 7th January.*—Rainfall 0·25. The weather is very cold and cloudy. A fall of snow is reported from the interior. The price of rice is 9 seers per rupee.

T. W. HOLDERNESS,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on Saturday, December 31st, 1898.**

Weather was more or less disturbed throughout the week under review in Northern India due to the passage of two cold weather storms through that area.

The first of these appeared in South-West Rajputana at the commencement of the week and marching eastwards across Northern India and Upper Burma during the next four days passed out of the Indian area on the 29th. It was throughout its existence a very diffused and ill-defined disturbance but occasioned numerous light showers in the North-Western Provinces, some local showers in the South-East and Submontane Punjab, Chota Nagpur, East Bengal and Assam and some snow in the Kashmir and Punjab Himalayas. The second disturbance entered Sind from the west on the 29th and advancing eastwards during the succeeding 24 hours gave rise to a secondary depression of moderate intensity in the East Punjab. The secondary depression filled up as quickly as it formed during the day, whilst the primary depression continued to drift eastwards and lay over the eastern districts of the Gangetic Plain at 8 A.M. of the 31st. The double disturbance gave light to moderate rain to the greater part of the Punjab and the neighbouring districts of the North-Western Provinces and moderate to heavy snow in the North-West Himalayas down to about 6,000 feet, chiefly on the 30th and 31st. Weather was throughout the week fine in Burma, Sind, Rajputana, Bombay, the Central Provinces, Berar, North Madras, the Deccan and Mysore. It was on the other hand unusually unsettled with moderate to heavy rain in Ceylon, South Madras and the South Coromandel Coast districts due to a disturbance of a somewhat unusual character. This disturbance originated in the extreme south-west of the Bay to the east of Ceylon during the first three days of the week and marching westwards on the 28th passed into the south-east of the Arabian Sea on the 29th. The disturbance was, it may be noted, similar in general character to that of December 1895.

**Daily Summary.—Sunday, December 25th.**—Pressure had given way briskly to rapidly in Rajputana and the adjoining districts and a shallow depression lay over South-West Rajputana. Over the remainder of the Indian area the barometric changes were small and unimportant. Pressure was everywhere below the normal. The deficiency was moderate to considerable over the Peninsula and Northern India and was greatest in the area of depression where it slightly exceeded a tenth of an inch in amount. Winds indicated a tendency to cyclonic circulation in Northern India and were light to moderate. Moderate north-easterly winds prevailed on the Coromandel Coast and light unsteady airs and calms in Burma. Skies were overcast in Kashmir and Baluchistan, thickly clouded in the southern half of the Peninsula and moderately clouded in Rajputana, Sind and the submontane and western districts of the Punjab. Moderate to heavy rain had occurred in the Coromandel Coast districts and East Ceylon. Feeble snow storms were in progress in Kashmir. The temperature conditions were practically normal over the greater part of Northern India. Temperature was on the other hand more or less considerably above the normal in the Peninsula and Burma. The excess was greatest in Berar (5°) and the Central Provinces (4°). The day temperature was in moderate excess and the night temperature in large excess in the area of increased temperature.

**Monday, December 26th.**—Pressure had increased to a moderate extent in North Bombay and South-West Rajputana and had given way briskly in the Gangetic Plain and the neighbouring districts of Central India and the Central Provinces. The depression which was passing through South-West Rajputana on the previous day had advanced into East Rajputana and the south-western districts of the North-Western Provinces. It was, however, even more

diffused and ill-defined than on the previous day. Light rain had occurred in the central and western districts of the North-Western Provinces and the South-East Punjab and light rain or snow in the adjacent hill districts and in Kashmir. The barometric changes in Southern India, Ceylon, and the neighbouring sea area were such as tended to accentuate the deficiency in that area. Pressure was now a tenth of an inch in defect over that area and moderate to strong east to north-east winds obtained on the Coromandel Coast. Moderate to heavy rain had again fallen in East Ceylon and the coast districts of Southern India and light rain in South Madras. A brisk reduction of temperature had occurred in the hill districts of Upper India and temperature was now in considerable to large defect in that area due chiefly to very low night temperature. Temperature had on the other hand increased in Central India, Berar, the Central Provinces and the Deccan, and was during the previous 24 hours from  $3^{\circ}$  to  $9^{\circ}$  above the normal in that area.

*Tuesday, December 27th.*—Pressure had recovered briskly in Rajputana, Central India and Kathiawar and was practically stationary over the remainder of India and Burma. The diffused disturbance which was passing through East Rajputana and the adjacent districts of the North-Western Provinces on the previous day had advanced eastwards into Bihar and almost completely filled up. Pressure had given way very slightly in Baluchistan due to the influence of a cold weather depression advancing from the west. Pressure had again diminished slightly in Ceylon and the south-west of the Bay, thus still further emphasizing the deficiency in that area. Steep gradients obtained over the southern half of the Bay. Winds continued moderate to strong on the Madras Coast. Skies were more or less clouded in all districts except Lower and Central Burma, Bengal, Rajputana and the greater part of the Punjab. Very heavy rain had been received in East Ceylon, moderately heavy rain in the Coromandel Coast districts and light rain in Malabar, Mysore and South Madras. Numerous light showers had again occurred in the Gangetic Plain and the eastern districts of Central India. Temperature had fallen rapidly in Rajputana, Gujarat, Central India, the west coast and Southern India, and increased briskly in Bihar. Elsewhere the temperature changes were unimportant.

*Wednesday, December 28th.*—Pressure had fallen briskly in Sind, the South-West Punjab and East Baluchistan and was in considerable to large defect. The depression approaching from the west on the preceding day was now crossing the north-west frontier into Sind. Pressure had fallen slightly in Bengal and the feeble residual disturbance in Bihar at 8 A. M. of the 27th had passed into Lower and East Bengal. A slight fall of the barometer had occurred also in Southern India and Ceylon and pressure was from a tenth to a seventh of an inch in defect of the normal in that area. Winds were shifting round to cyclonic directions in Sind and the South-West Punjab but were light and below their normal strength. Winds were exceedingly light at Cherat and Murree. Winds had backed to north on the Coromandel Coast between Cocanada and Cuddalore and were somewhat weaker than for some days past. Winds were very strong at Negapatam where their velocity during the previous 24 hours averaged 20 miles per hour. Moderate rain continued to be received in East Ceylon and the South Coromandel Coast districts and some showers in South Madras. The feeble disturbance in North-Eastern India had occasioned some local thunder-showers in that area. The temperature conditions were very unsteady and abnormal. The mean temperature of the previous 24 hours was  $6^{\circ}$  above the normal in Baluchistan and Orissa,  $5^{\circ}$  in Sind and the Madras Deccan,  $4^{\circ}$  in Chota Nagpur, and  $3^{\circ}$  in Bengal, Bihar, the Central Provinces, Mysore and the Madras Coast due to very high night temperature. It was, on the other hand, in large defect in the hill districts of Upper India, in considerable defect in Gujarat and in moderate defect in Rajputana and Central India.

*Thursday, December 29th.*—Pressure had decreased briskly to rapidly in Sind, Rajputana and the Punjab, and a well marked depression in which pressure was upwards of a fifth of an inch below the normal lay over Sind. Pressure had increased slightly to briskly in Bengal and the feeble residual disturbance in that area on the 28th was transferred into Upper Burma. It was, however, very faintly indicated in the chart. Pressure had increased slightly in Ceylon and the south-west of the Bay and the area of deficient pressure and disturbance in the south-west of the Bay on the preceding days was drifting

westwards and filling up. Winds were cyclonic in Sind, Rajputana and the Punjab and were blowing very strongly in the hill districts of the Punjab. Winds had fallen off in Southern India and were more northerly than usual at the interior stations. Skies were generally overcast in Baluchistan and north-western and Southern India. The depression in Sind had occasioned light rain in the North Punjab and some showers in the West and Central Punjab and light to moderate snow in the Punjab and Kashmir Himalayas. Light to moderate rain had again been received in South Madras and Ceylon and some local thunder showers had also occurred in Bengal and Assam. The temperature conditions continued very abnormal over a large part of the country. Temperature averaged  $10^{\circ}$  higher than usual in Sind,  $5^{\circ}$  in Orissa and the Madras Decdan and  $4^{\circ}$  in Mysore, and was from  $4^{\circ}$  to  $7^{\circ}$  in defect in the hill districts of Upper India and  $2^{\circ}$  in defect in Central India and the Central Provinces.

*Friday, December 30th.*—Pressure had fallen rapidly in East and Central Rajputana, Bundelkhand, the South-East Punjab and the neighbouring districts of the North-Western Provinces. It had, on the other hand, increased briskly in Baluchistan and Sind. The Sind depression had marched eastwards into the eastern and central districts of Rajputana and had given rise to a secondary depression over the South-East Punjab. Pressure was largely in defect over North-Western and Central India, the deficiency being largest in the area of the double disturbance where it averaged about two-tenths of an inch in amount. The pressure changes were unimportant over the remainder of the country with the exception of Ceylon where the barometer had continued to rise to a slight extent during the previous 24 hours. Pressure was more or less considerably in defect in the Peninsula. The deficiency was greatest in the Malabar Coast districts due to the continued existence of the disturbed conditions which have passed into the south-east of the Arabian Sea from the Bay. Winds in North-Western and Central India were under the influence of the depression and were of moderate intensity. Skies were overcast in the South-East Punjab, the western districts of the North-Western Provinces and the North-West Himalayas and cloud was extending rapidly eastwards to the North-Western Provinces. The double disturbance had given general light to moderate rain to the East and South-East Punjab and the neighbouring districts of the North-Western Provinces and some showers to West Rajputana. Moderate snow had fallen in the hill districts of Upper India. The snow line had descended to about 6,000 feet in the Simla hills. Weather continued feebly unsettled in South Madras and Ceylon and some showers had again been received in that area. A very large reduction of temperature had occurred in Baluchistan and Upper India, and the mean temperature of the previous 24 hours was from  $7^{\circ}$  to  $16^{\circ}$  below the normal in the hill districts of Upper India and  $3^{\circ}$  below in Baluchistan and the Punjab.

*Saturday, December 31st.*—Pressure had increased as rapidly as it had fallen on the previous day in North-Western India and the secondary depression in the South-East Punjab had completely filled up. The primary depression had advanced from East and Central Rajputana to the eastern districts of the Gangetic Plain and occasioned a brisk to rapid fall of the barometer in Bihar, Chota Nagpur and the neighbouring districts of the North-Western and Central Provinces. Pressure was about two-tenths of an inch in defect of the normal at the centre and the depression was hence of the same intensity as on the previous day. Pressure had again increased slightly in the southern half of the Peninsula and Ceylon, but was still a tenth of an inch below the normal on the Malabar Coast, thus indicating that the slight disturbance in the south-east of the Arabian Sea had not yet completely passed away. Winds were irregularly cyclonic in North-Eastern India. Light airs and calms obtained on the Ceylon and Malabar Coasts. Moderate to heavy snow had fallen in the Simla and Kumaon hills and light to moderate rain in the South-East Punjab and the adjacent districts of the North-Western Provinces. Weather continued showery in Ceylon and the extreme south of Madras. Temperature had decreased very rapidly in Baluchistan and North-Western India, the fall at several stations ranging between  $7^{\circ}$  and  $11^{\circ}$ . The mean temperature of the previous 24 hours was  $14^{\circ}$  below the normal at Simla, Chakrata, Mussoorie and Ranikhet,  $12^{\circ}$  at Murree and  $11^{\circ}$  at Quetta. It averaged  $5^{\circ}$  in defect in the Punjab and  $3^{\circ}$  in Rajputana and Sind due to very low day temperature. Temperature had, on the other hand, increased rapidly in

front and to the south of the advancing depression and was during the past day  $5^{\circ}$  above the normal in Berar and the Central Provinces,  $4^{\circ}$  in the Madras Deccan and Madras Coast and  $3^{\circ}$  above in Mysore, the Bombay Deccan, Central India, the Gangetic Plain and Orissa. The increased temperature in these areas was due chiefly to higher night temperature than usual. The lowest night temperature recorded in the plains was  $32^{\circ}$  at Rawalpindi, Peshawar and Sirsa and in the hills zero at Minimarg.

Temperature was more or less in excess of the normal throughout the week in Orissa, the Madras Deccan, the Madras Coast, Mysore and the west coast. The excess was, on the whole, greatest in the first two areas where it averaged  $4^{\circ}$  for the whole week. Temperature was very unsteady over the remainder of the country and varied very irregularly from the normal. This was specially the case in Baluchistan and North-Western and Central India where the temperature conditions were determined by the disturbances of the week. The second cold weather storm of the week was preceded by a warm wave of moderate intensity and followed by a cool wave of great severity. The crest of the warm wave was in Baluchistan on the 28th, Sind on the 29th, Rajputana on the 30th and the North-Western Provinces on the 31st. The cold wave in the rear of the storm appeared in Baluchistan and the West Punjab on the 30th and spread rapidly eastwards over the whole of North-Western India during the next 24 hours causing a reduction of temperature by amounts averaging  $9^{\circ}$  in Rajputana,  $7^{\circ}$  in Baluchistan and  $4^{\circ}$  in Sind and Gujarat. On the mean of the whole week temperature was normal over nearly the whole of Northern, Central and Southern India and slightly above the normal in Burma.

The following table gives temperature variation data for the week :—

PROVINCE.	VARIATION FROM NORMAL OF MEAN TEMPERATURE OF 24 HOURS PRECEDING 8 A.M. OF							Mean variation of week.
	25th.	26th.	27th.	28th.	29th.	30th.	31st.	
Burma . . . . .	+3.2	+2.2	+2.0	+1.6	+1.7	+2.2	-0.1	+1.8
Assam . . . . .	-0.4	-0.8	-0.7	+1.3	-0.9	-4.0	-2.9	-1.2

South India . . . . .	+2.0	+0.3	-3.0	-0.3	+1.4	+0.3	-1.1	-0.1
Mean for whole of India . . . . .	+2.2	+2.4	+1.8	+1.7	+1.4	+0.8	+0.9	+1.6

**Rain.**—A disturbance of a somewhat unusual character affected Ceylon and Southern-India during the week and gave excessive rain to East-Coast South and Madras South, moderate rain to Madras-South-Central and light rain to East-Coast Central and Malabar. The rainfall of the week was more or less above the normal in these areas, the excess being as much as 5.21 inches in East-Coast South which usually obtains only 0.67 inch of rain during the period and 2.46 inches in Madras South, the normal rainfall in which area averages only 0.47 inch.

The character of this remarkable downpour is shown more fully by the following data for four districts :—

DISTRICT.	Average actual rainfall of week.	Average normal rainfall of week.	Variation from normal.
	Inches.	Inches.	Inches.
Tanjore . . . . .	9'45	1'04	+8'41
South Arcot (Cuddalore) . . . . .	6'85	0'61	+6'27
Trichinopoly . . . . .	5'54	0'64	+4'90
Chingleput (Madras) . . . . .	5'39	0'49	+4'90

The weather in Northern India was determined solely by the passage of two cold weather storms across that area. The first of these which was a very feeble disturbance gave favourable showers to the North-West Provinces and the South-East and Submontane Punjab and some local showers to Chota Nagpur on the 26th and 27th, and to Assam and East Bengal on the 28th and 29th. The second storm which was of moderate intensity appeared in Sind on the 29th, and while travelling eastwards through Rajputana *during the day* gave rise to a subsidiary depression in the Punjab. The double disturbance occasioned light to moderate rain over the Punjab and the adjoining submontane districts of the North-Western Provinces and moderate to heavy snow in the North-West Himalayas between the 29th and 31st. Daily falls exceeding one inch in amount were registered at several stations in the plains, the largest being 1'34 inches at Gurdaspur on the 30th. The snowfall due to the disturbance was heaviest at Dharmasala where it was equivalent to 3'75 inches of rain.

The concluding rainfall statement shows that the rainfall of the week was abundant over the Punjab (excepting the western districts) and the west submontane and hill districts of the North-Western Provinces and light though more or less above the normal over nearly the whole of North-Eastern India.

The most noteworthy totals recorded during the week at individual rain-gauge stations were as follows :—

Nannilam (Tanjore) . . . . .	15'12 inches.
Jayankondasolapuram (Trichinopoly) . . . . .	13'42 "
South Arcot . . . . .	11'25 "
Kulasegarapatnam (Tinnevely) . . . . .	7'03 "
Dera (Kangra) . . . . .	3'81 "
Murree (Rawalpindi) . . . . .	3'00 "
Lansdowne (Garhwal) . . . . .	2'86 "
Una (Hoshiarpur) . . . . .	2'63 "

The chief features of the distribution of the rainfall period from 16th October to 31st December relatively to the normal may be summarized as follows :—

- (1) Practically no rain throughout the period in Deltaic and Central Bengal, Bihar, the eastern submontane districts of the North-Western Provinces, the West Punjab, the Eastern and Western districts of the Central Provinces, Kathiawar and Sind.
- (2) The rainfall of the period was practically normal, i.e., varied by less than 20 per cent. from the normal in Assam, Brahmaputra, North-Western Provinces (Central), Coorg, West Rajputana, Madras Central and East Coast Central.
- (3) It was in slight to moderate excess in Malabar and South Madras and in considerable to large excess in the western hill and west submontane districts of the North-Western Provinces, the South-East South and Submontane Punjab, the Punjab Hills, Mysore, Madras South Central and East Coast South.
- (4) It was in slight to moderate defect in North Oudh, Konkan and East Rajputana.
- (5) It was in large and marked defect over the whole of Burma, Bengal, Assam (excepting Assam Brahmaputra), South Oudh, the North-Western Provinces East and East Submontane, the Central North and West Punjab, Bombay Deccan, Khandesh, the Central Provinces, Berar, North Bombay, Central India East, East Coast North and Hyderabad South.

It may be noted that the rainfall in the Punjab occurred chiefly during the week under review.

GOVERNMENT OF INDIA.  
FINANCE AND COMMERCE DEPARTMENT.  
**SEPARATE REVENUE.**  
Post Office.

**REVIEW OF THE ANNUAL REPORT ON THE POST OFFICE OF INDIA FOR  
1897-98.**

No. 312 S. R., dated Calcutta, the 12th January 1899.

RESOLUTION—By the Government of India, Finance and Commerce Department.

**READ—**

Report on the Post Office of India for the year 1897-98.

**RESOLUTION.**—The continuous and steady progress shown in previous years in the operations of the Post Office was more than maintained during the year under review, although the year was one of special strain and unusual demands upon the resources of the Department. The interruptions caused by earthquake and cyclone in Bengal, the need for exceptional and important arrangements in connection with the military operations on the north-western frontier, and the effects of famine and plague experienced by this as by other Departments of Government, all added special features to the history of the year. The requirements of modern Postal Administration were met by the enactment of a new Post Office Act which did not, however, come into force until 1st July 1898, and efforts were made in various directions to improve and perfect the existing organisation. In the working of the Inland Post the following were noticeable features :—

- (1) The improvement of postal facilities in rural districts.
- (2) The extension of the Postal Life Insurance scheme to all Government servants whose pay is audited in Civil or Public Works Account offices, and to all members of establishments of the Military Department subject to civil rules, whose pay is audited by Military Account offices.
- (3) The further extension in the North-Western Provinces and Oudh of the arrangements for the sale of quinine through the agency of the Post Office.
- (4) The experimental payment by money orders in the Punjab of petty sums as compensation for land taken up under the Land Acquisition Act.
- (5) The use of money orders for the payment of Municipal refunds in Amritsar.
- (6) The introduction by the Government of the Punjab of a scheme to encourage the use of the Post Office Savings Banks by the cultivating class.
- (7) The disuse of receipt forms to be filled up by the senders of ordinary registered parcels, and the introduction of an arrangement under which, for half an anna, a certificate of posting may be obtained for any number of unregistered parcels or value-payable unregistered packets not exceeding six.
- (8) Improvements in the mail service between Bombay and Calcutta via Nagpur and Jubbulpore.

- (9) The introduction experimentally into Calcutta of a scheme of "continuous delivery" in selected parts of the city served by postmen attached to the General Post Office.

2. In the administration of the Foreign Post, the principal events were as follows:—

- (1) The meeting of the International Postal Congress at Washington, and the participation of India in the Union Parcel Post Convention.
- (2) The conclusion of a new contract with the Peninsular and Oriental Steam Navigation Company with effect from the 1st February 1898, for a combined Eastern and Australian mail service under which the time in transit from London to Bombay has been materially reduced.
- (3) Arrangements for the exchange of postal parcels between India and the United Kingdom *via* Italy and France in addition to the exchange by the sea route *via* Gibraltar.
- (4) The direct exchange of postal parcels, on the basis of the Union system, between India and France and Germany.
- (5) The extension of the foreign parcel post to Western Australia, New Zealand, German South-West Africa, Peru and the State of Honduras.
- (6) Arrangements for the exchange of postal parcels weekly with the Colonies of New South Wales, South Australia, Victoria, and Tasmania by the route *via* Tutuorin and Colombo, in place of the former fortnightly exchanges.
- (7) The introduction of a weekly parcel post service with Queensland in place of the four-weekly service previously in existence, *via* Bombay, Aden, and Torres Straits.
- (8) The re-opening of the parcel post with Egypt and certain places served through Egypt, and with Gibraltar and Tangiers, which had been temporarily interrupted by quarantine restrictions.
- (9) The extension of the foreign money order system to the Niger Coast Protectorate and Rhodesia.

3. The transactions of the Imperial Post Office during the year under review, in comparison with those of the previous year, are shown below:—

	1896-97.	1897-98.	Percentage of increase + or decrease —.
Number of Imperial Post Offices	9,949	10,263	+3.16
Number of letter-boxes (in addition to those at Post Offices)	16,952	17,721	+4.54
Number of letters and post-cards issued for delivery	386,950,269	409,797,236	+5.86
Number of newspapers issued for delivery	29,778,291	31,691,494	+7.09
Number of registered parcels issued for delivery	2,555,209	2,767,632	+8.31
Number of unregistered parcels issued for delivery	153,360	166,851	+8.77
Number of packets issued for delivery	19,341,398	21,364,415	+10.46
Number of letters and parcels insured	298,228	326,645	+9.53
Number of inland money orders issued	10,947,571	11,664,350	+6.55
Value of inland money orders issued	£ 21,97,29,206	24,23,27,096	+10.29
Commission realised on inland money orders issued	£ 27,92,116	30,57,199	+9.49
Number of telegraphic money orders issued	145,849	156,075	+7.01
Value of telegraphic money orders issued	£ 1,73,27,359	1,88,59,969	+8.80

		1896-97.	1897-98.	Percentage of increase + or decrease —.
Commission realised on telegraphic money orders issued	R	1,78,801	1,95,274	+ 9.53
Number of foreign money orders issued from India		59,854	68,350	+ 6.20
Value of foreign money orders issued from India	£	206,507	224,346	+ 8.64
Number of foreign money orders paid in India		85,036	89,743	+ 13.43
Value of foreign money orders paid in India	£	366,596	421,024	+ 15.36
Number of articles sent under the value-payable system		2,009,092	2,189,485	+ 8.93
Value declared for realisation under the value-payable system	R	2,30,39,800	2,56,62,825	+ 11.38
Commission realised on articles sent under the value-payable system	R	4,11,839	4,56,613	+ 10.77
<i>Mileage of Imperial mail lines.</i>				
Railways		19,410	20,248	+ 4.49
Mail carts, horses, camels, etc.		5,414	5,263	— 2.79
Bannars and boats		47,444	48,318	+ 1.84
Steamer services, sea and river		13,751	14,555	+ 8.03

4. There was an increase of 28 millions in the number of postal articles (excluding money orders) issued for delivery during the year, contributed to by increases of over 12½ millions under post-cards, of about 8½ millions in the case of paid letters, and of over 2 millions each under the head of newspapers and book and pattern packets. The percentage of increase in all articles taken together, was largest in the Punjab circle and is accounted for by the large bodies of troops collected there during the year. The popularity of the post-card continues to increase, and, as in last year, in the Bengal, Bombay, the Punjab, and Eastern Bengal circles, the number of post-cards exceeded the number of paid letters. The total number of unpaid letters was more than 29½ millions, the proportion being highest in Burma and Behar. The total number of letters registered during the year was more than 9½ millions, of which nearly a quarter were posted in Madras. Notwithstanding the increase of nearly 30 per cent in the number of unregistered parcels sent under the system newly introduced in 1895-96, the total number of parcels registered during the year was 8.31 per cent in excess of the number during the preceding year. The number of postal articles issued (excluding money orders) was 1.63 per head of the general and 38.58 per head of the literate population in comparison with 1.54 and 36.39 per head, respectively, during 1896-97. The figures of foreign correspondence with the United Kingdom show an increase of 31.73 per cent in the newspaper and packet mails received from home, which is in continuation of a similar increase in the previous year. There was also an increase of 13.36 per cent in the number of letters and post-cards received. These latter statistics are based on the weights recorded twice during the year, and in the absence of any special reason for the increase, the Director General doubts if the periods taken for the purposes of calculation were representative of the rest of the year.

5. The total number of postal articles (including money orders) received for delivery, was 466,643,617, the number actually delivered being 462,122,844 or 99.03 per cent as compared with 99.06 in the previous year. The number of articles ultimately found to be undisposable was 1,092,724 or 0.2 per cent of the aggregate number given out for delivery. From a special enumeration made for three months in the Bengal Dead Letter Office, it appeared that in the Bengal, Eastern Bengal and Assam Circles, 3,188 letters, 4,656 newspapers, and 284 packets were posted without any address at all, while in articles opened in the Dead Letter Offices of Bengal, Bombay,

Madras, the North-Western Provinces and Oudh, and the Punjab, cheques, notes, bills and hundis, etc., were found to the total value of Rs2,55,435 and Rs610, the greater part of which was successfully returned.

6. Under the head of "Money orders" the entire transactions of the year (comprising inland, Native State and foreign money orders) continue to show a considerable increase, as noted below:—

	1896-97.	1897-98.	Percentage of increase + or decrease —.
Number of orders issued .	11,069,726	11,795,041	+ 6.56
Value of orders issued . . B	25,50,41,069	24,79,45,455	+ 10.18
Commission realised on money orders issued . . B	58,40,581	81,09,946	+ 9.48
Number of orders paid .	11,144,141	11,875,905	+ 6.57
Value of orders paid . . B	22,63,76,091	25,26,88,159	+ 10.65

The inland money order business shows a continuous and steady progress, and the transactions (excluding transactions in Native States) in the first complete year after its transfer from the Treasuries to the Post Office and during the last two years, compare as follows:—

	1896-97.	1897-98.	1898-99.
Number of orders . .	1,601,174	10,947,571	11,864,350
Value of orders . . . B	4,67,08,580	21,97,28,206	24,28,97,096
Commission realised on orders . . . . . B	5,35,976	27,92,116	30,57,199

The average value of an inland money order has for some years remained practically stationary at rather less than Rs21. The transactions in the Lower Provinces of Bengal continue to be on a larger scale than in any other circle and in the year under report comprised more than one-third of the total for the whole of India. The issue of revenue money orders in the North-Western Provinces and Oudh recovered, both in number and value, from the check caused during the previous year by the prevalence of famine, but in the Central Provinces famine continued to interfere with the number of such orders, although there was an increase in their value. The system of remitting miscellaneous Government dues through the post continued to make progress in Bengal, the North-Western Provinces and Oudh, and the Punjab. There was a considerable improvement in the number of rent money orders issued in the North-Western Provinces and Oudh, but there was a slight falling off in the Central Provinces both in number and value, while in Bengal there was a slight increase in number accompanied by a decline in the aggregate value.

Particulars of the money order transactions in Native States during the last two years are given below:—

	1896-97.	1897-98.	Increase + or decrease —.
Number of orders issued in Native States . .	80,935	76,043	— 4,892
Value of orders issued in Native States . . . B	19,28,527	22,67,584	+ 3,38,997
Number of orders paid in Native States . .	44,830	47,709	+ 3,079
Value of orders paid in Native States . . . B	12,66,067	13,80,175	+ 94,118

Compared with the figures for 1896-97 the transactions of the year under review show an increase under each head, except in the number of orders issued in Native States which decreased by 4,892.

The transactions in telegraphic money orders are shown below:—

	1896-97.	1897-98.	Increase + Decrease —.
Number of orders issued .	145,849	156,076	+ 10,226
Value of orders issued . . B	1,73,27,652	1,68,62,960	+ 15,25,610
Commission realised on orders issued . . . B	1,78,301	1,95,274	+ 16,973
Number of orders paid .	136,583	155,000	+ 18,417
Value of orders paid . . B	1,60,28,857	1,97,10,943	+ 36,82,686

There was a large increase both in the number and value of telegraphic money orders issued. It occurred principally in Bombay and is said to have been due to some extent to telegraphic remittances despatched by dealers for the purchase of grain for the famine-stricken districts in the Deccan; this method of remittance was also more frequently resorted to by emigrant labourers and others for the relief of urgent distress in their homes.

The number of sterling money orders issued rose from 59,654 in 1896-97 to 63,350 in 1897-98, and their value from £206,507 to £224,346, while in the case of sterling money orders received for payment in India, there was an increase in number from 85,036 in 1896-97 to 89,748 during the year under report, and in value from £186,896 to £221,024. The average value of a money order issued from India during 1897-98 was £3-10-10 as compared with £3-9-8 during the previous year, and that of a money order paid in India £5-11-3 against £5-6-8 in 1896-97.

As regards the money order transactions with foreign countries with which the Indian Post Office has exchanges based on Indian currency, the most remarkable increase occurred in the orders issued in British East Africa payable in India, which rose from about 4½ lakhs in 1896-97 to over 7½ lakhs in 1897-98. The total payments made by India on account of money orders advised by foreign countries were more than six times the amount of the issues by India on the same countries. The telegraphic money order transactions between India and Ceylon showed a considerable further development in both directions, there being an increase of 233 in the number and of Rs. 348 in the value of telegraphic money orders issued by India on Ceylon, and of 4,362 in the number and Rs. 93,608 in the value of orders issued by Ceylon on India.

7. The operations of the Post Office Savings Banks during the last two years are compared below:—

	1896-97.	1897-98.	Percentage of increase + or decrease —.
Number of banks . . .	6,420	6,290	—2·02
Number of accounts opened during the year . . .	208,140	175,946	—15·46
Number of accounts closed during the year . . .	148,712	166,979	+6·83
Number of accounts at the close of the year . .	713,820	730,387	+2·39
Amount of deposits during the year . . .	R 5,66,10,981	4,36,52,416*	—22·69
Amount of withdrawals during the year . . .	R 5,36,54,634	4,99,75,566*	—6·85
Amount of interest which accrued during the year .	R 30,12,992	28,03,669	—6·94
Amount of balance at the close of the year . . .	R 9,63,92,411	9,28,72,978	—3·65
Average balance of each account . . . . .	R 135·13	127·15	—5·90

There were several noticeable features in the transactions of the year of which however no special explanation is furnished; fewer accounts were opened and a less amount deposited, while for the first time since 1889-90, the closing balance was reduced below the figure of the previous year owing to the amount withdrawn being in excess of the amount deposited by more than the interest for the year. The late famine has no doubt been the chief factor in these results. Out of 730,387 active accounts at the close of the year, 36,386 were security deposit accounts, 5,735 public accounts, and 173 regimental and other conjoint accounts. Of the remaining 688,098 private accounts, with an aggregate credit of over 840 lakhs, 89,596 with a balance of over 100 lakhs were held on behalf of minors by their parents, relatives and guardians. Of the total number of accounts, 91·14 per cent were held by natives of the country, while considering the depositors according to their occupations, the largest numbers were under the heads of the professional and domestic classes and those of no occupation or with incomes derived from others or from their own property. The number of agricultural depositors increased by 1·07 per cent, but their total number is still small.

\* Inclusive of R1,14,62,868 balance of accounts transferred from one Post Office to another.

8. The total number of letters and parcels insured during the year amounted to 326,645 in comparison with 298,228 in the previous year, and the total insured value to Rs10,00,62,500 against Rs8,81,85,426; the insurance fees increased from Rs2,34,945, during the previous year, to Rs2,65,550 during the period under report. The largest increase in the number of parcels insured occurred in Bombay and is attributed in a great measure to the panic caused by the plague, during which many of the Marwari and other foreign traders made use of the postal insurance as the cheapest and safest method of despatching their valuables to their homes. Claims for compensation on account of the loss of insured articles or the abstraction of their contents numbered 34 as against 54 in the preceding year. Of those 24 were admitted, of which in 12, the loss was caused by fraud or negligence on the part of the servants of the Post Office; 6 claims arose out of losses by highway robbery of mails in British territory, and 6 claims were on account of insured articles lost in the Rivers Steam Navigation Company's steamer *Lookit* which sank with all the mails on board. The claims admitted involved the payment of Rs7,045 or 2.65 per cent of the total amount realised from insurance fees, as compared with a percentage of 4.57 in the previous year. In the case of one claim which was rejected, the sender was prosecuted and convicted for making a false declaration that the enclosures, consisting of a few old letters, were currency notes.

9. The value-payable business which has practically doubled since 1890-91 continued to develop during the year under report, the total number of articles so sent having risen from 2,009,092, during 1896-97, to 2,180,465, the total amount specified for recovery from the addressees from Rs2,30,39,800 to Rs2,56,62,825, and the commission realised from Rs4,11,839 to Rs4,56,613. The increase was thus 8.53 per cent in the number of articles, 11.38 per cent in the value specified for recovery, and 10.87 per cent in the commission realised. As formerly, the bulk of the business (about two-fifths) was transacted in the Bengal Circle, or practically in Calcutta, in which 779,808 out of a total of 818,602 articles were posted, and 88 lakhs out of the sum of over 92½ lakhs of rupees recovered from the addressees were payable. The value-payable business with Ceylon continued to show steady progress. The number of value-payable articles despatched from India to Ceylon rose from 21,713 to 28,697 in 1897-98, and their value from Rs1,98,071 to Rs2,07,000.

10. The number of complaints by the public against the Post Office showed an increase of 1.21 per cent. The proportion of cases in which the complaints were found to be well-founded was only 35.02 per cent of the whole number, while the percentage of complaints held to be groundless was 38.58. In the remaining cases investigations were either pending or had proved inconclusive.

11. As in previous years, the transactions connected with the receipt of salt revenue through the agency of the Post Office during the year were of small importance, the amount of revenue realised on this account having been Rs1,56,050 only on 57,786 maunds of salt, against Rs1,30,372 on 51,305 maunds of salt in the preceding year.

12. The total number of pensioners of the Native Army paid during the year in the Punjab was 24,713 against 24,112 in 1896-97, and the amount paid to them Rs17,82,147 in comparison with Rs17,46,833 in the preceding year.

13. The financial results of the working of the Post Office during the year under review are compared below with those of the previous two years:—

	1896-98. R.	1896-97. R.	1897-98. R.
Revenue . . . .	1,71,29,819	1,78,84,737	1,87,84,663
Expenditure . . . .	1,64,38,167	1,69,81,561	1,72,95,858
+ Surplus or — Deficit .	+ 6,96,452	+ 8,53,176	+ 14,88,805

Excluding, however, from the figures of expenditure the District Post charges (other than in Baluchistan) which are provided for by local cesses (Rs12,04,904, Rs12,75,420 and Rs18,38,110 in the respective years), and including the indirect charges detailed in section XI of the Report (Rs8,11,615, Rs8,00,918, and Rs9,74,242 in the respective years), the resulting surpluses are Rs10,89,741, Rs13,27,678 and Rs19,62,673. As remarked by the Director General,

considering the prevalence of plague and famine during the year, the continued progress in the Department is the more noticeable.

14. As already mentioned, a new Post Office Act was introduced and passed by the Legislature during the year, although it did not actually come into force until the 1st July 1898. Experience had shown the necessity of giving further legal protection to the Post Office, and more extensive powers to enable its officers to deal with different abuses. The course of English postal legislation has suggested the need for new penalties, and it was desirable to bring within the provisions of the law, the different new schemes, such as postal insurance and the value-payable and money order systems, which, having been introduced since the previous Postal Act of 1863, had hitherto remained outside its scope. Enabling powers were conferred by the new Act for dealing by rule with numerous questions of postal practice and procedure affecting the public, and the opportunity was taken to recast and re-arrange much of the original matter of the law.

15. The Department, of the work of which the far-reaching nature and the continuous development are amply illustrated in the Report, was ably administered throughout the year by Mr. Fanshawe, to whom the acknowledgments of the Government are due, as they are due also to Mr. H. M. Kisch for his services as delegate for India at the Washington Postal Congress. The Governor General in Council notices with satisfaction the names of the following officers as having rendered especially good service during the year:—

Messrs. P. Sheridan, J. Owens, E. A. Doran; Bai Daulat Ram Bahadur, C.I.E.; Mr. W. T. Van Someren, C.I.E.; Babu Praphulla Chandra Banerji; Messrs. H. C. Sheridan, A. Bean, L. Byrne, C. J. Stowell, A. B. Thompson, A. D. Appleby, N. M. Cama, G. O. Hart; Lala Bhagwandas and Babu Rash Bihari Dass.

The valuable services rendered by the Department in connection with the late disturbances on the north-western frontier have already been separately acknowledged.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director General of the Post Office of India, and that the Report and the Resolution be published in the *Gazette of India*.

H. H. RISLEY,

*Offg. Secy. to the Govt. of India.*

# ANNUAL REPORT

ON

## THE POST OFFICE OF INDIA

FOR THE YEAR

### 1897-98.

No. 216 C., dated the 31st October 1898.

From—A. U. FANSHAW, Esq., C. S. I., Director General of the Post Office of India,  
To—The Secretary to the Government of India, Department of Finance and Commerce.

I have the honour to submit the Annual Report on the Post Office of India for the official year 1897-98.

2. The administration of the Department was in my hands throughout the year.

3. The year has been one of special work and of special demands upon the resources of the Department in various directions. It was remarkable for the convulsions of nature in the east of the Peninsula, which seriously affected postal arrangements. The earthquake in Assam and Bengal of the 12th June 1897 was followed by the great cyclone at Chittagong on the 24th October 1897. The first-named disaster destroyed large portions of the railway line, causing prolonged interruptions in traffic and necessitating the rapid organization of other means of communication under the greatest difficulties. On both occasions extensive damage was done to the buildings of the Department.

The postal arrangements for the important military operations on the North-West Frontier involved exceptional labour and responsibility, and constituted a severe tax on the powers of organization of the postal authorities in the Punjab. They have been separately reported on, and the success in carrying them out has already been recognized by Government.

During the course of the year, a new Post Office Act was introduced and passed by the Legislature though it did not actually come into force until the 1st July 1898. The old Act was defective in many ways and modern postal administration had quite outgrown its provisions. A large amount of personal work devolved upon me in the preparation of this Act, and in dealing with it at its various stages until it became law.

The effects of the famine were chiefly confined, as far as the Post Office was concerned, to an increase in money order transactions, owing to emigrant labourers, servants, and others making a larger use of the system than usual for the purpose of sending remittances to their homes in the famine-stricken tracts. The plague affected Post Office work less than in the previous year, owing, no doubt, to the population having grown more accustomed to it. It led to an increase in postal insurance business, chiefly between the Bombay Presidency and Rajputana, caused by money lenders and traders leaving their places of business

Charge of  
the Post  
Office  
Principal  
events,  
Inland Post.

for their homes and sending their valuables in advance by the post. The Post Office lost several of its servants from plague, and postal work in Bombay, Karachi and other plague-infected centres required specially careful supervision.

During the year special attention has been paid to the improvement of postal facilities in rural districts. The progress made in this respect is marked by the addition of 284 branch offices and 110 village postmen paid from Imperial and District Post Funds to the previously existing number. The increases have been greatest in the North-Western Provinces and Oudh, Bengal and the Punjab circles. At the same time steady progress has been made in the way of improving the position of the humbler servants of the Department. More would have been done in this direction had it not been that other important measures, which could not be carried out in 1896-97 owing to the necessity for strict economy, had to be made a charge against the grant for the year under review.

The last two months of the year saw the extension of the Postal Life Insurance scheme to all Government servants whose pay is audited in Civil or Public Works Account Offices, and to all members of establishments of the Military Department subject to Civil Rules whose pay is audited by Military Account Offices. It is too soon to form any confident opinion as to the success of this extension, but the results, so far, seem to show that it will be appreciated by the servants of the other Departments to which the scheme has now been made applicable. The sale of quinine through the agency of the Post Office was still further extended in the North-Western Provinces and Oudh. In the Punjab the money order system was adapted experimentally to the payment of petty sums for compensation under the Land Acquisition Act to the owners of the land taken up. A successful experiment in using the same system for the payment of Municipal refunds was made in Amritsar, while the Punjab Government set on foot a scheme under which it is hoped that the cultivating class may be induced to make more use of the Post Office Savings Bank than has been the case in the past. It may be added that further measures were taken to prepare for a decentralisation of money order audit, but definite proposals to complete the scheme were not made till 1898-99.

During the year senders of ordinary registered parcels were exempted from the trouble of filling up a form of receipt, and various minor changes in the parcel post rules were made. Among other changes the public was given the privilege of obtaining, for half an anna, a certificate of posting for any number of unregistered parcels or value-payable unregistered packets not exceeding six.

The improvements in the mail service between Bombay and Calcutta, *via* Nagpur and Jubbulpore, referred to in last year's report, came into effect during the year under review. The acceleration has been carried out most successfully by the railways concerned. The weekly special train from Bombay to Calcutta now brings the foreign mails into Calcutta about 45 hours after the steamer is signalled at Bombay, and all the most important places in Northern India share in this improvement. Under the new mail contract with the Peninsular and Oriental Steam Navigation Company, the outward foreign mail steamer leaves Bombay at 2 P.M. on Saturdays throughout the year, and it was found necessary to employ a weekly special train from Allahabad to Bombay to carry the mails from the Calcutta side, while a similar service was introduced from Jhansi to Itarsi for the benefit of the Punjab and other parts of Northern India. The outward foreign mails now leave Calcutta less than 44 hours before the mail steamer starts from Bombay, instead of leaving, as formerly, 68 hours in the fair weather, and 65 in the monsoon, in advance of that time.

In Calcutta a novel scheme of "continuous delivery" was experimentally introduced in selected parts of the city served by postmen belonging to the General Post Office. The experiment proved so successful that, towards the

close of the year, it was extended to the beats of all the postmen attached to the General Post Office. The object of this system is to give a continuous delivery of correspondence throughout the day at a minimum cost to the Department, and the result has been a very large increase of local correspondence which did not formerly pass through the post at all.

Besides the interruptions in the postal service caused by the earthquake of June, there were serious breaks during the year on the Great Indian Peninsula, Southern Mahratta, Nizam's Guaranteed State, North-Western, and Bengal and North-Western Railways, causing a temporary dislocation of mail arrangements, while a landslip which occurred on the Kathgodam-Naini Tal road in the end of September 1897 blocked the road for a week. A serious disaster also took place on the 2nd April 1897, when the S. S. "Loohit" sank with all the mails on board in the river Megna outside Chandpur.

4. The following were the principal events of the foreign post. The fifth Principal events, Foreign post. International Postal Congress was held during the year at Washington in May and June 1897, at which a number of material changes, some of them going to the root of the Union system, were decided upon, and an important step was taken by the Indian Post Office in declaring its intention to become a party to the Union Parcel Post Convention. The Acts of this Congress do not, however, come into force until the 1st January 1899. The British protectorate of Sarawak and the Orange Free State entered the Universal Postal Union, the former in July 1897 and the latter in January 1898. A new contract was negotiated with the Peninsular and Oriental Steam Navigation Company for a combined Eastern and Australian mail service, which came into operation on the 1st February 1898. The time in transit from London to Bombay under the new contract has been reduced from 395 hours and 35 minutes (16 days, 11 hours and 35 minutes) to 351 hours and 35 minutes (14 days, 15 hours and 35 minutes), so that the mails, which still leave London every Friday night, are now due at Bombay every Saturday at noon, in place of every Monday at 8 A.M. An exchange of postal parcels between India and the United Kingdom was established *via* Italy and France, in addition to the exchange by the sea route *via* Gibraltar, and a week is thus saved in the transit; while arrangements were made for the direct exchange of postal parcels, on the basis of the Union system, between India on the one hand and France and Germany on the other. The foreign parcel post was extended to Western Australia, New Zealand, German South West Africa, Peru and the State of Honduras. Arrangements were made for the exchange of postal parcels weekly with the colonies of New South Wales, South Australia, Victoria and Tasmania by the route *via* Tuticorin and Colombo, in place of the fortnightly exchanges which formerly existed; and similar arrangements were made for the establishment of a weekly parcel post service with Queensland, in place of the four-weekly service which had previously been carried on *via* Bombay, Aden, and Torres Straits. The parcel post with Egypt and certain places served through Egypt, and with Gibraltar and Tangiers, which had been temporarily suspended on account of quarantine restrictions, was re-opened during the year; and the foreign money order system was extended to the Niger Coast Protectorate and Rhodesia.

5. According to the Peninsular and Oriental Steam Navigation Company's Working of the P. and O. contract. time tables, as approved by Her Majesty's Postmaster-General, the steamers with the European mails were due in Bombay at 8 A.M. on Monday of each week during the first ten months of the year under report, and at noon on Saturday of each week during the remaining two months. The contract time was exceeded only once during the year, and then only by a few minutes. On 11 occasions the mail steamers arrived on Friday, on 25 occasions on Saturday, on

15 occasions on Sunday, and on one occasion on Monday. The shortest time occupied in transit by the mail from London to Bombay was 13 days 8 hours and 35 minutes, while the average time for the year was 14 days 14 hours and 47 minutes. In the opposite direction, that is, from Bombay to London, the quickest transit was 12 days 20 hours and 55 minutes, while the average time for the year was 14 days 23 hours and 17 minutes.

### Section I.—Post offices, Letter-boxes and Village Postmen.

Post offices,  
letter-boxes  
and rural  
delivery.

6. Appendix I shows the numbers of post offices, letter-boxes and village

	IMPERIAL POST.		DISTRICT POST.		Total.		Increase.
	Number at close of 1896-97.	Number at close of 1897-98.	Number at close of 1896-97.	Number at close of 1897-98.	Number at close of 1896-97.	Number at close of 1897-98.	
Post Offices	9,948	10,263	1,480	1,479	11,431	11,742	311
Letter-boxes (in addition to those at post offices).	16,950*	17,781	3,688	3,887	20,638	21,548	910
Village Postmen	4,388†	4,588	3,090	3,000	7,478	7,588	110

\* Two more shown in the Annual report for 1896-97.  
† One less shown in the Annual report for 1896-97.

posmen of the Imperial Post in each circle on the 31st March 1898, as compared with the numbers at the close of the previous year; and the marginal abstract shows the figures for the past two years for the whole

of India, for both the Imperial and District Post shown separately and together. The total number of post offices has increased by 311, and that of letter-boxes by 910. The increase in post offices was greatest in Bengal and in the Punjab, and in letter-boxes in the Punjab and in Madras. The total number of post offices entrusted to the charge of schoolmasters and other persons not belonging to the Department, was 6,520 at the end of the year under review, as compared with 5,812 at the end of the year 1896-97.

Post offices  
and letter-  
boxes con-  
trasted  
with area  
and popula-  
tion.

7. The following table shows for each circle, and for the whole of India, the number of post offices and letter-boxes, compared with the area, total population and literate population, according to the last census:—

NAMES OF CIRCLES.	Area in square miles.	Population.	Literate population.	Post offices.	Letter-boxes (including those at post offices).	1 POST OFFICE AREA.			1 LETTER-BOX AREA.		
						Square miles.	Popu-lation.	Literate popu-lation.	Square miles.	Popu-lation.	Literate popu-lation.
Bengal . . . . .	119,719	66,879,787	3,995,384	1,697	6,440	71	34,699	3,175	19	6,357	312
Bombay . . . . .	148,517	26,378,186	1,416,474	1,486	5,052	200	17,347	523	29	5,216	280
Madras . . . . .	205,015	55,984,761	3,188,768	2,205	5,832	119	25,380	1,410	47	9,934	553
North-Western Provinces and Oudh . . . . .	134,152	30,963,339	1,308,145	1,507	4,638	79	20,610	771	27	10,344	200
Punjab . . . . .	148,960	25,130,127	819,373	1,784	4,333	83	14,337	467	35	9,865	191
Assam . . . . .	49,004	5,470,833	168,314	252	671	148	10,518	508	72	2,188	331
Bihar . . . . .	42,364	23,578,375	718,383	575	1,886	74	41,140	1,242	33	16,580	507
Burma . . . . .	321,430	8,008,814	1,608,581	277	1,314	783	29,233	5,817	101	6,107	1,204
Central Provinces . . . . .	148,808	17,849,135	745,761	735	1,723	984	24,883	670	116	14,276	269
Eastern Bengal . . . . .	31,247	10,684,003	497,826	450	1,579	47	24,117	698	25	8,403	276
Rajputana . . . . .	177,441	17,848,893	—	330	556	333	53,541	—	318	31,053	—
Sind and Baluchistan . . . . .	53,898	3,430,081	118,030	196	377	275	15,303	881	617	8,750	213
Total . . . . .	1,512,491	185,852,303	12,044,393	17,742	53,790	189	14,394	1,010	45	8,500	349
1896-97 Total . . . . .	1,514,401	186,056,500	12,044,393	17,431	52,880	190	14,464	1,058	47	8,804	375

It will be observed that there is one post office in India for every 129 square miles, as against 132 square miles in 1896-97, and one letter-box for every 45 square miles as against 47 square miles in the previous year. In this respect Bengal, including Bihar and Eastern Bengal, continues to be the most favoured province as regards post offices and letter-boxes, while Burma and Rajputana are still the most backward.

## Section II.—Postal lines.

8. Appendix II contains statistics, according to postal circles, shewing the Postal communications.

Nature of line.	1897-98.				Total mileage in 1897-98.	Total mileage in 1896-97.	1897-98.	
	Imperial.	District Post.	Political.	Military.			Increase.	Decrease.
Railway	20,283	8	...	...	20,291	19,418	873	...
Mail cart	5,263	740	874	462	7,339	7,399	...	60
Runners and boats	48,318	33,975	...	...	82,293	81,185	1,108	...
Steamer	14,856	1,572	...	...	16,428	15,241	1,187	...
TOTAL	88,720	36,395	874	462	126,351	123,243	3,108	60

distances over which mails were carried by the various agencies of the Imperial Post Office. An abstract of that Appendix is given on the margin for facility of reference, with additional columns for District Post, Political and Military lines managed by the Post Office. There was a slight decrease under the head of mail cart lines, and an increase under all other heads, the increase being most marked in the case of "Runners and boats" and "Steamer." The extension of runner and boat lines occurred chiefly in the Madras circle and was due to the opening of new lines in the Cuddalore Division and the conversion of certain mail cart services into runners lines in other parts of that circle. The increase in Madras alone was about 500 miles. The increases in other circles were due to the opening of short lines, and to the transfer to Imperial of District Dak lines. The increase under steamer lines was mainly in the Burma circle, where the opening of a steamer service between Katha and Bhamo and also between Sandoway and Taung-gup added about 1,000 miles to the previous length.

The use of light hand carts or "Rickshaws" for carrying mails was further extended and continues to be well reported on in the matter both of economy and speed. This mode of carrying mails is gradually being introduced where the roads are good and the weight of the mails is sufficient to justify its adoption.

The use of bicycles on runners lines has been tried in parts of the Madras Presidency, and their use by letter-box clearers has also been tried in the town of Lahore. So far there seems to be every reason to anticipate the success of this form of conveyance in suitable localities, and it is the intention to extend the area of the experiment.

## Section III.—Correspondence and Parcels.

9. The estimated number of postal articles of all kinds, exclusive of money orders, issued for delivery during the year, amounted to 465 millions or 26 millions Postal Traffic. in excess of the number during the preceding year. The increase has been 37·03 per cent. since 1891-92, and 46·25 per cent. since 1890-91. Statistics showing the different classes of articles delivered in the various postal circles during 1897-98 will be found in Appendix III, and a summary of the general results is given in the following statement.

	Post-cards.	Letters (paid).	Letters (unpaid).	Letters (registered).	Total of Letters and post-cards.	Newspapers.	Book and pattern packets.	Parcels (registered).	Parcels (unregistered).	GRAND TOTAL (all postal articles except money orders).
1897-98.	166,803,227	181,817,607	29,469,993	8,860,142	386,950,269	29,778,291	19,341,398	2,555,209	153,550	438,778,727
1896-97.	179,370,803	190,258,850	29,791,932	9,375,651	408,797,236	31,891,484	21,364,415	2,767,639	198,351	465,019,125
1895-96.	12,567,176	8,441,243	322,639	515,509	21,846,567	2,113,193	2,023,017	918,430	44,791	26,240,398
Per cent.	7·53	4·64	1·09	5·82	5·65	7·10	10·46	8·31	29·17	5·98

There was thus an increase in the total number of articles under each head throughout India. The percentage of increase in all articles taken together was highest in the Punjab circle, where it was 13·22 per cent. Part of this increase is accounted for by the very large military force collected on the North-West Frontier during the year under report. The Bengal circle ranks next with an increase of 7·23 per cent., and the Burma circle follows with an increase of 6·82 per cent., and then come Assam, Bihar, Bombay, Rajputana and Sind and Baluchistan. In the year under report, as in previous years, the increase in the number of postcards (more than 12½ millions) far exceeded the increase in any other class of postal articles.

As in the previous year, the total number of postcards exceeded the total number of paid letters in the case of Bengal, Bombay, the Punjab and Eastern Bengal circles. The total number of unpaid letters was more than 29½ millions, the proportion of these letters being highest in Burma and Bihar, while the total number of unpaid letters delivered in Bengal was larger than in any other circle. The total number of letters registered during the year was more than 9½ millions. Registration, as usual, has been more popular in Madras than in other parts of India, the total number of letters registered in that Presidency being over 2 millions. The total number of parcels registered during the year was more than 2½ millions or an increase of 8·31 per cent. over the number of the preceding year, notwithstanding the very marked increase, of nearly 30 per cent., in the number of unregistered parcels under the system newly introduced in 1895-96.

Average number of postal articles per head of population.

10. The following table, prepared from the last census returns, shows for each circle the number of letters and other postal articles per head of the total population and per head of the literate portion of the population. Bombay, Sind and Baluchistan, the Punjab and Burma rank highest as regards the number of articles per head of the population, and Sind and Baluchistan, the Punjab and Bombay rank highest as regards the number of articles per head of the literate population.

NAME OF POSTAL CIRCLES.	Total population.	Number who can read and write.	Total number of postal articles (excluding money orders).	Number of postal articles per head of population.	Number of postal articles per head of those who can read and write.

\* Excluding Indian Post Offices at Bagdad, Bura, and places in the Persian Gulf.  
† Enumeration not taken under this head.

11. The figures in Appendix III include the foreign correspondence received in India for delivery, but a special table is given at the end of this paragraph showing separately the quantity of correspondence passing in each direction between India and the United Kingdom and between India and all other parts of the world. As regards the mails exchanged with the United Kingdom, the results of the year show a growth of traffic in all respects. The advance was of a normal character in the case of the homeward mails, but the increase in the case of those sent out from the United Kingdom calls for special remark. There was again this year an increase over the figures of the previous year, of more than a million in the number of newspapers and packets received from the United Kingdom. This steady addition of more than two millions during two successive years to the newspaper and packet mails sent out from home is sufficiently remarkable; but in the year under review there was also an unusual increase, at the rate of 13·36 per cent., of over 400,000 in the number of letters and postcards received from the United Kingdom, which it is not easy to account for. The figures showing the quantity of correspondence received from the United Kingdom are based on statistics of weight which are taken twice a year in the months of June and January. In both these months the weights of the mails for the year under review were greater than in the corresponding months of the previous year, the increase being specially marked in the month of January 1898, and it is possible that these figures may not be fairly representative of the whole year's traffic. As regards mails exchanged with countries other than the United Kingdom, statistics of the traffic are taken only once every three years, and as the figures given in the table are merely a repetition of those of last year, they do not call for any remark.

	Class.	ESTIMATED AGGREGATE NUMBER.		PERCENTAGE OF		Remarks.
		1897-98.	1898-99.	Increase.	Decrease.

12. The following statement gives details of the foreign parcel traffic both to and from India during the last two years. In the year under review there was

an increase of 15,189 or 6·5 per cent. in the total number of foreign parcels and of Rs 1,502 in the Indian share of the revenue from the foreign parcel post :—

\* Net revenue is calculated after deduction of customs duty and sums due to the Peninsular and Oriental Steam Navigation Company, the British Post Office, and other Administrations.

Parcel exchange with the United Kingdom.

13. More than 71·0 per cent. of the whole foreign parcel traffic was with the United Kingdom. As regards the exchange with the British Post Office, a new service by the overland route across the Continent of Europe was established

from the 1st February 1898, in addition to the service by the sea route *via* Gibraltar. During the two months of the year for which this new service was in operation, 1,244 parcels were sent to the United Kingdom, and 583 were received by the new route. Moreover, in view of the fact that there was a substantial increase in the number of parcels exchanged by the Gibraltar route, an increase in excess of the average increase for several previous years, the whole of the traffic carried by the new service may fairly be regarded as having been freshly created. As regards the exchange through the agency of the Peninsular and Oriental Steam Navigation Company, there was a small falling off in the number of parcels, both sent and received, and this exchange has practically now ceased to be of any importance. If the figures relating to all the parcel post services to and from the United Kingdom be taken together, they show a total increase of 8,135 in the number and of Rs. 731 in the net revenue of the Indian Post Office, over the figures of the preceding year.

14. In the exchanges with Continental Europe the number of parcels despatched from India shows a slight decrease, while the number received in India was about the same as last year. The new direct services established with France and Germany towards the end of the year under review do not appear, therefore, to have had any effect, so far, on the parcel post traffic with the Continent of Europe. In the exchanges with other countries, there was a satisfactory development of the traffic in both directions, an addition of 7,433, at the rate of 13.4 per cent., having been made to the number of parcels and of Rs. 3,412 to the net Indian revenue. The increase in the number of parcels sent to non-European countries is again to be attributed mainly to the steady growth of the parcel post with Ceylon.

Year.	Number of parcels.	Year.	Number of parcels.
1877-78 . . . . .	59,183	1888-89 . . . . .	163,989
1878-79 . . . . .	69,763	1889-90 . . . . .	177,210

1881-82 . . . . .	88,840	1892-93 . . . . .	185,460
1882-83 . . . . .	88,684	1893-94 . . . . .	204,270
1883-84 . . . . .	98,296	1894-95 . . . . .	215,201
1884-85 . . . . .	110,590	1895-96 . . . . .	220,378
1885-86 . . . . .	133,054	1896-97 . . . . .	231,332
1886-87 . . . . .	141,453	1897-98 . . . . .	246,521
1887-88 . . . . .	158,792		

15. The progress of the foreign parcel traffic as a whole since 1877-78 will be seen from the table in the margin.

16. The figures given in paragraph 9 of this report show that 465,019,125 letters, post-cards, newspapers, packets and parcels were issued for delivery during the year. These figures are calculated from actual enumerations made for a week at a time twice during the year, and approximately represent the delivery of mail articles properly so called. In order, however, to ascertain the entire delivery work of the year, it is necessary to add the number of money orders which are delivered and paid by postmen and village postmen. The entire delivery work of the year is shown by the following figures:—

Sent out for delivery (including 11,888,782 money orders) . . . . .	476,907,907
Received back undelivered (deducted as representing articles either again sent out and delivered, or sent to the Dead Letter Office) . . . . .	14,785,061
Balance actually delivered . . . . .	462,122,846
Sent to Dead Letter Office . . . . .	4,520,773
Total number received for delivery (counting each article only once) . . . . .	466,643,617

These figures show that the percentage of articles delivered on the whole number received for delivery was 99.03, as compared with 99.06 in the previous year.

17. The total number of letters, postcards and other articles excluding money orders, that reached one or other of the ten Dead Letter Offices, was 6,106,203 as compared with 5,613,291 received in the previous year. The distribution of these articles among the different Dead Letter Offices, and the way in which the

articles were disposed of are shown in detail in Appendix IV of which a summary is given below :—

	NUMBER.		PERCENTAGE.	
	1896-97.	1897-98.	1896-97.	1897-98.
Total number of articles received in Dead Letter Offices	5,613,291	6,266,203		
1896-97 1897-98				
DEDUCT—				
Articles issued by Dead Letter Offices for delivery to the addressees or senders, and received back again as undeliverable . . . . .	230,052	267,080		
Articles transferred to other Dead Letter Offices . . . . .	1,318,812	1,627,559		
Net receipts to be disposed of by the Dead Letter Offices . . . . .	3,864,427	4,210,564	100	100
Articles disposed of by the Dead Letter Offices, excluding articles returned as undeliverable.				
Disposed of by re-direction to addressees . . . . .	695,784	818,859	18'00	19'45
Disposed of by return to senders . . . . .	2,171,283	2,299,081	56'19	54'60
Articles undisposable . . . . .	997,358	1,092,724	25'81	25'95

Of the total number of articles 818,859 were successfully disposed of by being redirected and then delivered to the persons to whom they were addressed, while 2,299,081 were returned to the senders, and 1,092,724 were found to be unreturnable. This last figure is only 0'2 per cent. of the total number of articles given out for delivery in the year, and a large proportion of the 1,092,724 articles were from their nature not capable of delivery. From special statistics kept by the Bengal Dead Letter Office for three months, it appears that 3,188 letters, 4,656 newspapers and 284 packets were posted in the Bengal, Eastern Bengal and Assam circles without any address at all. As usual, a large number of valuable property was found in letters and other articles posted without address or with addresses so incorrect and incomplete that the covers had to be opened in order that the senders might be traced. In articles opened in the Dead Letter Offices of Bengal, Bombay, Madras, the North-Western Provinces and Oudh, and the Punjab were found cheques, hundis, bills of exchange, currency notes, coins and other property amounting in value to Rs. 2,55,435-0-8, £610-18-1, 5 Dollars and 28 Francs, and the greater part of this property was successfully delivered to the owners.

18. Particulars regarding the issues from treasuries of postcards, postage stamps, embossed envelopes and stamped wrappers will be found in Appendix V, and similar information regarding service postcards, service postage stamps, and service embossed envelopes will be found in Appendix VI, to which is added an abstract of the two appendices, showing the issues of each kind of postcard, postage stamp, embossed envelope and stamped wrapper. The total value of the issues of ordinary stamps was  $\text{Rs } 1,32,72,755$ , and of service stamps  $\text{Rs } 26,64,281$ , there being an increase over the figures of the preceding year of  $\text{Rs } 8,77,833$  in the value of ordinary stamps, and of  $\text{Rs } 71,315$  in the value of service stamps.

Sale of  
postage  
stamps, etc.

The issues of ordinary stamps were largest in the Bombay circle, where they amounted to nearly 27 lakhs of rupees. Madras comes next with issues of over 23 lakhs of rupees, and Bengal follows with issues of nearly 23 lakhs of rupees. The inland single postcards continued to command the highest sales, the total issues being over 120 millions in number. The small  $\frac{1}{2}$  anna envelope had the next largest sales, over 75 millions being issued during the year. Of the  $\frac{1}{2}$  anna adhesive stamps, over 58 millions were issued, of the  $\frac{1}{2}$  anna reply postcards, over 16 millions, of the one anna adhesive stamps, nearly 11 millions, of the 2 anna adhesive stamps, over 6 millions, of the  $2\frac{1}{2}$  anna adhesive stamps, over 3 millions, and of the 4 anna adhesive stamps, over 2 millions. In the case of the  $\frac{1}{2}$  anna square envelopes, both ordinary and service, as well as in the case of the one anna service envelopes, the sales declined; but there was an improvement in the number of one anna ordinary square envelopes issued, while there was also an increase in the sales of registration envelopes of all kinds, over the figures of the previous year.

The issue of  $\frac{1}{2}$  anna wrappers fell from some 358 thousand in the preceding year to some 329 thousand during the year under review, but there seems to have been a slightly increased demand for one anna wrappers, of which the issues rose from about fifty thousand in the previous year to about fifty-six thousand in the year under review.

Apart from the sales of postage stamps, one anna revenue or receipt stamps to the value of  $\text{Rs } 3,94,650$  were sold during the year, through the agency of the Post Office. Non-judicial stamps and Court-fee stamps are also sold at many post offices, but, except in Burma, the postmaster acts, as regards these stamps, as a private vendor, and the stamps do not form part of the post office balance. In Burma, where general stamps are kept by the postmaster in the same way as other stamps, the sales on this account amounted to  $\text{Rs } 65,093$ .

#### Section IV.—District Post.

19. There has been no change in the management of the District Post during the year under report. It was administered, as usual, by the heads of postal circles subject to the control of the several Local Governments and Administrations.

Manage-  
ment of the  
District  
Post.

20. The comparative statement given on the next page shows the establishments, income, and expenditure of the District Post, and also the work done under this head for the years 1896-97 and 1897-98. The total income of the year under report was  $\text{Rs } 12,28,851$ , and the total expenditure  $\text{Rs } 12,46,082$ . There was a decrease of 4 in the number of post offices, and of 125 in the number of postmen and village postmen, while the number of letter-boxes kept up out of District Post funds increased by 139, and the length of District Post mail lines by 380 miles. There was also an increase of 779,766 or 4.53 per cent. in the number of articles, including money orders, delivered by the District Post agency, and of 548,033 or 4.70 per cent. in the number of articles posted in post offices and letter-boxes kept up by the District Post. Appendix VII gives details according to circles of letters and other postal articles sent to, and received from, the District Post.

General re-  
sults of the  
year.

## Section V.—Money Orders.

21. The total number of money order offices at the end of the year under review was 11,491 as compared with 11,295 at the close of the previous year. The number of inland money orders issued, including telegraphic money orders, but excluding all transactions with Native States, was well over 11½ millions, of the aggregate value of nearly 24½ crores of rupees, while the commission realized amounted to over 30½ lakhs of rupees. The table

1895-96	20	8	0
1896-97	20	1	1
1897-98	20	12	4

report there was an increase of 6.55 per cent. in the number of inland money orders issued, of 10.29 per cent. in their value and of 9.49 per cent. in the amount of the commission realized. The average value of an inland money order has stood at something less than Rs. 2 for the last six years, as the figures in the margin show, with a tendency to decline, up to the year

under report.

22. The following statement shows the distribution of the inland money order business among the various postal circles:—

Incidence of inland money order work according to postal circles.

NAME OF POSTAL CIRCLES.	ISSUES DURING 1897-98.		PAYMENTS DURING 1897-98.		PERCENTAGE TO THE WHOLE.

Total for 1896-97	10,947,371	21,97,28,206	10,928,731	21,92,17,214	...	...
Increase	716,779	2,26,08,890	722,742	2,31,23,777	...	...

As in previous years the money order business of the Bengal circle was on a larger scale than that of any other postal circle. The number of orders issued and paid in the Lower Provinces during the year under report was more than one-third of the total transactions for all India. As in former years also the payments were largely in excess of the issues in the North-Western Provinces and Oudh, Bombay, and Bihar; whereas in Bengal, Assam, Burma, Central Provinces, Rajputana, and Sind and Baluchistan, the issues were in excess of the payments.

Revenue  
money  
orders.

23. In the North-Western Provinces and Oudh, the total number of revenue money orders issued, which during the previous year fell off in consequence of the prevalence of famine, showed during the year under report considerable improvement. The number of orders rose from 133,498 in 1896-97 to 168,118, and the amount from Rs 30,44,174 to Rs 37,46,711. In the Central Provinces, however, famine continued to interfere with the progress of the scheme during the year under report. The total number of revenue money orders issued there fell from 10,728 in 1896-97 to 9,976, but the amount rose from Rs 4,18,965 in the previous year to Rs 4,48,834 during the year under report. In the Lower Provinces of Bengal, including Eastern Bengal and Bihar, there was an increase both in the number and value of revenue money orders, as compared with the figures of the preceding year. The number of orders rose from 192,425 in 1896-97 to 193,278, and the amount from Rs 17,79,477 to Rs 18,91,028. The total number of revenue money orders issued in the Punjab rose from 9,859 in 1896-97 to 11,030 during the year under report, and the amount from Rs 5,81,235 to Rs 7,05,213.

Remittances  
of miscellaneous  
Government  
dues by  
money  
orders.

24. In the Lower Provinces of Bengal 93,933 official money orders of the aggregate value of Rs 20,32,378 were issued during the year under report as compared with 92,195 money orders of the aggregate value of Rs 21,25,813 issued in the previous year. In the North-Western Provinces and Oudh the system of remitting miscellaneous Government dues by money orders is making progress every year. The number of orders rose from 22,847 in 1896-97 to 28,916 during the year under report, and the value from Rs 4,74,493 to Rs 5,83,856. In the Punjab there was an increase of 248 in the number and of Rs 16,305 in the value of official money orders—the total number of orders and their amount being 4,023 and Rs 1,02,571 as compared with 3,775 and Rs 86,266, respectively, in the previous year. In Madras 4,416 official money orders of the aggregate value of Rs 74,633 were issued during the year under report as compared with 4,464 money orders of the aggregate value of Rs 75,018 in the previous year. In Burma, where the system was introduced in August 1896, official money orders were issued only from three offices and numbered 119 of a total value of Rs 6,665.

Rent money  
orders.

25. In the North-Western Provinces and Oudh the rent money order business, which for the last three years has been falling off, considerably improved during the year under report. The total number of orders rose from 51,691 in 1896-97 to 59,055, and the amount from Rs 7,03,349 to Rs 8,39,608. In the Central Provinces the number of rent money orders fell during the year under report from 1,509 in 1896-97 to 1,450, and the amount from Rs 24,693 to Rs 24,102. The decrease is said to be due to causes connected with the late famine. In the Lower Provinces of Bengal the progress reported last year was not sustained during the year under report. Though the number of orders slightly rose from 49,675 in 1896-97 to 49,819, the amount fell from Rs 7,40,310 to Rs 7,34,892.

26. The following statement shows the money order transactions with Native States :—

Money order transactions with Native States.

	ISSUES IN THE STATE.		PAYMENTS IN THE STATE.	
	Number.	Value.	Number.	Value.
		₹		₹
Gwalior . . . . .	46,438	14,86,276	20,261	5,55,399

<b>TOTAL</b>	<b>76,043</b>	<b>22,67,524</b>	<b>47,709</b>	<b>13,60,275</b>
Total for 1896-97	80,935	19,28,527	44,630	12,66,057
Increase or decrease	-4,892	+3,38,997	+3,079	+94,118

There was an increase of more than 3½ lakhs of rupees in the value of the issues and of more than ninetyfour thousand rupees in the value of the payments, in the Native States. It will be noticed that the payments made by the Imperial Post Office on account of money orders issued by Native States have been much larger than the issues by the Imperial Post Office on those States, and that this excess is an increasing quantity. The excess occurs mainly in the transactions with Gwalior State.

27. The transactions in telegraphic money orders are given in the following table according to postal circles :—

Telegraphic money orders.

NAMES OF POSTAL CIRCLES.	ISSUES.			PAYMENTS.	
	Number of money orders.	Value of money orders.	Commission.	Number of money orders.	Value of money orders.

<b>TOTAL</b>	<b>156,075</b>	<b>1,88,52,969</b>	<b>1,95,274</b>	<b>155,000</b>	<b>1,97,10,943</b>
Total for 1896-97	145,849	1,73,27,389	1,78,301	136,583	1,60,28,357
Increase	10,226	15,25,610	16,973	18,417	36,82,586

There was again a marked increase in the number and value of telegraphic money orders. The number of orders issued rose from 145,849 in 1896-97 to 156,075 and their value from Rs. 1,73,27,359 to Rs. 1,88,52,969. The chief increase occurred in Bombay, and is said to be due to some extent to grain dealers sending telegraphic remittances for the purchase of stocks of grain for the famine-stricken districts in the Deccan. There is no doubt that similar causes affected other parts of India in the same way, while emigrant labourers and others, in distant places, such as Burma, used this means of remittance more than usual in order to alleviate urgent distress in their homes. The postal commission on the orders amounted to Rs. 1,95,274 in addition to Rs. 1,56,075, the cost of telegrams, which is paid by the remitters along with the postal commission but credited to the Telegraph Department.

The average value of a telegraphic money order for the last six years is

YEARS.	Average value of a telegraphic money order.		
	Rs.	s.	d.
1892-93	108	0	0
1893-94	107	15	4
1894-95	111	7	5
1895-96	115	12	7
1896-97	118	12	10
1897-98	120	12	6

shown in the marginal statement.

Telegraphic money orders continued to be issued far more freely from Burma than elsewhere, the orders issued from that province in the year under report being 43.59 per cent. of the total number for the whole of India.

Payments in Burma also con-

tinued, as in previous year, to be larger in amount than in any other provinces, excepting only Madras.

28. Foreign money orders for and from the United Kingdom, most of the British Colonies and possessions, foreign European countries and most of their colonies and possessions and Egypt are issued in sterling, payments being made by the remitters and to the payees in India at the rates of exchange fixed by the Post Office from time to time for this purpose. Details of the sterling money order exchanges of the year are given in the table below:—

During the year under review the number of sterling money orders issued rose from 59,654 in 1896-97 to 63,350, while the value increased from Rs. 206,507 to Rs. 224,345. This increase was, as usual, principally due to the growth of the

drawings upon the United Kingdom. In the case of sterling money orders received for payment in India, there was also an increase, the number being greater by 4,707 and the value by £34,128 than the figures for the previous year. The average value of a money order issued from India in 1897-98 was £3-10-10 as compared with £3-9-3 in 1896-97, and that of a money order paid in India was £5-11-3 as compared with £5-6-8 in the preceding year. The average of the rates of exchange in force during 1897-98 was 15½d. per rupee as compared with 14½d. in the previous year.

29. The following table shows the money order transactions with foreign countries to and from which the amounts are advised in Indian currency :—

\* Includes Indian Ceylon telegraphic money orders.

The drawings by the foreign countries and colonies upon India during the year have, as in the previous years, largely exceeded the drawings by India on those countries and colonies except in the case of the Portuguese Settlements. The heaviest drawings were by Ceylon, British East Africa, the German Protectorate (East Africa), Mauritius and the Straits Settlements. The total payments made by India on account of money orders advised by foreign countries were more than six times the amount of the issues by India on those countries. The average value of a foreign rupee money order issued by India in 1897-98 was ₹37-12-2 as compared with ₹37-9-2 in 1896-97, and that of an order paid in India was ₹42-14-3 as compared with ₹42-1-1 in the preceding year.

30. The telegraphic money order transactions between India and Ceylon are shown in the statement on the margin. There was a considerable further development of the

YEAR.	ISSUED BY INDIA ON CEYLON.			ISSUED BY CEYLON ON INDIA.

Ceylon to India. There was an increase of 253 in the number and of ₹8,348 in

the value of telegraphic money orders issued by India on Ceylon and of 4,362 in the number and Rs. 3,03,608 in the value of orders issued by Ceylon on India. During the year under review the number of telegraphic money orders drawn by Ceylon on India rose to 15,951 or to more than 14 times the number of orders drawn by India on Ceylon. At the same time the value of orders drawn by Ceylon on India rose to Rs. 10,61,368 or to more than 15 times the value of orders drawn by India on Ceylon.

Forfeited or void money orders.

31. The usual statement of forfeited and void money orders is given below:—

Balance on the 31st March 1897.		Void money orders for 1897-98.		Total.		VOID ORDERS PAID, REPAYED TO REMITTERS IN FOREIGN COUNTRIES, RENEWED AND FORFEITED TO THE STATE DURING 1897-98.								Balance on the 31st March 1898.	
						Paid and repaid.		Renewed.		Forfeited to the State.		Total.

Revised figures.

The total balance standing on the register of forfeited money orders at the end of the year was Rs. 96,184 against Rs. 87,591 at the close of the previous year.

Aggregate money order transactions—inland and foreign.

32. The following statement gives an abstract of the entire money order business of the Post Office in the year, including inland and foreign money orders, both ordinary and telegraphic, the foreign sterling money orders being shown in Indian currency at the rates in force when the transactions took place:—

Money orders—Inland, Native State, and foreign for the year 1897-98.	ISSUES.						PAYMENTS.

British postal orders.

33. The statement on the margin shows the sales of British postal orders during the year. The total number of orders sold in 1897-98 was 59,058, as compared with 56,961 in the preceding year, and the total value (including postage) £38,370, compared with £37,297 in 1896-97. The orders most in demand were, as in former years, those of the 5 shillings, 10 shillings, and 20 shillings denominations. During the year 44,762 of these orders were sold, while the total sales of orders of all other denominations only amounted to 14,296. The net commission realized by the Indian Post Office on the entire sales of the year was Rs. 1,796.				
Denomination of British postal orders.	Number sold during 1896-97.	Number sold during 1897-98.	Increase.	Decrease.

compar

## Section VI.—Savings Banks.

34. The usual statement is appended showing in detail, according to postal circles, the savings bank transactions of the year, as compared with those of the previous year. At the close of the year there were 730,387 active accounts as compared with 713,320 at the end of the year 1896-97, there being thus a net increase of 17,067 or 2.39 per cent. in the number of depositors. Excluding transfers from one post office to another, the amount deposited in the year was about 322 lakhs of rupees as compared with nearly 451½ lakhs of rupees in 1896-97; the amount withdrawn was a little over 385 lakhs as compared with nearly 422 lakhs in 1896-97; and the interest paid was about 28 lakhs as compared with over 30 lakhs in 1896-97. The total amount standing at the credit of depositors at the close of the year was nearly 928½ lakhs, showing a decrease of about 35½ lakhs as compared with the balance at the close of the preceding year.

Thus it will be seen that the transactions of the year were on the whole of an abnormal character. There was a decrease both in the number of the accounts opened and in the amount of the deposits; and for the first time since 1889-90 the closing balance was reduced below the figure of the previous year, owing to the amount withdrawn being in excess of the amount deposited by more than the interest for the year. The total amount withdrawn, however, fell short of the amount withdrawn in the previous year, notwithstanding the unusually large withdrawals made during the year under review at certain places in the Bombay Presidency, but then the withdrawals in the previous year were themselves exceptionally heavy. The average balance of each account was 127.15 as compared with 135.13 in the previous year. Of the 730,387 active accounts at the end of the year, 36,386 were security deposit accounts with a balance in favour of depositors of nearly 45½ lakhs, giving an average of Rs 125 for each account, the maximum limit for a security deposit account being Rs 500. The number of public accounts was 5,735 with a balance of nearly 31½ lakhs, giving an average of Rs 549 for each account, as compared with 5,632 accounts with a balance of nearly 35 lakhs at the end of the previous year, giving an average of Rs 621 for each account. There were 173 regimental and other conjoint accounts with a balance of nearly 11½ lakhs, giving an average of Rs 6,787 for each account. There is no limit of deposit in the case of regimental and other conjoint accounts. Of the remaining 688,093 active accounts with a balance of over 840 lakhs, 89,596 with a balance of over 160 lakhs were held on behalf of minors by their parents, relatives and guardians, and the rest were accounts opened and held by depositors on their own behalf. It will be seen, therefore, that 94.2 per cent. of all the accounts in the Post Office Savings Banks and 90.45 per cent. of the total balance of 928½ lakhs, represent the savings of private persons, deposited either for their own benefit or for the benefit of their children, minor relatives, and wards.

## Statement showing Post Office Savings Bank transactions during 1897-98 compared with 1896-97.

[Arranged in the order of aggregate balances as shown in column 13.]

\* Inclusive of Rs. 1,14,69,866, balance of accounts transferred from one post office to another.

35. The statement below shows the number and value of accounts held by Europeans and Eurasians, as compared with the number and value of accounts held by natives of India. The proportion of accounts held by Europeans and Eurasians, as in the three preceding years, was highest in the North-Western Provinces and Oudh, Madras and Bombay circles; but 91·14 per cent. of the total number of accounts at the close of the year were held by natives of the country, showing again a slight increase over the percentage for the preceding year:—

NAMES OF POSTAL CIRCLES.	ACCOUNTS OF NATIVE DEPOSITORS (INCLUDING ACCOUNTS OF LOCAL NATIVE INSTITUTIONS ADMINISTERED BY NATIVES OF INDIA).			ACCOUNTS OF EUROPEAN AND EURASIAN DEPOSITORS (INCLUDING ACCOUNTS OF LOCAL INSTITUTIONS ADMINISTERED BY EUROPEANS AND EURASIANS).			TOTAL.

36. In the following statement the depositors are classified according to their occupation. As in the three preceding years the largest number of accounts were held by the undermentioned classes of depositors in the following order:—

- (1) persons of no occupation or whose incomes are derived from others or from their own property—classed as "Indefinite" in the statement;
- (2) the professional class, and
- (3) the domestic class.

The highest percentage of increase was, however, in the agricultural class, the number of whose accounts increased at the rate of 14·07 per cent. during the year under report:—

NAMES OF POSTAL CIRCLES.	CLASS I. PROFESSIONAL.		Class II. Domestic.	Class III. Commercial.	Class IV. Agricultural.	Class V. Industrial.	Class VI. Indefinite.	TOTAL.

Investment  
in Govern-  
ment securi-  
ties.

37. There were 657 investments in Government securities through the Post Office during the year, the nominal value of the investments being Rs 7,42,600 in the aggregate, as compared with 453 purchases of the nominal value of Rs 8,34,300 in the preceding year. This increase in the number of investments is to be attributed mainly to the favourable rate at which Government securities were selling during the last eight months of the year. The sales of securities through the Post Office were 35 as compared with 34 in 1896-97. The nominal value of the securities held in the custody of the Comptroller General at the close of the year, on account of depositors in the Post Office Savings Bank, was Rs 7,31,200 as compared with Rs 6,05,600 on the 31st March 1897; and it may be interesting to note that of this balance in the hands of the Comptroller General, Rs 6,65,700 represented the nominal value of securities of the  $3\frac{1}{4}$  per cent. loan, while the balance Rs 65,500 was held in 3 per cent. loans.

### Section VII.—Insurance.

Insurance  
Business.

38. The progress of the insurance business of the Post Office since it was first undertaken is given in the following statement:—

Year.	LETTERS.		PARCELS.		TOTAL.		Insurance fees.
	No.	Value.	No.	Value.	No.	Value.	
		Rs		Rs		Rs	Rs
1877-78, last quarter, being the commencement of the system		6,66,320		18,60,191		25,26,511	13,230
1878-79	Details not available.	89,71,775	Details not available.	2,81,21,219	Details not available.	3,70,92,994	1,23,556
1879-80		1,63,35,058		5,34,34,151		6,97,69,219	1,97,790
1880-81		1,57,33,428		6,30,26,524		7,87,59,952	2,01,046
1881-82		1,79,69,808		5,85,53,413		7,65,23,221	1,90,980
1882-83		2,30,67,342		3,95,70,924		8,26,38,266	1,99,841
1883-84		2,21,16,868		6,04,08,142		8,25,25,010	2,06,839

1885-86	83,985	2,21,78,613	1150,260	4,75,99,870	234,245	6,97,78,483	1,69,945
1886-87	74,806	2,35,74,205	148,445	5,26,06,770	223,253	7,61,80,975	1,80,274
1887-88	76,237	2,43,93,295	149,109	5,29,89,932	225,346	7,73,83,227	1,83,494
1888-89	76,364	2,52,60,326	151,474	5,39,54,694	227,838	7,92,15,020	1,99,928
1889-90	77,243	2,49,65,787	160,228	6,40,99,236	237,471	8,98,75,023	2,29,659
1890-91	85,829	2,31,91,674	176,838	5,67,24,543	262,727	7,99,16,217	2,10,873
1891-92	88,741	2,31,67,897	176,869	5,53,72,377	265,610	7,95,40,274	2,02,737
1892-93	89,845	2,36,54,593	172,966	4,94,06,117	262,811	7,30,60,710	1,93,250
1893-94	89,332	2,31,75,043	195,706	5,69,24,359	285,038	8,00,99,402	2,10,714
1894-95	92,019	2,34,06,681	198,237	5,92,55,919	290,276	8,26,62,600	2,18,436
1895-96	93,764	2,45,58,478	201,219	6,26,73,095	294,983	8,72,31,573	2,31,277
1896-97	99,405	2,57,93,201	198,823	6,23,92,225	298,228	8,81,85,426	2,34,945
1897-98	99,988	2,58,36,516	224,657	7,42,26,074	324,645	10,00,62,590	2,65,550
Percentage of increase.	59	17	1400	1897	953	1347	303

It will be seen that there was an increase in the total business of the year under report as regards both the number and value of the articles insured. It will be seen also that the parcel insurance business of the year has not only made up for the temporary decrease during 1896-97, but shows figures higher than those of any previous year. The total number of parcels insured exceeded the number in the preceding year by 27,834, and the number in 1895-96 by 25,438, their total value being nearly  $7\frac{1}{2}$  crores of rupees as compared with about  $6\frac{1}{2}$  crores in 1895-96 and 1896-97. The total value of all articles postally insured, for the first time exceeded 10 crores. The largest increase in insurance business occurred in Bombay, where the number of parcels insured in the year under report exceeded that in the previous year by 17,554. This was due

in a great measure to the panic caused by the plague, which drove many of the Marwari and other foreign traders to their homes. They made large use of postal insurance, considering it the cheapest and safest method of having their valuables despatched from Bombay to their native places.

The average value for which each letter was insured during the year 1897-98 was Rs 258 as compared with Rs 259 in the preceding year, and the average value for which each parcel was insured, Rs 227 against Rs 214 in the preceding year.

39. The number of claims for compensation on account of the loss of insured articles or the abstraction of their contents during the year under review was 34 as compared with 54 in the previous year. Six claims arose out of losses by highway robbery of mails all in British territory, and 6 claims had to be met in respect of insured articles lost in an accident which occurred on the 2nd April 1897 to the Rivers Steam Navigation Company's steamer *Lookit* on the river Megna, when she was caught in a sudden squall and sank with all the mails on board, about an hour's run from Chandpur. Out of the 34 claims made, 24 were admitted and in 12 of these 24 cases the loss was caused by fraud or negligence on the part of servants of the Post Office. The usual statement showing the cases in which compensation was actually paid or in which the claims were admitted during the last two years, is given on the margin. It

Claims for compensation.

Cases in which compensation was paid or the claims admitted.	1896-97.		1897-98.	
	No.	Amount.	No.	Amount.
		R s. p.		R s. p.
Loss by accident or departmental neglect or fraud	26	9,158 2 0	18	4,177 0 0
Loss by highway robbery in British territory	1	625 0 0	6	3,525 0 0
Loss by highway robbery in Native States.	19	6,042 0 0	...	...
	46	15,825 2 0	24	7,702 0 0
Value of property recovered.	...	5,082 0 6	...	637 0 0
Balance being amount of claims admitted.	...	10,743 1 6	...	7,045 0 0

will be seen that the claims admitted by the Post Office in the year under report amounted to Rs 7,045-0-0 or 2'65 per cent. of the total amount realized from insurance fees, as compared with a percentage of 4'57 in the previous year. Of the 10 cases in which

claims were not admitted 4 were actually rejected, the remaining 6 being pending at the close of the year. In all 4 cases in which compensation was refused, the Post Office declined to accept responsibility, as the insured articles had been delivered in good condition, on a clear receipt, and there was good reason to believe that the articles said to be missing were either not inside the insured covers when the latter were posted or that they were abstracted after delivery. In one of these cases, in which four sovereigns were said to have been stolen from a parcel, it was evident from the weight of the cover and its contents that the sovereigns could not have been removed from the parcel before delivery. In a second case, also of alleged abstraction of sovereigns, the enquiry showed that in all probability the theft took place before the parcel was posted, and that the pieces of lead, which were found inside the parcel on its being opened by the addressee, had been substituted for the original contents before the parcel was actually presented at the post office for insurance. In 2 of the two remaining cases, in which the contents of an insured letter, declared to be currency notes, were found on delivery to be a few old letters, it was clear that a false declaration had been made by the sender, for which he was prosecuted, and, on conviction, sentenced to 18 months' rigorous imprisonment, and a fine. The last of these four cases was one in which it was alleged that a gold bar had been abstracted from an insured parcel. No satisfactory conclusion could be arrived at in this case, but as the parcel was delivered in good outward condition on a clear receipt, the claim was rejected.

## Section VIII.—Value-payable System.

Value-payable post

40. The development of the value-payable business since its introduction in

YEAR.	Articles sent under the value payable system.	Value declared for realization.	Commission.
	No.	₹	₹
1877-78 (from the commencement of the system in December 1877) 4 months	413	6,721	195

1895-96	1,877,693	2,10,57,029	3,84,196
1896-97	2,009,092	2,10,10,800	4,21,839
1897-98	2,180,465	2,56,62,825	4,80,613
Increase per cent in 1897-98	8.53	11.38	10.87

1877 is shown in the marginal table, and it will be seen that the steady and rapid progress of this branch of the Post Office work was more than maintained during the year under report, and that the business has practically doubled since 1890-91. The total number of articles of all kinds sent through the post under the value-payable system was 2,180,465 as compared with 2,009,092 in the previous year;

the total amount specified for recovery from the addressees was over 2½ crores of rupees against less than 2½ crores, while the commission realized was nearly half a lakh more than in the previous year. There was thus an increase of 8.53 per cent, in the number of articles, of 11.38 per cent, in the value specified for recovery and of 10.87 per cent, in the commission realized. As in previous years, nearly two-fifths of the entire business of the year was transacted in the Bengal circle, or practically in Calcutta. Out of a total of 818,602 articles sent by the value-payable post in the whole of the Bengal circle, 779,808 were posted at the Calcutta General Post Office and its town sub-offices, and of the sum of over 92½ lakhs of rupees recovered from the addressees of value-payable articles posted in that circle, 88 lakhs of rupees were payable to the tradesmen of Calcutta. This amount was 4½ lakhs of rupees in excess of the corresponding figure of the preceding year.

The value-payable business with Ceylon shows steady progress since its introduction in 1891. During the year under report 23,697 value-payable articles of the aggregate value of ₹2,07,000 were despatched from India to Ceylon as compared with 21,713 articles of the aggregate value of ₹1,58,071 in the preceding year. The value-payable system has not yet been introduced between India and any other foreign country.

Classification of value-payable articles.

41. In the statement on the margin details are given of the different classes of

	No.	Value.	Commission.	Average value of each article.			Average commission on each article.
		₹	₹	₹	s.	p.	Annas.
Value-payable parcels	776,772	65,00,277	1,33,792	8	5	8	3
Value-payable railway receipts	283,850	82,62,243	1,06,932	29	1	9	6
Value-payable registered letters and registered packets	222,343	75,28,018	90,802	33	13	9	6
Value-payable unregistered packets	897,530	33,72,287	1,25,087	3	12	1	2
TOTAL	2,180,465	2,56,62,825	4,56,613	11	12	4	3

articles sent through the post under the value-payable system. As compared with the figures of the previous year, the result is an increase of 8.78 per cent, in the number of value-payable registered parcels, of 11.70 per cent, in the number of value-payable railway receipts, of 24.45 per cent, in the

cent, in the number of value-payable railway receipts, of 24.45 per cent, in the

number of value-payable registered letters and packets, and of 4·09 per cent. in

YEARS.	Average value of each article (taking all classes of articles together).		
	R	As	P.
1891-92	10	18	0
1892-93	10	11	4

1894-95	11	7	8
1895-96	11	8	6
1896-97	12	7	5

that of value-payable unregistered packets. The average value of each article, taking all classes of articles together was R11·12-4. The table in the margin shows the average value during the last 6 years. The average commission on

each article was practically the same as in the preceding year.

### Section IX.—Miscellaneous.

42. The following statement shows the transactions of the Post Office Post Office  
Guarantee  
Fund. Guarantee Fund during the year under report. The balance at the credit of the Fund, including the nominal value of Government Securities purchased on its behalf, rose from R6,41,920 on the 31st March 1897 to R6,69,225 on the 31st March 1898. The subscriptions realised from postal servants amounted to R14,923, while the amount decreed against the Fund in connection with frauds committed by officials of the Department was R14,195 as compared with R16,469 in the previous year and with an average of R17,625 for the last ten years. A sum of R23,700 was added to the Fund on account of interest during the year under report.

RECEIPTS.	Amount.	CHARGES.	Amount.
	R		R
Balance of 1896-97 <sup>a</sup>	6,41,920	Refund on account of excess realisation	783
Interest on R3,00,000 at 4 per cent. from April 1897 to March 1898	12,000	Sums decreed against the Fund	14,195
Interest on Government Securities of the nominal value of R2,94,000 (3½ per cent. loan of 1895) for the half-years ending 30th April 1897 and 31st October 1897	10,290	Refunds to subscribers on account of returnable subscriptions	1,377
Interest on Government Securities of the nominal value of R37,000 (3 per cent. loan of 1896-97) for the half-years ending 29th June 1897 and 30th December 1897	1,110	Rewards to persons who gave information leading to important results in Post Office robbery cases	252
Interest on Government Securities of the nominal value of R20,000 (3 per cent. loan of 1896-97) for the half-year ending 30th December 1897	300	Compensation to Postal servants for loss of private property	182

<sup>a</sup> Inclusive of Government Securities of the nominal value of R3,31,000.  
† Do. do. do. do. R3,51,000.

43. The number of complaints made by the public during the year under review was 19,053 against 18,827 in the previous year. There was thus an increase of 1·21 per cent. in the number of complaints received in 1897-98 as compared with the previous year's figures and as compared with a corresponding increase of 5·98 per cent. in the number of articles dealt with by the Post Office. The proportion of cases in which the complaints were found to be Complaints  
by the  
public

well founded was only 35·02 per cent. of the whole number, and the entirely groundless complaints were 38·58 per cent. of the total. In the remaining cases the investigation of the complaints had either not been completed at the end of the year, or although the enquiry had been completed no definite conclusion had been arrived at.

Under the head of groundless complaints are included all those which turn out to have no justification, though there may have been reason for asking for an enquiry. There are always, however, a number of complaints made without any real cause, of which the following may be cited as an instance. Numerous complaints having been received against a village postman in Eastern Bengal, a superior officer of the Department was specially deputed to enquire into the matter on the spot. It was then ascertained that the complaints had been lodged by or on behalf of a prominent resident of the village who thought that he had been insulted, because the village postman had once inadvertently handed him a letter with his left, instead of with his right, hand, and that the whole of them were either made up, or grave exaggerations.

It should be added that the difficulty of making effectual enquiries regarding the loss or miscarriage of unregistered articles, and the danger of complaints being treated as mere matters of routine have been fully recognized by the Post Office of India as it is recognized by all postal administrations. The clearest instructions on this subject are contained in the rules of the Department, and it may be fairly claimed that it is a constant endeavour on the part of those in authority to ensure that investigations shall be thorough, and that every reasonable complaint shall receive real attention. That there should be some failures is inevitable when the enormous mass of business of the Department is looked to, but it can only be repeated that complaints, when facts can be given, are really welcomed by the administration, and that year by year much care and patient trouble is expended on putting these complaints to their real purpose.

44. The usual statement is given below showing the number of complaints received during the year regarding registered letters, ordinary parcels, insured letters and value-payable articles. These figures are included in the number of complaints shown in paragraph 43. of this report.

Complaints  
regarding  
special  
classes of  
articles.

	1897-98.				Total.	
	Registered letters.	Ordinary parcels.	Insured letters and insured parcels.	Value-payable parcels and Value-payable registered articles.	1897-98.	1896-97.
I.—Cases in which enquiry showed either that no loss occurred or that the loss had not occurred through the fault of postal officials	240	166	22	75	503	543
II.—Cases in which the postal establishment was proved to be in fault, or in which there was strong ground for believing it to be so	130	73	19	62	284	277
III.—Cases in which no definite conclusion was arrived at or which were pending	70	102	10	26	208	208
<b>Total</b>	<b>440</b>	<b>341</b>	<b>51</b>	<b>163</b>	<b>995</b>	<b>1,028</b>

It will be seen that out of a total of 995 complaints relating to these special classes of postal articles, 503 or 50·55 per cent. were groundless, and that the proportion of cases in which postal officials were proved to be in fault was 28·54 per cent. The percentage of cases in which no definite conclusion was arrived at, or which were pending at the close of the year, was 20·9. The complaints were rather less in number than those received in the previous year, although there was

an increase of over half a million registered letters, over a quarter of a million parcels, over 170,000 value-payable articles, and over 28,000 insured articles. Complaints which proved to be well-founded were made by the public in respect of only 130 out of 9,375,651 registered letters, 73 out of 2,965,990 parcels, 19 out of 326,645 insured articles and 62 out of 2,180,463 value-payable articles.

45. The number of cases in each postal circle in which servants of the Post Office were found guilty of offences punishable by law is shown in Appendix VIII, and a summary of the figures is given on the margin. The

	1896-97.	1897-98.
Number of legal convictions	153	145
Number of cases departmentally punished	139	161
	292	306

total includes 59 cases of misappropriation of office cash, 112 money order frauds, 10 savings bank frauds, and 95 cases of theft from mails and post offices. Most of the remaining offences relate, as usual, to letters, parcels, and other mail matter properly so-called. Among the offenders convicted or departmentally punished were 64 departmental postmasters and 37 clerks (including 1 Railway Mail Service sorter), 71 extraneous agents in charge of post offices, 65 postmen and village postmen, 2 telegraph messengers, 2 overseers, 24 runners and 13 others employed on various other duties in post offices. The amount of defalcations and losses was Rs. 4,285-15-11 as compared with Rs. 37,020-3-7 in the previous year and Rs. 34,646-12-5 in 1895-96. Rupees 20,100-1-9 was recovered from the offenders or their sureties; Rs. 1,514-5-8 was decreed against the Guarantee Fund, and Rs. 12,671-8-6 remained unadjusted at the close of the year.

46. There were 4 cases of fraud in respect of money orders to the value of Rs. 159-14-0 and one case of fraudulent withdrawal amounting to Rs. 130-0-0 from the savings bank in which persons not belonging to the Post Office were concerned. Besides these, there were 49 cases of house-breaking and theft of Government money from post office safes and from the mails, apart from the cases of highway robbery which are separately dealt with. The total amount stolen was Rs. 3,274-9-0, of which Rs. 1,741-13-8 was recovered, Rs. 624-1-1 was written off as finally lost, and Rs. 908-10-3 was unadjusted at the close of the year.

47. The usual abstract is given in the margin showing the number of cases in which the mails were plundered by highway robbers during the year under review and in the previous year, whether in British territory or in Native States. There were 37 cases of the kind during 1897-98 as compared with 36 in 1896-97. Of these 37 cases, 27 occurred in British territory as compared with 28 in the previous year, and 10 in Native States as compared with 8 in the previous year, so that the increase in the total number was wholly due to the offences committed in Native States. The increase was greatest in the North-Western Provinces and Oudh where the number of these cases rose from 6 to 11. In Bombay, Madras, and the

States as compared with 8 in the previous year, so that the increase in the total number was wholly due to the offences committed in Native States. The increase was greatest in the North-Western Provinces and Oudh where the number of these cases rose from 6 to 11. In Bombay, Madras, and the

Punjab the number also increased; while in the Central Provinces and Berar, where there were no cases of the kind last year, two occurred during the year under report. On the other hand, in Bengal as well as in Bihar and Rajputana, the number decreased, while there were no mail robberies at all in the Assam, Burma, Eastern Bengal, and Sind and Baluchistan circles.

Character  
of mail  
robberies.

48. In 13 out of the 37 cases of highway robbery the mail carriers were wounded by the robbers, and in four cases so severely as to necessitate their detention for some time in hospital. In a case that occurred in the Hissar district of the Punjab, the runner was killed and his body buried in the sand. Three men who were supposed to be implicated in the murder were arrested. One of these was tried for the crime and sentenced to death. In another case which occurred in the Thana district in Bombay, the runner was murdered by a spear-thrust through his neck. Two men concerned in the murder were arrested. One of them was sentenced to death and the other to rigorous imprisonment for a term of ten years. Two other cases accompanied by loss of life occurred beyond the border in Waziristan. In one of these cases the driver of the mail *ekka* in which the mails were being conveyed from Miranshah to Bannu was shot dead by a party of some 30 or 40 Waziris. Three men were arrested on suspicion in connection with this crime, but were discharged for want of evidence. In the other case two mail *ekkas* while on their way to Miranshah, were fired on by a party of Waziris who were concealed behind some rocks. Two sepoy who were escorting the mails were shot dead; the two *ekka* horses were also killed on the spot; and one of the *ekka* drivers and a passenger succumbed shortly afterwards to the wounds they received. The object of this attack appears to have been to obtain possession of the arms and ammunition which the two sepoy were carrying. No one was brought to account for this outrage. The only other case involving a loss of life occurred in the Ellichpur district in Berar, where a runner was beaten to death by his assailants with clubs. For this crime one man was convicted of murder and sentenced to death, but on appeal the sentence was reversed by the Judicial Commissioner of the Hyderabad Assigned Districts who sentenced him to three years' rigorous imprisonment on a charge of receiving stolen property. In a case that occurred in the Meerut district of the North-Western Provinces, the mail bag carried away was found hanging on a tree. It had, however, been opened and a parcel which it contained was missing. In another case that occurred also in the North-Western Provinces, in the Bijnor district, the enquiry took an extraordinary turn and resulted in the conviction of three police officials who were investigating the case, one of the rank of Inspector and two Sub-Inspectors, under Section 195 of the Indian Penal Code, for fabricating false evidence, and they were each sentenced to three years' rigorous imprisonment. In one of the cases that occurred in the Madras Presidency the object of the robbers appears to have been to obtain some official papers. The bulk of the mail was found intact, but most of the articles addressed to Government officers had been opened.

There were only 11 cases in which Government suffered any loss, and the total loss amounted to Rs. 4,865-11-8. Of this sum Rs. 1,340-11-8 was taken from the mails in actual cash, while Rs. 3,525 represents the compensation that had to be paid for insured articles. In 11 cases the entire mail was recovered, in 19 cases a portion was recovered, and in the remaining seven cases the entire mail was lost. Prosecutions were instituted in 17 cases, in 10 of which convictions were obtained. In addition to the cases of actual highway robbery mentioned above, there were three unsuccessful attempts to rob the mail, two of which took place in British territory and one in a Native State.

Casualties.

49. There were various other cases during the year in which the lives of postal servants were lost and destruction of property was caused by storms,

floods, fires, and other causes. On the 12th June 1897 a severe shock of earthquake was felt throughout Bengal and Assam, which caused the entire destruction of 25 post office buildings, though happily there was no loss of life among servants of the Department. In addition to the buildings altogether destroyed, 52 others suffered damage, which was of so serious a nature in 18 cases that the buildings had to be almost entirely rebuilt. The Chittagong district in Eastern Bengal was visited, on the 24th October 1897, by a cyclone of unusual violence, which levelled almost all the buildings in the district to the ground, causing the total destruction of 33 post office buildings, of which 20 were the property of Government, while 8 others were more or less seriously damaged. In one instance the destruction of a post office was unfortunately attended by loss of life, a postman and a daughter of the sub-postmaster being killed by the falling house. In March 1898 a mail runner was killed by a tiger in the Singbhum district of Bengal while returning to his stage and several lives were lost by river accidents. In August 1897 two mail carriers were drowned in Travancore owing to the capsizing of a boat in which they were crossing a stream, and later in the year a village postman of the Gorakhpur district in the North-Western Provinces lost his life owing to a similar accident. In the following month a small mail boat was upset in a whirlpool on the Sittang river in Burma and one of the mail carriers in it was drowned, while another mail carrier perished in Cutch while attempting to ford a stream that was in flood. It should be added that a village postman in the Jummoo province of Kashmir was precipitated into the river Chenab, owing to the collapse of a swinging bridge over which he was crossing, and was never seen again. A mail peon attached to the Chandernagore post office was run over and killed by a train on the East Indian Railway. It was his duty to attend to the mail exchanging apparatus by the side of the railway line, and it is supposed that he had incautiously walked down the line and failed to hear the train coming up behind him.

In four instances during the rains of the year under report, mails were lost in the attempts of the mail carriers to cross streams that were in flood. In another instance a sowar who was conveying the mails to Miranshah in the Tochi Valley was carried away by a flood which came down the road, and narrowly escaped being drowned. Most of the mails were, however, recovered when the flood subsided. On the 23rd February 1898 the Royal Indian Marine Steamer *Fagan* with five mail bags on board was wrecked on her way from Kindat to Mandalay in Burma. The mail bags were saved, though the contents were much damaged. On the 6th August 1897 the boat conveying mails from the S.S. *Plover* to the Sualkuchi post office in Assam capsized, resulting in the loss of an account bag containing a remittance of Rs 100. A more serious accident of the same kind that occurred during the year was the loss of the River Steam Navigation Company's Steamer *Lookit* on the 2nd April 1897, about an hour's journey from Chandpur. The steamer was caught in a sudden squall on the river Megna and sank with all the mails on board, comprising a large number of insured, value-payable, and other registered letters and parcels.

During the year 21 post offices were destroyed by fire, of which 7 were the property of the Department and two post office buildings were blown down by storms. A postal van attached to the Delhi-Umballa-Kalka Railway mail train was completely burnt on the 14th June 1897 between the Lahu and Ghaggar stations. The fire originated in a horse-box, in front of the mail van, and this vehicle as well as the brake van next to it were also burnt. Owing to the promptitude of the sorters who were in the mail van, the whole of the mails were saved. There was no loss of life during the year under report on the mail lines to Chitral, Leh and Gilgit which cross over Himalayan

passes at high elevations, but on two occasions during the winter the runners carrying the mails from Chitral were more or less seriously injured while crossing the Lowari Pass, 10,450 feet in height, and a runner was hurt in a land-slip which occurred on the Srinagar side of Kargil, on the Leh line.

Post Office staff.

50. The establishment of the Imperial Post Office in the various grades is

Postal Officials.	1896-97.	1897-98.	Percentage of Increase.
Chief Officers of the Directorate and Account Offices and Heads of Circles	82	83	0.00
Superintendents, Probationary Superintendents, Assistant Superintendents and Inspectors of Post Offices	441	449	1.81
Postmasters, including Deputy, Assistant, Sub and Branch Postmasters	5,109	5,154	0.88
Extraneous agents, such as schoolmasters and station-masters	4,983	5,276	5.88
Clerks	7,335	7,434	1.35

TOTAL	50,755	51,966	2.38

\* One less shown in 1896-97.

increase under the several heads was due to the general development of Post Office work, the largest purely postal increase being under the head of extraneous agents and village postmen. This is owing to the special attention which continues to be paid to providing postal facilities in rural tracts. The staff of the Post Office included 164 pensioned soldiers of the native army, of whom 34 were non-commissioned officers and 130 sepoys. These men were employed in various capacities, such as branch postmasters, clerks, postmen or packers. Out of the total number of 164 pensioned soldiers, 92 were serving in the Punjab, and 39 in the Madras circle. During the year 1897-98, 40 women were employed in the Post Office, of whom 37 were European or Eurasian. Of these 40 women, one was postmistress of a head office, 6 were postmistresses of sub-offices, 4 of branch offices, while 28 were clerks and one a postwoman.

Cost of printing by private presses.

51. The charges incurred during the year on account of printing work done by private presses amounted to Rs. 2,717, as compared with Rs. 3,676 in 1896-97 and Rs. 7,805 in 1895-96.

#### Section X.—Non-Postal Branches of the Post Office.

Postal Telegraph (combined) offices.

52. During the year under review, 81 new combined post and telegraph offices were opened, and 18 previously existing combined offices were closed. Of the latter number, seven offices situated on the North-West Frontier, were transferred from the Post Office to the Telegraph Department to be worked as Departmental Telegraph offices in consequence of the field operations. There was thus a net increase of 63 in the total number of combined offices, as compared with a net increase of 106 during the previous year. Of the new combined offices, 74 were opened at places which had previously been without a Government telegraph office, and 56 at places where there had previously been no Government or Railway telegraph office.

In the Madras circle, seventeen new combined offices were opened. Bombay comes next with ten new offices and then Bengal with nine new offices. The total number of combined offices in each postal circle is shown in the statement given in the next paragraph. At the close of the year there were 1,634 Government telegraph offices, of which 257 were under the control of the Telegraph Department, and 1,377 were combined post and telegraph offices controlled by the Postal Department.

53. The usual statement is given below showing the traffic statistics of combined offices arranged according to postal circles. There was an increase of 208,416 or 11.17 per cent. in the number of messages sent, and of 309,474 or 15.82 per cent. in the number of messages received, while the revenue showed an increase of R2,29,929 or 12.40 per cent. over the figures of the previous year. The number of transit messages rose from 854,103 to 1,017,747, so there was an increase of 163,644 or of 19.15 per cent. in these messages. The total revenue from messages sent from combined offices amounted to R20,84,000, and exceeded the expenditure on the establishment of these offices by R16,21,129.

Traffic statistics of combined offices.

\* Excluding 122,434 free messages.

During the year, 294 servants of the Post Office qualified as signallers, while 106 were under training when the year closed. The number of boys employed as telegraph messengers in combined offices on the 31st March 1898 was 456, as compared with 328 on the 31st March 1897.

54. In addition to messages despatched and received by wire at the 1,377 combined offices, telegrams were received from the public at 1,859 post offices for despatch by post to the nearest telegraph offices, as compared with 1,923 such offices during 1896-97. The number of telegrams booked at these receiving offices was 38,016 and the revenue realized was R35,371, as compared with 39,780 messages booked, and R38,190 realized, during the previous year. The decrease in the transactions during the year under review is probably due to the reduction in the number of receiving offices consequent on an increase in the number of combined offices.

Telegraph receiving offices.

The number of messages booked by post offices in the Persian Gulf on

account of the Indo-European Telegraph Department was 289, as compared with 246 in 1896-97, and fees to the amount of Rs. 3,081-7-0 were realized, as compared with Rs. 3,391-2-0 in the previous year.

Post Office  
Passenger  
and Bullock  
Train Ser-  
vice between  
Kalka and  
Simla.

55. The gross expenditure on the combined Passenger and Bullock Train Service was Rs. 3,76,326 against Rs. 4,38,242 during the previous year, showing a decrease of Rs. 61,916 during the year under report. The receipts amounted to Rs. 3,55,401 as compared with Rs. 3,45,874 during 1896-97, and there was, therefore, an excess of charges over receipts of only Rs. 20,925, although over Rs. 5,000 were paid to the establishment as compensation for the famine prices of grain.

Receipt of  
salt revenue  
at post  
offices.

56. The system of employing this Department as an agency for receiving salt revenue continued in force during the year at a few selected post offices in the North-Western Provinces and Oudh, the Punjab, the Central Provinces and Rajputana; but, as in the previous four years, the transactions were very small during the year under report. The Post Office was made use of to forward to the salt depôts a total of 353 indents for 57,786 maunds of salt of the gross value of Rs. 1,56,050, on which Rs. 798 was realized as postal commission.

Sale of  
quinine at  
post offices.

57. The following table shows the supplies of quinine obtained on indent for sale at post offices in the several postal circles during the year 1897-98 as compared with the figures of the previous year. The result is an increase of nearly 393 lbs. over the latter year.

NAMES OF POSTAL CIRCLES.	SUPPLY IN 1896-97.		SUPPLY IN 1897-98.		INCREASE.		DECREASE.

Net increase 392 lbs. 6,563 grains.

The most noticeable features of the table are the rather marked decrease in the supply of the drug to Bengal, and the still more marked increase in its supply to Madras. As stated in last year's report, the system was abandoned in the Punjab in compliance with the wishes of the Local Government. With the exception, therefore, of Bengal, every postal circle in which quinine was on sale at post offices exhibits a satisfactory increase—a result which may be regarded as showing that the masses are acquainted with its value as a febrifuge, and that they are ready to avail themselves of it when it is procurable at their doors in small quantities at a cheap price.

The falling off in Bengal is confined to Bengal proper, as distinguished from Bihar and Eastern Bengal, and is attributed partly to the diminished prevalence of malarial fevers and partly to the high price of food-grains which made less money available for the luxury of medicines. The large increase of over 326 lbs. in Madras might have been even larger were it not that the price of the drug was raised, under the orders of the Local Government, from two to three pies for the 5-grain packet, with the result that the sales, which till then averaged 71,731 packets monthly, fell to about 39,000 packets a month—a decline of about 45.0 per cent.

In the same circle a trial was made during the year of the system obtaining in some other circles, of entrusting packets of quinine for sale to village postmen and postmen serving villages. The experiment was first tried in three districts and met with such success that it was introduced generally throughout the presidency. It is anticipated that the sale of the febrifuge in this way will be extremely popular in the more fever-stricken tracts. Special efforts were also made in two other circles to promote the popularity of the scheme: in Bombay, directions for the use of the drug were printed on the packets in the several local vernaculars; and in Burma, leaflets were issued in English and Burmese describing the merits of quinine.

The sphere of operation of this branch of postal business was extended in the North-Western Provinces and Oudh, where it now embraces the whole of that postal circle; in the Central Provinces circle, where it now includes all post offices in the Central India Agency, and in Burma, where every village postman and all but a few post offices now sell the drug.

58. A separate report has been submitted, as usual, on the administration of the Postal Insurance Fund. From the 1st February 1898 the benefits of the Fund were extended generally to all Government servants who are subject to Civil Rules, and from the same date a system of Endowment Assurances was added to the scheme. During the year 291 new policies for an aggregate amount of Rs. 4,38,250 were issued. Of these 82 were Endowment Assurance policies issued during February and March 1898, and it would seem that the system of Endowment policies is likely to prove in the future the most popular form of insurance. As regards the scheme for monthly allowances, which has hitherto been practically inoperative, there was a decided increase this year in the number of contracts taken out. Eleven new contracts were issued as compared with two in the previous year, and there were 19 contracts in existence at the close of the year as compared with nine at the end of 1896-97. Since the Postal Insurance Fund was started on the 1st February 1884, 2,966 lives have been insured, and at the close of the year under report there were 2,455 active policies in existence, 1,861 of which were held by Post Office servants and 594 by servants of other Departments. Forty-two claims, amounting in all to Rs. 55,900, were paid during the year on the deaths of insured persons, and the aggregate sum insured at the end of the year was Rs. 34,69,650. In the year under report, as in the preceding one, no advantage was taken by women of the extension of the benefits of the scheme to them. Nine life annuities were purchased under Article 867 of the Civil Service Regulations during the year under report, of which one was subsequently cancelled.

59. The system of paying the pensions of pensioners of the Native Army through the agency of the Post Office in the Punjab continued to work satisfactorily. The total number of pensioners paid during the year under report was 24,713, and the amount paid to them was Rs. 17,82,147. The following table shews the yearly transactions in this branch of business from its introduction.

Year of payment.	No. of pensioners paid.	Amount paid.			Commission to Post Office at 12 annas per cent.

## Section XI.—Financial Results.

Receipts and  
expenditure  
according to  
Depart-  
mental  
accounts.

60. The receipts and charges of the year, as shown in the Post Office accounts, are given in detail in Appendix X, under two main heads, Postal Service proper and Non-Postal branches, a summary of which is given in the statement below :—

	RECEIPTS.		CHARGES.	
	1896-97.	1897-98.	1896-97.	1897-98.
	R	R	R	R
1. Postal Service Proper . . .	1,73,84,646	1,83,23,590	1,28,98,761	1,32,71,540
2. Non-Postal Branches—				
(a) Mail cart, parcel van, passenger and goods service . . .	3,46,476	3,55,708	3,46,476	3,55,708
(b) Mail steamer subsidies . . .	...	...	6,77,964	6,32,889
(c) Contributions from Na- tive States . . .	6,000	6,000	...	...
TOTAL . . .	1,77,37,122	1,86,85,208	1,35,33,201	1,42,60,137

Under Postal Service proper, the net receipts, after deducting the amounts due to the British, Colonial and other Post Offices, were Rs 9,38,854 in excess of those of the previous year, while the charges increased by Rs 4,62,779. The improvement in the receipts was due to an increase of Rs 6,05,606 from the sale of ordinary postage stamps, to an increase of Rs 71,395 in the revenue derived from service postage stamps, and to an increase of Rs 2,70,749 in the income realized from money order commission. There was also an increase of Rs 2,996 in the collections on account of postage paid in cash, and an increase of Rs 11,796 in the miscellaneous receipts of the Department. On the other hand, there was an increase of Rs 3,688 in the payments made to British and other Post Offices. Under the head of Non-Postal branches the receipts were Rs 9,233 more than in the previous year. None of the items of postal expenditure calls for any special notice. Altogether the receipts exceeded the charges by Rs 44,25,071.

61. In Appendix XI will be found a comparative abstract of the receipts and charges of the Post Office for the year, including, under a distinct head (III), certain receipts and charges which appear in the Finance and Revenue Accounts,

RECEIPTS, 1897-98.	R	CHARGES, 1897-98.	R

TOTAL . . .	99,455	TOTAL . . .	30,35,721

but not in the Post Office accounts. The entries under this head are shown on the margin, and if these totals be added to the totals given in the preceding para-

graph, the entire receipts of the year amount to Rs 1,87,84,663, and the entire charges to Rs 1,72,95,858. There was thus a surplus of Rs 14,88,805 on the year's transactions, as shown in the Finance and Revenue Accounts. The charge or account of District Post Establishments has, however, to be excluded, as it is entirely met by grants from District Post funds, which, with the exception of Rs 99,455 shown in the marginal table, are not credited to the Post Office in the

Financial  
position of  
the Post  
Office.

Finance and Revenue Accounts. The actual accounts of the year there-

	Details.	TOTAL.
<i>Add</i> —Railway free service estimated . . . . .	97,610	
Rent of Government Buildings . . . . .	4,15,292	
Gratuities . . . . .	3,504	
Leave allowances paid out of India . . . . .	28,048	
Pension (being the average of five years capital- ised at 10 1/2% year's purchase) . . . . .	5,43,581	10,88,035
<i>Deduct</i> —Share of Marine subsidies which should strictly have been borne by the Military, Political and other Departments . . . . .	1,74,935	
Postage on unpaid official correspondence sent from India to the United Kingdom (formerly collected and brought into account) . . . . .	38,858	2,13,793
Net amount to be added . . . . .		8,74,242

fore show a surplus of Rs 27,49,951. In order, however, to bring out the complete financial results of the year in the usual way, the net balance of the items marginally shown\* must be deducted from the surplus just noted, and the net financial result is a surplus of

Rs 18,75,709 as compared with Rs 12,51,973 in 1896-97 and with Rs 10,29,230 in 1895-96.

In this estimate of the financial position of the Post Office no allowance has been claimed, as stated each year, on account of the services rendered by the Department to Government in the management of the Post Office Savings Bank and in carrying official correspondence at exceptionally low postage rates. It will be seen from the figures noted above that the Post Office is now showing steady progress every year in its financial position. The progress this year is all the more noticeable, regard being had to the prevalence of both famine and plague, almost throughout the year.

#### Section XII.—Notice of Post Office Officials.

62. I have much pleasure in bringing to the notice of Government the valuable services rendered by Mr. H. M. Kisch, as the delegate of the Indian Post Office at the Washington Congress. Mr. Kisch has already received the special thanks of Government for the excellent work done by him on this occasion, but it is right that his name should also be mentioned here. Mr. Kisch was accompanied to Washington by Mr. Doran, Assistant Director-General, in the capacity of Secretary, and has reported in the highest terms of the assistance received by him from that officer. I have also much pleasure in bringing to the notice of Government the name of Mr. P. Sheridan, Postmaster-General, Punjab, for his successful organization and management of the postal arrangements for the various expeditions on the frontier, and with his name the names of Mr. W. T. vanSomeren, C.I.E., Chief Superintendent with the Tirah Expedition, of Mr. H. C. Sheridan, Superintendent in charge of the arrangements with the Malakand Field Force, and of Mr. C. J. Stowell, Superintendent with the Mohmand Field Force. All these officers also have already received the thanks of Government, but, in accordance with the usual practice, are mentioned again in the Annual Report. I also wish to place before Government the name of Mr. Owens, Presidency Postmaster of Calcutta, for his success in carrying out the novel scheme of a continuous delivery in that city, and the name of Babu Profulla Chandra Banerji, officiating Deputy Postmaster-General, Eastern Bengal, for his energy and good work in dealing with the difficulties caused by the great cyclone of October 1897, in the Chittagong District. The name of Rai Bahadur Daulat Ram, C.I.E., also deserves prominent mention. During the last two years he has had special anxieties and difficulties to contend with in the management of the Kalka-Simla service, chiefly owing to the prevalence of famine prices, and his management has never been more successful. He received the distinction of a Companion-

Mention of  
Officers of  
the Post  
Office.

ship of the Indian Empire on the occasion of Her Majesty's Jubilee, in recognition of his long and meritorious work while in charge of this line. The services of the following officers also, who have been mentioned by heads of circles, deserve special recognition:—Mr. L. Byrne, Superintendent of the Lahore Division of the Railway Mail Service, upon whom very onerous duties devolved in connection with the postal arrangements for the various frontier expeditions; Mr. A. Bean and Mr. A. B. Thompson, Postal Superintendents with the Tirah Expedition; Mr. Appleby, at first Base Postmaster for the Malakand Field Force and afterwards an officiating Superintendent with that Force; Mr. Cama, at first Inspector and afterwards Superintendent with the Malakand Field Force; Lala Bhagwandas, Base Postmaster for the Tirah Expedition; Mr. G. O. Hart, Assistant Superintendent, Railway Mail Service, for his courage and determination in getting through the mails on the Eastern Bengal Railway after the earthquake of June 1897, and Babu Rash Bihari Das, postmaster of Shillong, for his promptitude in making arrangements for carrying on the work of the office in a temporary building, the post office having been entirely destroyed by the earthquake.

I have the honour to be,

Sir,

Your most obedient Servant,

A. U. FANSHAWE,

*Director-General of the Post Office of India.*

SCHEDULE OF PRINCIPAL STEAM SERVICES (1897-98).

*By the British India Steam Navigation Company.*

- (1) Direct communication twice a week between Calcutta and Rangoon.
- (2) Weekly communication between Calcutta and Rangoon via Chittagong, Akyab, Kyauk-Phyu and Sandoway.
- (3) Weekly direct communication between Madras and Rangoon.
- (4) Weekly communication between Madras and Rangoon via the N. E. Coast ports.
- (5) Communication three times a week between Rangoon and Moulmein.
- (6) Weekly communication between Rangoon, Tavoy and Mergul.
- (7) Direct communication twice a week between Bombay and Karachi.
- (8) Weekly communication between Bombay and Karachi via the Coast ports.
- (9) Weekly communication between Karachi and Basrah via the Persian Gulf ports.
- (10) Daily communication (Sundays excepted) between Tuticorin and Colombo.
- (11) Additional services between any of the ports served by the above-mentioned lines, and between Burma and the Straits.

- (12) Fortnightly service from Negapatam to the Straits.

Under contract with the Post Office for ten years, from 1st May 1894, on an annual subsidy of Rs. 5,500.

Under contract with the Post Office so long as the service is actually maintained on payment of a special additional subsidy at the rate of Rs. 6,000 per annum.

*By the Asiatic Steam Navigation Company.*

- (13) Six-weekly communication between Calcutta and Port Blair, with extensions to Madras and Rangoon.

The consideration is not in the form of subsidy, but of guaranteed rates for the transport of Government stores: the contract is for five years, from 1st January 1895, and is terminable after the five years by a notice of six months.

*By the Irrawaddy Flotilla Company, Limited.*

- (14) A daily service between Mandalay and Myingyan to and fro each way (except on Saturdays).
- (15) A daily service between Myingyan and Pokokku to and fro each way (except on Sundays).
- (16) A daily service between Promo and Thayetmyo to and fro each way (except on Sundays).
- (17) A service twice a week between Thayetmyo and Pokokku to and fro each way.
- (18) A weekly service between Pokokku and Kindat to and fro each way.

Under contract with the Local Administration originally for five years from the 1st August 1896 to the 31st March 1901. The subsidy is Rs. 7,000 per mensem, towards which the Post Office contributes Rs. 2,722.

- (19) Six times a week between Katha and Bhamo.

Under contract with the Local Administration originally from 1st July 1896 to 30th June 1897, which has however been extended to the 31st October 1898. The subsidy is Rs. 1,500 a month, towards which the Post Office contributes Rs. 388.

- (20) A service three times a week between Thayetmyo and Minbu to and fro each way.

Under contract with the Local Administration from 1st January 1896 to the 31st March 1899, but terminable at any time by 30 days' notice from either party. Monthly subsidy Rs. 1,000 per mensem.

- (21) A service three times a week between Rangoon and Bassein.

Under contract with the Local Administration from 1st January 1896, and to continue in force until six months' notice is given by either party, the subsidy being Rs. 1,250 per mensem, towards which the Post Office contributes Rs. 250.

- (22) A service twice a week between Bassein and Henzada.

*By the Euphrates and Tigris Steam Navigation Company.*

- (23) Weekly communication on the River Tigris between Basrah and Bagdad.

Under contract for ten years, from the 1st May 1894, with Her Majesty's Secretary of State for India. Subsidy Rs. 4,000 per annum: steamers to run in connection with line No. 9.

and the total numbers at the end of the official years 1896-97 and 1897-98.

\* Calculated from the actual duration of 14 days.

*By Messrs. Apear & Co., Calcutta, and Jardine, Matheson & Co., Hong-Kong.*

- (24) Communication at irregular intervals between Calcutta and the Straits and Hong-Kong, the dates of departure being regulated mainly with reference to the Calcutta opium sales. } No subsidy.

*By the Peninsular and Oriental Steam Navigation Company.*

- (25) Fortnightly communication between Calcutta and Colombo, touching occasionally at Madras. } Non-contract lines maintained by the Company in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.
- (26) Fortnightly communication between Bombay and Colombo.

*By other Agencies.*

- (27) By River Steam Navigation Company.—Daily communication between Rowmari and Dibrugarh on the Brahmaputra River. } Under contract with the Post Office from the 1st May 1898 to the 30th April 1903. Annual subsidy Rs75,000, towards which the Bengal Government and the Assam Administration contribute Rs40,000.
- (28) By Messrs. Shepherd & Co.'s Steamers.—Daily communication between Bombay and Goa. } Under contract with the Local Government from 1st October 1897 to 31st May 1898. The monthly subsidy is Rs3,000, towards which the Post Office contributes Rs969-6 and the Portuguese Government Rs200\*.
- (29) By Mr. G. E. L. Dawson.—A steamer service three times a week between Butti-daung and Akyab from 1st October to 30th April in each year, and during the remaining months of each year a service twice a week. } Under contract with the Local Administration for five years from 15th February 1898, but terminable at any time by either party giving six months' notice. Subsidy Rs15,000 a year.
- (30) By Mr. G. E. L. Dawson.—A steam launch service twice a week between Akyab and Paletwa from 1st October to 30th April in each year, and during the remaining months of each year a weekly service.

\* Discontinued for the period from 1st January to 31st May 1898.

## No. III.

number of Money Orders received in the Post Offices (both Imperial and District Post) under the Bengal, Bombay, Eastern Bengal, Rajputana, and Sind and Baluchistan postal-circles, during the years 1896-97 and 1897-98.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting discount to vendors.

Column 3.—The great difference observable in this column etc. due mainly to changes of system in the treatment of official correspondence, which was charged at full rate up to 1860-61, at the same rate as ordinary correspondence (letters, packets, etc.) from that year to 1870-71, and afterwards at a low privileged letter rate of one anna for 10 letters (about 400 Rs.).

Column 4.—The figures in this column show the revenue so collected by the changes of system in respect of official correspondence mentioned in the note regarding column 3.

## No. XII.

*of the Post Office Department in India from 1853-54 to 1897-98.*

an accord of concurrence of passport or of any of the sub-postal branches of the administration.]

[illegible]

Column 10.—The figures in this column show the proportion of the cash collections in column 8 to the total postal receipts of columns 1, 2, and 4. The comparisons compare with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collection is eleven.

Columns 11 to 13.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1872-73.

John Maynard wrote to include letters to Gibraltar, Malta, and places east of Sicily.

(2) Revised as 24 to show the number of articles exchanged with the United Kingdom instead of the number of postage rates.

\* Inclusion from 1999-2000

\* 1,222 million of fines under this head have in 1983-84 been included in column 10.

(13) Revised so as to show the number of letters conveyed by P. and O. contract ~~mailers~~ to and from Europe and Egypt only.

(d) Payment is made at this rate for the first six months. Payment to be made under terms of this contract has not yet been notified.

SUPPLEMENT TO  
**The Gazette of India.**

No. 3.1 CALCUTTA, SATURDAY, JANUARY 21, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, January 7th, 1899.**

The cold weather storm which was the chief feature of the weather of the last three days of the previous week lay over South and Central Bengal at the beginning of the week under review. It advanced eastwards during the next 24 hours and completely filled up. It was a comparatively important disturbance in its last stage of existence and occasioned only very light local showers in East Bengal, Assam and Upper Burma. Whilst the previous storm was breaking up in North-Eastern India a disturbance was quickly formed in Berar and the Central Provinces. This drifted rapidly eastwards through Chota Nagpur and the neighbouring districts, on the 3rd into Bengal, where it filled up before the morning of the 4th. Fairly general rain due to the disturbance fell in the Gangetic Plain on the 3rd, and Bengal on the 4th and light to moderate snow in the eastern half of the North-West Himalayas. Weather was fine and dry over the whole of the Indian area on the 5th, except for a few local thunder showers in Upper Burma and Bengal. An important change however occurred during the day in Berar and the Central Provinces. A depression similar in character to the previous was generated rapidly in that area before the morning of the 6th, and transmitted eastwards to Chota Nagpur and South-West Bengal during the succeeding 24 hours. It was a much more influential disturbance than its immediate predecessor and gave light to moderate rain over the greater part of North-Eastern India, Bundelkhand and Baghelkhand and some snow in the North-Western Himalayas. Weather was throughout the week fine with clear or lightly clouded skies over the area outside the influence of the disturbances of the week.

The chief feature of the weather of the week was the prevalence of very low temperature both by day and night over the large area including Baluchistan, the Punjab, Sind, Rajputana, Gujarat, Central India and the North-Western Provinces. The deficiency was throughout the week most marked in

Baluchistan and the North-Western Himalayas where it ranged between  $7^{\circ}$  and  $18^{\circ}$ .

**Daily Summary.—Sunday, January 1st.**—Pressure was practically unchanged in the Peninsula and was in moderate to considerable defect in that area. It had increased to a slight extent in North-Western India and Burma, and was below the normal by amounts ranging between  $02''$  and  $09''$ . Pressure had recovered briskly to rapidly in Bihar and the eastern districts of the North-Western Provinces and of Central India, and the depression which lay over Bihar on the previous day had advanced into Bengal where the barometer had fallen slightly to briskly. Pressure was a sixth of an inch in defect of the normal in the area of depression in South and Central Bengal. Winds were anti-cyclonic in North-Western and Central India, feebly cyclonic in Bengal, south-easterly in the Deccan and generally north-easterly in Southern India, and the west coast districts. They were very light and irregular in Burma. Skies were more or less heavily clouded in Bengal and Assam, moderately clouded in Southern India and clear over the remainder of the country. Light snow had fallen at Simla and Chakrata and some light local rain showers in South Bengal and Assam. Temperature had increased rapidly in North-Eastern India in front of the depression and was during the preceding 24 hours  $8^{\circ}$  in excess of the normal in Orissa,  $6^{\circ}$  in Chota Nagpur,  $3^{\circ}$  in Bengal, due chiefly to much higher night temperature than usual. Temperature was practically unchanged in Berar, the Central Provinces and the Deccan and continued in moderate to large excess over that area. The cool wave in the rear of the depression had caused a very rapid reduction of temperature in Rajputana, Central India and the North-Western Provinces, and the mean temperature during the past day averaged  $7^{\circ}$  below the normal in the Punjab, Sind and Gujarat,  $6^{\circ}$  in Rajputana,  $2^{\circ}$  in Central India and  $1^{\circ}$  in the North-Western Provinces. Temperature had increased in Baluchistan and the Upper India hills, but was still very largely below the normal.

**Monday, January 2nd.**—The pressure changes of the previous 24 hours were large and unimportant over by far the greater part of the country. Pressure had increased briskly to rapidly in North-Eastern India and Upper Burma, and the depression in South and Central Bengal on the 1st had filled up and disappeared. Pressure had given way briskly to rapidly in North-Western and Central India, Berar and the western half of the Central Provinces, and was in considerable to large defect over the whole of that area and in Baluchistan. A depression in which pressure was nearly two-tenths of an inch below the normal had formed quickly over Berar and the western and central districts of the Central Provinces during the past day. Pressure had increased slightly in the southern half of the Peninsula thus reducing the deficiency in that area. Northerly winds had set in over South Bengal. Winds had increased in Berar, the Central Provinces and the North Deccan where they were irregularly cyclonic in direction. They were light and irregular on the Madras Coast. Skies were moderately clouded in the Central Provinces and were clouding over in the North-Western Provinces and Bihar. Heavy rain had fallen at Colombo and some very light local showers in Bengal, Assam and Upper Burma. A brisk to rapid reduction of temperature had occurred over the North-Western Provinces, Central India, Chota Nagpur, Bengal, Orissa and Assam and was practically unchanged elsewhere.

**Tuesday, January 3rd.**—The barometric changes were again large over the greater part of the country. Pressure had increased briskly in Baluchistan and briskly to rapidly in North-Western India, Berar and the Central Provinces, and was in moderate to considerable defect over nearly the whole of that area. Pressure had, on the other hand, fallen briskly to rapidly in Chota Nagpur, South Bihar, West Bengal and the eastern districts of the North-Western Provinces, and was considerably to largely below the normal. The depression in Berar and the Central Provinces on the previous day was now passing through Chota Nagpur and the neighbouring districts. Pressure was stationary in Burma and the southern half of the Peninsula, and was below the normal to a moderate extent. Winds exhibited an irregular cyclonic circulation in the area of depression, but were generally light. Skies were overcast in the Gangetic Plain and Chota Nagpur and light to moderate showers had fallen in these areas. Pressure was largely in defect in the hill districts in North-Western India and weather was feebly disturbed with light to moderate snow in the Kumaon,

Garhwal and Simla hills. Temperature was largely below the normal in North-Western and Central India by average amounts ranging between  $5\frac{1}{2}^{\circ}$  and  $11^{\circ}$  and very largely below in Baluchistan and the Upper India hills, the deficiency being exhibited as largely in the day as in the night temperature. The low temperature conditions had extended southwards to the Bombay Deccan where temperature of the past day was  $3\frac{1}{2}^{\circ}$  in defect. Temperature was, on the other hand,  $6^{\circ}$  above the normal in Orissa,  $4^{\circ}$  in the Madras Deccan and  $3^{\circ}$  in the Madras Coast, due to high night temperature.

*Wednesday, January 4th.*—Pressure had increased briskly to rapidly in the Punjab, Rajputana, Central India, the Central Provinces, Chota Nagpur and the neighbouring districts of Bengal and Bihar, and was practically steady over the remainder of the Indian area. The depression in Chota Nagpur on the previous day had drifted eastwards and filled up. Pressure was in slight to moderate defect in Burma, Bengal, the Deccan, Southern India and the eastern half of the Central Provinces and normal in North-Western and Central India. It was in moderate to considerable defect in Baluchistan and the Upper India hill districts. Pressure was highest at Ajmere and lowest at Colombo, and there was a difference of  $0.286''$  between these two stations. Winds were fairly normal in direction and were strongest on the Kathiawar and Konkan coasts and in the Bombay Deccan. The air was unusually dry in Sind and Kathiawar, the lowest humidity at 8 A.M., being 15 per cent. at Rajkot. Skies were heavily clouded in the Gangetic Plain and Bengal and light to moderate showers had been received in the eastern districts of the North-Western Provinces, Bihar, Bengal and Assam. Light snow had again fallen at Mussoorie and Ranikhet. A large reduction of temperature had occurred in Berar and the Central Provinces and temperature now averaged from  $4^{\circ}$  to  $11^{\circ}$  below the normal in North-Western and Central India, Berar, the Central Provinces and the Bombay Deccan. It was  $7^{\circ}$  above the normal in Orissa,  $4^{\circ}$  in Chota Nagpur and Mysore, and  $3^{\circ}$  in the Madras Deccan. The temperature conditions were approximately normal in other districts.

*Thursday, January 5th.*—Pressure had given way to a slight extent in Baluchistan and North-Western India and was steady or had increased slightly over the remainder of the country. Pressure was now in considerable defect in Baluchistan and at the hill stations in North-Western India and practically normal elsewhere. The air circulation was similar in character to that of the previous day, except in the Deccan where winds were easterly. Skies were thickly clouded in Baluchistan, Kashmir and Bengal and were clear or lightly clouded over the remainder of the country. No rain had fallen beyond some local showers in Upper Burma and Bengal. Temperature had increased more or less rapidly in Baluchistan, North-Western and Western India, thus diminishing the deficiency in these areas. It had on the other hand decreased largely in Chota Nagpur and briskly in Orissa and North-Western Provinces. Temperature during the previous 24 hours was most deficient in the plains in Rajputana and Central India (each  $9^{\circ}$ ) and most largely above the normal in Orissa ( $15^{\circ}$ ).

*Friday, January 6th.*—Pressure had increased briskly in Baluchistan and was now only in slight defect in that area. It had decreased briskly in the Punjab, Upper Sind and Rajputana and rapidly in Berar, Central India and the Western half of the Central Provinces. A closed depression of slight intensity had formed rapidly during the past day in the Central Provinces, and the distribution of pressure was similar in general character to that which obtained on the 2nd. Light irregular airs and calms prevailed in Upper India, the southern half of the Peninsula and Burma, and feeble cyclonic winds over the area of depression and the neighbouring districts. Skies had cleared in Baluchistan and clouded over in the Gangetic Plain and the greater part of Central India. Light showers of rain had fallen in Bundelkhand and Baghelkhand and light snow in the North-West Himalayas. Temperature was in slight to moderate excess of the normal in a belt running eastwards from the Bombay Deccan across the Bay to Burma and more or less below the average elsewhere. The deficiency was  $10^{\circ}$  in Baluchistan,  $8^{\circ}$  in Gujarat,  $7\frac{1}{2}^{\circ}$  in Sind,  $6\frac{1}{2}^{\circ}$  in Rajputana and  $5^{\circ}$  in the Punjab and was almost as large in the day as in the night temperature.

*Saturday, January 7th.*—The pressure changes were generally small except in the areas affected by the depressions. Pressure had increased rapidly in the area covered by the depression on the preceding day and fallen rapidly in Chota Nagpur, Bihar and South-West Bengal to which area it had been transferred during the previous 24 hours. Pressure was in considerable

to large defect in the area of depression. The disturbance was hence, as on the previous day, of slight intensity. Winds tended to circulate cyclonically in North-Eastern India and were strong in South-West Bengal. Skies were overcast in North-Eastern India and fairly general rain had occurred in the eastern and central districts of the North-Western Provinces, Bihar, Chota Nagpur and the northern and central districts of Bengal. Snow storms had occurred in the eastern half of the North-West Himalayas. The temperature conditions were even more abnormal than on the previous day. Temperature was more or less largely below the normal over the whole of the Indian area, except in the Madras Deccan, Madras Coast, Chota Nagpur, Orissa and Burma in which it was in slight to considerable excess. The deficiency of temperature was more than  $5^{\circ}$  in Baluchistan, North-Western India, Central India and the Bombay Deccan and was absolutely greatest at Simla and Chakrata ( $18^{\circ}$ ) and Ranikhet and Murree ( $14^{\circ}$ ).

**Temperature.**—The temperature conditions of the week were very marked and unusual over by far the greater part of the country, due chiefly to the spread eastwards and southwards of the cool wave which followed in the rear of the cold weather storm of the last three days of the previous week. Temperature was throughout the week more or less largely below the normal in Baluchistan, Sind, Rajputana, the Punjab, Gujarat, Central India and the North-Western Provinces. The deficiency was on the whole largest in amount in Baluchistan and the hill districts of North-Western India where it varied between  $7^{\circ}$  and  $18^{\circ}$ , and was exhibited almost equally in both the day and night temperatures. Temperature was steadily in moderate to considerable excess of the normal in the Madras Deccan and the Madras Coast, and in large excess in Orissa. It was on the mean of the whole week practically normal in Burma, Assam, Bengal, the Central Provinces, Berar and South India and slightly below the normal in Bihar, the West Coast and the Bombay Deccan.

Remarkably low night temperatures were recorded in Baluchistan, the North-Western Himalayas and the West Punjab during the week.

The most noteworthy were as follows:—

Srinagar	.	.	.	.	.	.	.	-12°·5 on the 1st.
Quetta	.	.	.	.	.	.	.	13°·3 " 3rd.
Chakrata	.	.	.	.	.	.	.	21°·8 " 7th.
Simla	.	.	.	.	.	.	.	23°·2 " 7th.
Dera Ismail Khan	.	.	.	.	.	.	.	31°·0 " 2nd and 7th.

The following table gives temperature variation data of the week:—

Province.	Variation from normal of mean temperature of 24 hours preceding 8 A.M. of							Mean variation of week.
	1st.	2nd.	3rd.	4th.	5th.	6th.	7th.

**Rain.**—The normal rainfall of the week does not exceed a few thousandths of an inch over by far the greater part of the country. Bihar, East and Deltaic Bengal, and the Assam Valley obtained light showers on the 1st from a cold-weather storm drifting eastwards through South and Central Bengal. A depression which originated in Berar and the Central Provinces on the 2nd and marched eastwards to Bengal gave light to moderate rain to the North-Western Provinces (excepting the western districts) on the 3rd and 4th, and to Bihar, Chota Nagpur, Deltaic and Central Bengal and Sikkim between the 3rd and 6th, and light to moderate snow in the North-Western Provinces Himalayas. The largest daily falls during this period were 1·75 inches at Korantadih, 1·68 inches at Partabgarh and 1·40 inches at Ghazipur. The disappearance of this disturbance was followed by the formation of another feeble disturbance in Berar and the Central Provinces on the 6th. It advanced along the same track and gave rain in practically the same districts as the previous depression on the 6th and 7th. The rainfall of the week hence occurred solely in Assam, Bengal, Bihar, Chota Nagpur, the whole of the North-Western Provinces (excepting the western districts), Central India East and the hill and central districts of the Punjab, and was more or less in excess in all these areas excepting Assam Surma, and the Central Punjab where it was even less than the small normal of the period. It was unusually abundant in Central Bengal, South Bihar and North-Western Provinces East, and East Submontane which obtained more than double their normal fall in January. The following gives data for the districts in which there was an excess of over an inch :—

District.	Average actual rainfall of week.	Average normal rainfall of week.	Variation from normal.
	Inches.	Inch.	Inches.
Patna . . . . .	1·90	0·05	+1·85
Sonthal Parganas . . . . .	1·56	0·07	+1·49
Monghyr . . . . .	1·31	0·04	+1·27
Malda . . . . .	1·22	0·07	+1·15
Dacca . . . . .	1·20	0·09	+1·11
Gaya . . . . .	1·13	0·05	+1·08
Bhagalpur . . . . .	1·08	0·05	+1·03
Partabgarh . . . . .	1·97	0·08	+1·89
Ghazipur . . . . .	1·73	0·03	+1·70
Jaunpur . . . . .	1·48	0·05	+1·43
Sultanpur . . . . .	1·38	0·04	+1·34

HEM RAJ,

Off. Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 18th January 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 14th January.*—Light scattered showers of rain fell in parts of the Carnatic and the adjoining districts, but none elsewhere. The water-supply is generally ample except in parts of the Deccan. Sowings still continue. The standing crops are generally in good condition, except in parts of the Deccan. The harvest outturn is almost normal. Pasturage is scarce in parts, but the fodder supply is generally sufficient. Cattle are in normal condition. Prices continue to fall, except in parts of the Deccan and the West Coast.

**Bombay.**—*For week ending 18th January.*—Rain is wanted for the late crops in parts of Poona, Ahmednagar, Satara and Shikarpur. The standing crops are withering in parts of Poona and Ahmednagar, and have been damaged by frost in all districts of Sind, and by rats, blight or frost, in parts of Ahmedabad, Ahmednagar, Bijapur and Dharwar. Harvesting of the early crops continues in three and of the late crops in five districts. Cotton-picking is progressing in parts of Khandesh and Kathiawar. Preparations for next season continue in five districts. Fodder is sufficient, except in parts of Sind. Agricultural stock is healthy. Prices have risen slightly in three and fallen in eleven districts.

**Bengal.**—*For week ending 16th January.*—Rain, though not general, fell in several districts during the week. The prospects of all the spring crops are favourable. Poppy is also promising. The winter rice crop is nearly all harvested, and threshing is now going on. Pulses and the earlier spring crops are being gathered. Sugarcane-pressing is in progress. There is no want of fodder anywhere. Prices of common rice continue practically stationary.

**North-Western Provinces and Oudh.**—*For week ending 18th January.*—Light showers of rain fell in two districts, otherwise the weather has been clear and cold. The standing crops are flourishing. Sugarcane-pressing continues. Irrigation is being resorted to where necessary. Slight damage to crops, by frost, is reported from a few districts. Prospects are favourable. The market is full and the fodder supply sufficient. Prices are almost stationary.

**Punjab.**—*For week ending 18th January.*—Slight rain is reported to have fallen in Murree; but more is urgently needed throughout the Province. Pressing of sugarcane still continues. The spring sowings have been completed. Watering and weeding of crops are in progress. The outturn of sugarcane is said to be above the average in Sialkot. The condition and prospects of standing crops are generally reported to be good, but are below the average in Dera Ismail Khan and bad on unirrigated areas in Lahore. The rape and gram crops are being damaged by caterpillars in parts of Ferozepore. The condition of cattle is good to fair in all districts, except in parts of Dera Ismail Khan. Fodder is said to be sufficient in all districts, except in Delhi, Shahpur and in parts of Dera Ismail Khan. Prices, especially of wheat, are rising in Delhi, Sialkot and Shahpur, falling in Hissar and Dera Ismail Khan, and are unchanged elsewhere. Wheat is selling from 15½ to 21, gram 21 to 24, barley 32, bulrush millet 20 to 26, maize 28 to 33, great millet 25 and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 17th January.*—The weather is generally clear and very cold. Rain is wanted in Raipur and Bilaspur. The prospects of the spring crops are fair to good in all districts, except Saugor,

Damoh, Chanda and Bilaspur, where they are poor to gloomy. Some damage to crops, through frost, is reported from Damoh, Jubbulpore, Mandla, Narsinghpur and the Harsud Tahsil of Nimar; through frost and cloudy weather, from Balaghat and Bilaspur; through frost and blight, from Saugor; and through cloudy weather and want of rain, from Raipur. Reaping and threshing of the autumn crops are approaching completion, and pressing of sugarcane continues. The cheapest prices are wheat 19, gram 32, rice 27½, and *juar* 30 seers per rupee. The dearest prices are wheat 12, gram 16, rice 11 and *juar* 19½ seers per rupee. Wheat continues to sell above the normal price in the south, east and west of the Provinces, and the price of gram is still low in the northern districts.

**Burma.**—*For week ending 14th January.*—In Lower Burma reaping of the main crop has nearly been completed. The Amherst District now reports an outturn below the normal. In Upper Burma the greater part of the wet weather paddy crop has been reaped. Prospects of the standing crops continue unchanged. The price of paddy has risen considerably in Akyab, Thaton and the Upper Chindwin and has fallen considerably in Mandalay and Bhamo. There has been a slight increase in the price in Rangoon, Prome and Thongwa.

**Assam.**—*For week ending 17th January.*—No rain fell during the week. Harvesting of late rice is nearing completion; the outturn is generally good. Gathering of pulses, pruning of tea, and pressing of sugarcane continue. Prospects of pulses, mustard and sugarcane are generally good. Fodder is scarce in Cachar, the Naga, Khasi and Jaintia Hills and in parts of Sylhet. Water is insufficient in the Khasi and Jaintia Hills. Prices—common rice, Sylchar 15, Sylhet 16½, Dhubri 17, Gauhati 16, Tezpur, Sibsagar and Dibrugarh 13, and Nowgong 12 seers per rupee.

**Mysore and Coorg.**—*For week ending 18th January.*—**MYSOORE:** Prospects are favourable. Prices have slightly risen in Mysore and Kadur. *Ragi* (*Eleusine coracana*) has been harvested in parts of Bangalore, Kolar and Shimoga.

**COORG:**—Harvesting of rice, threshing of *ragi* (*Eleusine coracana*) and coffee-picking continue. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 18th January.*—**BERAR:** The weather is cool. The winter crops are suffering for want of moisture. The preparation of land for the monsoon crops is in progress in three districts. Fodder is sufficient, but a scarcity of water prevails in parts of the Akola and Amraoti Districts. Prices are almost stationary.

**Hyderabad.**—No rain fell during the week. The autumn rice harvest is almost completed, and that of the spring crops has commenced in parts. Rats and insects are damaging the spring crops in a few talukas. The winter rice sowings continue. Prices are falling. Prices—wheat 9, coarse rice 10½, and *jawari* 20½ seers per current sicca rupee.

**Central India.**—*For week ending 18th January.*—No rain fell during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The condition of the standing crops and their probable outturn are reported to be good, though the *arhar* (*Cajanus indicus*) and *masur* (*Lens esculenta*) crops have been partially damaged by frost in Baghelkhand. Slight damage to the poppy crop is reported from Indore. Agricultural stock and pasturage are in good condition. Prices are normal.

**Rajputana.**—*For week ending 18th January.*—No rain fell during the week. Irrigation of crops continues. Their condition is generally good, but they have been slightly damaged by frost in parts of Kerowlee and Kotah. The average outturn of the autumn crop in thirty-one affected villages of Ajmere is 5 annas, and for the whole area of Marwar 8 annas in the rupee. Cattle are generally in good condition. The Government reserves have been opened to grazing in Ajmere-Merwara. Distress is spreading and increasing in Merwara. Takavi advances have been granted freely with beneficial results.

In Ajmere distress is increasing in some villages of Gangwana. Fodder is scarce in parts of Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypore and Bikanir. Prices are rising in Jhallawar, fluctuating in Kotah, falling in Dholepore and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues; 205 persons emigrated during the week. The total emigration from Merwara up to date amounts to 3,792 persons. The numbers employed on relief works were—422 in Ajmere, 1,967 in Merwara and 2,092 in Marwar. Prices—Ajmere 20, Beawar 22 and Marwar 14½ seers per rupee.

**Kashmir.**—*For week ending 17th January.*—The weather has been snowy and cloudy. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE:**—*For week ending 18th January.*—No rain fell during the week. Prices have fallen slightly: wheat is selling at 19 and maize 26 seers per rupee. The condition of the standing crops is fair. Fodder is sufficient.

**Nepal.**—*For week ending 14th January.*—Rainfall 0·84. Wheat is being sown. The price of rice is 9½ seers per rupee.

T. W. HOLDERNESS,  
*Secretary to the Government of India.*

GOVERNMENT OF INDIA.  
FOREIGN DEPARTMENT.

STATISTICS OF THE TRADE OF INDIA WITH RUSSIAN AND CHINESE TURKISTAN  
AND TIBET, FOR THE YEAR ENDED 31st MARCH 1898.

No. 461, dated Leh, the 17th September 1898.

From—CAPTAIN G. CHENEVIX TRENCH, Assistant to the Resident in Kashmir  
for Leh, Ladakh,

To—The Resident in Kashmir.

I have the honour to forward herewith, for favour of transmission to the Government of India, the statistics of the trade of India with Chinese and Russian Turkistan, and Tibet for the year ending 31st March 1898.

\* The total value of trade which passed through Leh during the year under report amounts to Rs 42,02,640-15, against Rs 39,30,142-8-6 in the previous year. A decrease of Rs 17,27,501-9-6.

The subjoined table gives the figures for the past ten years. There has been a rapid decline in the last two years :—

Years.	Import.	Export.	TOTAL.
1888-89 . . .	13,53,845 0 0	12,12,030 0 0	25,65,875 0 0
1889-90 . . .	16,00,580 0 0	15,13,626 0 0	31,14,206 0 0
1890-91 . . .	15,25,483 0 0	14,40,906 0 0	29,66,389 0 0
1891-92 . . .	15,65,278 0 0	14,47,840 0 0	30,13,118 0 0
1892-93 . . .	17,95,141 0 0	15,91,544 0 0	33,86,685 0 0
1893-94 . . .	21,54,252 0 0	18,37,375 0 0	39,91,627 0 0
1894-95 . . .	31,65,218 4 0	28,50,102 12 0	60,15,321 0 0
1895-96 . . .	33,10,751 10 0	28,95,426 2 0	62,16,177 12 0
1896-97 . . .	31,00,098 0 0	28,30,044 8 0	59,30,142 8 0
1897-98 . . .	22,39,262 1 6	19,63,378 13 6	42,02,640 15 0
TOTAL . . .	2,18,19,908 15 6	1,95,82,273 3 6	4,14,02,182 3 0
AVERAGE . . .	21,81,990 1 6	19,58,227 1 1	41,40,218 3 6

The schedule below gives the value and direction of the trade for the past two years between India, Chinese Turkistan, and Tibet :—

Year.	India.	Chinese Turkistan.	Tibet.	TOTAL.
Import from { 1896-97 . . .	17,69,143 10 0	11,72,697 6 0	1,58,257 0 0	31,00,098 0 0
{ 1897-98 . . .	14,44,008 12 0	6,47,947 5 6	1,47,306 0 0	22,39,262 1 6
Export to { 1896-97 . . .	12,84,362 12 6	14,35,667 2 0	1,10,014 10 0	28,30,044 8 6
{ 1897-98 . . .	7,66,618 13 6	11,10,723 0 0	86,037 0 0	19,63,378 13 6

*Exports and Imports.*

During the year under report the total value of the imports amounted to Rs 22,39,262-1-6, as against Rs 31,00,098, and the exports to Rs 19,63,378-13-6 as against Rs 28,30,044-8-6.

*Piece goods.*

The total exports to Turkistan of English goods amounted to Rs. 16,750, and that of Indian Manufactured Cotton Rs. 21,645.

There was a decrease of Rs. 13,437.8 in the value of the trade in European Manufactured Cotton as compared with last year.

*Drugs and Medicines.*

The number of maunds of charas imported was 4,020 maunds 16 seers as against 4,663 maunds 22 seers. Decrease of 643 maunds 6 seers.

The import figures of charas for the last five years in rupees are as follows :—

	R	a.	p.
1893-94 . . . . .	2,18,886	0	0
1894-95 . . . . .	2,49,105	0	0
1895-96 . . . . .	3,66,368	10	0
1896-97 . . . . .	3,03,150	12	0
1897-98 . . . . .	2,21,122	5	6

The decrease in the last two years is most marked.

*Dying material.*

The indigo trade to Yarkand shows a large increase of Rs. 41,480 which is satisfactory when everything else is on the decline.

The figures for the past four years are as follows :—

	R
1894-95 . . . . .	44,280
1895-96 . . . . .	88,275
1896-97 . . . . .	27,160
1897-98 . . . . .	68,640

*Hides and skins.*

The value of the trade in skins shows a decrease of Rs. 9,088 from that of the previous year.

The past four years' figures are quoted below :—

	R
1894-95 . . . . .	64,298
1895-96 . . . . .	70,582
1896-97 . . . . .	61,980
1897-98 . . . . .	52,892

*Leather.*

A satisfactory increase of Rs. 98,665 is shown in the value of manufactured leather this year.

The following are the tables for the last two years :—

	R
1896-97 . . . . .	62,195
1897-98 . . . . .	1,60,860

*Carpets and Namdas.*

The trade under the head of Namdas shows a slight increase, owing to great demand in Kashmir, as compared with last year's report, and a decrease of Rs. 1,020 in carpets. Taking both commodities together there is a small increase in the figures for the present year.

The following are the figures for the past five years :—

	Carpets. R	Namdaz. R
1893-94 . . . . .	3,075	20,505
1894-95 . . . . .	5,070	29,748
1895-96 . . . . .	4,365	27,844
1896-97 . . . . .	9,420	23,550
1897-98 . . . . .	8,400	27,375

*Precious metals.*

The amount of both the articles, gold and silver, imported in the year under report shows a very large decrease :—

	R	a.	p.
On silver . . . . .	3,63,935	0	0
On gold . . . . .	1,00,277	8	0

The figures under the above headings for the past five years are as follows :—

	Gold.			Silver.		
	R	a.	p.	R	a.	p.
1893-94 . . . . .	2,66,686	0	0	2,92,158		
1894-95 . . . . .	3,56,702	0	0	6,78,331		
1895-96 . . . . .	3,25,925	0	0	6,17,524		
1896-97 . . . . .	3,48,339	0	0	5,82,347		
1897-98 . . . . .	2,48,161	8	0	2,18,412		

*Opium.*

Fifteen maunds of opium to the value of about R4,500 was brought up this year by certain Hindu traders to be exported to Turkistan.

*Silk, raw.*

Silk, raw, to the value of R15,570 was imported during the year, as against R34,050 worth imported in the previous year. Decrease of R18,480.

*Spices.*

The trade under this head shows a decrease of R36,530.

The figures for the past five years are as follows :—

	R
1893-94 . . . . .	26,005
1894-95 . . . . .	35,805
1895-96 . . . . .	36,225
1896-97 . . . . .	58,590
1897-98 . . . . .	22,060

*Precious stones.*

Turquoises and Coral.

Dealings under the head of Turquoises show an increase of R4,531 on those of the previous year, while the trade in imported Corals shows a decrease of R29,965, as compared with last year's report.

The figures for the last ten years are attached :—

	R
1888-89 . . . . .	11,232

*Indian Tea.*

The trade in India tea imported this year shows a decrease of Rs 31,085 from that of the previous year, due to the Russian traders, who are the chief dealers, not coming to Ladakh on account of plague prohibition.

The figures for the last ten years are as subjoined :—

	R
1888-89 . . . . .	9,160
1889-90 . . . . .	51,762
1890-91 . . . . .	32,947
1891-92 . . . . .	37,220
1892-93 . . . . .	39,060
1893-94 . . . . .	45,700
1894-95 . . . . .	57,280
1895-96 . . . . .	72,315
1896-97 . . . . .	73,025
1897-98 . . . . .	43,180

*China Tea.*

This is green leaf tea, imported *via* Bombay or Calcutta. Shows a decrease of Rs 16.

The figures are as follows :—

	R
1888-89 . . . . .	609
1889-90 . . . . .	900
1890-91 . . . . .	1,840
1891-92 . . . . .	1,540
1892-93 . . . . .	4,865
1893-94 . . . . .	8,890
1894-95 . . . . .	7,070
1895-96 . . . . .	9,870
1896-97 . . . . .	9,270
1897-98 . . . . .	8,360

*Lhasa brick tea.*—The trade under this head has slightly decreased as compared with last year.

The figures for the last ten years are as follows :—

	R
1888-89 . . . . .	1,02,600
1889-90 . . . . .	62,580
1890-91 . . . . .	24,640
1891-92 . . . . .	46,980
1892-93 . . . . .	39,285
1893-94 . . . . .	18,447
1894-95 . . . . .	45,448
1895-96 . . . . .	22,320
1896-97 . . . . .	21,881
1897-98 . . . . .	20,100

*Wool.*

Unmanufactured. The trade under this head in the year under report shows a decrease of Rs 18,754 on that of the previous year.

The manufactured woollen goods shows also a decrease of Rs 11,660.

The value of the above goods imported during the year under report was Rs 2,272-8-0 as against Rs 3,438-8-0 in the previous year.

*Miscellaneous.*

The trade under this head shows a decrease of Rs 1,980.

The total amount of the miscellaneous imports is Rs 35,088 against Rs 37,068.

*General Remarks.*

In 1896 when reporting on the trade of 1895, I was able to write most favourably on its rapid increase. Improved roads, increased interest, had materially raised the figures each successive year.

2. In the trade there was profit to our home manufacturers, profit to our Indian manufacturers and the means of a cash revenue to the Kashmir State.

3. This year in reporting on last year's trade, I regret to have to state that on the total value of the trade, and in almost every article of import and export there has been a heavy decrease.

4. From all appearance the Indian Yarkand trade is suffering from a rapid decline.

5. In view then of the future uncertainty of our trade with Chinese Turkistan, and the chance that the "open door" in that quarter may not always be as open as now, it is our duty to look for fresh fields.

6. In my opinion this is to be found in the direction of Tibet. A commercial invasion of that mystic country, with the rich provinces of Szo Chau Kansi and Shensi in China as objective, would I believe be profitable.

7. There are already some hopeful signs. The peasantry of Tibet are gradually losing their suspicious dislike of the trader from India. Between Ladakh and Tibet trade is busy to the few who are allowed to cross the border, and I am being constantly asked whether the wool trade used in carpet manufacture, etc., could not be increased.

8. Surely there is much to advocate a policy which should carry trade to South China, and I hope this trade report will at any rate be the means of drawing attention to Tibet and its possible use as a trade market.

## Ladakh Trade Return for the year ending 31st March 1898—continued.

### Report on the trade between India and Chinese Turkistan, for the year ending the 31st March 1898.

(1) There is no means of obtaining locally any reliable statistical information regarding our Central Asian trade. Once goods arrive in Yarkand from Ladakh, the greater portion is expedited to the different commercial centres of Khotan, Kashgar, Maralbashi, Aksu, etc., and no official record is kept by the Chinese Authorities of the quantity, and nature, of the wares thus distributed. With the assistance, however, of our traders, the two annexed tables have been prepared. The one contains information regarding the proportional demand for Indian goods in the principal cities of Chinese Turkistan, and the other gives information regarding the proportional supply goods from these same centres for export to Ladakh, whilst the notes in the "Remark column" deal with the present and prospective state of the market for the goods.

(2) It is not here intended to make an accurate comparison of the trade of the year under report, with that of the previous. But, generally, it may be said that there has been a falling off in the imports as well as in the exports. The diminution in the former was not unexpected by the merchants, in view of the market having, in the spring of 1895, been over-stocked with Indian goods and of the consequent low prices. Another cause of the decrease may apparently be traced to the uncertainty of the Indian charas market: it is a well established fact that there is nothing that so depresses import trade as when charas sells badly in the Punjab. Charas being the chief export from Turkistan, to the same uncertainty may be ascribed the cause of the fall in the exports.

(3) Although there appears to have been a diminution of trade during 1897-98, yet there is no reason to anticipate that its injurious effects will be of a permanent nature. The capital invested, has, in no way, diminished; and the number of our traders has remained practically the same as during the previous year. The profits realized are estimated at 12½ per cent. per annum by the Hindus; and this, taking into account the fact that most of them trade with borrowed money on which interest varying from 6 to 9 per cent. is charged. The profits made by Mohamadans is said to be higher. This dividend of 12½ per cent. would appear to have been fairly well maintained during the last five years. Previous to this period, the profits were more considerable, amounting at times to 25 per cent. But despite this diminution, the market for Indian goods has grown in firmness. During the eighteen years of peace which the natives of Kashgaria have uninterruptedly enjoyed under the Chinese rules there can be no doubt that the wealth of the country has increased, and with it, the improved purchasing power of the people. With time, too, Indian goods have become known, and, unlike the epoch when our Central Asian trade was in its infancy, they now find their way not only to the whole of the Alta Shahr (literally, six cities, viz., Khotan, Kargalik, Yarkand, Yangi Hissar, Kashgar and Maralbashi), but also to the Aksu District. The present attitude of the Chinese local authorities with respect to the Indo-Turkistan trade ought perhaps to be described as one of friendliness, a proof of which they have recently given in the re-opening of the Kugiar and Sanju roads.

(4) The demand for goods from India for the year under report (especially during the latter portion of it) has been very fair; other skins, brocades, velvet, broad-cloth and coral selling at present exceptionally well. It is regrettable to notice that the things for which the market is good are generally not of English manufacture. The brocades are from Benares or from Lyons. The velvet and broad-cloth are "made in Germany."

(5) A few facts regarding the position which Indian trade now occupies in relation to its Russian rival cannot fail to be of interest.

The demand for Russian goods is without doubt ever increasing. Cotton prints of Moscow manufacture, as cheap as they are varied and pretty, are very largely imported. The bazaars of every town are over-stocked with them, as well

as with a multitude of other articles, amongst the most important of which may be mentioned lamps, candles, soap, petroleum, honey, sugar, sweetmeats, porcelain cups, tumblers, enamelled iron plates, matches, knives and silks. These articles, with few exceptions, could, but for the competition, be supplied from India. But we have gradually had to relinquish our position in favour of Russia, until at last our trade has had to confine itself chiefly to articles of which we are the sole producers, and in which there is no competition. This general rule has a few exceptions, the most important, as well as the most unexpected, of which is the English cotton goods.

(6) The inequality of circumstances under which Russian and Indian trades in this commodity are carried on is most marked; and, needless to add, largely preponderates in favour of Russia. Owing to the quickness with which goods from Moscow can be exported to Kashgar *via* trade routes which are practically open at all seasons, a Russian merchant can turn over his capital at least twice in the course of a year. Transport is moreover astonishingly cheap. Moscow goods are expedited to Kashgar by two different roads, the one *via* Kazan, Semipalatinsk and Vernoi, and the other *via* Transcaspia and Osh. The charges of the carrying company (Comptoir) at Vernoi are roubles 3 per pood (36 lbs.) from Moscow to that town. The carriage for the remaining distance to Kashgar is effected by means of camels, and cost 50 copeks for the same weight. The transport *via* the southern route is largely in the hands of another carrying company established at Samarkand, whose charges are roubles 2-60 copeks per pood from Moscow to Samarkand. The freightage thence by cart to Osh costs about 40 copeks per pood, whilst for the remaining distance to Kashgar, which is effected by means of ponies carrying at least 288 lbs., the expenses of transport amount to 80 copeks. The average cost per pood, or 0-44 maund, from Moscow to Kashgar is therefore roubles 3-65 copeks or Rs 5 (supposing the rouble = 25d., and the rupees 16d.). A reduction in this freightage is anticipated, consequent on the opening to merchandise transport of the Samarkand-Andijan Railway, which will certainly take place during the current year. The average bounty given by the Russian Government on the export of different sort of cotton goods amounts to roubles 3-70 copeks which sum is more than sufficient to cover the costs of transport. In the near future, a further stimulus will probably be given to the Russian chintz trade by the encouragement which has systematically been afforded to the growth of cotton in the Caucasus and in Turkistan. The cotton yearly produced in the latter province is said to amount to over four million poods. The yield in the Ferghana District, which is appraised at 18 million roubles per year, is such as to have considerably increased the value of land, the cost of which in the surroundings of Margillan is estimated at roubles 300 per desiatine (113,067 square yards).

(7) Now, under these most favourable circumstances for Russian trade, it is a curious fact that English cotton goods still sustain a competition. Can we claim superiority for these goods? There is not the slightest reason for thinking so. One would rather believe that amongst our exports, some of the most worthless cottons from the bazaars of India find their way to Yarkand. The same cottons sell, by reason of their exceeding cheapness, and are disposed of with little or no profit. Why are they then imported? Because of their value as a medium of exchange for charas, the chief article of export to India. Suppose a trader had purchased in Yarkand some charas, and had paid for it Rs 100 in cash, and another trader had brought chintz, etc., with him from India which, plus carriage, had cost him the same amount. Even if the latter could not dispose of his prints, by taking payment in money, so as to cover his outlay, he would still make a better bargain for charas in using his goods as a medium of exchange, than could the first trader who had only money to offer. Hence the tenacity of the English cotton goods. If the above proposition needs a proof, it will be found in the fact that, with very few exceptions, the exporters of cotton-prints are our Hindus, and only such of our Muhammadan merchants as are engaged in the charas trade; whilst the other traders, Afghans and Badakhshis who abstain from traffic in that drug, seldom export cotton goods from India.

The inequality of circumstances under which Russian and Indian trades are carried on in Kashgaria.

British cotton goods. Their value as a medium of exchange for charas.

(8) The trade between India and Russian Turkistan, carried on through Kashgar, merits at the best of times but little attention. This may especially be said to be the case with reference to the year 1897-98, when quarantine regulations on the Ferghana border have almost stopped the little communication there is. The Russian exports which go to Ladakh and Kashmir are very scarce, consisting merely of a few pieces of cloth known as shaitan-tari. The only goods from India which have, during the year under report, been sent to Ferghana in any quantity are coral, for which the market is invariably good. It is estimated that one-third of the amount of this commodity received from India are for consumption in Ferghana. As the duty is extremely high (roubles 180 per pood) doubtless the Russian customs find it extremely remunerative whenever they can levy it; there is no article in which contraband trade is so developed as in coral. It is estimated that fully one-half of the quantity imported into Russian territory is smuggled. The importation of English muslin is absolutely prohibited, but as this commodity is much liked, it also forms an item in contraband trade. Indigo, on which there is no duty, and tea used to be sent *via* Kashgar to Ferghana; but for the last two years their import has ceased, owing, it is said, to their having now followed, from India, the road *via* Persia, to Russian Turkistan. The cause of this deviation in favour of a circuitous route ought to be an interesting subject for investigation.

(9) A few samples of piece-goods of Russian, French, German, etc., manufacture, collected in the Yarkand Bazaar, are forwarded with this report, together with a list containing some particulars regarding prices, etc. (see Tables C and D).

YARKAND;	}	GEORGE MACARTNEY, <i>Special Assistant</i>
<i>The 31st March 1898.</i>		<i>for Chinese Affairs to the</i> <i>Resident in Kashmir.</i>

---

TABLE A.

Showing the imports from India, *via* Ladakh, and their proportional consumption in different parts of Chinese Turkistan, during the year 1897-98.

---

Table A.

Showing the imports from India, via Ladakh, and their proportional consumption in different parts of Chinese Turkistan, during the year 1897-98.

Description of goods.	PROPORTIONAL CONSUMPTION IN PERCENTAGE.				SALEABILITY IN THE YARKAND MARKET IN MARCH 1898.		REMARKS.
	Yarkand District.	Khotan District.	Akan District.	Kashgar District.	Profit.	Loss.	
1. Cotton (manufactured)— (a) European— Long cloth (lutta or khasa)	15	60	20	5	20	...	This material is selling well and is also largely used as a medium of exchange for charas. Present quantity in the Yarkand bazaar rather small. A sort of long cloth known as Mitkan khasa (see sample No. 56 of Table marked C) is largely imported from Russia and competes against the English long cloth.
Muslin . . .	12	40	24	24	...	5	
Nainu and Sainu gauze .	20	25	15	40	...	10	Market dull, and material can only sell at a profit when disposed of in exchange for charas. Since the restoration of the Chinese rule in Kashgaria, white muslin <i>pagoris</i> (an essentially Mohammedan headgear, have been gradually going out of fashion, especially amongst the lower classes, who have taken to wearing caps. The entry into Russian Turkistan of English muslins has, for the last three years, been prohibited. No Russian competition.
Cotton prints (chintz) and "alwan."	35	50	10	5	Part		The supply for the year 1896-97 is not yet exhausted. Certain descriptions of Russian chintz (see Table C, samples Nos. 25, 26 and 30) compete against these goods.
Dhoti . . .	10	20	50	20	10	...	About 35 per cent. of the 1896-97 stock is still left. Russian competition extremely severe.
Handkerchiefs . . .	20	10	20	50	12	...	No competition. Out of the last two years' stock about 40 per cent. still unsold. Handkerchiefs are also slightly imported from Russia. About 25 per cent. of the present year's stock still remaining.

(b) Indian— Lungs . . . . .	10	30	30	30	10	...	No competition. The present year's stock all exhausted. But about 40 per cent. of the 1896-97 stock still remaining. These were of a somewhat superior quality and did not suit the market.
2. Drugs and Medicines— Kashmir opium . . . . .	...	...	...	...	...	...	A portion of the opium imported in 1896-97 is still in the market and cannot sell above par value. Little or none was imported during 1897-98.
Medicines . . . . .	20	40	20	20	25	...	A sort of medicine known as "Sana" is now selling at 80 per cent. profit. No competition.
3. Dyeing Materials— Indigo . . . . .	9	26	53	12	6	...	The demand has somewhat fallen since April 1897. There is no competition in this article. Previously Majenta crystals used to be imported from India, but they have been supplanted by Russian dyes.
4. Hides and skins— Other skins . . . . .	18	2	40	40	16	...	Market at present specially good.
Goat and fox skins (manufactured). . . . .	16½	25	16½	41½	25	...	Since the last six years' goat skins have been cured locally, but the native goods are not much appreciated.
5. Silk (manufactured)— (a) Brocade of Benares . . . . .	10	10	20	60	12	...	Present market good, and decidedly more active than in April 1897. The "real" and the "imitation" brocades are in equal demand.
(b) Brocade of Surat (real) . . . . .	20	10	20	50	15	...	} The 1897-98 stock almost sold out.
(c) Do. do. (imitation) . . . . .	20	10	20	50	30	...	
(d) Brocades, European . . . . .	10	10	30	50	5	...	These are French goods and are imported in small quantities. See sample No. 9 of Table I.
(e) Velvet . . . . .	25	5	20	40	30	...	Present market decidedly better than in April 1897. Velvets are largely of French and German manufacture (see samples 5, 6 and 7 of Table I). It is estimated that out of the 1897-98 stock, no less than 80 per cent. are foreign goods (an increase of 10 per cent. since last year). In their order of importance, the favourite colours are dark blue, green and dark red. Slight Russian competition.
(f) Atlas (satin) . . . . .	40	30	10	20	6	...	Over 50 per cent. of this article is of French and German manufacture. Slight Russian and Chinese competition.

Table A—*concl.*

*Showing the imports from India, via Ladakh, and their proportional consumption in different parts of Chinese Turkistan, during the year 1897-98—concl.*

Description of goods.	PROPORTIONAL CONSUMPTION IN PERCENTAGE.				SALEABILITY IN THE YARKAND MARKET IN MARCH 1898.		REMARKS.
	Yarkand District.	Khotan District.	Aksu District.	Kashgar District.	Profit.	Loss.	
					Per cent.	Per cent.	
6. Spices . . . . .	12	60	16	13	30	...	No competition.
7. Coral . . . . .	5½	34	49	42	15	...	Profits on the large corals are more than on the little ones.
8. Sugar (including sweetmeats)	20	80	...	...	20	...	The profits have somewhat fallen since April 1897 owing to severe Russian competition which has driven the Indian article out of the northern markets (Kashgar, Aksu, etc.).
9. Tea (Palampur) . . . . .	8	32	32	28	15	...	The profits have diminished by about 10 per cent. since 1890-97. The Chinese brick tea is gaining in favour.
10. Wool (manufactured)—							
(a) Broad cloth . . . . .	40	20	10	30	15	...	About 70 per cent. of these goods are of foreign, principally German, manufacture. The most favourite colours are black, indigo and green. See samples Nos. 1, 2, 3, and 4 of Table D.
(b) Flannel . . . . .	50	15	15	20	15	...	Generally of very inferior quality and in small demand. Favourite colour: white. See sample No. 8 of Table D which is of Dutch manufacture.

CAMP YARKAND;

31st March 1898.

GEORGE MACARTNEY.

*Special Assistant for Chinese Affairs to the Resident in Kashmir.*

Table B.

Showing the proportional exports from the different parts of Chinese Turkestan to India via, Ladakh, during the year 1897-98.

Description of goods.	PROPORTIONAL EXPORT IN PERCENTAGE.				ESTIMATED REALISATIONS IN INDIA.		REMARKS.
	Yarkand District.	Khotan District.	Akon District.	Kashgar District.	Profit.	Loss.	
Drugs and medicines— Charas . . . . .	50	...	...	50	Per cent. ...	Per cent. ...	<p>The profits on charas exported to India during 1897-98 cannot yet well be estimated. It is said, however, that 10 per cent. has been realized on the quantity that has, up to date (March 1898), been disposed of in the Panjab (circa <math>\frac{1}{2}</math> of total export). There are now about 4,000 maunds ready in Yarkand for export during the 1898-99 trading season. Probably an additional amount of 2,000 maunds will be bought up before the departure of the caravans in September. The present Yarkand prices are 40 per cent. less than in March 1897.</p> <p>These are exported to Ladakh and Kashmir as a partial medium for the transfer of capital to India. The Khotan prices have been fairly stationary.</p> <p>The present ratio in Khotan between gold and silver is 1 : 27. It is not expected that silver will be exported this year. This metal is now imported into Kashgar from Russia. The export for the year under report is estimated at Rs. 15,000.</p> <p>Russian roubles have, during 1897-98, been largely remitted (about Rs. 85,000 worth) to Bombay as a forced medium for the transfer of capital. This is a sign of depression in the export trade. The present value of the rouble and the rupee in Yarkand is respectively 1 ael 67g and 1 ael 0 38.</p> <p>The raw silk exported during 1897-98 realized little or no profit in India. This article will, as a forced medium for the transfer of capital, again be exported during the ensuing trading season.</p> <p>This cloth was for the Ladakh market.</p>

SUPPLEMENT TO  
**The Gazette of India.**

No. 4.1 CALCUTTA, SATURDAY, JANUARY 28, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

**GOVERNMENT OF INDIA.**

**DEPARTMENT OF REVENUE AND AGRICULTURE.**

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, January 14th, 1899.**

At the end of the previous week a shallow depression lay over South-West Bengal and Chota Nagpur. It was transferred eastwards to Upper Burma during the next 24 hours, where it filled up. Thunder-showers were received in Bengal, North Bihar and the Assam Valley between the 8th and the 10th from the disturbance initiated by this storm. Very strongly marked anticyclonic conditions, on the other hand, obtained during this period in North-Western and Central India and the northern half of the Peninsula, and higher pressures were recorded in Berar and at Nagpur on the 9th than have been observed in that area during the past ten years. Pressure gave way steadily during the remainder of the week over the Indian area, but this negative phase of the barometric oscillation was associated with no important change in the weather, which hence remained fine and settled throughout the period. A feeble and ill-defined depression was formed or appeared in Upper Sind on the 12th, and drifted eastwards across Rajputana on the 13th, where it disappeared during the day. It gave light to moderate snow in Kashmir on the 13th, but no rain in the plains and was hence of little importance.

The most noteworthy feature of the weather of the week was the prevalence of abnormally low temperature over by far the greater part of the country. This feature was, on the whole, most pronounced in Chota Nagpur, the Central Provinces and Berar, where the mean temperature of the week was  $7^{\circ}$  below the normal of the period. The deficiency was, it may be noted, exhibited somewhat more largely in the night than in the day temperature. Unusually low night temperatures were registered at some stations in the Central Provinces on the night of the 8th. The lowest in the plains was  $40^{\circ}6$  at Nagpur, which is  $2^{\circ}6$  lower than had been previously recorded at that station under the standard conditions of thermometer exposure.

**Daily Summary.—Sunday, January 8th.**—Pressure had increased briskly to rapidly over the greater part of Northern and Central India and the north of the Peninsula, and was steady over the remainder of the country. The depression which lay over South-West Bengal and Chota Nagpur at the close of the previous week had advanced into Upper Burma during the previous 24 hours and filled up. Pressure was in moderate to considerable excess in North-Western and Central India and in slight to moderate defect in the southern half of the Peninsula, the Bay of Bengal, Burma and East Bengal. Gradients were hence above their normal January intensity. Winds were generally from their normal cold-weather directions. Skies were moderately clouded in Bengal, Assam and Upper Burma, and clear lightly clouded elsewhere. Showers, light to moderate in amount, had occurred in North Bihar, Bengal and Assam. A light shower of hail had fallen at Mussooree. The temperature conditions were very marked. Temperature was in considerable excess in Orissa and the Madras Deccan, and in moderate excess in Mysore, the Madras Coast and Burma. Temperature was, on the other hand, more or less largely below the normal over the remainder of the Indian area. The deficiency ranged between  $6^{\circ}$  and  $11^{\circ}$  over the area, including Baluchistan, the North-Western Provinces, Gujarat, the Punjab, Rajputana, Central India, the Central Provinces, Berar and the Bombay Deccan, and was absolutely greatest at Simla ( $18^{\circ}$ ) and Chakrata and Ranikhet (each  $17^{\circ}$ ). Both day and night temperatures were in large defect in the area of decreased temperature.

**Monday, January 9th.**—Pressure was unchanged in Baluchistan and the Indus Valley and had increased throughout the remainder of the Indian region. The rise was brisk to rapid in the Peninsula, North-Eastern India and Upper Burma and slight elsewhere. Pressure was more or less above the normal everywhere, except in Lower Burma, where it was locally in slight defect. The excess was least in Southern India ( $-0.2^{\circ}$ ), and greatest in Berar and the neighbouring districts of the Central Provinces, where it averaged a seventh of an inch in amount. Strongly marked anticyclonic conditions hence obtained in India, more especially in Berar and at Nagpur, where pressure was higher than has been recorded during the past ten years. The wind system was of the usual cold-weather type. The air was abnormally dry in Cutch, the humidity at 8 A.M. being only 18 per cent. at Bhuj. Skies were more or less clouded in Baluchistan, the North-West Himalayas, Assam, Upper Burma and Southern India. Light thunder-showers had been received at Jalpaiguri and Cocanada. The temperature conditions were even more abnormal than on the previous day. Temperature was below the normal over the whole of the country, with the exception of Burma, Mysore and Madras, where it continued in slight to moderate excess. The deficiency exceeded  $5^{\circ}$  over the whole of Northern and Central India and the northern half of the Peninsula, and was greatest in Berar and the Central Provinces where it averaged  $11^{\circ}$  in amount.

**Tuesday, 10th January.**—Pressure had decreased over the northern half of the Indian area and increased over the southern half. The changes were, however, very small in amount and did not modify the pressure distribution to any important extent. Winds were normal in direction in India and more westerly than usual in Lower Burma. Skies were generally clear, and no rain had fallen anywhere beyond light local showers at Trincomalee and Bhamo. A very rapid rise of temperature had occurred in Baluchistan and the Upper India hill districts, and the mean temperature of the previous 24 hours was  $4^{\circ}$  above the normal in the former and  $3^{\circ}$  to  $5^{\circ}$  in defect in the latter area. Temperature had increased slightly to considerably in North-Western and Central India and the Deccan, and the deficiency in these areas was hence less marked than on the previous day. The low temperature conditions had, on the other hand, extended eastwards to Bengal, Assam and Orissa, and the mean temperature during the past day ranged between  $4^{\circ}$  and  $10^{\circ}$  below the normal in these areas. Temperature remained in moderate excess in Burma and Southern India.

**Wednesday, 11th January.**—Pressure was practically steady in the Peninsula and had decreased slightly to briskly in Baluchistan and Northern and Central India. The distribution of pressure was somewhat abnormal, pressure being lowest in Tenasserim and highest in the Central Provinces, Berar, Central India and Rajputana. Winds were little changed. Skies were clouding over in Balu-

chistan and Upper India, but remained clear over the remainder of the country. The only rainfall reported was at Negapatam and Trichinopoly. Temperature had decreased rapidly in Burma, due to the extension of the cool wave to that area, and was during the previous 24 hours more or less below the normal over the whole of the Indian area, excepting Baluchistan, South India, Mysore, Tenasserim and the Upper India hills, where it was in moderate to large excess. The deficiency was least in Burma ( $1^{\circ}$ ) and greatest in Orissa ( $8^{\circ}$ ).

*Thursday, 12th January.*—Pressure had given way briskly in East Baluchistan, Sind and West Rajputana, and a depression in which pressure was nearly a tenth of an inch below the normal had appeared in Upper Sind. Elsewhere the pressure changes were small and of no significance and the general pressure conditions remained unaltered. Winds were feebly cyclonic in Sind and more easterly than usual in the west coast districts. The air was very dry in the hill districts of Upper India and the Central Punjab. The lowest humidities recorded in these areas at 8 A.M. were 16 per cent. at Chakrata and Khushab and 23 per cent. at Simla. Skies were generally overcast in Baluchistan and Upper India and practically cloudless over the remainder of the country. Temperature had diminished briskly in Mysore and Southern India and was steady or had increased to a moderate extent over the remainder of the Indian region. The mean temperature of the past day was  $7^{\circ}$  in defect of the normal in Orissa and Chota Nagpur,  $6^{\circ}$  in Bengal, Bihar and Berar and  $5^{\circ}$  in Assam and the Central Provinces. It was, on the other hand,  $11^{\circ}$  above the normal at Quetta and  $5^{\circ}$  at Simla, Chakrata and Ranikhet.

*Friday, 13th January.*—Pressure had given way over the whole of the Indian region, with the exception of Baluchistan and the Indus Valley, where it had increased slightly to rapidly. The fall was brisk in East Rajputana and Bundelkhand, due to the transfer to that area of the depression which was passing through Sind on the previous day. Pressure was normal in Northern and Central India and in slight to moderate excess in the Peninsula. Gradients were, hence, feebler than usual over India. Pressure continued in slight to moderate defect in Burma, and the area of minimum pressure lay as for some days past over Tenasserim and the neighbouring sea area. Southerly winds prevailed in the hill districts of Upper India, and humidity had again decreased in that area. The air was driest at 8 A.M. at Chakrata where the percentage of humidity was 13 per cent. Skies had cleared in Baluchistan and the Punjab. They were overcast in Kashmir and light to moderate snow had fallen in that area. A cool wave of moderate intensity was affecting Baluchistan where temperature had fallen  $11^{\circ}$  during the past 24 hours. Temperature had increased slightly to briskly over the greater part of India and was now approximately normal, except in the Punjab, the Central Provinces, Berar, North-Western India, the Bombay Deccan and Upper Burma, where it was from  $3^{\circ}$  to  $8^{\circ}$  below the normal, due to much lower night temperature than usual.

*Saturday, January 14th.*—The pressure changes were again small in amount and of little importance. The chief features of the pressure conditions were a slight to moderate deficiency in Lower Burma and the adjacent sea area, and a moderate excess in Baluchistan. Winds were very light and irregular in the interior of India and north-westerly in Burma and the east coast of the Peninsula. They were exceedingly unsteady on the West Coast. A large increase of humidity had occurred in the hill districts of Upper India. Skies were generally free from cloud over the Indian region, with the exception of Southern India, where they were moderately clouded. No rain had fallen anywhere beyond a light thunder-shower at Mergui. The temperature conditions differed much less from the normal than for some days previously. The mean temperature of the previous 24 hours was  $5^{\circ}$  below the normal in Chota Nagpur and Orissa,  $4^{\circ}$  in Bengal, and  $3^{\circ}$  in Assam, Berar and the West Coast. Elsewhere temperature was practically normal.

**Temperature.**—The most remarkable feature of the weather of the week was the abnormally low temperature which prevailed over by far the greater part of the country. On the average of the whole period temperature was normal (i.e., varied by less than  $1^{\circ}$  from the normal) in Burma, Mysore and Madras, and was more or less in defect over the remainder of the country.

The deficiency was considerable to large in amount over nearly the whole of Northern and Central India and the north of the Peninsula and was most

marked in Chota Nagpur, the Central Provinces and Berar where it averaged 7°. The night temperature was somewhat more largely in defect in the area of decreased temperature than the day temperature. It is noteworthy that lower night temperatures were recorded at some stations in the Central Provinces than have been previously registered in January. The following gives data in illustration:—

STATION.	Lowest night temperature recorded during the week.	Date.	Lowest hitherto recorded in January.
Nagpur . . . . .	40°6	9th	43°2 in 1878
Pachmarhi . . . . .	30°3	9th	31°1 in 1878

The following table giving temperature variation data of the week shows that the mean temperature of the whole of India including Burma was in considerable defect of the normal on the first five days and in moderate defect on the last two days. For the whole week the mean temperature averaged 3°6 below the normal as compared with 1°5 during the previous week:—

**Rainfall.**—The rainfall of the week was small in amount and occurred almost solely in North-Eastern India. The rainfall returns show that the only districts which received effective rain during the week were Assam, Brahmaputra and Hills, East, Deltaic and North Bengal, Bengal Hills, North Bihar and East Coast South. The average amounts over the region of effective rainfall ranged between 0°17 inch and 0°38 inch and were very slightly above the normal of the period.

A feeble disturbance gave light to moderate snow in Kashmir on the 13th, but over the remainder of the country the week was unusually free from disturbance, and characterized by the prevalence of fine settled weather with little or no cloud.

HEM RAJ,

Off. Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 19th January 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 21st January.*—Light showers of rain fell in parts of the southern districts, but none elsewhere. The water-supply is generally sufficient. Some sowings are still being made. The standing crops are generally in good condition, except in parts of the Deccan. Harvesting continues, the outturn being almost normal. Pasturage is growing scarce, but fodder is sufficient. The condition of cattle is normal. There has been a general fall in prices.

**Bombay.**—*For week ending 25th January.*—Rain is wanted for the late crops in Shikarpur. The standing crops have been damaged by frost throughout Sind, and by rats or blight in parts of Bijapur and Dharwar. Harvesting of the early crops continues in three, and of the late crops in seven districts. Cotton-picking is progressing in parts of Gujarat and Kathiawar. Preparations for next season continue in parts of the Deccan and the Konkan. Fodder is sufficient, except in parts of Sind. Agricultural stock is healthy. Prices have risen in four and have fallen in six districts.

**Bengal.**—*For week ending 23rd January.*—There was no rain during the week except 1·18 inches at Darjeeling. Reports of all crops are favourable. The harvesting of winter rice is practically over, and the gathering of pulses and pressing of sugarcane are going on. The spring crops are thriving and are nearly ready to be cut. Poppy is also doing well. Caterpillars have appeared in Saran and Champaran, and are doing injury to the spring and poppy crops. The transplantation of spring rice is proceeding, and ploughing for autumn rice and jute has begun in some districts. The fodder-supply is everywhere abundant, and cattle are generally in good condition. No important change is reported in the price of common rice.

**North-Western Provinces and Oudh.**—*For week ending 25th January.*—The weather is clear and cold. The standing crops, except for slight damage from frost in parts, are doing well. Irrigation and the pressing of sugarcane continue. Supplies and fodder are sufficient. Prices have slightly risen in places, otherwise they are practically stationary.

**Punjab.**—*For week ending 25th January.*—Rain is badly wanted throughout the Province: none fell during the week. Sugarcane-pressing continues. Irrigation and weeding of the spring crops are in progress. Ploughings for the extra spring crops have commenced in Lahore. The standing irrigated spring crops are generally promising, but their condition is below the average in Dera Ismail Khan. Crops on lands dependent on rain are mostly suffering from drought, and the extreme dry cold has stunted the growing crops in Lahore. The gram and rapeseed crops are being damaged by caterpillars (*sundi*) in two tahsils of the Ferozepore district. The condition of cattle is generally good to fair, but poor in parts of Dera Ismail Khan. Fodder is getting scarce in Delhi, Shahpur and parts of Dera Ismail Khan, but is sufficient elsewhere. Prices are rising in Amritsar, Shapur, and Rawalpindi; falling in Delhi, Jullundur, and Sialkot; and are unchanged elsewhere. Wheat is selling from 15½ to 21½, gram 21 to 24, barley 32, bulrush millet 20 to 26½, maize 27 to 33, great millet 25, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 24th January.*—The weather is clear and cold, the night temperature being very low. The prospects of the

spring crops are fair in all districts, except in Saugor, Damoh, Chanda, and the Behir tahsil of Balaghat, where they are poor to gloomy. Frost has damaged the standing crops in Saugor, Jubbulpore, Narshingpur, the Behir tahsil of Balaghat, Damoh, the Lakhnadon tahsil of Seoni and parts of Chhindwara. Blight has caused slight damage in Hoshangabad, and drought and insects in parts of Raipur. The reaping and threshing of the autumn crops are almost complete, and the pressing of sugarcane continues. Reaping of linseed has begun in parts of Nagpur. The cheapest prices are—wheat 19, gram 32, rice 26, and *juar* 30 seers per rupee. The dearest prices are—wheat 12, gram 15, rice 11½, and *juar* 19½ seers per rupee. Wheat continues to sell above the normal rate in the south, east and west of the provinces, and the price of gram is still low in the Northern districts.

**Burma.**—*For week ending 21st January.*—In Lower Burma the reaping of the main crop has been completed in nine districts. Threshing continues. In Upper Burma sowing of dry weather paddy and other crops is still in progress. The standing crops generally promise well. The price of paddy has fallen slightly in Akyab and Myaungmya and risen in Pegu and Thayetmyo.

**Assam.**—*For week ending 24th January.*—No rain fell during the week. Harvesting of the late rice crop still continues in Kamrup, Darrang and Nowgong. Gathering of pulses, pruning of tea, and pressing of sugarcane are in progress. The prospects of the mustard, pulse, and sugarcane crops are generally good. Fodder is scarce in Cachar, the Naga, Khasi and Jaintia Hills, and in parts of Sylhet. Water is insufficient in the Khasi and Jaintia Hills. Prices—common rice, Silchar 14½, Sylhet, Dhubri and Gauhati 16, Tezpur, Nowgong, Sibsagar and Dibrugarh, 13 seers per rupee.

**Mysore and Coorg.**—*For week ending 25th January.*—**MYSOORE:** The standing crops are in good condition. Prices have fallen slightly in Kolar and Kadur and risen in Bangalore. *Ragi* (*Eleusine coracana*) has been harvested in Bangalore, Kolar, Mysore, Chitaldrug and Shimoga.

**COORG:** The threshing of rice has commenced, whilst that of *ragi* (*Eleusine coracana*) and coffee-picking continue. Prices of food-grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 25th January.*—**BERAR:** The weather is cool. The prospects of the winter crops are unfavourable. Land is under preparation for the ensuing monsoon crops in parts of the Province. Fodder is insufficient in two districts. A scarcity of water prevails in Akola, Amraoti, and Wun. Prices of wheat and *juar* have fallen in the Akola taluka but are steady elsewhere.

**HYDERABAD:** No rain fell during the week. The autumn rice harvest has been completed, and that of the spring crops has commenced in parts. Winter rice is being sown. Insects are damaging the castor-seed crops in three talukas of the Naldurg and Warangal districts, and rats are causing injury to the *jowar* and gram crops in some talukas in the Aurangabad and Gulburga divisions. Prices continue to fall. Prices—wheat 9, coarse rice 10½, and *jawari* 22 seers per current sicca rupee.

**Central India.**—*For week ending 25th January.*—No rain fell during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The condition of the standing crops is indifferent in Baghelkhand, and the probable outturn will, it is estimated, be below the average. Crops have been damaged by frost in Baghelkhand, Malwa and two districts in Bundelkhand. Agricultural stock and pasturage are in good condition. Prices are rising in Baghelkhand and Indore. The condition of opium is good in Bhopal and fair in Malwa and Indore.

**Rajputana.**—*For week ending 25th January.*—No rain fell during the week. Irrigation of crops continues. Their condition is generally good but

they have been damaged by frost in Jeypore and Kerowlee. Cattle are generally in good condition. The Government reserves have been opened to grazing in Ajmere-Merwara. Distress is spreading and increasing in Merwara. Takavi advances have been granted freely with beneficial results. In Ajmere distress is increasing in some villages of Gangwana. Fodder is scarce in parts of Marwar, Kherwara, Moywar, Haraoti, Ajmere, Jeypore and Bikanir. Prices are rising in Jhallawar and are steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 143 persons emigrated during the week. The total emigration from Merwara up to date amounts to 3,869 persons. The numbers employed on relief works were—363 in Ajmere, 2,122 in Merwara, and 102 in Marwar. Prices—Ajmere 20, Beawar 22, and Marwar 14½ seers per rupee.

**Kashmir.**—*For week ending 24th January.*—The weather has been snowy and cloudy. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE :**—*For week ending 25th January.*—No rain fell during the week. The condition of the standing crops is fair. Fodder is sufficient. Prices have risen slightly: wheat is selling at 18 and maize 25 seers per rupee.

**Nepal.**—*For week ending 21st January.*—Rainfall 0·11. The weather is intensely cold. Wheat is germinating. The price of rice is 9 seers per rupee.

T. W. HOLDERNESS,

*Secretary to the Government of India.*

GOVERNMENT OF INDIA.  
FOREIGN DEPARTMENT.

KHORASSAN TRADE REPORT FOR 1897-98.

It has been explained in previous reports that statistics as to the trade of Khorassan are not obtainable. This report is therefore necessarily restricted to Meshed.

General Review of Trade.

The tabular statement showing the import and export of foreign goods to and from Meshed for the past five years, reveals that there was an increase in the year under report over the previous year of £40,733. This is due to the figures for the year 1896-97 being specially low, owing to the roads between India and Persia and Afghanistan and Persia having been closed for a considerable time on account of a scare caused by a fear of the Plague. Other reasons for this decrease were also detailed in the report last sent in. The year under report, as compared with the year 1895-96, shows a decrease of £68,885. There was, moreover, a decrease as compared with the years 1898-94 and 1894-95. From Russian territory, on the contrary, there has been a steady increase for some years as shown by the following figures:—

	£
1894-95	69,208
1895-96	86,929
1896-97	42,547
1897-98	121,279

This is no doubt due to the Transcaspian Railway, and the existence of a cart-road between Meshed and Ashkabad. The Russian frontier is, as compared with the Indian frontier, very close to Meshed, and there is a large demand for the produce of Khorassan in Transcaspia.

The figures giving the imports from Europe *via* Turkey and Tabriz show that the year under report was the best of the last five years. The imports from Afghanistan were up to the average. The total imports tend to show that Meshed imports are somewhat declining. The figures have, however, been obtained from native sources, and can only be regarded as approximate. The exports to Russian territory, as compared with those to India, are about double. The figures of the exports of foreign goods passing through Meshed into Afghanistan show a steady increase. The total exports have much increased during the last five years.

BRITISH IMPORTS.

Trade from India *via* Bombay and Bandar Abbas with Meshed appears to have increased. A considerable proportion passed through Meshed on its way

Imports from India.

to Russian territory. The figures given in the returns are approximate rather than accurate.

There has been a decrease in the imports of green tea during the year under report, as compared with the previous year; while black tea has been

Tea.

imported in largely increased quantities, nearly all the green tea comes from China through Bombay, a very small proportion being Indian. The black tea is chiefly Indian. Only tea of a cheap description can find a ready sale in Meshed, the better descriptions being too expensive. There is no demand for uncoloured Indian green tea in Meshed, but about 300 packages of 100 lbs. each pass through Meshed on their way to Russian territory. The amount of green tea which passed into Russia through Meshed has decreased, while the amount of black tea increased. This subject was dealt with *in extenso* in last year's reports.

The imports of indigo into Meshed have trebled. The increase appears to be accidental, and not to have been caused by anything abnormal. The indigo brought to Meshed is of an inferior quality produced by native growers

Indigo.

in Sukkur and Multan. There is no demand for the better descriptions such as are grown in Bengal.

The figures, as compared with the previous year, show a considerable increase in sheetings and longcloth, both bleached and unbleached. These articles have not yet been driven out of the market.

Sheetings, longcloth—bleached and unbleached.

Under the head Prints there has been a considerable decrease owing to Russian prints being cheaper and more attractive than those supplied by British firms. It was noted in last year's report that the Russian Government were granting a bounty on prints. Their command of the trade was enlarged on in that report and the reasons were given. Under the head "Miscellaneous piece-goods," there has also been a considerable decrease.

Cotton prints.

Large quantities of muslin were formerly imported to be sent on to Russia, but this year this commodity was only imported to the extent of £260. The Russians have manufactured muslin. In last year's report it was noted that it was imported into Central Asia *via* Batoum.

Muslin.

The imports of cotton yarn and twist have risen from £1,590 to £17,545. These commodities find great favour amongst the inhabitants of Khorassan for manufacture into country cloth of a rough quality. In 1895-96 and 1896-97 there was a great fall in this import. The figures have, however, again risen.

Cotton yarn and twist.

The import of drugs has risen from £154 to £2,100; the increase seems to have been due to an accumulation caused by the closing of the roads into Persia under the Russian plague regulations, otherwise there is no special reason why an unusual amount of drugs should have been imported. Most of these drugs are of Indian produce.

Drugs.

There is an increase under the head of coffee. It is said that there is an increase in the consumption of this article in Mehab and the district.

Coffee.

There was an increase also in spices, said to have been caused by a large quantity coming in directly the roads were opened after they had been closed in consequence of the rumours of approaching plague.

Spices.

Broadcloth was imported to the extent of £2,730; the importation of this article is said to be largely on the increase. Formerly broadcloth came *via* Turkey and Tabriz. The broadcloth coming from Bombay is of a finer quality and suits public taste better; an increase which has taken place in the import may be thus accounted for.

Broadcloth.

#### RUSSIAN IMPORTS.

With respect to articles imported from Russian territory it is noticeable that there has again been a considerable increase under the head of loaf-sugar and crystallised sugar. The increase over last year is said to be due to a certain extent to the increase in the custom of drinking tea sweetened to an extent which would be unpalatable in Europe. Other sugars are practically entirely ousted from the market. There is no competition between Russia and other countries with regard to sugar. This point has been noted in previous reports.

Sugar.

Piece-goods.

In piece-goods there was a small decrease for which no very special reason can be assigned.

There has been an increase in iron goods (chiefly rods) used for a variety of miscellaneous purposes. There has also been a large increase in steel sheets.

Iron goods and steel.

In glass and Chinaware there was a small increase. In the report submitted last year it was noted that Russian glass and China had ousted the manufactures of other countries.

Glass and Chinaware.

Formerly gold thread and lace was imported through Balkh to various parts of Afghanistan, but owing to heavy dues levied by the Amir these articles are now brought in through Russia and pass on through Meshed. This accounts for a large increase under this head.

Gold lace.

In paper there has been an increase, as is the case in vitriol, for which no specific reason can be assigned. Last year decreases under both heads were reported.

Paper, Vitriol.

An increased import of cotton yarn is reported. The Russians appear to be manufacturing this article with success.

Cotton yarn.

An increase in sack-cloth is accounted for by an increase in the export of wool to Russia, for the packing of which sack-cloth is required. This wool is not shown in these returns, as it goes from other parts of Persia without entering the town of Meshed.

Sack-cloth.

There has been an increase from £390 to £472 under this head. This is Chinese black tea, which is in some cases more appreciated by Persians of the higher classes than the Indian black tea. The increase under this head is not very considerable.

Tea.

With respect to the goods imported from Merv and Bokhara, the figures available show that there has been an increase from £1,729 to £4,997. The chief item is skins, the import of which has increased from £680 to £2,260, said to be due to the increase in the wearing of lamb-skin caps in Persia. There has also been an increase in the imports of hides to a considerable extent; they are much required for covering boxes containing opium which are exported to China.

Merv and Bokhara trade.

#### IMPORTS *via* TURKEY AND TEHRAN.

In the articles imported *via* Turkey, Tabriz and Tehran, there is an increase of £6,983. The chief increases are in piece-goods, mostly English cotton prints. There is also a large increase under the head of aniline dyes; extensively used in dyeing wool and silk. It is to be regretted that popular taste should occasion a demand for these dyes, which are of bad quality and inharmonious colours.

#### AFGHAN IMPORTS.

In the imports from Afghanistan there was an increase of £5,972. The general increase is probably due to the opening of the roads from Afghanistan which had been closed on the plea of plague. With respect to "barak" there was a considerable decrease owing to the Amir's preventing the export. In sheep and lamb skins there was a very large increase. These articles are largely bought by Russian merchants in Meshed. There was an increase in the import of pistachio nuts, due to the removal of a prohibition placed by the Amir on their export.

#### EXPORTS TO INDIA.

Exports to India *via* Yezd or Kirman have increased by £20,402. The chief increase was under the head of opium from £14,690 to £37,770. This was partly owing to a favourable opium harvest. Probably most of this opium is for China. Opium is very largely cultivated in Khorassan. The export of silk, both piece and raw, decreased, while there was an increase in asafoetida owing to a favourable harvest.

### EXPORTS TO RUSSIAN TERRITORY.

As regards the export of articles from Meshed to Russian territory the returns show that the exports were almost stationary, there being a decrease of only £867. There was a considerable increase in skins owing to the possibility of buying them cheaply in Meshed, while a ready demand is found in Russia. A large decrease in turquoises is noticeable, probably due to their being readily carried by pilgrims and travellers and not passing through the custom house.

### EXPORTS TO AFGHANISTAN.

The total of exports from Meshed into Afghanistan show a slight increase. The figures hardly call for special remark.

Revenue.	REVENUE OF KHORASSAN AND SEISTAN FOR 1897-98.			
	Khorassan.		Seistan.	
	Tumans.	Krams.	Shahis.	
Cash	621,359	8	11	(£124,268)
	Khurware.	Mans.	Seers.	
Grain	39,864	69	10	(Tons 11,540)
Chopped straw	5,067	13	25	( „ 1,468)
	Seistan.			
	Tumans.	Krams.	Shahis.	
Cash	15,364	6	...	(£3,073)
	Khurware.	Mans.	Seers.	
Grain	10,431	80	...	(Tons 3,082)
Chopped straw	800	...	...	( „ 86)

As large numbers of people have come from various places to reside at Meshed, it can be safely estimated that the population of this town was about 80,000 souls this year.

At present there are about 200 carpet-weaving looms. Each loom turns out in a year three carpets, each measuring, on an average, 5 zars long by 4 zars broad.

The length of the zar is 41½ inches. There is also a large number of carpet factories in Turshiz and Kain.

Baluch and Herat carpets, which are much appreciated at present, are exported in large numbers to foreign countries.

Formerly there were 1,200 looms for silk-weaving in Meshed, but at present there are not more than 250. The falling off is due to a rise in the value of raw silk and less demand for Meshed silks owing to aniline dyes being used.

There are also shawl-weaving factories and other factories for the manufacture of inferior articles for local consumption, such as glazed earthenware, glass, soap, candles, etc.

The turquoise mines at Nishabur are at present held by the Malik-ut-Tujjar of Khorassan (the head of the merchants) at an annual rent of 24,000 Tumans (£4,800). There is great uncertainty as to the continuity of the contracts, which is injurious to the mines. The outturn of the mines can only be a matter of estimate.

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the copy of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA,  
DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, January 21st, 1899.**

Very strongly pronounced anti-cyclonic conditions obtained in the Indian area during the first two days of the week. A wave of low pressure crossed the North-West Frontier into North-Western India on the 17th, but it was of very slight intensity, and hence produced no important change in the weather conditions beyond giving a light fall of snow in Kashmir and perhaps the interior ranges of the Punjab Himalayas. Its disappearance on the 18th was followed by a brisk increase of pressure which re-established high pressure conditions of moderate intensity on the 20th and 21st.

Weather was hence unusually fine and settled throughout the week in the plains of India, except in South Madras, which obtained some local thunder-showers of little importance at the end of the week from intensified north-east winds.

The principal feature of the weather of the week under review, as also of the previous week, was the severe cold over the whole of Northern and Central India and the North Deccan. The mean temperature of the week averaged from 3° to 6° below the normal in these areas due chiefly to unusually low night temperature. The cold was most severe in Bengal on the night of the 17th, when lower night temperatures were recorded at several stations than have been observed for many years in January.

**Daily Summary.**—*Sunday, January 15th.*—Pressure was practically unchanged in Southern India, and had increased over the remainder of the Indian region. The rise was brisk to rapid in Northern and Central India. Pressure

was in moderate to considerable excess in North-Western and Central India and Baluchistan, and strongly marked anti-cyclonic conditions obtained in that area. Pressure was approximately normal in the Peninsula, North-Eastern India and Burma, and the range of pressure was hence considerably larger in amount than usual over the Indian area in January. The air motion was of the ordinary cold weather type. The air was very dry in Kathiawar, Cutch and West Rajputana. Skies were overcast in the Kashmir Valley, and were clear or lightly clouded in the plains of India. No rain had fallen anywhere during the previous twenty-four hours. A cool wave of considerable intensity was affecting Baluchistan and Upper India, and causing a large reduction of temperature. The mean temperature of the past day was  $15\frac{1}{2}^{\circ}$  below the normal at Quetta,  $6^{\circ}$  in Sind and  $5^{\circ}$  in the Punjab due chiefly to unusually low night temperature.

Temperature was in moderate to considerable defect of the normal in Bengal, Assam, Orissa, Bombay and Southern India, and practically normal in Burma, the Gangetic Plain, Mysore, Madras Deccan, Central India, Berar and the Central Provinces.

*Monday, January 16th.*—The pressure changes of the previous 24 hours were very irregular in character in the plains of India. They, however, tended to accentuate the abnormal pressure conditions obtaining in Northern and Central India on the previous day. Pressure was nearly two-tenths of an inch above the normal in Sind and a twentieth of an inch below it in Upper Assam and North Bengal, and there was hence an abnormal gradient of a quarter of an inch between these two regions. Pressure had increased with great rapidity locally in Kashmir, the rise being greatest at Astor, where it was three-tenths of an inch in amount. A slight local fall of the barometer had occurred in Baluchistan, and a feeble wave of low pressure was passing eastwards through that area. Winds were generally from their normal cold weather directions in the plains of India, but were somewhat stronger than usual. The air was abnormally dry in Sind, Cutch and Rajputana. The lowest humidity recorded in this area was 17 per cent. at Hyderabad. Skies had clouded over in Baluchistan and Upper India. No rain or snow had again occurred at any of the meteorological stations. Temperature had increased very rapidly in Baluchistan, and was only in slight defect in that area during the previous 24 hours. A further reduction of temperature had, on the other hand, occurred in Upper and Central India and also in the North-Western Provinces due to the extension of the cool wave to that area. The mean temperature during the past day was  $7^{\circ}$  in defect in the Punjab,  $6^{\circ}$  in Sind,  $5^{\circ}$  in Rajputana,  $4^{\circ}$  in Central India, Gujarat and the North-Western Provinces,  $3^{\circ}$  in Bengal and Orissa and  $2^{\circ}$  in Bihar, Chota Nagpur, the Bombay Deccan and West Coast. Elsewhere the variations of temperature from the normal were small and unimportant.

*Tuesday, January 17th.*—The wave of low pressure which was affecting Baluchistan on the previous day had entered North-Western India, and caused a brisk to rapid fall of pressure in that area. Pressure was now in slight to moderate defect in the Punjab, and in considerable defect at the stations in the North-Western Himalayas. Over the remainder of the Indian area the pressure changes were too small to modify the general pressure conditions. Gradients had diminished rapidly in Northern and Central India, and the winds were hence much lighter than on the previous two days. The air continued exceedingly dry in North Bombay. The driest station in India at 8 A.M. was Bhuj, where the percentage of humidity recorded at that hour was only 10. Skies had cleared in Baluchistan, but continued overcast in Kashmir, where light snow had fallen during the previous 24 hours. Temperature had fallen over the whole of Northern and Central India and the Deccan, and was now more or less largely below the normal. The deficiency was most marked in the Punjab, Sind, Central India, Rajputana and the North-Western Provinces, in which it varied between  $6^{\circ}$  and  $11^{\circ}$ . Temperature differed to no important extent from the normal in Burma and Southern India.

*Wednesday, January 18th.*—Pressure had increased in Baluchistan, Northern India and Burma, and had fallen in the remainder of India. The

changes were, however, too small in amount to affect the distribution of pressure. The air circulation was similar to that on the previous day. Skies had cleared in Kashmir, and were now free from cloud over the whole of the country, excepting Southern India, where they were lightly clouded. Light snow had again been received in Kashmir. The most noteworthy feature of the weather was the low temperature over the whole of India to the north of Lat.  $20^{\circ}$  N. The mean deficiency exceeded  $3^{\circ}$  in amount over that area, and was greatest in the North Western Provinces and Central India ( $7^{\circ}$ ). The temperature conditions were practically normal in the Peninsula and Burma.

*Thursday, January 19th.*—Pressure had given way briskly in Baluchistan thus reducing the excess in that area. It had increased over nearly the whole of India and Burma, briskly in Southern India, Berar, the Central Provinces, Chota Nagpur and South and East Bengal, and slightly elsewhere. The variations of pressure from the normal were small, except in Baluchistan, Berar and the Central Provinces, where pressure was nearly a tenth of an inch above the normal. No change of importance had occurred in the air movement. The air was abnormally dry in Kathiawar, Gujarat and the northern districts of the Central Provinces. The lowest reported 8 A.M. humidity was 13 per cent. at Saugor. Skies were clouding over in Baluchistan and North-Western India, but remained clear over the remainder of the country. No rain had fallen in India during the previous 24 hours. A large increase of temperature had occurred in Baluchistan and a moderate increase in Northern India. The mean temperature of the previous 24 hours was in slight excess in Baluchistan, Upper Sind and the South-West Punjab and also in Burma, and was more or less below the normal in other districts. The deficiency was more than  $5\frac{1}{2}^{\circ}$  in amount in Central India ( $8^{\circ}$ ), Berar ( $7^{\circ}$ ) and the Central Provinces, the North-Western Provinces, Chota Nagpur and Bengal (each  $6^{\circ}$ ). The decreased temperature in these areas was due chiefly to much lower night temperature than usual.

*Friday, January 20th.*—Pressure had increased slightly at the great majority of stations, thus intensifying the high pressure conditions obtaining on the previous day. Pressure was now approximately uniform over Northern and Central India and the North Deccan, and winds were light and irregular in these areas. Winds were strong over the west of the Peninsula, where gradients were steep. Humidity had increased in the Gangetic Plain, Central India and the Central Provinces. Skies had cleared in Baluchistan and Upper India. No rain or snow had fallen anywhere. The temperature conditions were practically unchanged.

*Saturday, January 21st.*—Pressure had changed generally by small amounts except in Baluchistan and Upper India, where it had fallen slightly to briskly. Pressure continued above the average almost everywhere. The excess was moderate to considerable in amount in North-Eastern and Central India, Berar, the Central Provinces and North Madras, and small and unimportant over the remainder of the country. Winds had shifted to north-east on the Madras coast, and were blowing freshly. A northerly gale prevailed at Cherat. Skies were overcast in Southern India, and light showers had fallen in the extreme south of Madras and in East Ceylon. Skies were clouding over in Baluchistan and Upper India. Temperature had increased over the greater part of India, and the deficiency was hence less pronounced than on the previous day. The mean temperature of the previous 24 hours was from  $3^{\circ}$  to  $9^{\circ}$  below the normal in a large area, including the whole of North-Eastern and Central India, the Central Provinces and Berar, and approximately normal in the remainder of India. The night temperature was much more largely in defect in these areas than the day temperature. Temperature was, on the other hand, in considerable excess in Baluchistan, the Punjab hill districts and Central Burma.

**Temperature.**—The variations of the temperature conditions of the week from the normal were almost identical in character and amount with those of the previous week. Temperature was more or less below the normal over the

whole of India during the first six days of the week, but rose above it to a slight extent in Gujarat and the coast districts of the Peninsula on the 21st. Temperature varied slightly but irregularly from the normal in Burma on the first four days, but was in steady slight excess during the remainder of the week. On the average of the whole period temperature was practically normal (*i.e.*, differed by less than  $1^{\circ}$  from the normal) in Burma, the Madras coast and Madras Deccan, and more or less in defect of the normal in all other districts. The deficiency was small in amount in South India, Mysore, the West Coast and Bombay Deccan, and moderate to large over the whole of Northern and Central India and the North Deccan. It was most pronounced in Central India, where it averaged  $6^{\circ}$ . The night temperature was in much larger defect in the area of decreased temperature than the day temperature. The most striking feature of the temperature conditions of the week was the abnormally low night temperatures experienced in Baluchistan, the West Punjab and Lower Bengal. The following gives the lowest temperatures recorded in these areas and also the lowest hitherto registered in the month of January at the same stations for comparison:—

STATIONS.	Lowest minimum temperature during week.	Date on which recorded.	Lowest minimum previously recorded in January.	Year in which recorded.
Quetta . . . . .	10.8	15th	9.3	1897
Peshawar . . . . .	28.9	18th	28.8	1878 and 1880
D. I. Khan . . . . .	29.0	18th	26.0	1876
Mymensingh . . . . .	40.2	18th	41.1	1887
Saugor Island . . . . .	47.0	18th	46.8	1878
Calcutta . . . . .	45.2	18th	45.5	1878
False Point . . . . .	45.9	21st	46.4	1890

The following table gives temperature variation data of the week:—

PROVINCE.	Variation from normal of mean temperature of 24 hours preceding 8 A.M. of date—							Mean variation of week.
	15th.	16th.	17th.	18th.	19th.	20th.	21st.

	-2.3	-0.5	0	-1.8	-2.5	-3.2	-0.3	-1.5
Mean for whole of India . . . . .	-2.2	-2.4	-3.6	-3.7	-3.8	-3.6	-2.7	-3.1

**Rainfall.**—Weather was feebly disturbed in Kashmir and the interior ranges of the Punjab Himalayas on the 17th and 18th due to the advance of a low pressure wave from Persia into North-Western India, and light snow fell in these areas during that period. Darjeeling was visited by a severe hailstorm on Wednesday evening, which gave it a fall equivalent to 1·18 inches of rain. With these exceptions no rain or snow was reported from any part of the Indian area during the week.

The chief abnormal features of the seasonal rainfall up to date may be summed up as follows:—

- (1) Heavier rain than usual in Bengal (excepting Orissa), the Assam Valley and Hills, Oudh and North-Western Provinces East, and East Submontane.
- (2) Scanty rainfall in Cachar, Orissa, the North-Western Provinces Central, West, West Submontane and Hills, the Central Punjab, the Punjab Hills, Central India East, and East Coast South.
- (3) Absence of rain over the remainder of India, Burma and Baluchistan, and hence general deficiency, most marked in the Punjab, Baluchistan and parts of the Central Provinces.

HEM RAJ,

Offg. Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 26th January 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 28th January.*—No rain fell during the week except showers in the southern districts. The water-supply is generally sufficient except in parts of the Deccan. Some sowings are still being made chiefly under irrigation. The standing crops are thriving generally, except in the Deccan where some are not in good condition. The recent harvest has yielded a fair to normal out-turn. Pasturage is growing scarce, but fodder is generally sufficient. The condition of cattle is normal. The fall in prices continues.

**Bombay.**—*For week ending 1st February.*—The standing crops have been injured by frost throughout Sind and by white ants in one taluka of Thar and Parkar. Wheat has been injured by rats in parts of Bijapur and by excessive wind in two talukas of Dharwar. Cotton has been damaged by frost in parts of Baroda Territory. The reaping of the late crops is progressing in ten and preparations for next season are being made in seven districts. Cotton-picking continues in parts of Gujarat and Kathiawar. Fodder is sufficient except in parts of Sind. Agricultural stock are generally healthy. Prices have risen in five and have fallen in seven districts.

**Bengal.**—*For week ending 30th January.*—There was rain over a considerable portion of Bengal Proper and Chota Nagpur, and also in places in Bihar during the week. Prospects of the spring crops are generally favourable and some of them are being harvested. The poppy crop in Bihar, except for some damage done by caterpillars in parts of Darbhanga and Champaran, is flourishing. Spring rice is being transplanted and doing well. Ploughing for autumn rice and jute is proceeding. Fodder is plentiful in every district. Prices have slightly risen in some places: in others they are stationary.

**North-Western Provinces and Oudh.**—*For week ending 1st February.*—Slight showers of rain fell during the week in three districts, otherwise clear weather has prevailed. The standing crops are in good condition. Pressing of sugar-cane and irrigation of the spring crops continue. Prospects, except for damage by frost in parts, are favourable. Markets are well supplied. Fodder is sufficient. Prices show a slight rise in some districts otherwise they are fairly stationary.

**Punjab.**—*For week ending 1st February.*—No rain fell during the week: It is badly wanted throughout the Province to improve the prospects of the standing spring crops. Sugar-cane pressing still continues in some districts. Watering of the spring and ploughing for the extra spring crops are in progress. The standing crops are generally in fair condition: they are up to the average in Jullundur and below the average in Dera Ismail Khan. Irrigated crops are promising while those dependent on rain are mostly suffering from drought. The rapeseed crop is being damaged by caterpillars in two tahsils and by cold in one tahsil of the Ferozepore district. Cattle are generally in good condition. Fodder is scarce in Delhi, Shahpur and parts of Dera Ismail Khan, insufficient in Lahore, and ample elsewhere. Prices, specially of wheat, are rising in Jullundur, Amritsar, Rawalpindi and Peshawar and are unchanged elsewhere. Wheat is selling from 15½ to 21, gram 21½ to 24, barley 32, bulrush millet 20 to 24½, maize 26 to 31, great millet 25, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 31st January.*—The weather is clear and cold. The prospects of the winter crops are fair to good in all districts except in Saugor, Damoh and part of Chanda where they are poor to gloomy. Some damage through frost to standing crops, more especially to pulses, is reported from Saugor, Damoh and Bhandara, and through frost and want of moisture from Mandla. The reaping and threshing of the autumn crops have almost been completed and the pressing of sugar-cane continues. The reaping of the winter crops has begun in some districts but employment for agricultural labour is scarce in Saugor and Damoh. Fodder has become scarce in the Bargarh tahsil of Sambalpur. The cheapest prices are:—Wheat 20, gram 32, rice 26 and *juar* 38 seers per rupee. The dearest prices are wheat 12, gram 15, rice 11½, and *juar* 20 seers per rupee. Wheat continues to sell above the normal rate in the south, east and west of the provinces, and the price of gram is still low in the northern districts.

**Burma.**—*For week ending 28th January.*—In Lower Burma reaping still continues in a few districts. In Bassein the outturn is found to be slightly less than was anticipated. In Upper Burma sowing and transplanting of dry weather paddy and miscellaneous crops are progressing. Prospects continue favourable. The price of paddy has risen slightly in Rangoon, Thongwa, Henzada, Thaton, Tavoy, Minbu and Bhamo and has fallen in Mandalay and to a less extent in Pegu.

**Assam.**—*For week ending 31st January.*—Slight rain fell during the week in all districts except Goalpara and Kamrup. Harvesting of the late rice crop still continues in Kamrup and Nowgong. Gathering of pulses, pruning of tea, and pressing of sugarcane are in progress. The prospects of the sugarcane, mustard and pulse crops are generally good. Fodder is scarce in Cachar and the Naga, Khasi and Jaintia Hills. Water is insufficient in the Khasi and Jaintia Hills. Prices—common rice, Silchar 14½ to 15, Sylhet, Dhubri and Gauhati 16, and Tezpur, Nowgong, Sibsagar and Dibrugarh, 13 seers per rupee.

**Mysore and Coorg.**—*For week ending 1st February.*—**MYSORE:** Prospects are good. *Ragi* (*Eleusine coracana*) has been harvested in parts of Bangalore, Kolar, Mysore and Chittaldroog. Prices have fallen slightly in Bangalore, Mysore and Kadur and have risen in Shimoga.

**COORG:**—The threshing of rice continues whilst that of *ragi* (*Eleusine coracana*) has been completed. Coffee is still being gathered. Prices of food grains are stationary. Water and fodder for cattle are sufficient.

**Berar and Hyderabad.**—*For week ending 1st February.*—**BERAR:** The weather is cool. The winter crops are not in good condition. Land is being prepared for the ensuing monsoon crops in all districts except Amraoti. A scarcity of fodder and water prevails in parts of the province. Prices are stationary.

**Hyderabad.**—No rain fell during the week. Harvesting of the spring crops continues and weeding of the winter crop is in progress. Insects are damaging the castor-seed crop in parts of the Warangal and Nalgunda districts. Prices continue stationary. Prices—wheat 9, coarse rice 10½, and *juari* 21½ seers per current sicca rupee.

**Central India.**—*For week ending 1st February.*—No rain fell during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The condition of the standing crops and their probable outturn are good, though slight damage has been caused by frost in Gwalior, Bundelkhand and Malwa. Agricultural stock and pasturage are in good condition. Prices are normal everywhere. The condition of opium is good in Bhopal and fair in Malwa.

**Rajputana.**—*For week ending 1st February.*—No rain fell during the week. Irrigation of crops continues. Their condition is generally good but they have been slightly damaged by frost in Merwara, Jeypore and Ulwar and considerably in Kishengurh. Cattle are generally in good condition. The Government reserves have been opened to grazing in Ajmere-Merwara. Distress is spreading and increasing in Marwar. Takavi advances have been granted freely with beneficial results. In Ajmere distress is increasing in some villages of Gangwana. Fodder is scarce in parts of Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypore and Bikaner. Prices are rising in Jhallawar and Jeypore, falling in Sirohi and Meywar, and are steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 113 persons emigrated during the week. The total emigration from Merwara up to date amounts to 3,956 persons. The numbers employed on relief works were—409 in Ajmere, 2,608 in Merwara and 1,087 in Marwar. Prices—Ajmere 20, Beawar 22 and Marwar 14½ seers per rupee.

**Kashmir.**—*For week ending 31st January.*—The weather has been snowy and cloudy but is now fine. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 1st February.*—Report not received.

**Nepal.**—*For week ending 28th January.*—Rainfall '06. The weather is foggy and damp. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,  
Secretary to the Government of India.

GOVERNMENT OF INDIA.  
PUBLIC WORKS DEPARTMENT.  
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST TO 22ND  
JANUARY, 1898, AND FROM 1ST TO 21ST JANUARY, 1899.

N.B.—As regards the figures in column Total Earnings from 1st January 1899, audited figures have been used, as far as possible.

RAILWAY.	Average earnings per mile per week during the first half of 1898.	WEEK ENDING 22ND JANUARY, 1898.			WEEK ENDING 21ST JANUARY, 1899.			Earnings from 1st to 22nd January, 1898.	Earnings from 1st to 21st January, 1899.	Increase.	Decrease.

SUPPLEMENT TO  
**The Gazette of India.**

No. 6. CALCUTTA, SATURDAY, FEBRUARY 11, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or usefully be known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees seven if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA,

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, January 28th, 1899.**

The week under review was remarkably free from disturbance throughout the Indian region, with the exception of Kashmir, the extreme south of the Peninsula and Bengal. The first of these areas obtained light snow on the 25th and 26th due to a slight depression in the North Punjab, the second area some local showers from intensified north-east winds on the 22nd and 23rd, and the last-named locality numerous thundershowers on the 27th due to the passage eastwards through that area of a low pressure wave. The temperature conditions of the week were much less abnormal than during the previous two weeks. Temperature was in steady moderate defect in Madras due chiefly to low night temperature accompanying great dryness of the air caused by the prevalence of dry land winds. Very cool weather prevailed over the whole of Bengal during the first three days of the week, and remarkably low night temperatures were recorded at Calcutta and Saugor Island on the night of the 21st. On the mean of the whole week temperature was approximately normal over the whole of the Indian area, excepting Assam, Bengal, Bihar and Madras, where it was in moderate defect.

**Daily Summary.—Sunday, January 22nd.**—Pressure had decreased throughout the Indian area, and was now practically normal. Light irregular airs and calms obtained over the whole of Northern and Central India, where pressure was approximately uniform. Moderate gradients obtained in the Peninsula and the Bay of Bengal, and winds were strong in the south-west of the Bay. Skies were densely clouded in the North-West Himalayas, the South-

East Punjab and the adjacent districts of the North-Western Provinces. They were moderately clouded in the south of the Peninsula and Ceylon, and moderate rain had fallen in East Ceylon and showers in the extreme south of Madras. Temperature was in considerable to large defect of the normal in Assam, Bengal, Orissa, Chota Nagpur, the Gangetic Plain, Berar and the Central Provinces and practically normal in the remainder of India and Burma. Temperature was, on the other hand, in considerable excess in Baluchistan due to much higher day temperature than usual.

*Monday, January 23rd.*—A rapid rise of the barometer had occurred in Baluchistan and Upper Sind, and pressure was now upwards of a tenth of an inch above the normal in that area. Pressure had increased slightly to briskly in the Punjab and Lower Sind, and was in slight excess. In the remainder of India the barometric changes were too small to affect the relative distribution of pressure. Winds were unchanged in direction, but were somewhat lighter in the south-west of the Bay and the Coromandel Coast districts. The air was very dry in West Rajputana and the hill districts of Northern India. Skies had cleared in Upper India, and were now free from cloud over the whole of the Indian area, except Southern India and Ceylon, where they continued moderately clouded. Moderate rain had fallen in Ceylon and showers in the extreme south of Madras. A rapid fall of temperature had occurred in Baluchistan, and temperature was now practically normal in that area. Temperature had, on the other hand, increased slightly to rapidly in India, thus reducing the deficiency in that area. The mean temperature of the previous 24 hours was from  $3^{\circ}$  to  $7^{\circ}$  below the normal in North-Eastern India and approximately normal in other districts. The chief feature of the temperature conditions was the unusually large diurnal range in the Punjab and Rajputana ( $11^{\circ}$  above the normal).

*Tuesday, January 24th.*—Pressure had given way over the whole Indian area. The fall was rapid in Sind and the Punjab, slight in Burma and Southern India and brisk over the intervening region. Pressure was below the normal throughout India and Burma by amounts ranging from  $\cdot 04$ " in Burma and Southern India to  $\cdot 13$ " in the North-West Punjab. Pressure was unusually uniform over the greater part of the interior of India, and winds were light and unsteady. Winds had shifted to north-westerly directions in South Madras, and caused a very rapid decrease of humidity. Skies had clouded over in Kashmir and the Punjab due to the formation of a slight disturbance in the North Punjab and Chitral. Skies were clearing in Southern India and Ceylon. Practically no rain or snow had fallen at any of the meteorological stations. Temperature had increased to a moderate extent in North-Eastern India, but was still in moderate to considerable defect. Temperature had decreased briskly in Southern India and also in Gujarat and Baluchistan, and averaged  $2^{\circ}$  to  $3^{\circ}$  below the normal. The variations of temperature from the normal were small and unimportant in other districts.

*Wednesday, January 25th.*—Pressure had increased slightly in Bengal, Assam and Upper Burma and briskly in the North-West Punjab. Pressure was steady in Lower and Central Burma and Baluchistan, and had fallen over the remainder of the country—briskly in Rajputana and Central India. Pressure was in moderate excess in Baluchistan and more or less in defect in India and Burma. The deficiency was least in amount in East and North Bengal and greatest in Rajputana, Central India and the central and northern districts of the Central Provinces, where it was slightly upwards of a tenth of an inch. Winds had shifted to southerly directions in Bengal and easterly directions in the Gangetic Plain. Humidity had increased very rapidly in Gujarat and the hill districts of Upper India, and decreased in Sind, Rajputana, the Central Provinces and the Peninsula. Skies had cleared in the North and West Punjab, but were overcast in Kashmir and heavily clouded in the South-East Punjab, the North-Western Provinces and East Rajputana. Light snow had fallen in Kashmir and probably also in Chitral. Temperature had increased rapidly in Orissa, Sind and Rajputana and briskly in Bengal, Gujarat and Berar. The temperature conditions were now much less abnormal than for some days

past. The mean temperature of the past day was in moderate defect in Bengal, Assam, Bihar, Mysore and Madras and in moderate excess in Berar, Sind and Rajputana.

*Thursday, January 26th.*—Pressure had fallen slightly in Baluchistan and increased slightly to briskly in North-Western India, and was now practically normal over the whole of that area. Pressure had increased briskly to rapidly in Kashmir, and the feeble disturbance in that area on the previous day had passed away. Pressure had decreased slightly to briskly in North-Eastern India, and was nearly an eighth of an inch in defect of the normal in Chota Nagpur. The pressure changes were small and irregular in the Peninsula, and the pressure conditions remained unchanged in that area. Winds from between south and east prevailed in Bengal, Bihar and Chota Nagpur, and skies were clouding over in that area. Skies were lightly clouded in Southern India, and were clear in the remainder of India and Burma. Light snow had fallen in Kashmir and a local shower at Mymensingh. Temperature had decreased slightly in the southern half of the Peninsula, and averaged  $3^{\circ}$  below the normal in Mysore and Madras during the previous 24 hours due almost solely to much lower night temperature than usual. Temperature had again increased briskly in North-Eastern India, and was now approximately normal over nearly the whole of Central India, the Central Provinces and Upper India. It was  $2^{\circ}$  in defect of the normal in Burma, Assam and the North-Western Provinces and  $5^{\circ}$  below in Baluchistan.

*Friday, January 27th.*—Pressure had recovered briskly over the greater part of Northern and Central India and Upper Burma and slightly in the Peninsula and Baluchistan. Pressure differed to no important extent from the normal over by far the greater part of the country. It was in moderate to considerable excess in Upper Burma and Assam and in moderate defect in Berar and the Central Provinces. Winds were shifting back to northerly directions in Bengal. Humidity had increased generally in India and fallen in Baluchistan. The air was very dry in Berar, Gujarat and the West Punjab. The lowest humidity recorded at 8 A.M. in that area was 20 per cent. at Deesa and Bhavnagar-Para. Skies were heavily clouded in Baluchistan and Kashmir and partially clouded in North-Western and Central India. Local thundershowers had occurred in Bengal, but skies were now clearing in that area. A brisk to rapid increase of temperature had occurred in Chota Nagpur, Bihar and Bengal, and the mean temperature of the previous 24 hours was  $5^{\circ}$  above the normal in Chota Nagpur,  $3^{\circ}$  in Orissa and  $2^{\circ}$  in Bengal and Bihar. Temperature continued in moderate to considerable defect of the normal in Mysore and Madras. Temperature was practically normal in North-Western and Central India and the Deccan. The diurnal range of temperature was, however, unusually large in the Punjab, where the day temperature averaged  $4^{\circ}3$  above the normal and the night temperature  $4^{\circ}4$  below it.

*Saturday, January 28th.*—The barometric changes of the previous 24 hours were generally small in amount, and produced no important change in the pressure conditions prevailing on the previous day. Winds continued light and unsteady in Northern India. Winds were much below their normal strength in Madras and Mysore. A further slight decrease of humidity had occurred in Gujarat and Upper Sind, and the air was now unusually dry in that area. The percentage of humidity at 8 A.M. was only 18 at Bhavnagar-Para and 28 at Bhuj. There was much cloud in Baluchistan, North-Eastern India and South Madras. No rain had fallen anywhere in the Indian area beyond a light shower at Colombo. Temperature was in moderate to considerable excess in Orissa, Chota Nagpur, Rajputana, Central India and Berar and  $3^{\circ}$  in defect in the West Coast and Bihar. Elsewhere the variations from the normal were small and of no significance.

**Temperature.**—The mean temperature conditions of the week varied to a much less extent from the normal than during the preceding two weeks. The chief feature was a persistent moderate deficiency of temperature in Madras due chiefly to low night temperature accompanying the prevalence of dry land

winds. Another important feature was the unusually large diurnal range of temperature in North-Western India due to the day temperature being in considerable excess and the night temperature in defect by nearly equal amounts. Thus the diurnal range averaged  $11^{\circ}$  above the normal in the Punjab and Rajputana on the 23rd and  $11\frac{1}{2}^{\circ}$  above in Sind, and  $9^{\circ}$  above in the North-Western Provinces on the 24th. Temperature was very low in the Bengal Presidency during the first three days of the week, but increased rapidly on the 25th and 26th and was more or less above the normal on the last two days. Temperature was in considerable defect of the normal in Berar and the Central Provinces at the commencement of the week, but rose rapidly during the next two days and was from  $1^{\circ}$  to  $3^{\circ}$  above the normal during the remainder of the week. Temperature differed but little from the normal throughout the week in Burma. On the mean of the whole week temperature was normal over the whole of the Indian area, with the exception of Assam, Bengal, Bihar and Madras, where it was in moderate defect.

The following statement gives the variations of the mean daily temperature from the normal for the 20 divisions of the Empire on each day of the week and for the whole week:—

PROVINCE.	VARIATION FROM NORMAL OF MEAN TEMPERATURE OF 24 HOURS PRECEDING 8 A.M. OF DATE							Mean variation of week.

The following gives the most noteworthy night temperatures recorded during the week:—

STATION.	Lowest night temperature recorded during the week.	Date on which recorded.	Lowest minimum recorded in January previous to 1899.	Year in which recorded.
Calcutta . . . . .	44.7	22nd	45.5	1878
Saugor Island . . . . .	46.0	22nd	46.8	1878
Wellington . . . . .	37.2	26th	34.2	1885
Bellary . . . . .	52.6	26th	50.8	1891 and 1882
Cuddapah . . . . .	56.3	26th	57.3	1891

**Rainfall.**—Light snow fell in Kashmir and Chitral on the 25th and 26th due to a slight and ill-defined disturbance in the North Punjab and light to moderate showers in Assam, Deltaic, East and Central Bengal, Chota Nagpur and South Bihar between the 26th and 28th due to the advance eastwards of a low pressure wave across that area. The total amounts in these areas were, however, small and less than the normal, except in the case of East and Central Bengal and Assam (Surma) which divisions obtained from two to three times the normal fall of the week. Weather was unusually fine and dry over the remainder of the Indian area throughout the week, except locally in the extreme south of Madras, where light showers were received on the 22nd and 23rd from intensified north-east winds. Hence the chief feature of the weather of the week was the absence of cold weather storms and the consequent prevalence of quiet settled weather over Baluchistan, North-Western and Central India, which areas receive light to moderate rain during the period in years of ordinary meteorological conditions.

During the period 1st to 28th January less rain than usual has fallen over by far the greater part of the country, the only exceptions being Bengal, Chota Nagpur, Bihar, Oudh and the east of the North-Western Provinces. The deficiency is, on the whole, most marked in Baluchistan and the Punjab, which usually obtain moderate to heavy rain, but where practically or absolutely no rain has fallen since the beginning of January.

PROVINCE.	DIVISION.	RAINFALL DATA FOR WEEK ENDING 25TH JANUARY 1899.			RAINFALL DATA FROM JANUARY 1ST TO JANUARY 25TH, 1899.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in the week.	Average actual rainfall of season to date.	Average normal rainfall, January 1st to January 25th.	Excess or defect of (seasonal) rainfall expressed as a per- centage.

HEM RAJ,

Offg. Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 2nd February 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 4th February.*—Some rain fell in the southern part of Tinnevely and light scattered showers in the remaining parts of the southern districts and Circars. The water-supply is generally sufficient. Some sowings under irrigation are being made. The standing crops are in good condition except in parts of the Deccan. The harvest outturn is fair to normal. Pasturage is scarce, but fodder is generally sufficient. The condition of cattle is normal. Prices are falling generally.

**Bombay.**—*For week ending 8th February.*—Slight rain fell in two talukas of the Upper Sind Frontier. The standing crops have been damaged by frost in parts of three districts of Sind, by white ants in one taluka of Thar and Parkar, and by rats in one taluka of Bijapur. *Jowari* (*Sorghum vulgare*) has been injured by drought in one taluka of Poona, and wheat in one taluka of Dharwar by excessive wind. Reaping of the late crops is progressing in twelve and preparations for next season in six districts. Cotton-picking continues in parts of Gujarat and Kathiawar. Fodder is sufficient except in parts of Sind. Agricultural stock are generally healthy. Prices have risen in five and have fallen in the same number of districts.

**Bengal.**—*For week ending 6th February.*—There was rain during the week in various parts of Bengal Proper and in some places in Bihar and Chota Nagpur. The general prospects of the crops are favourable, but some damage is reported to have been done by hail in Gaya, Monghyr, and the Sonihal Parganas. Some of the spring crops are being harvested, and sugarcane is being pressed. Poppy has come into flower. Spring rice is still being transplanted. Ploughing for autumn rice and jute is in progress. There is no want of fodder anywhere. Prices show a slight fall in some districts and a slight rise in others, otherwise they are fairly stationary.

**North-Western Provinces and Oudh.**—*For week ending 8th February.*—Showers of rain are reported from a few districts and hail in Muzaffarnagar and Aligarh, otherwise the weather has been clear. The standing crops are doing well, but more rain is said to be needed in parts. The damage done to crops by frost has been slight, except in a few districts. Irrigation and sugarcane pressing continue. Harvesting of peas has begun. Prospects are favourable. Supplies and fodder are sufficient. Prices are stationary or rising slightly.

**Punjab.**—*For week ending 8th February.*—Rain has fallen in all districts, except Hissar, Delhi, Ferozepore and Sialkote. More rain is urgently needed. Sugarcane pressing still continues in some districts. Watering of the spring and ploughing for and sowings of the extra spring crops are in progress. The standing crops are generally in fair condition: they have benefited by the recent rain in most districts. Irrigated crops are flourishing, but those on dry land are still suffering from an insufficient rainfall. Crops are being damaged by rats in parts of Umballa and by caterpillars and rust in parts of Ferozepore. Cattle are generally in good condition. Fodder is scarce in Delhi, Umballa, Shahpur and Dera Ismail Khan, insufficient in Lahore but ample elsewhere. Prices, especially of wheat, are unchanged in Hissar, Delhi, Multan and Amritsar: they have fallen in Dera Ismail Khan, and have risen elsewhere on account of the continuous dry weather. Prices have again generally shown a tendency to rise, but the late rainfall, though light, may result in a check. Wheat is selling from 15½ to 20, gram 21 to 24,

barley 32, bulrush millet 20 to 24, maize 24 to 32, great millet 25 and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 7th February.*—The weather is occasionally cloudy and cold in Betul, Chhindwara, Wardha and Bilaspur, but is warmer than usual elsewhere. Slight showers of rain fell in Mandla, Seoni, Bilaspur and Balaghat, and are said to have been beneficial in Mandla. The prospects of the winter crops are fair to good in all districts except in Saugor and parts of Damoh and Chanda. The spring crops have suffered from want of rain in Raipur. Crops have been damaged extensively through the recent frost in Saugor and through frost and cloudy weather in Bhandara. The reaping and threshing of the autumn crops have almost been completed and the pressing of sugarcane continues. The reaping of the winter crops has begun in some districts. Employment for agricultural labour is scarce in Saugor and Damoh. The cheapest prices are wheat 20, gram 30, rice 26 and *juar* 29 seers per rupee. The dearest prices are wheat 11½, gram 14½, rice 11½, and *juar* 19½ seers per rupee. Wheat continues to sell above the normal rate in the south, east and west of the provinces, but the price of gram is still low in the northern districts.

**Burma.**—*For week ending 4th February.*—In Lower Burma agricultural operations have been nearly completed: the outturn being generally less favourable than was anticipated. In Upper Burma cultivation of the dry weather paddy and miscellaneous crops continues, island crops are being reaped in places and standing crops are generally in good condition. The price of paddy has risen slightly in Akyab, Rangoon, Prome, Thongwa and Thaton, and fallen slightly in Amherst and Minbu. Prices are stationary elsewhere.

**Assam.**—*For week ending 7th February.*—Slight rain fell in Sylhet and the Naga Hills. It has benefited the young tea plants and nurseries in the former district. Harvesting of the late rice crop is finished, the outturn being generally good. Gathering of mustard and pulses, pruning of tea and pressing of sugarcane are in progress. Prospects of the sugarcane, mustard and pulse crops are generally good. Ploughing for early rice has commenced. Fodder is scarce in Cachar and the Naga, Khasi and Jaintia Hills. Water is insufficient in the Khasi and Jaintia Hills. Prices—common rice, Silchar 15 to 15½, Sylhet, Dhubri and Gauhati 16, Tezpur, Sibsagar and Dibrugarh 13, and Nowgong 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 8th February.*—**MYSORE:** The standing crops are in good condition. *Ragi* (*Eleusine coracana*) has been harvested in Bangalore, Kolar and Chittaldroog. Prices have fallen in Bangalore, Kolar, Tumkur, Mysore and Kadur.

**COORG:** The threshing of rice and coffee-picking continue. Water and fodder for cattle are sufficient. Prices of food-grains are stationary.

**Berar and Hyderabad.**—*For week ending 8th February.*—**BERAR:** The weather is cool. Harvesting of the winter crops has commenced. Ploughing continues in five districts. Fodder and water are inadequate in parts of Akola, Amraoti and Wun. Prices are almost stationary.

**HYDERABAD:** No rain fell during the week. The spring harvest is progressing. Rats have harmed *jawari* and the wheat crop in a few talukas. The sowing of winter rice continues. Prices are stationary. Prices—wheat 9, coarse rice 10½ and *jawari* 21½ seers per current sicca rupee.

**Central India.**—*For week ending 8th February.*—Slight rain fell in the Baghelkhand Agency during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The standing crops are in fairly good condition, though they have been slightly damaged by frost throughout Central India. Agricultural stock and pasturage are in good

condition. Prices are above normal in Bundelkhand, but normal elsewhere. The condition of opium in Bhopal, Malwa and Bhopawar is good.

**Rajputana.**—*For week ending 6th February.*—No rain fell during the week. Irrigation of crops continues. The state of the crops is generally good, but they have been slightly damaged by frost in a few villages of Ajmere. Cattle are generally in good condition. Distress is spreading and increasing in Merwara. Fodder is scarce in parts of Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypore and Bikanir. Prices are rising in Ulwar and Jhalla-war, fluctuating in Kotah, falling in Meywar, and are steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 71 persons emigrated during the week. The total emigration from Merwara up to date amounts to 3,963 persons. The numbers employed on relief works were—387 in Ajmere, 3,273 in Merwara and 1,057 in Marwar. Prices—Ajmere 20, Beawar 22 and Marwar 14½ seers per rupee.

**Kashmir.**—*For week ending 7th February.*—The weather is snowy and cloudy. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE** :—*For week ending 8th February.*—Good rain fell during the week. The condition of the standing crops is generally fair. Fodder is sufficient. Prices are generally stationary: wheat selling at 18 and maize 24 seers per rupee.

**Nepal.**—*For week ending 4th February.*—No rain fell during the week. Prospects of the wheat crop are good. The price of rice is 9 seers per rupee.

T. W. HOLDERNESS,  
Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

No. 7.] CALCUTTA, SATURDAY, FEBRUARY 18, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or manfully be known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the copy of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, February 4th, 1899.**

Ordinary high pressure conditions obtained in Baluchistan and North-Western India at the commencement of the period under review, and weather was fine over the whole of that area. The pressure changes during the next two days were such as tended to accentuate these conditions, so that on the morning of the 31st a well marked anti-cyclone, in the central area of which pressure was two-tenths of an inch above the normal, overlay the whole of Baluchistan and North-Western and Central India. A brisk to rapid fall of pressure, however, occurred during the day in the central area of the anti-cyclone, which hence decreased considerably in intensity. The downward movement of the barometer continued during the next 24 hours in Baluchistan and North-Western India and a moderately deep cold weather depression formed in Upper Sind. The disturbance marched along the usual track of cold weather storms across Rajputana and filled up during the 3rd. Baluchistan obtained moderate general rain from the disturbance on the 2nd and 3rd and the North-West and Central Punjab light to moderate rain. Light to moderate snow fell in Kashmir and the interior ranges of the Punjab Himalayas on the 3rd. Weather improved rapidly in these areas during the 3rd, but only to become unsettled again on the 4th due to the formation of a fresh disturbance in Upper Sind similar in character to the previous.

Weather was settled throughout the week in the remainder of India with the exception of Bengal which was visited by a series of thunderstorms of moderate intensity on the afternoon of the last day of the preceding week.

The mean temperature conditions of the week approximated to the normal over a large part of the country. The only important features were a moderate

to considerable excess in North-Western India and a moderate deficiency in Assam and Orissa.

**Daily Summary.—Sunday, January 29th.**—Pressure had increased slightly to briskly in Rajputana, Central India, Berar, the Central Provinces and Chota Nagpur and fallen over the remainder of the Indian area. The fall was brisk in the submontane districts of North-Eastern India and slight elsewhere. Pressure was in moderate to considerable defect over the greater part of the Peninsula and approximately normal in Northern and Central India and Burma. Winds were generally from their normal cold-weather directions, but were lighter than usual on the Coromandel and Ceylon Coasts. The air was much drier than usual in North-Western and Western India. Skies were heavily clouded in Baluchistan and partially clouded in Southern India and Bengal. A series of thunderstorms of moderate intensity (in some cases with hail) had visited Chota Nagpur, South Bihar, South and East Bengal, Assam and Upper Burma. Temperature had increased in Mysore and Madras and fallen over the remainder of India. The variations of temperature from the normal were small and unimportant over by far the greater part of the country. Temperature was in considerable defect in Bihar, due chiefly to low day temperature and in moderate excess in Mysore due to high day temperature.

**Monday, January 30th.**—Pressure had decreased briskly to rapidly in Kashmir due to some local disturbance. Pressure had given way slightly in South India and Lower Burma and increased over the remainder of the country. The rise was brisk in Assam and East Bengal. The general pressure conditions differed little from the normal over the greater part of the country, the only important abnormal features being a slight to considerable deficiency in the southern half of the Peninsula and a slight to moderate excess in Upper India. Gradients were hence slightly above their normal strength. Winds were light and unsteady in Bengal. They had strengthened slightly in the Gangetic Plain and were also more westerly in direction than on the previous day. Skies were overcast in Kashmir and light snow had fallen in that area. Skies were heavily clouded in Ceylon and light rain had been received in that area. A rapid reduction of temperature had occurred in Bengal, Orissa and Chota Nagpur, and the mean temperature of the previous 24 hours was from  $2^{\circ}$  to  $3^{\circ}$  in defect of the normal in these areas. Temperature had on the other hand increased more or less rapidly in North-Western India, and was during the past day  $5^{\circ}$  above the normal in Sind and  $2^{\circ}$  in the Punjab. Temperature varied to no important extent from the normal in other districts.

**Tuesday, January 31st.**—Pressure had increased throughout the Indian area. The rise was rapid in Baluchistan, Kashmir and the Indus Valley, slight in Burma and North-Eastern India and brisk in the intervening area. Pressure continued slightly below the normal in South Madras and Ceylon, but exceeded the normal over the remainder of the country. The excess was large in Baluchistan and Upper India where it was most marked. Very strongly pronounced anti-cyclonic conditions hence obtained in India, the total range of pressure in that area being about a fifth of an inch greater than the normal. The wind circulation was of the usual cold-weather type. Unusually strong winds prevailed in Coorg, Mysore and the West Deccan, where gradients were steepest. Thus the velocity at 8 A.M. was at the rate of 36 miles per hour at Belgaum and 24 miles per hour at Mercara. The air was generally drier. Skies had cleared in Kashmir and were now serene over the whole of the country with the exception of the south of the Peninsula where they were slightly clouded. Light snow had fallen in Kashmir. A brisk to rapid rise of temperature had occurred in the North-Western Provinces, Rajputana, Gujarat, the West Coast, the Bombay Deccan and Chota Nagpur, and a slight fall in Berar, the Central Provinces and Southern India. The mean temperature of the previous 24 hours was in moderate defect in Bengal, Assam and Orissa, in considerable excess in North-Western India, the North-Western Provinces and the Madras Coast. The excess was exhibited more largely in the day than in the night temperature in the area of increased temperature. In the area of diminished temperature on the other hand the night temperature was more largely in defect than the day temperature.

*Wednesday, February 1st.*—Pressure was steady in the Peninsula and continued normal in Southern India and in slight excess in the Deccan. Pressure had given way over the remainder of the Indian area except locally in Kashmir where it had increased slightly to rapidly. The decrease was brisk in Baluchistan, the South Punjab and the North-Western Provinces and rapid in the North and East Punjab. The chief effect of these changes was to reduce considerably the excess of pressure prevailing in North-Western India and Baluchistan on the previous day. The air movement in the plains of India was similar in character to that of the previous day. Winds had strengthened rapidly in the Upper India hill districts and were blowing strongly from north. They were strongest in that area at Cherat where their velocity at 8 A.M. was at the rate of 40 miles per hour. The air was considerably drier in Upper India, more especially in the hill districts where humidity had fallen very rapidly with the prevalence of northerly winds. The percentage of humidity at 8 A.M. on this day was only 14 at Murree, 16 at Chakrata, 22 at Mussoorie and 23 at Simla. Cloud was commencing to form in Baluchistan. Skies were moderately clouded in Southern India and clear in the remainder of India. No rain had fallen anywhere beyond light local showers at Tinnevely and Darjeeling. Temperature had increased rapidly in Baluchistan and was 8° above the normal during the previous 24 hours. The distribution of temperature with respect to the normal was unchanged in India and Burma.

*Thursday, February 2nd.*—A rapid decrease of pressure had occurred in Baluchistan, Sind and the neighbouring districts of the Punjab and Rajputana, and a moderately deep depression in which pressure was upwards an eighth of an inch in defect of the normal had formed in Upper Sind. Pressure had increased briskly to rapidly in the submontane and hill districts of Northern India, North Bengal, Upper Assam and Upper Burma and was now in moderate to considerable excess. The barometric changes were small in the remainder of India and Burma and produced no important change in the relative distribution of pressure. Winds had under the influence of the depression in Upper Sind shifted round to cyclonic directions in the Punjab, North-West Rajputana, Lower Sind and Cutch and were intensifying rapidly on the Sind and Cutch coasts. Winds had diminished in strength in the hill districts and were now light and unsteady. The air was considerably damper in Baluchistan and North-Western and Central India. Skies were overcast in Baluchistan, the North Punjab and Kashmir, and were clouding over in the remainder of North-Western India. Light to moderate rain had fallen in Baluchistan. A further and very rapid rise of temperature had occurred in Baluchistan and a rapid rise in Sind and the Punjab. The mean temperature of the past day was 16° above the normal at Quetta, 8° in Sind, 4° in the Punjab and Rajputana and 3° in Gujarat and the West Coast. It was on the other hand from 2° to 3° below the normal in Burma, North-Eastern India and the North and West Deccan.

*Friday, February 3rd.*—Pressure had recovered rapidly to very rapidly in Baluchistan, Upper Sind, the West Punjab and West Rajputana, and the depression which lay in Upper Sind on the previous day had advanced into Central Rajputana and practically filled up. Pressure had given way slightly to briskly in Kashmir where conditions remained feebly disturbed. The barometric changes were small and unimportant in the remainder of India. Pressure was again in considerable to large excess in Baluchistan, Upper Sind and the North-West Punjab, in moderate excess in the Gangetic Plain and approximately normal elsewhere. Moderately strong north-west winds obtained in the North and Central Punjab. Winds were light and irregular in Northern and Central India where pressure was remarkably uniform. The air was much damper in the Punjab and the North-Western Provinces and considerably drier in Southern India and the South Deccan. Light to moderate rain had occurred in Baluchistan and the North and Central Punjab, but skies were now clearing in that area. Light to moderate snow had fallen in Kashmir and light snow in the interior of the Simla hills down to about 8,500 feet. A cool wave was affecting Baluchistan, Sind and the Punjab and causing a very rapid reduction of temperature.

*Saturday, February 4th.*—Pressure had increased locally in Kashmir and Southern India and had fallen over the remainder of the Indian region. The

fall was rapid to very rapid in Baluchistan, Upper Sind, the Punjab and the North-Western Provinces and brisk over the remainder of Northern and Central India and Upper Burma. Pressure was in moderate to considerable defect over the whole of North-Western India, the deficiency being greatest in Upper Sind where it was a tenth of an inch in amount. Pressure was approximately uniform in the Indian area and winds were generally light. Skies were more or less heavily clouded in Baluchistan and North-Western India, and there was a marked tendency to the formation of a cold-weather depression in Upper Sind. A very rapid rise of temperature had occurred in Baluchistan and a brisk rise in North-Western India and the mean temperature of the previous 24 hours was  $10^{\circ}$  higher than usual at Quetta,  $7^{\circ}$  in Rajputana,  $4^{\circ}$  in the Punjab, Gujarat and Central India and  $3^{\circ}$  in the North-Western Provinces. Temperature was on the other hand in large defect in Mysore and in moderate to considerable defect in Madras and Orissa. Elsewhere the departures from the normal temperature conditions were small.

**Temperature.**—The mean temperature conditions of the week differed to no large extent from the normal over a large part of the country. The only important features were a moderate to considerable excess in North-Western India and a moderate defect in Assam and Orissa. In all other districts the average mean temperature of the week was practically normal.

The mean temperature of India and Burma averaged  $0.1^{\circ}$  above the normal for the week and was hence practically normal.

The following table gives temperature variation data of the week:—

Province.	Variation from normal of mean temperature of 24 hours preceding 8 a.m. of date—							Mean variation of week.
	29th January.	30th January.	31st January.	1st February.	2nd February.	3rd February.	4th February.

**Rainfall.**—The precipitation during the week under review was confined to the following three areas:—

- (1) Bengal and Assam.
- (2) Baluchistan and the Punjab.
- (3) South Madras and Malabar.

The rainfall in the first of these areas was due to the occurrence of a series of thunderstorms on the afternoon of the last day of the previous week and

was fairly general, the whole of the province with the exception of Orissa, North Bengal and North Bihar obtaining light to moderate amounts. The total fall of the week in this area ranged from an average of 0·11 inch in Assam Brahmaputra, to 0·47 inch in Central Bengal, and exceeded the normal by very small amounts in Assam Surma, Central Bengal, Chota Nagpur and South Bihar.

In the second area the precipitation was due to the formation of a cold weather storm in Upper Sind and occurred on the last three days of the week. The total fall of the week was very slightly greater than the normal in Baluchistan, the North and West Punjab, and less than the small normal of the period in the Central and Submontane Punjab.

In Malabar and South Madras the rainfall was due to thunderstorms and was light and local.

The more noteworthy totals recorded during the week at individual rain-gauge stations were as follows :—

	Inches.
Agasteeswaram (Trivandrum) . . . . .	2·35
Gujranwala (Sudder Station) . . . . .	1·63
Jagadhri (Umballa) . . . . .	1·48
Rampur Hat (Birbhum) . . . . .	1·31

The rainfall of the week has made no important change in the chief features of the distribution of the seasonal rainfall beyond reducing to some extent the amount of deficiency in Baluchistan and parts of the Punjab.

HEM RAJ,

Off. Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 9th February 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 11th February.*—Some rain fell in the southern districts, Coimbatore and South Arcot. The water-supply is generally sufficient. Some sowings under irrigation are being made. The standing crops are generally in fair condition. The harvest is yielding almost the normal outturn. Pasturage is scarce, but fodder is generally sufficient. Prices are almost stationary in the Circars and the southern districts and are falling elsewhere.

**Bombay.**—*For week ending 15th February.*—Slight rain fell in parts of Shikarpur, Khandesh, Sholapur and Dharwar. The standing crops have been damaged by frost in parts of Sind, by white ants in one taluka of Thar and Parkar, by rats in one of Bijapur and by drought in one of the Upper Sind Frontier, and one of Poona. The reaping of the late crops is progressing in thirteen and preparations for next season are being made in seven districts. Cotton-picking continues in parts of Gujarat and Kathiawar. Fodder is sufficient except in parts of Sind. Agricultural stock is healthy except in parts of two districts. Prices have risen in six and fallen in four districts.

**Bengal.**—*For week ending 13th February.*—Rain fell generally in Bihar and in some parts of Bengal Proper and Chota Nagpur during the week. The rain is reported to have been generally beneficial, but in Shahabad and Monghyr, where it was accompanied by hail, some damage has been done to the spring crops. These crops are maturing and some are being harvested. The pressing of sugarcane is still proceeding. The general prospects of the poppy crop in Bihar are favourable except in the Siwan Sub-Agency, where considerable damage is reported to have been done by blight. The transplantation of spring rice is still going on, and the ploughing for autumn rice and jute is in progress. Cattle are generally in good condition. No important change is reported in the price of common rice.

**North-Western Provinces and Oudh.**—*For week ending 15th February.*—The rainfall during the week has been almost general: it was accompanied in parts by hail which, however, has done little or no damage. The standing crops have been benefited by the rain and are thriving. Pressing of sugarcane continues. Prospects are favourable. Markets are well supplied. Fodder is sufficient. Prices are stationary or rising.

**Punjab.**—*For week ending 15th February.*—Rain has fallen during the week in Ferozepore, Multan, Sialkot, Shahpur, Rawalpindi, Peshawar and Dera Ismail Khan; but more is wanted urgently in most districts. Sugarcane-pressing continues in some districts. The standing crops are being irrigated and are generally reported to be in good condition: their prospects have been improved by the recent rain. The crops on unirrigated areas are suffering from drought in Delhi. Crops have been damaged by caterpillars in parts of Ferozepore. Cattle are generally in good condition. Fodder is said to be sufficient in all districts, except in Delhi, Umballa and Shahpur. Prices, especially of wheat, are rising in Delhi and Dera Ismail Khan, falling in Umballa, Jullundur, Sialkot, Rawalpindi and Peshawar and are unchanged elsewhere. Wheat is selling from 15 to 20½, gram 20½ to 24, barley 32, bulrush millet 19 to 24, maize 25 to 32, great millet 25, and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 14th February.*—The weather is occasionally cloudy, the nights and mornings being cool and pleasant, but the

days are gradually growing warm. Slight showers of rain fell during the week in almost every district of the Provinces and may benefit the late sowings in Mandla, but in Hoshangabad and Betul the rain has done some damage to the standing crops. The prospects of the winter crops are fair to good in all districts, except in Hoshangabad, Saugor and the northern half of Damoh, where they are poor to gloomy. Hail storms have damaged the standing crops in parts of Seoni and Saugor; the damage in the Saugor and Khurai tahsils in the latter district being considerable. Some damage through blight is also reported from Betul and through the recent cloudy weather from Bhandara. The reaping and threshing of the autumn crops have almost been completed. Pressing of sugarcane continues. The reaping of winter crops has begun. Employment for agricultural labour is still scarce in Damoh. Prices are rising slowly. The cheapest prices are—wheat 18, gram 30, rice 24, and *juar* 29 seers per rupee. The dearest prices are—wheat 11, gram 14, rice 11, and *juar* 20 seers per rupee.

**Burma.**—*For week ending 11th February.*—In Lower Burma threshing and winnowing operations are approaching completion everywhere. In Upper Burma prospects of the standing crops continue generally favourable. The price of paddy has risen slightly in Rangoon, Thongwa, Henzada, Amherst, and Shwebo; considerably in Bassein and Mandalay; whilst it has fallen slightly in Prome and Thayetmyo. Prices are stationary elsewhere.

**Assam.**—*For week ending 14th February.*—Slight rain is reported to have fallen in almost all districts. Gathering of mustard and pulses, pruning of tea and pressing of sugarcane are in progress. Prospects of the sugarcane, mustard and pulse crops are generally good. Land is under preparation for the sowing of early rice. Fodder is scarce in Cachar, the Naga, Khasi and Jaintia Hills and in parts of Sylhet. Water is insufficient in the Khasi and Jaintia Hills and in parts of Sylhet. Prices—common rice, Silchar 15 to 15½, Dhubri and Gauhati 16, Teapuri and Sibsagar 13, and Nowgong 15 seers per rupee.

**Mysore and Coorg.**—*For week ending 15th February.*—**MYSOORE:** Prospects are fair. Paddy has been harvested in parts of Bangalore, Kolar, Tumkur, and Mysore. Prices have risen slightly in Bangalore and Mysore and fallen in Kolar, Hassan, Kadur, and Chitaldrug.

**COORG:** Rainfall '95. The threshing of rice and coffee-picking continue. Water and fodder for cattle are sufficient. Prices of food-grains are stationary.

**Berar and Hyderabad.**—*For week ending 15th February.*—**BERAR:** The weather is cool with occasional clouds. Harvesting of the winter crops continues. Land is being prepared for the ensuing rain crops. Fodder is reported to be insufficient in the Murtizapur taluka. A scarcity of water prevails in parts of the Akola and Amraoti districts. Prices are almost stationary.

**HYDERABAD:** No rain fell during the week. The sowing of winter rice continues. Prices are almost stationary. Prices—wheat 9½, coarse rice 10½ and *jowari* 21½ seers per current sicca rupee.

**Central India.**—*For week ending 15th February.*—Slight rain fell in Bundelkhand during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The standing crops have been damaged by frost in Gwalior, Bundelkhand, Baghelkhand and Malwa. Agricultural stock and pasturage are in good condition. Prices have fallen slightly but are still above the normal in Bundelkhand and normal elsewhere. The condition of opium is good in Gwalior and Bhopal and fair in Malwa.

**Rajputana.**—*For week ending 15th February.*—Slight rain fell in Dholepur and showers in three tehsils of Ulwar, but none elsewhere. Irrigation of crops continues. The state of the crops is generally good, but they have been slightly damaged by frost in a few villages of Ajmere. Wheat is suffer-

ing from blight in Kotah. Cattle are generally in good condition. Fodder is still scarce in parts of Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypore, and Bikaner. Prices are rising in four States, falling in Meywar and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 170 persons emigrated during the week. The total emigration up to date amounts to 4,084 persons. The numbers employed on relief works were—3,440 in Merwara and 1,049 in Marwar. Prices—Ajmere 20, Beawar 22, and Marwar 14½ seers per rupee.

**Kashmir.**—*For week ending 14th February.*—The weather is snowy and cloudy. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE:**—*For week ending 15th February.*—Slight rain fell during the week. The condition of the standing crops is generally fair. Fodder is sufficient. Prices are generally stationary.

**Nepal.**—*For week ending 11th February.*—Rainfall 0·49. Prospects of the wheat crop are good. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,

*Secretary to the Government of India.*

CIVIL WORKS.

Telegraph.

**ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT  
FOR 1897-98.**

No. 144 C. W. T., dated Simla, the 13th February 1899.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Despatch from Her Majesty's Secretary of State for India, No. 1 Telegraph, dated the 12th January 1899, and enclosures, being the Administration Report of the Indo-European Telegraph Department for the year 1897-98, and the India Office Note reviewing it.

ORDER.—Ordered that copies of the Report and Note be forwarded to the Home Department of the Government of India, to the Government of Bombay, and to the Director General of Telegraphs for information.

Ordered also that the Report and Note be published in the Supplement to the *Gazette of India*.

O. C. LEES,

*Under Secretary to the Government of India.*

ADMINISTRATION REPORT  
OF THE  
**INDO-EUROPEAN TELEGRAPH DEPARTMENT**  
FOR  
**1897-98.**

CAPITAL AND REVENUE ACCOUNT.

1. *Capital*.—The Capital account of the Department was decreased by **Rs 13,961**, making the capital expenditure to end of the year **Rs 1,15,35,814**.  
The following statement shows how the above decrease is made up:—

	Increase.	Decrease.	TOTAL.
Works . . . . .	R 11,769	R ...	R 11,769
Suspense:			
Works . . . . .	...	31,430	—31,430
Other heads . . . . .	5,700	...	5,700
	17,469	31,430	—13,961

A summary of the year's transactions on Capital account is given in Appendix A.

2. *Revenue*.—Appendix B is a summary of the earnings and expenditure.\* The earnings amounted to **Rs 15,40,153**, or an increase of **Rs 55,646**, as compared

\* Excluding the cost of the London Office Establishment (1,564*l.*), which is included as part of the Establishment of the Secretary of State.

with 1896-97, when the sum realised was Rs 14,84,507. The expenditure during the year was Rs 7,81,981, against Rs 7,71,477 in the previous year, or an increase of Rs 10,504, due chiefly to the payment made during 1897-98 on account of the Jask Royalty. The net result is a profit of Rs 7,58,172 on the year's working, against that of Rs 7,13,030 in 1896-97, or an increase of Rs 45,142, as compared with that year.

3. The following statement shows the chief differences between the earnings and expenditure of the current and previous years. For details, see Appendix B:—

## EARNINGS.

Head of Account.	1896-97.	1897-98.	Increase.	Decrease.
	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>
*Traffic Earnings . . .	19,30,488	18,49,445	...	71,043
Common Purse . . .	-2,79,555	-1,93,331	86,224	...
Australasian Message Fund . . .	-1,71,753	-1,40,351	31,402	...
Profit and loss . . .	35	-304	...	339
Total Message Revenue . . .	14,69,215	15,15,459	1,17,626	71,382
Miscellaneous Revenue . . .	15,292	24,694	9,402	...
TOTAL . . .	14,84,507	15,40,153	1,27,028	71,382
Net Increase . . .	...	...	55,646	...

4. There was thus an increase of Rs 55,646 in the earnings of 1897-98, as compared with the preceding year. The rupee figures under Traffic earnings show a falling off, due chiefly to an improvement in the value of the rupee, which resulted in a smaller amount of rupee collection as the franc equivalent. The earnings of 1897-98 as worked out in francs amounted to 2,990,675, against 2,956,006 francs in the preceding year, and the amount drawn out of the Joint Purse on account of Indian traffic was 5.983% more than last year. The increase in Miscellaneous revenue consists of realisations from sale of cable core and other unserviceable stores in England.

## EXPENDITURE.

Head of Account.	1896-97.	1897-98.	Increase.	Decrease.
	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>
Persian Gulf:—				
General charges . . .	1,41,331	1,22,709	...	18,622
Line maintenance . . .	19,329	40,090	20,761	...
Signalling . . .	1,75,436	1,80,723	5,287	...
Cable maintenance . . .	1,71,079	1,85,726	14,647	...
Persian Section:—				
General charges . . .	92,188	91,390	...	798
Line maintenance . . .	58,883	56,502	...	2,381
Signalling . . .	91,325	84,610	...	6,715
Exchange . . .	21,906	11,535	...	10,371
Expenditure by other Departments (Jask Royalty) . . .	...	8,696	8,696	...
TOTAL . . .	7,71,477	7,81,981	49,391	38,887
Net Increase . . .	...	...	10,504	...

\* NOTE.—The head "Traffic Earnings" includes the amount collected in India, as also the loss on account of exchange on sterling transactions. The tariffs on international messages are fixed in a gold standard, and the balances due to or from foreign administrations are settled in that standard. The rupee collections in India vary, therefore, in correspondence with the fluctuations in exchange, and the balance received from the Indian Telegraph Department at Karachi in rupees is sufficient to pay the telegraph companies and foreign administrations in the gold standard and retain the share of this Department in a gold standard also.

5. The increase and the decrease under the main heads are as follows:—

*General Charges.—Gulf and Persian Sections.*—The decrease is due to short outlay under superintendence, Gulf Section, on account of leave and casualties of some of its officers, and under exchange compensation allowance, and also to less expenditure in England on furlough allowances than in the previous year, as well as to the absence of any outlay in England on advertising charges. The decrease under exchange is due to the same cause, *viz.*, short expenditure in England combined with improvement in the rate of exchange.

*Line Maintenance.—Gulf Section.*—The increase is due to a larger outlay (both cash and stores) on repairs to the land lines, due to the destruction of the line in Mekran by the Baluchis and to the murder of Mr. Graves.

*Line Maintenance.—Persian Section.*—The decrease under this head represents chiefly less expenditure on account of exchange compensation allowance and carriage of line stores.

*Signalling.—Gulf Section.*—The increase was caused by annual increases of pay to the signalling staff, employment of new men to fill existing vacancies, and an issue of new instruments to signal offices.

*Signalling.—Persian Section.*—The decrease is due partly to short expenditure on house allowance, consequent on the completion of quarters for the signalling staff at Teheran, and partly to less outlay on repairs to buildings, office contingencies, and exchange compensation allowance.

*Cable Maintenance.*—The increase is due chiefly to more extensive cable repairs being necessary.

#### NET REVENUE.

6. On a total Capital expenditure of Rs. 1,535,814 a net profit of Rs. 7,58,172 was earned, which gives a dividend of 6.57 per cent. The dividends earned during the past six years are as follows:—

Year.	Interest on Capital.
1892-93 . . . . .	3.8
1893-94 . . . . .	4.28
1894-95 . . . . .	6.50
1895-96 . . . . .	7.42
1896-97 . . . . .	6.17
1897-98 . . . . .	6.57

The higher dividend in 1895-96 was due to the low rate of exchange, that is, a higher rate in rupees collected for the franc equivalent.

#### CIS-INDIAN JOINT PURSE.

7. Appendix C deals with the transactions in connection with this Agreement, which was entered into in 1878. The number of words carried between Europe and India or Trans-India and *vice versa* during the year by the three Administrations (*viz.*, the Eastern Telegraph Company, the Indo-European Telegraph Company, and this Department) rose from 6,157,208½ to 6,469,171, showing an increase of 311,962½, while the net value also shows an increase of 30,448l. 4s. 1d. The Department's share of the whole Purse shows also an increase of 5,930l. 0s. 11d., and the amount paid into the Purse was more than in the preceding year by 1,497l. 4s. 4d.

8. The following table shows the sums paid in and drawn out by the Department annually since the Agreement was concluded :—

Year.	Paid in.	Drawn out.	EXCESS.	
			Paid in.	Drawn out.
1878-79	£ 42,265	£ 62,256	£ ...	£ 19,991
1879-80	52,488	68,905	...	16,417
1880-81	57,235	76,295	...	19,060
1881-82	67,108	74,798	...	7,690
1882-83	110,728	84,914	25,814	...

1894-95	99,267	91,012	8,255	...
1895-96	110,380	101,683	8,693	...
1896-97	117,286	100,539	16,747	...
1897-98	118,783	106,469	12,314	...
TOTALS	1,769,478	1,639,729	195,120	65,371
TOTAL EXCESS PAID IN	...	...	129,749	...

9. *Division of Traffic.*—The following are the proportions according to which the Joint Purse receipts are divided :—

Administration.	INDIAN RECEIPTS.		Trans-Indian Receipts.
	To 1894.	From 1894.	
Eastern Telegraph Company	60'39	59'82	80'53
Indo-European Telegraph Company	22'34	22'12	12'03
Indo-European Telegraph Department	17'27	18'06	7'44
	39'61	40'18	19'47

10. The percentages of traffic which have been actually carried since 1878-79 are:—

Year.	ON INDIAN TRAFFIC.		ON TRANS-INDIAN TRAFFIC.	
	Via Suez.	Via Indo-European Route.	Via Suez.	Via Indo-European Route.
	Per cent.	Per cent.	Per cent.	Per cent.
1878-79	71'31	28'69	93'26	4'74
1879-80	67'91	32'09	94'10	5'90
1880-81	69'01	30'99	92'50	7'50
1881-82	64'63	35'37	81'26	18'74
1882-83	48'34	51'66	59'26	40'74
1883-84	53'96	44'04	83'53	16'48
1884-85	53'02	46'98	84'44	15'56
1885-86	52'14	47'86	75'91	24'09
1886-87	55'46	44'54	85'32	14'68
1887-88	60'93	39'07	86'48	13'52
1888-89	51'69	48'31	77'04	22'96
1889-90	49'92	50'08	82'89	17'11
1890-91	46'67	53'33	83'21	16'79
1891-92	43'52	56'48	80'75	19'25
1892-93	48'09	51'91	82'49	17'51
1893-94	51'75	48'25	85'20	14'80
1894-95	48'91	51'09	84'31	15'69
1895-96	49'03	50'97	84'09	15'91
1896-97	44'15	55'85	83'00	17'00
1897-98	42'98	57'02	87'11	12'89

11. *Interruptions affecting Joint Purse Traffic.*—One interruption stopping traffic between Teheran and Karachi occurred on the Persian Section and lasted 22 hours, 56 minutes. Beyond Teheran to London the Indo-European Company's lines were totally interrupted for 8 days, 19 hours, 6 minutes, but none of these interruptions affected the divisions of the Joint Purse receipts.\*

12. On the Turkish route interruptions occurred between Fao and Constantinople lasting 74 days, 16 hours, 21 minutes. The working of this route continues to be very unsatisfactory. The Fao-Bushire cable was also interrupted for repairs for 10 hours, 5 minutes.

During the last six years the Turkish route beyond Fao has been interrupted as follows:—

Year.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
Days, hours, minutes . . .	108—0—34	101—3—41	150—0—53	111—17—33	83—14—36	74—16—21

The Department was only liable to the Joint Purse for 33 days' interruptions on the Turkish route at Fcs. 50 per diem.

#### AUSTRALASIAN MESSAGE FUND.

13. Full particulars regarding the nature of this Fund are given in the Administration Report for 1893-94 (page 6, paras. 14 to 17), and for 1896-97 (page 7, para. 14).

The Departmental receipts for this year show an increase of 4,677*l.* over the receipts in 1889, on which the original Australasian Message Fund was based. See Appendix C. (1).

\* The altered proportions only take effect after the lapse of one clear day, calculating from midnight of the day of the interruption of the line.

## TRAFFIC.

14. The service regulations of the Buda-Pesth International Conference of 1896 have been in force since 1st July 1897, up to which date the Paris Convention of 1890 remained in force.

15. Appendix E shows the traffic carried by the two sections of the Department. The number of words was 2,122,710, against 2,059,941 in the previous year, showing an increase of 62,769; the value as stated in francs shows an increase from 2,956,006 to 2,990,675 francs.

In Indian currency the earnings of the Department are, however, less by Rs 1,043, being Rs 18,49,445, against Rs 19,20,488 in the previous year.

16. The comparative values of the franc and rupee varied once only during the year, rising in the case of the rupee from 1 franc = '64 in April 1897 to 1 franc = '62 in October 1897, and continued so until the end of March 1898. As compared with 1896-97 there was a decided rise in the rupee. This accounts for the decrease in the revenue expressed in rupees as compared with the increased number of words.

17. The following table gives the amounts paid into the Joint Purse by the Department as compared with its independent traffic revenue :—\*

	FOR JOINT PURSE, ETC.		Independent. Revenue.	TOTAL.
	Indian.	Trans-Indian.		
	Pcs. cts.	Pcs. cts.	Pcs. cts.	Pcs. cts.
Persian Gulf Section .	2,014,043'60½	579,735'82	12,590'07½	2,606,370'50½
Persian Section .	293,700'56½	82,089'20½	8,515'07½	384,304'85½
<b>TOTAL FRANCS</b>	<b>2,307,744'17½</b>	<b>661,826'02½</b>	<b>21,105'15½</b>	<b>2,990,675'35½</b>

18. Appendix F gives the number of messages and words carried under the four following classes during the past five years :—

State.	Press.
Commercial and Private.	"Times" (special rate).

19. The average length of "private and commercial" messages was 13'01 words in 1897-98, as compared with 13'27 words in the previous year. The average length, calculated from the averages of the past seven years, is 13'27 words.

20. In addition to the messages classified in Appendix F, 844 messages\* containing 69,132 words, were forwarded to the British Resident at Bushire free of charge. These are called "Government and Press" telegrams, and would, if charged for, yield Rs 16,203 at press rates.

21. The percentages of traffic carried on the Teheran and Turkish routes were 95'06 and 4'94, respectively. The following table gives the respective percentages for the past seven years :—

Years.	Via Teheran.	Via Turkey.	REMARKS.
1891-92 . . . . .	92'37	7'63	
1892-93 . . . . .	92'96	7'04	
1893-94 . . . . .	93'60	6'40	
1894-95 . . . . .	94'36	5'64	
1895-96 . . . . .	93'55	6'45	
1896-97 . . . . .	94'61	5'39	
1897-98 . . . . .	95'06	4'94	

\* NOTE.—The independent traffic revenue is that obtained from traffic dealt with by this Department and not touching India, such as for telegrams between the stations of Jask and Bushire.

The Turkish route continues to be next to useless, being very slow and inaccurate.

22. The mean rate of transmission of telegrams between the United Kingdom and Karachi, and between Karachi and Teheran, the latter being the section worked by the Department, during each of the past six years is as follows:—

Years.	Between the United Kingdom and Karachi, <i>via</i> Teheran.		Between the United Kingdom and Karachi, <i>via</i> Turkey.		Between Karachi and Teheran.			
					Karachi to Teheran.		Teheran to Karachi.	
	Hours.	Min.	Hours.	Min.	Min.	Sec.	Min.	Sec.
1892-93 . . . . .	0	45	27	47	5	51	4	26
1893-94 . . . . .	0	43	36	49	5	40	4	28
1894-95 . . . . .	0	43½	46	46	7	7	5	00
1895-96 . . . . .	0	46	34	00	5	27	4	41
1896-97 . . . . .	1	12	36	08	19	33	13	28*
1897-98 . . . . .	0	55	30	23	13	25	10	40

23. The reason of the present high rate is, however, owing in great measure to the introduction of a modified system of calculating the daily average delay on the two sections since October last. Formerly each transmitting station worked out its own averages, whereas now the actual time of acceptance of every message at Teheran and Karachi from the adjoining Administrations is inserted in the official instructions and is wired on, so that now Teheran works out Karachi's delay and Karachi Teheran's. By this means all chances of arriving at inaccurate results, due to incorrect timing of messages by clerks, are eliminated.

24. *Check of Errors.*—The accuracy of transmission over the lines of the Department for the past two years is shown below. It will be seen that in this respect the year under review compares somewhat unfavourably with the preceding one, but the accuracy is still very satisfactory.

1896-97 . . . . .	0.096 per cent.
1897-98 . . . . .	0.112 „

25. *Complaints.*—The number of complaints received for investigation amounted to 124, being 35 less than the total for the year 1896-97. Of this number, 76 were from Europe and 48 from India; 26 related to messages *via* Turkey, and 2 to local traffic.

The following table gives all details:—

Nature of Complaint.	Received from Europe.	Received from India.	Total.
Non-deliveries . . . . .	19	16	35
Non-deliveries due to insufficient address . . . . .	2	3	5
Mis-deliveries . . . . .	2	2	4
Delays . . . . .	9	5	14
Errors . . . . .	22	2	24
Refund of reply deposits not used . . . . .	6	9	15
Miscellaneous references . . . . .	16	11	27
TOTAL . . . . .	76	48	124

Of the above, 44 were not admitted by the Administrations concerned, or are still being investigated by them. Of the remaining 80 this Department is responsible for 12 only.

#### OFFICES.

26. The number of offices open to the public throughout the year (excluding those on the Teheran and Meshed (Persian Government) line) was, in the

\* Eastern Company's route interrupted in March 1897.

Persian Gulf Section 8, and in the Persian Section 9. The temporary Telegraph Office, which was opened for the use of the Political Agent, Southern Baluchistan at Lyari, in the Lus Beyla district, on 28th October 1895, was closed on 30th April 1897. The expenses on this account were charged to the Political Department.

#### ESTABLISHMENT.

27. At the close of the year the strength of the signalling establishment, including four Inspectors in the Persian Section, stood at—

General service civilian clerks . . . . .	58
Unattached list: Non-commissioned officers of Royal Engineers . . . . .	8
Local service signallers . . . . .	30
Postal employé . . . . .	1
<b>TOTAL</b> . . . . .	<b>97</b>

28. The following casualties occurred during the year:—

Resignations:—2 general service clerks (pensioned); 1 N.C.O. (returned to military duty); 1 officer of cable ship "Patrick Stewart;" 2 local service signallers (pensioned).

Murdered:—1 Temporary Superintendent.

Died:—1 general service clerk.

Dismissed:—1 general service clerk.

#### PERSIAN GULF SECTION.

##### CABLES.

29. The lengths of the various cable sections on the 31st March 1897 and 1898 were as follows:—

Cables.	1896-97.	1897-98.
	Knots.	Knots.
Pan-Bushire Gutta-percha Cable . . . . .	154'488	154'500
Bushire-Jask India-rubber Cable of 1869 . . . . .	502'028	502'028
Bushire-Jask Gutta-percha Cable of 1885 . . . . .	520'642	520'680
Jask-Manora Gutta-percha Cable . . . . .	528'000	528'066
Manora-Karachi (3 harbour cables) . . . . .	13'780	13'798
<b>TOTAL KNOTS</b> . . . . .	<b>1,718'938</b>	<b>1,719'072</b>

showing an increase in length of 134 since last year, due to repairs. In addition to the above there is a seven-core Fowler-Waring cable from the Karachi Harbour to the Central Telegraph Office, 1'414 knots in length.

30. This Department also keeps the following cables in working order:—

(i) The Harbour Defence Revised System, composed as follows:—

	Statute miles.
From Customs Cable House through Junction Box to Marsh Fort (Harbour Cables) . . . . .	6'703
From Junction Box to Manora and Beach Ports (Fowler-Waring Cables) . . . . .	1'328
From Central Office to Customs Cable House one twin Fowler-Waring Cable) . . . . .	1'629
<b>TOTAL MILES</b> . . . . .	<b>9'660</b>

The remainder of the Harbour Defence line, consisting of a land line from Central Office to Royal Artillery Office, is controlled by the Indian Telegraph Department. . . . .

**TOTAL MILES** . . . . . **10'750**

- (ii) A telephone line for the Port Trust connecting the Port Trust Office at Karachi with the Port Trust and Port Officer's Offices at Manora.

	Miles.
Land line—Manora to Cable Box IX . . . . .	0.367
Harbour Cable to Customs Cable House . . . . .	4.997
Land line to Port Trust Office . . . . .	0.460
<b>TOTAL MILES . . . . .</b>	<b>5.824</b>

31. *Summary of the History of the Cables and their Electrical and Mechanical Condition during the year 1897-98.*

No. 1. *Fao-Bushire Gutta-percha Cable of 1864.*—One partial earth fault occurred in this cable during the past year; it was removed in January 1898 at 60.612 knots from Fao. The sheathing was found to be deeply pitted by the action of sea-shells and weed. Reviewing the past history of this cable since 1886, it would appear that toredo insect faults are now common between 25 and 65 knots from Fao, and when making future repairs in this length, brass taped core will be used. The electrical condition of this cable during the year was practically the same as the year previous, namely, 38 megohms per knot. There is, however, a marked difference between the insulation to the east and west of 76 knots from Fao, the former being 212 and the latter (78.5 knots) 82 megohms per knot. The maintenance of this cable at a high point of insulation is not considered necessary, and as it works well, its electrical condition may be accepted as satisfactory.

No. 2. *Bushire-Jask Gutta-percha Cable of 1885.*—Only one fault, a partial earth, occurred, this was near Bushire cable house in the shore end, and was easily removed. Since this cable was laid in 1885 there have been no faults due to corrosion, and consequently its mechanical condition is probably fairly satisfactory. The insulation of the cable is now 227.5 megohms per knot, and although this is a good deal lower than last year (326 megohms) it may be considered good.

No. 3. *Bushire-Jask India-rubber Cable of 1869.*—This cable has not been disturbed during the year, and the fault which appeared in it in September 1897 does not affect its satisfactory working. As pointed out in last year's report, in this cable there are lengths of 101.679 knots of original (1869) India-rubber Cable, and 135.597 knots of original (1864) Gutta-percha Cable which have been inserted at various times. Thus nearly half the section is composed of old cable which may require renewal shortly. The average insulation before it became faulty in September 1897 was 60 megohms per knot. The fault has too high a resistance to permit of its being localised, and with this exception the electrical condition may be accepted as satisfactory.

No. 4. *Jask-Manora Gutta-percha Cable of 1864.*—This cable has been repaired twice during the year, namely, on the 2nd May, a partial earth, and on 30th August, a total break in old cable. The composition of this cable now includes about 77 knots of the old 1864 cable and 18 knots of old India-rubber 1869 cable. This may require renewal shortly. Its insulation at the end of the year was 65.5 megohms per knot, which is as high as can be expected.

*Harbour Cables.*—Two faults occurred during the past year; one of these was apparently a cut by a knife, and the other by a borer insect. Both were easily repaired.

The seven-core Fowler-Waring Cable in use from the harbour to the Central Station was accidentally cut by some workmen employed in repairing the water pipes, and the three core Fowler-Waring Cable laid from the local to the Manora Office was similarly cut. Measures to obviate such accidents in the future are under consideration.

*Cable Houses and Cable Land Lines.*

32. The cable houses and cable land lines were inspected during the year and found satisfactory. The cable land line at Jask has been replaced by a seven-core Fowler-Waring Cable during the year, and a similar type of cable will be laid at Bushire during 1898-99 when the cable ship visits Bushire next cold weather.

*Expenditure of Cable and Cable in Stock.*

	Knots.
40. Cable in stock on 1st April 1897 . . . . .	45'811
Receipts since above date :—	
Manufactured at Manora, 13'000 . . . . .	} 13,717
Recovered at sea and retaped, 4'855 . . . . .	
Recovered and brought on charge, 0'862 . . . . .	
<b>TOTAL</b> . . . . .	64'528
Deduct cable expended during the year . . . . .	13'457
<b>Balance in hand on 31st March 1898</b> . . . . .	<b>51'071</b>

*Cable Steamer "Patrick Stewart."*

41. On the 1st April 1897, after her return from Ceylon, the *Patrick Stewart* was still in dock at Bombay undergoing repairs. She returned to Karachi on 5th idem.

42. On 26th April the vessel left Karachi with the Director and the Political Agent, Southern Baluchistan, to see whether quarantine arrangements at the Persian Gulf coast ports against India, where plague was raging, were efficient. As a fault had to be cut out of the Jask-Manora cable, about 72 knots from Jask, it was decided that the inspection of the coast ports between Karachi and Charbar and the cable repairs should be done on the one trip, so as to reduce the expenses to the Political Department as much as possible. The Political Department was therefore only charged for actual expenses incurred on their account and for the hire of the vessel for the time employed on purely political business. The ship returned to Karachi on 6th May.

43. On 24th August the *Patrick Stewart* again left Karachi in order to repair the Jask-Manora Cable, after doing which she returned on 2nd September. The vessel left for Bombay in October, and from November 1st to 22nd inclusive was in dock undergoing repairs. She returned to Karachi on 26th. From December 7th to January 19th the vessel was away from Karachi with the Director-in-Chief, Director, and the Electrician, on her annual tour of inspection of the Gulf stations. The vessel lay off Gateg from 13th to 26th December inclusive in connection with the murder of the late Mr. Graves. After visiting the various Gulf stations (Fao excepted owing to quarantine), and after repairing faults in the Bushire-Fao and Bushire-Jask Gutta-percha Cable of 1885, the vessel returned to Karachi on 19th January.

44. After this the *Patrick Stewart* was employed between Karachi and Gwadar in carrying troops and stores and line materials in connection with the rising of the Baluchis in the Mekran and the repair of the land lines between Pasni and Gwadar. Three trips were made between January 22nd and February 20th, since which date the vessel has been at Karachi.

During the year the vessel steamed 7,311 knots.

45. The earnings of the ship during the year amounted to Rs. 1,563-3-4, of which Rs. 124-8-0 were on account of passages and Rs. 1,438-11-4 on account of the hire of the *Patrick Stewart* by the Military Department. The latter amount, although earned during the year under review, will be adjusted during the current official year.

**MEKRAN COAST LAND LINE.**

46. The lengths of the various sections of this line on the 31st March 1898 were as follows, viz. :—

	Miles of Line.	Miles of Wire.
Karachi to Sonmiani Branch . . . . .	41'10	82'20
Sonmiani Branch . . . . .	1'56	1'56
"    "    to Ormara . . . . .	173'35	346'70
Ormara to Pasni Branch . . . . .	89'65	179'30
Pasni Branch . . . . .	3'20	3'20
"    "    to Gwadar . . . . .	76'50	153'00
Gwadar to Charbar . . . . .	117'18	234'36
Charbar to Jask . . . . .	198'85	397'70
<b>TOTAL</b> . . . . .	<b>701'39</b>	<b>1398'02</b>

*Maintenance and Repairs to Land Lines.*

47. *Karachi-Gwadar Subdivision.*—The full programme for the past working season could not be carried out owing to the rising of the Baluchis, which resulted in the destruction of the lines for many miles between Pasni and Gwadar, but the greater part of the subdivision was closely inspected by the Assistant Superintendent in charge, who carried out two renewals of wire, besides reconstructing the line where wrecked by the Baluchis.

*Gwadar-Jask Subdivision.*—Mr. E. Graves, Temporary Superintendent, held charge of the subdivision up to the 2nd December 1897, when he was murdered by a gang of Karwanis at the River Rapch, where he had arrived on inspection duty on 29th November. After this it was not considered safe for an European to march along the line, but later in the season the native artificer with his line gang did so and carried out such repairs as were necessary.

*Interruptions on Land Lines.*

48. During the year there have been six total interruptions, the aggregate duration of which amounted to 53 days, 11 hours, 52 minutes. Of this, 50 days, 13 hours, 32 minutes were caused by the wrecking of the lines during the late rising in Mekran. In addition to this, two other interruptions, lasting 1 day, 18 hours, 20 minutes, were due to wilful damage. Thus 52 days, 7 hours, 52 minutes are accounted for by wilful damage, the remaining 1 day, 4 hours being due to storms. As in the previous year, there was no total interruption on the Charbar-Jask section.

49. Of partial interruptions there have been 22, aggregating 13 days, 20 hours, 8 minutes, of which 13, lasting 7 days, 6 hours, 13 minutes, occurred in the Karachi-Gwadar subdivision, and 9, lasting 6 days, 13 hours, 55 minutes, in the Gwadar-Jask subdivision.

50. The causes of the faults are summarised as follows:—

	Number.	Duration Hours.
Definitely traced to preventable causes:—		
Faulty construction . . . . .	1	5
Faulty maintenance . . . . .	12	157
Working parties . . . . .	—	—
Other preventable causes . . . . .	1	53
Unpreventable causes:—		
Cyclones and storms . . . . .	4	64
Floods . . . . .	—	—
Animals and birds . . . . .	1	9
Malice . . . . .	4	876
Unknown causes . . . . .	1	12

Of the 12 faults due to faulty maintenance, 11 were due to corrosion of the line wire.

*Inspections.*

51. All the offices of the Persian Gulf Section, with the exception of Fao, where quarantine regulations prevented landing, were inspected by the Director-in-Chief in company with the Director, and were generally found in a satisfactory state. The buildings were also in good order.

52. The Examiner of Telegraph Accounts also inspected the accounts of the Persian Gulf Section at Karachi during the year.

*General Remarks.—Persian Gulf Section.*

53. The year under review has been rendered remarkable by two chief events: (1) the murder of the late Mr. Graves at the Rapch River in Perso-Baluchistan in December 1897, and (2) the rising of the Baluchis in the Mekran under Sirdar Mehrab Khan, Gitchki of Kej, in January 1898.

54. A noticeable feature in the first case is the fact that our lines were never once cut between Charbar and Jask (the Rapch River is situated about half-way between these two places), nor was any damage done to the lines throughout the operations which followed the murder.

At the time of the outrage it was supposed that the object was simply "loot"; afterwards it was suggested that race hatred was at the bottom of the attack. It might, in some way, have been connected with the general state of unrest which existed at the time along the Persian Gulf Coast and on the North-West Frontier of India.

55. The second affair began with an attack on the Nazim of Mekran and the Indian Survey Parties in the Kej Valley, and was followed immediately by the wrecking of the telegraph line between Pasni and west of Gwadar.

Such a display of ill-will towards this Department has never been known since the erection of the telegraph in 1862. Whatever the reason that actuated them on this occasion, the work of destruction was carried out with a thoroughness not generally characteristic of Baluchis. No less than 370 posts had to be renewed and nearly 11 miles of wire, besides nearly 750 insulators, were required to repair the damage done.

56. On the 25th April 1897 the village, which is attached to the Jask Station, and the Persian Fort there, were surprised by a party of Bashkardis, who looted the shops of the native traders. The Persian Governor, instead of protecting the station, came to the telegraph buildings to seek protection. The result of this attack was the despatch from Bushire to Jask of a Persian garrison, consisting of 120 soldiers with a field gun. They did not, however, stay long, the whole force, including the Governor, returning to Bushire during May 1897, since when the fort has been garrisoned by Mustapha Khan, son of the late Mir Abdul Nubbee and Chief of Sudaich, who is in the pay of this Department.

57. The Superintendent at Bushire in his report for November 1897 wrote that there was still an impression there that the telegraphs were keeping back the rain. This was, of course, with reference to the trigonometrical benchmarks which had been destroyed by a mob in January 1897, but had been rebuilt in the following April, with much public ceremony, under the orders of the Political Resident at Bushire. At the end of the official year, i.e., on 31st March last, the general state of affairs at Bushire was still reported as being very disturbed.

#### PERSIAN SECTION.

58. *Line Maintenance.*—Only ordinary line repairs were carried out during the year.

59. *Offices.*—The mud roof of the joint signalling room of the Indo-European Telegraph Company and of this Department at Teheran was replaced by an iron roof, and some improvements and additions were made to the senior clerk's quarters. These works were done at the expense of the Persian Government, the building being their property. The office building at Shiraz was also much improved by that Government.

60. *Interruptions.*—There was one total interruption on this section lasting for 22 hours; this occurred at an altitude above the sea-level of about 7,000 feet, and was caused by accumulations of snow, which broke the wires in a great number of places along a distance of two miles.

61. The faults from all causes, including contacts between the wires, during the past three years have been:

Year.	1 Wire.		2 Wires.		3 Wires.	
	Hours.	Mins.	Hours.	Mins.	Hours.	Mins.
1895-96 . . . .	325	65	13	32	5	16
1896-97 . . . .	606	0	17	12	20	53
1897-98 . . . .	340	56	7	3	22	5

62. The causes of them are summarised as follows:—

	Number.	Duration.	
		Hours.	Mins.
Definitely traced to preventable causes :—			
Faulty construction and maintenance . . . . .	1	1	19
Working parties . . . . .	1	0	48
Unpreventable causes :—			
Cyclones and exceptional storms . . . . .	3	29	43
Floods . . . . .	1	47	15
Lightning . . . . .	1	7	39
Snow . . . . .	2	33	12
Fires . . . . .	—	—	—
Trees falling other than those caused by cyclones . . . . .	—	—	—
Animals and birds . . . . .	3	61	37
Malice . . . . .	—	—	—
Other unpreventable causes . . . . .	5	15	15
Unknown causes . . . . .	13	52	1
Faults in offices . . . . .	2	7	25

63. *Wilful Damage.*—There were 478 acts of wilful damage reported during the year, being 226 more than last year. They were distributed along the line as follows:—

Section.	From	To	No. of miles.	No. of Acts.
1st . . .	Teheran . . .	Ispahan . . . . .	247	138
2nd . . .	Ispahan . . .	Meshed-i-Meerghab, 88 miles north of Shiraz.	195	143
3rd . . .	Meshedi-Meerghab	Mean Kotal, 60 miles south of Shiraz	131	143
4th . . .	Mean Kotal.	Bushire . . . . .	102	54

The reason for the greater number of acts in the 2nd and 3rd sections is probably due to their being more frequented by the nomad Hyats than the other two sections. The attention of Her Britannic Majesty's Minister and His Excellency the Mukhbar-ed-Dowlah has been requested to this. The amount claimed for damages from the Persian Government amounted to Krans 8,784.\* Of this, Krans 1,672 has been collected locally, and the balance, 7,112, was deducted from the Jask royalty.

64. Wilful damage caused interruptions for the past four years as shown below:—

Year.	1 Wire.		2 Wires.		3 Wires.	
	Hours.	Mins.	Hours.	Mins.	Hours.	Mins.
1894-95 . . . . .	150	38	42	16	Nil.	
1895-96 . . . . .	158	8	Nil.		5	16
1896-97 . . . . .	315	46	Nil.		20	53
1897-98 . . . . .	93	50	Nil.		Nil.	

\* Note.—360 krans=100 rupees at the present rate of exchange.

*General Remarks.—Persian Section.*

65 The principal events which occurred in Persia affecting this Department are as follows:—

His Excellency Ali Guli Khan Mukhbar-ed-Dowlah died on the 16th July 1897, and his son the Mukhbar-ul-Mulk succeeded him as Minister of Telegraphs on the 10th August. By the death of His Excellency the late Mukhbar, the Department has lost a great friend.

Three hundred soldiers mobbed the Shiraz Office on one occasion, demanding arrears of pay. On two occasions the Kazerun Office was invaded by a mob, complaining of the high price of bread and of ill-treatment, and on one occasion a crowd collected at Dehbeed Station, complaining of being looted by Arabs. On each occasion the Persian Authorities took action and the men dispersed.

Two burglaries were committed and one attempted.

On two occasions Inspectors while marching were threatened, and on two occasions line men were fired on.

Once the post bag was robbed.

The Mashelah (swampy ground) near Bushire was overrun by armed Tangistanies (hill men) in February and March 1898, so that the route under the line was pronounced unsafe, and several murders were committed near and in Bushire.

*Buildings in Persia.*

66. In consequence of the stock of sheet iron for roofing purposes having become exhausted in the Teheran market, the completion of the iron roofing to the buildings for the clerks' quarters at Teheran has had to be postponed, and there is still some work to be done, connected with laying out and draining the ground, etc.

The new residence for the Director at Teheran was occupied by him in October 1897, and the completion report has now been submitted.

The title deeds of the ground purchased for both the Director's and clerks' quarters are deposited in the safe in the charge of the Superintendent, Teheran Station.

*Medical.*

67. Doctors Odling, C.M.G., and Scully, Medical and Assistant Medical Superintendents of this Department at Teheran and Shiraz respectively, were present throughout the year. Doctor Odling also holds the appointment of Legation Surgeon at Teheran since 1892, by permission of the Government of India.

The health of the staff was on the whole good. One clerk died at Shiraz in March 1898 of pleurisy.

The free dispensaries at Teheran, Ispahan, and Shiraz are much appreciated and used by the people.

*Meteorology.*

68. Similarly to last year, telegrams reporting the state of the weather in Persia were sent to the Meteorological Reporter, India, from the 15th November 1897 to the 15th March 1898.

**MESHED LINE.**

69. Mr. S. Butcher, Acting Assistant Superintendent, took over charge of this line on 15th May 1897, and executed the necessary repairs between 10th October 1897 and 28th March 1898. From the 29th December 1897 to 9th February 1898 work was stopped by snow and frost. Six hundred and ninety-six new juniper poles were erected, 106 old poles were dug up and re-erected after rotten wood had been cut off, and 700 field service insulators were fixed. No money was received from the Persian Government during this year towards the maintenance of the line, and therefore the expenditure was limited to the Rs20,000 sanctioned by the Government of India.

70. *Offices.*—The office at Aiwanikief had again to be moved this year, and the office at Sabzewar was also moved into another building.

71. *Interruptions, Meshed Line.*—The interruptions to communication from all causes during the past three years are given in the statement below :—

	1895-96.	1896-97.	1897-98.
	Hours. Mins.	Hours. Mins.	Hours. Mins.
Faulty construction and maintenance . . . . .			3 20
Working parties . . . . .	13 30	Nil.	Nil.
Floods . . . . .	55 11	15 20	82 0
Animals and birds . . . . .	72 40	18 30	Nil.
Malice . . . . .	65 0	144 47	33 35
Faults in offices . . . . .	118 37	Nil.	65 28
Unknown causes . . . . .	72 20	7 48	Nil.
<b>TOTAL</b> . . . . .	<b>397 18</b>	<b>186 25</b>	<b>184 24</b>

Deducting faults in offices, the total number of hours of interruption due to other causes works out thus :—

	Hours. Mins.
1895-96 . . . . .	379 41
1896-97 . . . . .	186 25
1897-98 . . . . .	118 56

The Persian clerk who caused 65 hours 28 minutes interruption under the head "Faults in Offices" has since been dismissed by the Persian Government, together with another clerk and two gholams (line guards) for stealing insulators for the value of their iron stalks.

72. *Wilful Damage.*—One hundred and ninety-seven cases of wilful damage occurred, in which 183 insulators and 57 posts were broken or stolen and 55 yards of wire were carried away.

The figures were for the years :—

	Acts.
1895-96 . . . . .	445
1896-97 . . . . .	169

There is thus an increase of 28 over last year, but the improvement over 1895-96 and before continues to be satisfactory.

The amount of Krans 200 was recovered from local Governors, etc., on account of compensation.

73. *Traffic.*—The table below shows the amount of paid conversational traffic, etc., carried by the line during the past three years :—

Year.	Total paid conversation and State messages.	State messages only.
1895-96 . . . . .	3,423 krans	814 krans.
1896-97 . . . . .	2,993 "	1,195 "
1897-98 . . . . .	2,529 "	1,278 " 50 g.

74. There were no events of a political nature which affected the line or offices on the Meshed line.

#### STORES.

75. The principal items of expenditure under this head have been as follows :—

	R. a. p.
Stores purchased in India . . . . .	2,750 10 1
London stores, including freight, landing charges and exchange . . . . .	79,215 6 0
Stores from other Departments . . . . .	1,814 5 3

The following were the principal issues of stores :—

Repairs to cable . . . . .	31,452 0 8
Cable steamer . . . . .	18,758 9 6

The issues to repairs and renewals to the Persian Gulf land line amounted to Rs 21,353, and were heavy, owing to the line being wrecked for some miles by the Baluchis. The issues to offices in that section amounted to Rs 13,541 and to offices in the Persian Section to Rs 6,715-4-2.

*Personnel.*

76. The Director, Persian Gulf Section, recommends to favourable notice the following officers of his staff for good services rendered after Mr. Graves' murder and the destruction of the line by the Baluchis in Mekran:—Messrs. E. Woodsell and R. C. Campbell, Assistant Superintendents, and Mr. W. H. Janes, General Service Clerk, the last of whom has been rewarded with a personal allowance of Rs 25 per mensem. Lieutenant-Colonel Wells and Mr. Sealy also report that their thanks are due to the staff generally for good services rendered throughout the year, and their thanks are warmly joined in by me. To the above Directors also my special acknowledgments are due for the continued assistance they have given in maintaining this, the Indo-European route, as the most accurate and quickest of the telegraph routes to India.

It is again my pleasing duty to mention Mr. C. E. J. Twisaday, the senior clerk in my office, who during my absence in India, from November 1897 to March 1898, was in charge of the current duties of my office, and who performed those duties to my entire satisfaction.

INDIA OFFICE,  
10th November 1898.

B. T. FINCH,  
Director-in-Chief.

## APPENDICES.

Rx. 184,944 the exact sum being  
Rs. 49,444-11-0  
(vide Appendix B).

Note.—Traffic earnings are primarily worked in francs in accordance with the existing Convention, but in converting the francs into rupees a uniform rate is not adopted. For the receipts from the Indian Department for traffic interchanged with it, a rate of francs 25 to the pound sterling is taken; and from working to rupees the conversion is made at the latest rate obtained by the Secretary of State for demand bills which is communicated to the Chief Office. On the other hand, for the receipts from the Indo-European Company and Turkey, which are settled in London in sterling, a uniform rate of francs 25 to the pound (in accordance with the Convention) is adopted, and the conversion to rupees made at the average rate of the Secretary of State's drawings for the year, which in the present case is 15,353,000, to the rupee.

## APPENDIX F.

STATEMENT showing the NUMBER of MESSAGES and WORDS FORWARDED during the Year 1897-98, compared with four previous years.

YEAR.	STATE.		COMMERCIAL AND PRIVATE.						PRESS.		TIMEL.		TOTAL.				GRAND TOTAL.		Add or deduct Messages in transit.	Total as per Appendix E.

NOTE.—Under the columns headed "Gulf" are shown messages and words accounted for in Gulf Traffic Accounts.  
Under the columns headed "Persia" are shown messages and words originating or terminating in Persia to or from Indo-European Company's lines, which consequently do not appear in the Gulf Traffic Accounts.

## APPENDIX G.

## STATEMENT of WORK done by the TELEGRAPH STEAMER "PATRICK STEWART" during the year 1897-98.

Date.		Particulars.
From	To	
1897.	1897.	
April 1	April 1	In Bombay dock undergoing repairs.
" 2	" 5	Hauled out of dock and left for Karachi, arriving 5th.
" 6	" 25	At moorings in Karachi Harbour.
" 26	May 6	Left Karachi with Director and Political Agent, Southern Baluchistan with staff and escort for Melran and Baluchistan Coasts, re quarantine operations. Repaired a fault in Karachi-Jask cable, and returned to Karachi, arriving 6th.
May 7	Aug. 23	At moorings in Karachi Harbour.
Aug. 24	Sept. 2	Left Karachi, and repaired a fault in Karachi-Jask cable, and returned to Karachi, arriving 2nd.
Sept. 3	Oct. 27	At moorings in Karachi Harbour.
Oct. 28	" 31	Left for Bombay, arriving 31st.
Nov. 1	Nov. 22	In dock undergoing repairs.
" 23	" 26	Hauled out of dock and left for Karachi, arriving 26th.
" 27	Dec. 6	At moorings in Karachi Harbour.
Dec. 7	1898.	
	Jan. 19	Left Karachi with Director-in-Chief, Director, and Electrician on annual inspection of the Persian Gulf Stations, and with reliefs and stores. Repaired faults in Bushire-Fao cable and Bushire shore end, and returned to Karachi, arriving 19th.
1898.		
Jan. 20	" 21	At moorings in Karachi Harbour.
" 22	" 28	Left Karachi with troops and mules for Panni, and with a country boat in tow, and returned to Karachi, arriving 28th.
" 29	Feb. 5	Left Karachi for Mekran coast on political and telegraph duties with line materials, and returned to Karachi, arriving 5th.
Feb. 6	" 14	At moorings in Karachi Harbour.
" 15	" 20	Left for Panni with land-line stores, and returned to Karachi, arriving 20th.
" 21	Mar. 31	At moorings in Karachi Harbour.
		ABSTRACT.
		Days.
		At moorings in Karachi Harbour . . . . . 144
		In Bombay Harbour and dock . . . . . 23
		At sea . . . . . 98
		TOTAL DAYS . . . . . 365

*Note reviewing the Administration Report of the Indo-European Telegraph Department for the year 1897-98.*

The following statement shows the financial results of working the Department during the past five years :—

Year.	Total Capital Outlay.	Gross Receipts.*	Expenditure.	Net Receipts.	PERCENTAGE OF	
					Net Receipts to Capital.	Expenditure to Gross Receipts.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1893-94	1,14,46,190	13,50,856	8,60,608	4,90,248	4'28	63'7
1894-95	1,14,42,885	15,70,420	8,26,897	7,43,523	6'50	52'6
1895-96	1,14,89,206	16,70,081	8,17,450	8,52,631	7'42	48'9
1896-97	1,15,49,774	14,84,507	7,71,477	7,13,030	6'17	51'9
1897-98	1,15,35,814	15,40,153	7,81,981	7,58,172	6'57	50'77

\* This represents the revenue of the Department after adjustments made in accordance with the provisions of the Joint Purse arrangement.

The Capital Account was decreased by Rs. 13,961.

The total earnings of the Department show an increase of Rs. 55,646, as compared with the previous year. This is due to the fact that the traffic with India, which fell off considerably in 1896-97, more than recovered itself during the year under review. On the other hand, the traffic with places beyond India shows a slight decrease. The increase under miscellaneous revenue is due to larger sales of old cable core and other unserviceable stores.

The expenditure shows an increase of Rs. 10,504. This is mainly due to the large outlay on repairs to the Mekran Coast land lines necessitated after the destruction of the line by the Baluchis and the murder of Mr. Graves.

The net result is a profit of Rs. 7,58,172, which gives a dividend of 6'57 per cent. on the capital, against 6'17 per cent. in the previous year. When it is remembered that the capital of the Department is a very inflated one, and includes the cost of lines and cables which have long since been abolished, and sundry political charges, it will be seen that the dividends now earned are very satisfactory, and show that the lines are valuable from a commercial as well as from a political point of view.

The proportion of Indian traffic actually carried by the Indo-European route is still largely in excess of the proportion on which the Joint Purse was based, but the trans-Indian traffic is considerably less (*see* paragraphs 9 and 10 of the Report).

Australasian traffic shows a large falling-off during 1897-98, the total amount being 54,474 $\frac{1}{2}$  less than in the previous year, and the Department's share is 1,384 $\frac{1}{2}$  less than last year. The sum drawn out of the Purse is, however, 3,293 $\frac{1}{2}$  more than the amount earned by the Department in 1889 when the Australasian Message Fund was formed.

The general working of the Department continues to be very satisfactory. Only one total interruption to traffic between Teheran and Karachi occurred during the year, and only lasted 22 hours 56 minutes. The cables and land lines are, considering their age, in a sound condition. The speed and accuracy of transmission are also satisfactory.

The murder of Mr. Graves and the rising of the Baluchis on the Mekran Coast were fully reported at the time. Considerable damage was done to the land lines during the latter disturbance, but the cables fortunately worked well, and the through traffic was not interfered with. The lines have now been repaired, and the districts appear to be more settled.

EDMUND NEEL,

Secretary, Public Works Department.

13th December 1898.

INDIA, No. 8, Hastings Street, Calcutta.

SUPPLEMENT TO  
**The Gazette of India.**

No. 8.1 CALCUTTA, SATURDAY, FEBRUARY 25, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or more known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, February 11th, 1899.**

The slight disturbance which had formed in Upper Sind at the close of the previous week lay over Rajputana on the morning of the 5th. A secondary depression began to form in the East Punjab during the day. This subsidiary depression was of moderate intensity but was the chief feature of the weather on the morning of the 6th. It filled up as rapidly as it formed during the day and high pressure conditions were re-established in North-Western India on the 7th. The primary or original disturbance advanced through Central India on the 6th, the eastern districts of the North-Western Provinces and Bihar on the 7th, Assam and Upper Burma on the 8th, and broke up or passed outside India during the next 24 hours.

A second disturbance passed into Baluchistan on the 8th from the plateau of Iran. It marched along the usual track of cold weather storms through Rajputana, on the 10th, into the Central districts of the North-Western Provinces on the 11th.

The two disturbances described above gave moderate rain in Baluchistan, light to moderate rain over the greater part of the Punjab, the Gangetic Plain, Berar and the Central Provinces and moderate to heavy snow in the North-West Himalayas.

Weather was fine throughout the week in Burma and the Peninsula, with the exception of Southern India, which obtained moderate rain from thunderstorms, chiefly on the 8th and 9th.

The mean temperature of the week was in moderate to considerable excess of the normal over nearly the whole of Northern and Central India and the Central Provinces, and approximately normal in Burma and the Peninsula. The excess was most pronounced in Rajputana ( $5^{\circ}$ ), Central India and the North-Western Provinces (each  $4\frac{1}{2}^{\circ}$ ).

**Daily Summary.—Sunday, February 5th.**—Pressure was unchanged in the Peninsula and differed very slightly from the normal of the day. It had increased briskly in Burma and North-Eastern India and was in slight to moderate

rate excess in that area. Pressure had given way briskly in Rajputana due to the transfer to that area of the disturbance which was forming in Upper Sind at the close of the previous week. Pressure had increased slightly in the rear of the depression in Upper Sind and was now from a twelfth to a tenth of an inch below the normal over the whole of Rajputana, Kathiawar and Upper Sind. Winds were from their normal cold weather directions in the Peninsula. They were light to unsteady in the Burmese Peninsula and Bengal and had shifted to easterly directions in the Gangetic Plain under the influence of the disturbance in Rajputana. Humidity had increased rapidly in Sind, Gujarat, Central India, Berar and the Central Provinces and at the hill stations in Upper India. Skies were free from cloud in parts of Bengal, Burma and Southern India and more or less clouded in the remainder of the country. They were overcast in Baluchistan and Upper India. Light rain or snow had fallen in Baluchistan, Kashmir and the Punjab hill and submontane districts. The mean temperature of the previous 24 hours was more or less largely in excess of the normal in the North-Western Provinces, Rajputana, the Punjab, Central India, Berar, Bihar and Gujarat, in slight to moderate defect in the southern half of the Peninsula and practically normal in the remainder of India.

*Monday, February 6th.*—Pressure had increased to a slight extent in Baluchistan, Sind, Gujarat and West Rajputana and had decreased over nearly the whole of the remainder of the country. The fall was brisk in Bundelkhand and the neighbouring districts and brisk to rapid in Kashmir, the Punjab and the western and hill districts of the North-Western Provinces. The depression passing through Rajputana on the previous day was central in Bundelkhand. It was, however, obscured by the formation of a secondary depression in the East Punjab. Pressure was about a seventh of an inch below the normal in the two areas of depression. Winds were irregularly cyclonic in direction over the Punjab, Rajputana, Central India and the Gangetic Plain, but were light in force. Skies were overcast in the North-West Himalayas and heavily clouded in the Punjab and North-Western Provinces. Skies had cleared in Baluchistan. The double disturbance had occasioned light to moderate showers in Baluchistan, the Punjab and the western districts of the North-Western Provinces, and moderate snow in Kashmir and the Punjab Himalayas. Temperature had risen briskly in North-Eastern India and was higher than usual over the whole of the country, with the exception of the Deccan, Mysore and Madras where it was in slight to considerable defect, due chiefly to much lower day temperatures than usual. The excess in the area of increased temperature was most marked in the North-Western Provinces ( $9^{\circ}$ ), Central India ( $7^{\circ}$ ), Rajputana ( $6^{\circ}$ ) and the Punjab ( $4^{\circ}$ ) and was on the whole exhibited more largely in the night than the day temperature.

*Tuesday, February 7th.*—The secondary or the Punjab depression had broken up completely. The primary depression had, on the other hand, advanced eastwards into the eastern districts of the North-Western Provinces and become of less importance. Pressure had hence risen briskly to very rapidly in North-Western and Central India, thus re-establishing high pressure conditions in that area. A slight increase of pressure had also occurred in Burma, Bengal and the greater part of the Peninsula, and pressure was now more or less above the normal throughout the country, with the exception of Sind where it was in slight local defect. The excess was considerable to large in Burma and the Punjab and was most marked in the North Punjab where it was upwards of an eighth of an inch in amount. South-easterly winds held in Bihar and the eastern and central districts of the North-Western Provinces. Skies had cleared in North-Western and Central India but were more or less clouded in the Eastern districts of the North-Western Provinces, Bihar, Chota Nagpur and Bengal. Fairly general rain, light to moderate in amount, had been received in the East Punjab and the North-Western Provinces and some showers in Bihar, the Central Provinces and Central India. Moderate to heavy snow had fallen in the North-West Himalayas. A rapid reduction of temperature had occurred in the North-Western Provinces, Rajputana, Central India and the Punjab and a brisk to rapid increase in Bihar, Chota Nagpur, Mysore and Madras. The mean temperature of the previous 24 hours was  $5^{\circ}$  above the normal in Bihar and Chota Nagpur,  $4^{\circ}$  in Central India, Berar and the North-Western Provinces,  $3^{\circ}$  in Southern India, Mysore, the Central Provinces

and Sind, and  $2^{\circ}$  in Rajputana, the Punjab, Bengal and Assam. Elsewhere the variations were small and unimportant. Temperature was in large defect ( $8^{\circ}$  to  $9^{\circ}$ ) at Simla, Chakrata and Ranikhet.

*Wednesday, February 8th.*—Pressure had again increased briskly to rapidly in Sind, the Punjab and Kashmir, thus emphasizing the high pressure conditions obtaining in that area on the previous day. Pressure had on the other hand fallen to a slight extent in Burma, Assam, Bengal and Bihar due to the eastward advance of the residual disturbance which was in the eastern districts of the North-Western Provinces on the previous day. Pressure was beginning to give way in West Baluchistan on the outskirts of a cold weather disturbance advancing through East Persia. Light to moderate north-west winds had set in over the Punjab and Rajputana and were extending eastwards down the Gangetic Plain. Very strong winds were blowing at Cherat. Light variable airs and calms obtained in Bengal and ordinary easterly winds in the Peninsula. Skies had cleared in North-Eastern India but were moderately clouded in Southern India. Cloud was beginning to form in Baluchistan and the Punjab. Some heavy thundershowers had occurred in East Ceylon and Southern India, and a few light showers had fallen in Bihar and North Bengal. Temperature had increased  $9^{\circ}$  in Baluchistan and was  $12^{\circ}$  above the normal in that area during the past 24 hours. It had fallen  $5^{\circ}$  in Bihar and was normal in that area. The temperature conditions in the remainder of India were similar to those prevailing on the previous day.

*Thursday, February 9th.*—Pressure had decreased throughout the Indian area. The decrease was rapid in Sind and Kashmir and brisk in Baluchistan and the remainder of North-Western India. The disturbance which was in East Persia on the previous day was now crossing the North-West frontier into Upper Sind. Pressure was a twentieth of an inch in defect of the normal at Jacobabad and the depression was hence of very slight intensity. Pressure was normal in the Peninsula and in slight to moderate excess in Burma and North-Eastern India. Winds were light at the hill stations in Upper India and were falling off in the Gangetic Plain where they blew generally from westerly directions. Skies were overcast in Baluchistan, the Punjab and Kashmir and light to moderate rain had fallen in Baluchistan and some light showers in the West Punjab during the previous 24 hours. Local thundershowers had again occurred in Madras and Malabar where skies were overcast. Temperature had diminished rapidly in Baluchistan and was now  $7^{\circ}$  higher than usual in that area. Temperature had on the other hand increased slightly to briskly in Northern India and the northern half of the Peninsula, and was during the past day normal in the Madras Deccan, Orissa, Madras Coast, West Coast and Burma, and from  $2^{\circ}$  to  $5^{\circ}$  above the normal in the remainder of the country due to much higher night temperature than usual.

*Friday, February 10th.*—Pressure had recovered to a slight extent in Baluchistan and had again fallen in India and Burma. The fall was greatest in Rajputana in consequence of the advance to that area of the feeble disturbance passing through Upper Sind on the previous day. The depression was unchanged in character, pressure being as on the 9th only about a twentieth of an inch below the normal of the day in the central area. Winds from northerly directions obtained in the Punjab and light airs and calms in the Gangetic Plain. Winds were increasing in the Peninsula and were from their normal cold-weather directions. Skies had cleared in Baluchistan and were less clouded in the Punjab than on the previous day. They were overcast in Kashmir and more or less heavily clouded in Berar, Central India and the Western and Central districts of the Central Provinces. Baluchistan and the North and Central Punjab had obtained light to moderate rain and Berar and the Central Provinces some local thundershowers. Light snow had fallen in the Murree and Kashmir Hills.

Temperature had fallen  $3^{\circ}$  in Baluchistan and  $2^{\circ}$  in the Punjab, and was during the previous 24 hours in moderate excess in the former and normal in the latter area. The temperature conditions were practically unchanged in other districts.

*Saturday, February 11th.*—The barometric changes of the previous twenty-four hours were unimportant except in the areas affected by the depression.

Pressure had increased briskly in the area covered by the disturbance on the previous day and had fallen rapidly in the central districts of the North-Western Provinces to which area it had now been transferred. Pressure was in somewhat greater defect in the depression than on the previous day. Winds had shifted to southerly directions in Lower Bengal and Chota Nagpur and were of moderate intensity. Winds were cyclonic in direction in the depression but were light. Unusually strong winds prevailed at Cherat, their velocity being at the rate of 44 miles per hour at 8 A.M. Light to moderate north-westerly winds had appeared over Sind, Rajputana and the Punjab. The air was abnormally dry in Gujarat and West Rajputana, the lowest humidity recorded at 8 A.M. was only 6 per cent. at Mount Abu. Skies were more or less heavily clouded in the North-Western Provinces and Central Provinces and numerous light to moderate showers had occurred in these areas and in Bundelkhand, Baghelkhand and the North Punjab. Light snow had fallen in the Murree and Kashmir Hills and hail in the hill districts of the North Western Provinces. A very rapid reduction of temperature had occurred in Berar, thus reducing the temperature considerably below the normal in that area. The mean temperature of the past 24 hours averaged  $7^{\circ}$  above the normal in Rajputana,  $6^{\circ}$  in Chota Nagpur,  $5^{\circ}$  in Central India and the North-Western Provinces,  $4^{\circ}$  in Bihar and Bengal and  $2^{\circ}$  in Assam, Orissa and the Central Provinces. Temperature varied but slightly from the normal in other districts.

**Temperature.**—The mean temperature of the week was in general excess by amounts averaging  $2^{\circ}$  for the whole Indian land area. The only area in which the mean temperature of the month was lower than usual included the Madras Coast and Madras Deccan. The deficiency in that area was however small and of no importance. The excess of the mean temperature of the week over the normal was least marked in Burma, Orissa, West Coast, Bombay Deccan, Mysore and South India and was largest in amount in a belt stretching from Rajputana to Chota Nagpur in which it ranged between  $4^{\circ}$  and  $5^{\circ}$ . It may be noted that in the area of increased temperature the day temperature was almost as largely above the normal as the night temperature.

The following table gives mean temperature variation data of the week:—

Province.	Variation from Normal of Mean Temperature of 24 Hours Preceding 5 A.M. of Date							Mean variation of week.
	5th.	6th.	7th.	8th.	9th.	10th.	11th.

**Rainfall.**—The conditions under which the precipitation of the week occurred have been fully indicated in the general summary. The rainfall returns show that practically or absolutely no rain fell during the week in Burma, Assam Surma and Hills, Bengal (excepting Central Bengal), the eastern districts of the North Western Provinces, the South and Central Punjab, Rajputana, Central India and the whole of the Peninsula north of Lat.  $12^{\circ}$  N. The deficiency over the greater part of the rainless area was however very slight as the normal fall of the period is small in amount. In the area of effective rainfall the average amounts received ranged from a tenth of an inch in Assam Brahmaputra to 2.34 inches in the Punjab Hills and differed but little from the normal in Central and North Bengal, Chota Nagpur, North Bihar, South Oudh, the South-East Punjab and the west of the North-Western Provinces. The fall of the week was in moderate excess of the normal in South Madras, Malabar, Coorg, Madras, South-Central, the North-Western Provinces Hills and West Submontane and Baluchistan and in large excess in the Punjab Hills which obtained 1.59 inches more than their normal quantity, *viz.*, 0.75 inch.

The most noteworthy daily falls recorded during the week were 2.94 inches at Dehra Dun on the 7th, 2.84 inches at Trivandrum on the 9th and 2.25 inches at Dharamsala on the 7th and the principal totals 6.70 inches at Srivilliputtur (Tinnevely), 4.31 inches at Palampur (Kangra), 4.22 inches at Cochin (Malabar), 3.16 inches at Coonoor (Nilgiris) and Pithoragarh (Almora) and 3.09 inches at Dehra Dun.

The seasonal rainfall continues more or less in defect of the normal over the whole of the country with the exception of Bengal, Chota Nagpur, Bihar, Oudh, the eastern districts of the North-Western Provinces, Malabar, Coorg, South Madras and Madras South-Central. The deficiency is moderate to considerable in amount in Orissa, the western districts of the North-Western Provinces, the greater part of the Punjab and Baluchistan. It may be noted that no rain has fallen during the past six weeks in Sind and Rajputana areas which usually obtained light to moderate rain during the period.

HEM RAJ,

Offg. Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 16th February 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 18th February.*—No rain fell during the week except very slight showers in Ganjam and Vizagapatam. The water-supply is generally sufficient. Some sowings are being made. The standing crops are generally in fair condition. The harvest is yielding a fair outturn. Pasturage is scarce, but fodder is generally sufficient. Prices are generally falling.

**Bombay.**—*For week ending 22nd February.*—The standing crops have been damaged by frost in parts of the Upper Sind Frontier and by rats in one taluka of Bijapur. American cotton has been blighted in two talukas of Dharwar. The harvesting of the late crops is progressing in seventeen and preparations for next season are being made in nine districts. Cotton-picking continues in parts of Guzerat and Kathiawar. Fodder is sufficient except in parts of Sind. Agricultural stock is healthy. Prices have risen in seven, have fallen in three districts, and are stationary elsewhere.

**Bengal.**—*For week ending 20th February.*—Slight rain fell during the week in almost every district of the Province, except those of the Orissa Division. The rain was accompanied by hail in places in Bihar, but not much damage to the crops is reported. The general prospects of the crops continue favourable. The spring crops are maturing, and poppy is coming into flower. Sugarcane-pressing is approaching completion. Spring rice is still being transplanted. Lands are being ploughed for autumn rice and jute. The fodder-supply is everywhere sufficient. The price of common rice continues almost stationary.

**North-Western Provinces and Oudh.**—*For week ending 22nd February.*—With the exception of slight showers in a few districts clear weather has prevailed generally. The standing crops are flourishing, and are being irrigated where necessary. The pressing of sugarcane continues and planting of the new sugarcane crops has commenced in parts. The poppy crop is thriving and promises well. Damage to crops by rats is reported from some districts. Prospects continue favourable. Supplies and fodder are sufficient. Prices show a slight fall in a few districts but are otherwise stationary or rising.

**Punjab.**—*For week ending 22nd February.*—More or less rain has fallen in the Umballa, Ferozepore, Mooltan, Lahore, Sialkote, Rawalpindi, Peshawar and Dera Ismail Khan districts. Pressing of sugarcane and ploughings for the extra spring crops continue. The standing crops have been generally benefited in the districts where rain has fallen recently. Crops on unirrigated areas are failing from drought in Delhi. The condition of the standing spring crops is generally good to average. The gram and rapeseed crops are being damaged by caterpillars and rust in Ferozepore, and the sugarcane crop has been damaged by frost in parts of Sialkote. Cattle are generally in good condition. Fodder is sufficient except in Delhi, Shahpur and parts of the Umballa districts. Prices, especially of wheat, are rising in Hissar and Sialkote, falling in Shahpur, Rawalpindi, Peshawar and Dera Ismail Khan and are unchanged elsewhere. Wheat is selling from 15½ to 20½, gram 19 to 25, barley 19, bulrush millet 19 to 25, maize 25 to 34, great millet 25 and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 21st February.*—The weather is clear. The nights and mornings are cool but the days are becoming warm. The recent rain has benefited the late sowings in Mandla. The recent cloudy

weather has damaged the standing crops in Bhandara. The extent of the damage to crops caused by hail in Saugor and Seoni is being ascertained, otherwise prospects are unaltered. The threshing of the autumn crops has almost been completed and the pressing of sugarcane continues. The reaping of the winter crops is progressing. Employment for agricultural labour is scarce in the Haka tahsil of Damoh. Fodder is becoming scarce in the Bargarh tahsil of Sambalpur. The cheapest prices are—wheat  $19\frac{1}{2}$ , gram 30, rice 22, and *juar* 28 seers per rupee. The dearest prices are—wheat  $12\frac{1}{2}$ , gram 16, rice 11 and *juar* 20 seers per rupee.

**Burma.**—*For week ending 18th February.*—In Lower Burma threshing is nearing completion and winnowing is well advanced. Dry weather paddy has been sown in Tavoy. In Upper Burma cultivation of the dry weather crops is progressing and prospects continue fair or good. The price of paddy has risen from three to five per cent. in Rangoon and seven other districts of Lower Burma and ten per cent. in Thayetmyo and Pakokku. Prices are stationary elsewhere.

**Assam.**—*For week ending 21st February.*—Rain fell in most districts during the week. Land is being prepared for early rice in the Assam Valley districts and for low land rice in Sylhet. Gathering of mustard and pulses, pruning of tea and pressing of sugarcane are in progress. Prospects of the mustard crop are fair and of sugarcane and pulses generally good. Fodder is scarce in Cachar, the Naga, Khasi and Jaintia Hills and in parts of Sylhet. Water is insufficient in the Khasi and Jaintia Hills and in parts of Sylhet. Prices—common rice, Silchar 15 to  $15\frac{1}{2}$ , Sylhet, Dhubri, Gauhati and Tezpur 16, Nowgong 14, Sibsagar 13 and Dibrugarh  $13\frac{1}{2}$  seers per rupee.

**Mysore and Coorg.**—*For week ending 22nd February.*—**MYSORE:** The standing crops are in good condition. Paddy has been harvested in parts of Tumkur, Kolar, Mysore and Chitaldrug. Prices have fallen slightly in Bangalore, Hassan and Shimoga and risen in Kolar and Kadur.

**COORG:**—The threshing of rice and coffee-picking continue. Water and fodder for cattle are sufficient. Prices of food grains are stationary.

**Berar and Hyderabad.**—*For week ending 22nd February.*—**BERAR:** The weather is cool. Harvesting of the winter crops is in progress and ploughing of fields for the ensuing monsoon crops continues. A scarcity of fodder and water prevails in parts of the province. Prices are fluctuating.

**HYDERABAD:** No rain fell during the week. The harvesting of the spring crops is progressing. The winter rice crop is in fair condition. Prices are almost stationary. Prices—wheat  $9\frac{1}{2}$ , coarse rice  $10\frac{1}{2}$  and *jawari* 22 seers per current sicca rupee.

**Central India.**—*For week ending 22nd February.*—No rain fell in Central India during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. The standing crops have been slightly damaged in Gwalior and Malwa, but are in good condition elsewhere. Agricultural stock is healthy and pasturage sufficient. Prices are above the normal in Bundelkhand and normal elsewhere. The condition of opium is good in Gwalior and Indore and fair in Malwa.

**Rajputana.**—*For week ending 22nd February.*—No rain fell during the week. Irrigation of crops continues. Their condition is generally good but slight damage by frost is reported from Ajmere-Merwara and by hail from Kerowlee. Cattle are generally in good condition. Fodder is still scarce in parts of Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypore and Bikanir. Prices are rising in Ajmere and five States, falling in Jeysulmere and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 79 persons emigrated during the week. The total emigration up to date amounts to 4,115 persons. The numbers employed on

relief works were—3,962 in Merwara and 1,067 in Marwar. Prices—Ajmere 19, Beawar 22, and Marwar 19 seers per rupee.

**Kashmir.**—*For week ending 21st February.*—The weather has been cloudy but is now fine. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 22nd February.*—No rain fell during the week. The condition of the standing crops is fair. Fodder is sufficient. Prices are falling slightly, wheat selling at 18 and maize 25 seers per rupee.

**Nepal.**—*For week ending 18th February.*—Rainfall 0·16. The weather is sunny and clear. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,

*Secretary to the Government of India.*

GOVERNMENT OF INDIA,  
FINANCE AND COMMERCE DEPARTMENT.

**REPORT ON THE CASH BALANCES AND RESOURCE OPERATIONS OF THE INDIAN TREASURIES FOR THE TWELVE MONTHS FROM OCTOBER 1897 TO SEPTEMBER 1898.**

No. 588A, dated Calcutta, the 23rd February 1899.

ORDER—By the Government of India, Finance and Commerce Department.

**READ—**

Letter from the Comptroller and Auditor General, No. 1886, dated the 7th February 1899, submitting a report on the Cash Balances and Resource Operations of the Indian Treasuries for the twelve months from October 1897 to September 1898.

ORDERED that the letter and its annexures be published in the *Gazette of India* for general information.

H. H. RISLEY,  
*Offg. Secretary to the Government of India.*

No. 1886, dated Calcutta, the 7th February 1899.

From—The Comptroller and Auditor General,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit my report on the Cash Balances and Resource Operations of our Treasuries for the twelve months from October 1897 to September 1898.

**Minimum Balances.**

2. The following table gives the estimated Minimum Balances for all India for each month, from October 1898 to September 1899, and their distribution between the District Treasuries of the several Provinces and the Reserve Treasuries and Presidency Banks. The usual statements, marked A and B, showing the comparison of these balances with the estimates of previous years, are appended at the end. In the table the total balances at the Presidency towns have been shown as usual in a lump sum in a separate column:—

[In lakhs of Rupees.]

	DISTRICT TREASURIES.										Presidency Bank and Reserve Treasuries.	Grand Total.
	India.	Central Provinces.	Burma.	Assam.	Bengal.	N.-W.P. and Oudh.	Punjab.	Madras.	Bombay.	Total.		
1st October 1898	34	41	48	29	70	1,36	94	70	1,00	6,21	4,98	11,20
November	24	40	44	25	75	1,00	85	70	1,00	5,63	3,47	9,10
December	23	35	40	20	75	1,06	75	60	85	5,19	3,21	8,40
January 1899	26	35	45	25	75	1,30	80	75	90	5,83	2,67	8,50
February	31	40	58	40	90	1,45	1,02	1,20	90	7,16	4,24	11,40
March	43	48	74	44	1,00	1,63	96	1,15	1,10	7,93	4,07	12,00
April	47	48	87	43	1,90	1,63	95	1,25	95	8,88	5,12	14,00
May	30	46	71	40	1,30	1,43	90	1,15	95	7,60	5,10	12,70
June	42	48	63	36	90	1,70	85	95	90	7,19	4,81	12,00
July	45	50	61	36	1,00	1,75	1,12	90	1,00	7,69	5,11	12,80
August	33	47	59	35	80	1,80	1,10	80	1,00	7,06	5,04	12,10
September	36	44	59	31	75	1,40	1,00	75	1,00	6,60	4,90	11,50

3. As soon as the special pressure on our cash balances was removed, steps were taken to reduce the number of temporary Currency Chests, and as many as 124 were closed during the year. The Accountants General have revised their minima with reference to this change and to the remark contained in the last Report. With a very few exceptions I have accepted them in the above table. The balances for all India have been estimated by me on the principle explained in previous reports.

#### Cash Balances.

4. The following statement shows the distribution of the actual balances in thousands of rupees on the first day of each month during 1897-98, with the corresponding figures of the previous year:—

	October.	November.	December.	January.	February.	March.	April.	May.	June.	July.	August.	September.	September closing balance.
<b>1897-98.</b>													
Reserve Treasuries .	1,14,89	1,27,49	81,67	1,60,56	2,38,65	3,41,00	3,13,50	2,36,20	1,64,66	1,18,60	2,93,06	8,11,79	2,02,98

5. During the period referred to in the above table the balances passed through two crises, once in December 1896 and again in October 1897. The former was caused by famine and plague, as stated in the last Report, and the same causes, together with the war on the North-Western Frontier, produced the latter. Both occasions required the adoption of special measures for husbanding the resources and working the treasuries with extremely low balances. Help was obtained in December 1896 by the investment of 200 lakhs of the Currency Reserve (*vide* last Report), and in October 1897 by a remittance of 100 lakhs from the Secretary of State. The low state of the balances gave rise to frequent calls for assistance from treasuries at short notice, and to meet them numerous Currency chests were used. They numbered 144 on 1st December 1896 and 212 on 1st October 1897. The reason why more Currency chests were required on the latter date, although the balance was 17 lakhs higher, was that the special receipt referred to above was 100 lakhs less, and the net outgoings of the months were 71 lakhs more than in the previous year.

6. The relief afforded by the currency investment of December 1896 was only temporary. The effects of famine and plague grew more serious in the subsequent months, and it became necessary to reduce the capital expenditure on Railways in July 1897, and to ask the Secretary of State to suspend his drawings in September 1897. These measures, however, proved insufficient, and in October 1897, when the balance was 495 lakhs lower than in October 1896, they were supplemented by the remittance from the Secretary of State mentioned above. The balances, however, remained very low until December, when Revenue collections improved the position and Famine Relief works began to be closed. The Secretary of State was able to resume his drawings by the middle of this month, and the balances rose steadily till they reached about 16 crores in April, being 2 crores higher than the corresponding figure of the previous year. A considerable improvement in Railway Revenue and in some of the principal heads of Revenue immediately after April, and the termination of the Military operations on the North-Western Frontier soon after, enabled Government to effect a reduction in the intended amount of the new loan and maintain easy balances throughout the second half of the twelve months under report.

7. The details given in the statement contained in para. 4 show that the balances in the hands of the Presidency Banks were kept at a fairly high level during the year, the reduction in the balances being, as far as possible, effected at Government treasuries.

#### Movement of Funds.

8. The following table shows the net result of Inter-Provincial transfers by "Foreign Remittances" and "Supply Bills" during the year, and compares the position of each province with the previous year, eliminating in the last column the changes in its balance :—

[In thousands of Rupees.]

	FOREIGN REMITTANCES.				FOREIGN SUPPLY BILLS.		Comparison with previous year. Net received more or not sent less +. Net received less or not sent more —.	VARIATION IN BALANCES. 10. It appears from this statement that large improvements occurred in many provinces (especially North-Western Provinces, Central Provinces, Madras and Bengal), chiefly on account of a favourable agricultural season and the disappearance of famine. From these causes the revenue increased, expenditure on Famine Relief was discontinued, advances made in the previous year in connection with Famine were repaid, and the traffic on Railways revived. These improvements in the Punjab were, however, insufficient to raise the balances there higher than they had been in the previous year in consequence of war expenditure, and in Bombay in consequence of very large payments of Council Bills and the shortness of loan receipts there. The heads printed in italics in the above statement represent special transactions of 1896-97, which did not recur in 1897-98.

11. Details of Inter-Provincial Remittances shown in the table under para. 8 are given in the statement marked C annexed to this report. As compared with the corresponding statement of the last report, there was a decrease in the total amount of each kind of remittance, except transfers through Banks, the total of all kinds decreasing from 40 to 35 crores. This followed from easier balances which rendered fewer remittances necessary. The transfers through the Currency

Department, under which the heaviest transactions occur, show the most marked decrease, viz., from 22 to 13 crores, their amount in the previous year having been abnormally high on account of their frequent occurrence. On the other hand, transfers through Banks, which are made for meeting the demands of trade, increased, the increase in the net amount remitted to Bombay alone having been 192 lakhs, the result of the brisk trade in wheat at Karachi and Bombay. The transfers between Bengal and India in the accounts of the Bank of Bengal are only technically remittances, and their amount was almost the same as in the previous year.

12. Of the differences between the amounts of Foreign Supply Bills of the two years given in the table under para. 8, the following only need be noticed. In Assam the receipts increased as the traders, especially in Sylhet, used this form of remittance more freely than before. As Bengal drew less on the Central Provinces, the net receipts of the former decreased and the net result of the latter was converted into a receipt on account of smaller payments of these bills. Larger amounts of bills were drawn upon Punjab in connection with the wheat trade, the payment of which reduced the net receipts of the province. The "Variation in balances" given in the same table shows that in both years the increase or decrease in the total balance was distributed among all provinces.

13. The following statement gives the usual particulars of the large Foreign Remittances, as well as the more important of the Local Remittances, including Supply Bills, local and foreign :—

[In lakhs of Rupees.]

NATURE OF OPERATIONS.	FORM OF REMITTANCE.					TOTAL.	REMARKS.

the demand on Bombay having fallen off by 6 lakhs. The transfers through the Bank of Bengal from the treasury and the currency chest at Nagpore amounted to a net deposit of 2 lakhs against a net drawal of 4 lakhs in the previous year.

18. In *Burma* 117 lakhs were supplied by District Treasuries to Rangoon against 52 in 1896-97 to meet the increased drawings of the Bank of Bengal during the rice season. The total amount of local Bills sold on the Bassein Currency Agency was 13 lakhs more than during last year, the increase in the demand being caused by a plentiful harvest of rice and better prices. On the other hand, Bills on Henzada Currency Agency fell off by about 2 lakhs, the funds there being insufficient. The Mandalay treasury continued to be the depôt for the supply of coin to the treasuries dependent on it, and was the only permanent Currency Agency in Upper Burma. The issue of local Supply Bills showed an increase of 4 lakhs, due to larger demands at Mandalay.

19. In *Assam* there was an increase of 10 lakhs in the issue, and a decrease of 4 in the payment, of Foreign Supply Bills compared with last year. The steady decrease since 1892-93 in the issue of Bills by Bengal continued, no increase in their demand having arisen after the special arrangements made last year for issuing them as freely as possible. No remittance of coin was required from Bengal against 6 lakhs in the previous year.

20. In *Bengal* the remittances to Calcutta from the District treasuries increased by 10 lakhs, owing chiefly to an increase in the issue of Supply Bills, as the District treasuries had larger balances. The remittances to the Opium-paying treasuries were 49 lakhs less on account of the closure of Famine Relief Works. The remittances made to the several centres of trade to facilitate the drawing of Supply Bills decreased by 26 lakhs, larger local surpluses being available for the purpose. There was also a decrease of about 9 lakhs in the issue of Foreign Supply Bills on treasuries in the Central Provinces, as compared with the transactions of last year. The small coin depôt at Jalpaiguri has been closed.

21. In the *North-Western Provinces and Oudh* with the disappearance of famine, the treasuries required smaller supplies of funds. There was a decrease of 2,38 lakhs in the total volume of local remittances, namely, 1,64 lakhs in whole rupees, 60 lakhs in Currency Notes, and 14 lakhs in small silver and copper. The demand for Supply Bills on local treasuries also decreased by 33 lakhs, which is attributable to the stagnation in trade caused by the outbreak of plague in other provinces.

22. In the *Punjab* there was a very brisk demand, presumably in connection with the heavy trade in wheat, for Supply Bills on Bombay and Karachi, and the largest sales took place at Delhi, Simla, Rawalpindi, Dehra Ismail Khan, Peshawar, Bannu and Kohat. The amount of local coin remittances decreased as larger supplies were obtained from the local currency chests.

23. In *Madras* the effects of famine being over, the net amount remitted by District treasuries to Madras was about 2 lakhs more than in the previous year. The issue of Supply Bills and wire transfers on District treasuries fell off by 2½ lakhs, owing to a decrease in the demand in connection with the working of Cotton Presses, although the restrictions necessitated by the financial pressure of last year were removed.

24. In *Bombay* the balance in the hands of the Presidency Bank was generally kept above 40 lakhs, although the balance of the Province was low during the early part of the year. The remittances from the Reserve Treasury

14. The general result of the principal operations connected with the three Presidency towns are summarized as follows. The amount withdrawn from the District Treasuries in each case is larger than in the previous year owing to their higher balances :—

*Supplies drawn to Calcutta.*

15. The following points in the Resource operations of the year under report may be specially noticed.

16. In *India* the treasuries no longer accumulate coins of local currency. Bhopali Rupees do not circulate now in Central India, having been called in by the Bhopal State as noted in the last Report, and Halli Rupees have been considerably superseded by Government currency at Hyderabad since 1897, the few transactions in Halli coin that now remain resulting in a net outgoing from the treasury and necessitating at times a purchase in the local market. Sambhar, although a surplus treasury throughout the year in every year, required help once during the year under report to meet a sudden demand of the Postal Department in connection with heavy Money Orders remitted by merchants returning in large numbers from Calcutta in consequence of a panic about plague. The Nepal treasury was able, for the first time since 1887-88, when orders were issued for the purpose, to meet all its requirements by the sale of Supply Bills which had not previously been in favour with the public.

17. In the *Central Provinces* 9 lakhs of Foreign Supply Bills were drawn during the year on Calcutta and Bombay against 14 lakhs in the previous year,

to the District treasuries were about 73 lakhs less, while those in the opposite direction were somewhat more than in the previous year, because the latter was a year of famine. The heavy drawings of the Postal Department, however, continued in some Districts. The Bank of Bombay took over 55 lakhs for the use of its up-country branches. Karachi issued bills for 22 lakhs on Sukkur during May to July to strengthen its currency balance.

### Small Silver and Copper Coin.

25. Statement D annexed to this report shews the absorption of these coins in the different Provinces during the year under review and in the three preceding years. Its most prominent feature is that coins other than half pice and pie pieces were returned from circulation into the Government treasuries. This unusual fact was the result of the extraordinarily large issues of the previous year which had overstocked local markets. The copper coins returned were so numerous that in many treasuries it was difficult to find sufficient accommodation for their storage. This quick return of the surplus stock in the districts lately affected with famine is a satisfactory feature, as otherwise the coins might have circulated at a discount to the injury of the people. The special features of the several Provinces are noted below.

26. In *India* the net issues to the public from the Reserve Treasury at Calcutta decreased by over 5 lakhs, owing partly to large receipts of coins returned from circulation, and partly to smaller demands of the trade which was not very brisk during the last six months. In the *Central Provinces* the treasuries were generally overstocked, and consequently required fewer remittances than in the previous year. Out of the surplus copper at Nagpur a portion was found uncurrent, and this has since been ordered to the Bombay Mint for use in dollar coinage. In *Burma* the absorption increased in the Lower Provinces due to a bumper rice crop, but it was more than counterbalanced by the decrease in the Upper Provinces due to large remittances in the previous year to famine-stricken districts. In *Assam* the demand for small coin exists chiefly in connection with the payment of wages in Tea Estates, the Assam-Bengal Railway, and the Military and Public Works Departments. In *Bengal* the absorption of small coin occurs in normal years in connection with tea, jute and silk trades, and the decrease from the last year is attributed to the large issues of that year on account of Famine Relief Works. In the *North-Western Provinces*, with the return of a good season after the famine of last year, the consumption of  $\frac{1}{2}$  Rs. and  $\frac{1}{4}$  Rs. increased, while there was a falling off in  $\frac{1}{8}$  Rs. as they were issued in exceptionally large quantities in connection with Famine Relief Works. The return of single pice from circulation after the closing of Relief Works counteracted the effects of the great demand for them during the marriage season in April and May. In the *Punjab* the increase in the absorption of single pice was chiefly due to the concentration of troops on the Frontier, to larger demands of the Public Works Department, and to a large number of Hindu marriages. In *Madras* the heavy return of coins from circulation was a reaction from the excessive absorption for famine expenditure during the previous year. In *Bombay* the same cause accounts for the decrease in circulation.

**A**

*Statement showing the estimated minimum Cash Balances in the District Treasuries (excluding Head Offices of Presidency Bank and Reserve Treasuries) at the beginning of each month of the years 1890-91 to 1898-99.*

GOVERNMENT OF INDIA.  
FINANCE AND COMMERCE DEPARTMENT.

ANNUAL REPORT ON THE OPERATIONS OF THE SAVINGS BANKS IN INDIA  
DURING THE YEAR 1897-98.

No. 868A., dated Calcutta, the 23rd February 1899.

ORDER—By the Government of India, Finance and Commerce Department.

READ—

Report by the Comptroller and Auditor General, No. 1781, dated the 9th January 1899, on the operations of the Savings Banks in India during the year 1897-98 and the Statements annexed to it.

ORDERED that the Report and the Statements be published in the *Gazette of India* for general information.

H. H. RISLEY,  
*Offg. Secretary to the Government of India.*

No. 1781, dated Calcutta, the 9th January 1899.

From—The Comptroller and Auditor General,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit my Annual Report on the operations of the Savings Banks in India during the year 1897-98.

2. These Banks are of two descriptions, *viz.*, Banks open to the public and Service Institutions; the former head now includes the Post Office Banks only; and the latter, the State Railways Provident Institutions, the Civil Engineers' Provident Fund, the Forest Officers' Provident Fund, and the Military Banks. The State Railways Provident Institutions are for the non-pensionable employes of the State Railways, the Civil Engineers' Provident Fund is for the Officers of the Public Works and Telegraph Departments, the Forest Officers' Provident Fund is for the officers of the Imperial and Provincial branches of the Forest Service, and for the officers of the Geological Survey Department, and the Military Banks are for the benefit of Non-Commissioned Officers and Privates of British Regiments.

3. I enclose the usual Statements marked I to VII, containing the accounts and statistics for the year.

4. The principal features of the returns are shown in the following table, which also compares them with those of the previous year:—

DESCRIPTION OF BANKS.	BANKS.		DEPOSITORS.		INTEREST EARNED.		BALANCE.		NOMINAL VALUE OF GOVERNMENT PROMISSORY NOTES.		AVERAGE OF DEPOSITOR'S BALANCE.	
	Number.	Increase + or Decrease over previous year.	Number.	Increase + or Decrease over previous year.	Amount.	Increase + or Decrease over previous year.	Amount.	Increase + or Decrease over previous year.	Balance of Government Promissory Notes held for depositors.	Net purchased or received, + sold or returned — during the year.	Amount.	Increase + or Decrease—.

\* Excludes Rs. 6,044, on account of interest on Presidency Savings Bank deposits.

5. The statement shows that on the 31st March 1898 there were 6,484 Government Savings Banks in India, containing 755,426 accounts, which earned interest from Government to the amount of Rs 32,70,439, and held balances aggregating Rs 10,55,67,332, exclusive of Government Securities held on behalf of the depositors to the nominal value of Rs 7,42,400. As compared with the year 1896-97, there has been a decrease of 112 in the number of banks and an increase of 13,211 in the number of depositors. The balance of deposits has, however, declined by Rs 33,00,584 and the amount of interest earned by Rs 1,89,076. The causes of these decreases are probably to be found in the famine and plague which prevailed during the year. The volume of the transactions on account of Government Promissory Notes was less than in 1896-97, but the net result was an increase of Rs 1,13,600.

6. Upon the working of the Post Office Banks, the Director-General of the Post Office will submit a detailed report, and it is therefore only necessary here to make some observations in respect of the other Banks.

7. There has been a large decrease of Rs 2,27,609 in the balances in the Military Banks. The decrease occurs in all the commands. The chief cause which led to this result was the operations on the Frontier, Savings Bank transactions being suspended when corps proceed on Field Service. Military Savings Banks will shortly be closed, as their maintenance is not considered necessary now that the Postal Savings Banks afford the necessary facilities for thrift, and it may be that the prospective closing of these Banks has affected the deposits.

8. The Forest Officers' Provident Fund was created only in 1896-97, and the balance stands at Rs 1,36,991.

9. The balances of the other Service Institutions still continue to increase, and now amount to Rs 1,12,94,746, an increase over the previous year of Rs 3,54,634. The transfer of the Burma State Railway to a Private Company accounts for the decrease in the number of Banks and depositors which appears under the State Railway Provident Fund Institutions.

10. The balances of the Savings Banks proper, including the Military Banks, amount to Rs 9,41,35,595, which represents a decrease of Rs 37,47,042 as compared with the balances of 1896-97. These balances are held by Government at call.

## Statement I.

*Number of Working Banks and of the Depositors therein on the 31st March 1898.*

GOVERNMENT OF INDIA.  
HOME DEPARTMENT.

PROGRESS OF EDUCATION IN INDIA DURING THE YEAR 1897-98.

No. 102—113.

*Extract from the Proceedings of the Government of India in the Home Department (Education),—under date Calcutta, the 22nd February 1899.*

READ—

The several reports on the Progress of Education in India during the year 1897-98, with the orders passed on them by Local Governments and Administrations.

RESOLUTION.

The information regarding the state and progress of Education in India during the quinquennial period 1892-93 to 1896-97, given in the special reports submitted by Local Governments and Administrations in accordance with the instructions contained in Home Department Circular No. <sup>9-Education</sup> 271-280, dated the 18th July 1895, is being separately reviewed. The present Resolution gives a brief summary of the most striking features presented by the figures for the year 1897-98.

2. The total number of Public and Private Institutions in 1897-98 was 148,829 as compared with 152,025 in 1896-97 and 152,841 in 1895-96. The decrease was in Public Institutions, the number of which fell to 106,462 from 109,886 in 1896-97. The number of Private Institutions showed a small increase from 42,139 to 42,367. Primary (Public) Institutions which had risen to 102,036 in 1895-96 and 103,920 in 1896-97 fell to 100,507 in the year under review, the decrease occurring among both boys' and girls' schools. The number of Secondary (Public) Schools (5,333) showed an increase of 66. The number of Elementary Private Institutions rose from 36,959 in 1896-97 to 37,443 in 1897-98. Arts Colleges (124) showed an increase of 4, and the number of Professional Colleges (40) was the same as in the previous year.

3. Taking the population of school-going age at 15 per cent. of the total population according to the last census, the percentage of total scholars to total population of school-going age was 12·25 against 12·49 in 1896-97 and 12·05 in 1895-96; the percentages of male and female scholars on the total male and female population of school-going age was 21·84 and 2·33, respectively, as compared with 22·29 and 2·34 in 1896-97 and 22·02 and 2·34 in 1895-96. The total number of pupils under instruction decreased from 4,356,870 in the previous year to 4,274,275 in the year under review. Of the total number of scholars 3,874,809 were males and 399,466 were females against 3,954,712 and 402,158, respectively, in 1896-97. The number of pupils in Secondary (Public) Schools (551,141) showed an advance over the figures of the previous year (533,155), as also did the number in Private Elementary Institutions which increased from 503,106 in 1896-97 to 510,173 in 1897-98, but the number in Primary (Public) Schools decreased to 3,104,593 from 3,209,825 in 1896-97.

The decrease in the total number of pupils occurred mainly in Bombay, Bengal and the Central Provinces, and is attributed by the Local Governments to famine and plague.

4. The average monthly attendance at the different classes of Public

Public Institutions.		AVERAGE MONTHLY ATTENDANCE.

	Secondary Schools . . . . .	19,628	19,437
	Primary Schools . . . . .	402,782	406,104
	Schools for special instruction . . . . .	2,480	3,472
Total . . . . .		3,640,273	3,551,441

Institutions during the years 1896-97 and 1897-98 is shown in the comparative statement in the margin. The total shows a decrease of 88,832 on the figures of 1896-97. The number of scholars in Arts Colleges on the 31st March 1898 was 14,842 against 14,420 in 1897. In Colleges and Departments of Colleges for Professional training there were 4,468 scholars on the rolls at the end of 1897-98 as compared with 4,363 in the preceding year. The increase in the number of pupils in the secondary stage of instruction was maintained during

the year under review, the number having risen from 535,155 on the 31st March 1897 to 551,141 on the 31st March 1898; on the other hand, the number of pupils in the primary stage decreased from 3,209,825 to 3,104,583 or by 3.27 per cent. The reason for this decrease is as stated in paragraph 3 above. The number of scholars in Training Schools for Masters and Mistresses, which at the close of 1896-97 had risen to 5,667 from 5,016 in 1895-96, fell to 5,409 at the close of 1897-98. The attendance at other schools for special instruction showed a slight decline from 18,952 on the 31st March 1897 to 18,663 on the 31st March 1898.

5. The total number of pupils under instruction in all institutions on the 31st March 1898 was 4,274,275; of these 454,599 were receiving instruction in English against 438,846 in 1896-97; and 584,791 were studying a classical language as compared with 571,209 in the previous year. The number of vernacular pupils (3,907,894) showed a marked decrease of 81,638, which occurred mainly in the Primary (Public) Institutions for boys. In Private Institutions the number of pupils studying a classical language and a vernacular (294,144 and 338,573, respectively) compared favourably with the number of such pupils in 1896-97 (268,727 and 328,842, respectively); but the number studying English decreased from 5,240 to 4,396.

7. The classification of scholars according to race or creed, and the percentage of each class on the total number of scholars is shown in the following statement :—

Race or Creed.	1896-97.		1897-98.	
	Number of scholars.	Percentage on total.	Number of scholars.	Percentage on total.
Hindus . . . . .	2,935,597	67·38	2,886,279	67·53
Muhammadans . . . . .	988,632	22·18	922,566	21·50
Europeans and Eurasians . . . . .	29,176	·67	29,855	·69
Native Christians . . . . .	114,695	2·63	117,858	2·76
Others . . . . .	310,770	7·18	317,917	7·43

There was a decrease in the numbers of Hindu and Muhammadan scholars, and an increase in the case of Europeans and Eurasians, Native Christians and other classes. The greater proportionate decrease was among the Muhammadans, and the percentage of Muhammadan scholars therefore fell away whilst the percentage of Hindu scholars increased notwithstanding their numerical decline. Of the students at Colleges (19,310), 84·2 per cent. were Hindus, 6·8 per cent. Muhammadans, 3·2 per cent. Native Christians, and 2·1 per cent. Europeans and Eurasians. The Muhammadan students show a numerical increase of only 14 on the preceding year. Of those receiving a secondary education (551,141), 71·4 per cent. were Hindus, 14·0 per cent. Muhammadans, 5·5 per cent. Native Christians, and 4·5 per cent. Europeans and Eurasians. Of the 3,104,583 pupils under primary instruction at Public Institutions, 2,239,349 (72·1 per cent.) were Hindus; 607,271 (19·6 per cent.) were Muhammadans; 78,081 (2·5 per cent.) were Native Christians; 3,548 (·1 per cent.) were Europeans and Eurasians; and the remainder (176,334 or 5·7 per cent.) belonged to other classes. In the case of Hindus the numerical decrease was from 2,296,545 to 2,239,349 and in the case of Muhammadans from 647,159 to 607,271.

8. The total expenditure (direct and indirect) on public instruction, which in 1895-96 and 1896-97 amounted to Rs.50,85,032 and Rs.52,41,900, respectively, increased to Rs.55,40,262 in 1897-98. The increase was distributed over all classes of education. The direct expenditure reached Rs.2,82,16,380 as compared with Rs.2,77,38,737 in the preceding year. The indirect expenditure which embraces charges on account of direction, inspection, scholarships, building, school grants and other miscellaneous items amounted to Rs.73,23,873 against Rs.75,06,163 in 1896-97. The decrease was due to smaller expenditure on buildings.

9. The expenditure on education was met from Provincial Revenues, Local and Municipal Funds, from fees and from miscellaneous sources, such as endowments, subscriptions, etc. A comparison of the sums spent from each of these

sources during the years 1896-97 and 1897-98 and the proportion of such expenditure to the total cost of education is shown in the following statement :—

Sources from which expenditure on education is met.	1896-97.		1897-98.	
	Amount.	Percentage to total cost.	Amount.	Percentage to total cost.
	<i>R</i>		<i>R</i>	
Provincial Revenues . . . .	95,22,955	27·0	95,94,645	28·2
Local Funds . . . . .	57,45,944	16·3	56,71,204	15·9
Municipal Funds . . . . .	14,96,721	4·3	14,69,719	4·1
Fees . . . . .	1,06,10,932	30·1	1,05,82,145	29·8
Miscellaneous . . . . .	78,68,317	22·3	85,12,549	24·0
<b>TOTAL . . . . .</b>	<b>3,52,44,900</b>	<b>100·0</b>	<b>3,55,40,262</b>	<b>100·0</b>

The contributions from Provincial, Municipal and Local Funds and fees all fell off, but the decrease was more than counterbalanced by a considerable rise in the income from miscellaneous sources.

10. The statistics for the year appear to the Governor General in Council to be satisfactory, except for the check in the progress of primary education which resulted from the prevalence of famine and plague.

FINANCE AND COMMERCE DEPARTMENT  
February 21, 1899.

H. H. RISLEY,  
Offg. Secretary to the Government of India.

SUPPLEMENT TO  
**The Gazette of India.**

No. 9.]

CALCUTTA, SATURDAY, MARCH 4, 1899.

**OFFICIAL PAPERS.**

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on  
Saturday, February 18th, 1899.**

During the greater part of the week under review the ordinary cold weather conditions of pressure and circulation of the winds have obtained over India accompanied generally with fine and bright weather. These settled conditions were disturbed on three occasions during the week under review. Thus during the 24 hours ending at 8 A.M., on the 12th, numerous thundershowers were experienced over Bengal, Assam, Bihar and Chota Nagpur, then on the 14th, a slight storm was shown over Sind, and light to moderate rain was falling in Baluchistan and showers in the West Punjab. On the following day the 15th, a double disturbance was shown over North-Western India, and rain had been received in Baluchistan and the North and West Punjab and snow in Kashmir. By the morning of the 16th, the disturbed weather had passed away and fine weather prevailed till the 18th, when again a feeble disturbance appeared over the North-Western Frontier and the sky clouded over. During the greater part of the week the heat was greater than usual over a large part of the country, the excess being most marked over the North-Western Provinces, the Punjab, Sind, the Central Provinces and Berar. In South India the weather during the week was slightly cooler than usual.

**Daily Summary.**—*Sunday, February 12th.*—The barometer had fallen over the West Punjab and Baluchistan and Upper Burma, and had risen at several central stations but elsewhere the changes had been unimportant. The

pressure conditions were approximately normal except that the barometer read somewhat lower than usual over Burma. The winds blew from the usual cold weather directions except in Bengal, where they were more than ordinarily variable. The skies were thickly clouded over North-Eastern India, where a series of thunderstorms had occasioned light to heavy fairly general rain, showers were at the same time reported from one or two stations in Persia and the North-Western Himalayas. The heat had been excessive over Burma, Bengal, the Indus Valley and Bombay, and had been nearly normal elsewhere.

*Monday, February 13th.*—The barometer had fallen over most parts of India, more particularly in the North-West and a feeble low pressure area has entered upper Sind. This was the only change of importance. The depression had drawn the wind into South-East in Baluchistan, but elsewhere the usual cold weather winds were reported. The skies had cleared over North-Eastern India, the showers had again been received over parts of Burma. On the other hand, cloud has increased over North-Western India, Kashmir and Baluchistan. The air was exceedingly dry over parts of Rajputana and North Bombay. The heat was much greater than usual over the depression area in upper Sind, and slightly greater than usual over Rajputana and Bombay. On the other hand the weather was cool over Bengal and Assam.

*Tuesday, February 14th.*—Pressure had again given way over nearly the whole of India. The change had been brisk to rapid in the North-West and the depression in Sind had intensified considerably. Hence humidity and the cloudiness of the sky had increased in the North-West, and rain had fallen in Baluchistan and the West Punjab while the winds had assumed cyclonic directions. In other parts of India except the North-West, the weather was quiet and fine. The heat was greater than usual except over North-Eastern India and Burma. The temperature excess was, as is usual under these conditions, greatest within the depression area in the North-West and amounted to  $8^{\circ}$  at Mooltan and Bikaner. The previous night had been very warm throughout North-Western India.

*Wednesday, February 15th.*—Pressure had increased over Rajputana, North Bombay and the greater part of the Peninsula but had continued to decrease elsewhere. The Sind depression had drifted eastward and was shown between Agra and Jhansi, while a shallow secondary depression had been developed in the North Punjab. The north-west of India was thus under the influence of a double disturbance, so that rain had fallen in Baluchistan and the North and West Punjab, and snow in Kashmir where the air was damper and the sky cloudy. In other parts of India the weather was quiet and settled, and the winds light and variable. The heat was very excessive over the central north-west divisions of India the excess having been over  $10^{\circ}$  at Sirsa and  $9^{\circ}$  at Sambhar. In Burma and the south of the Peninsula the weather was cooler than usual.

*Thursday, February 16th.*—The barometer had fallen rapidly in Bengal and risen rapidly in North-Western India. The double disturbance over North-Western India had filled up, and a large high pressure area occupied that region while the lowest pressure were reported from Bengal. The weather had consequently cleared in upper India, and the irregular cyclonic winds had given way to the usual north-west and north-east winds of the cold weather. In Bengal south-west winds were blowing in from the Bay and the sky was cloudy over Bengal and Assam. Temperature had fallen more or less rapidly over North-Western India, and the area of excessive heat had moved eastward and was shown over the North-Western Provinces where the mean temperature was over  $6^{\circ}$  higher than usual. In the North Punjab, North Bombay and the west and south of the Peninsula and in Burma the weather was cooler than the normal.

*Friday, February 17th.*—The barometer had fallen over the Indus Valley but had risen elsewhere most so in Bengal. Pressure was high in the North-West and low over the Bay, and the winds blew from the usual cold weather directions. The sky was practically clear of cloud except in parts of North-Eastern India and of the Peninsula, and the only rainfall recorded was a few drops in parts of Assam, Burma and Malabar. The heat was less than usual over Rajputana, North Bombay, the west and south of the Peninsula and Tenasserim but

exceeded the normal elsewhere. The largest opposite variations from the normal were  $+8^{\circ}0$  at Barisal and  $-5^{\circ}2$  at Rajkot.

*Saturday, February 18th.*—The barometer had fallen almost everywhere, and a trifling depression had entered Sind from the westward. Pressure was high in Rajputana and low near Jacobabad, near Darbhanga, and near Gopalpur. The winds were feebly cyclonic in North-Western India but blew from the normal directions elsewhere. The only rainfall had been a trifling shower at Sibsagar. The weather remained cool over Rajputana, North Bombay, the west and south of the Peninsula and Tenasserim and hotter than usual elsewhere. The principal variations were  $+6^{\circ}8$  at Sialkot,  $-4^{\circ}3$  at Rajkot and  $-5^{\circ}2$  at Tavoy.

**Temperature.**—The principal feature in the temperature conditions of the week has been the progress eastward across Northern India of a well marked wave of heat. On the 12th the crest of the wave lay over Quetta ( $+6^{\circ}2$ ) and Jacobabad ( $+5^{\circ}0$ ); on the 13th over Mooltan ( $+7^{\circ}5$ ) and Jacobabad ( $+7^{\circ}4$ ); on the 14th over Mooltan ( $+8^{\circ}3$ ) and Bickaneer ( $+8^{\circ}1$ ); on the 15th over Sirsa ( $+10^{\circ}2$ ) and Sambhar ( $+9^{\circ}8$ ); on the 16th over Bareilly ( $+6^{\circ}7$ ) and Sutna ( $+6^{\circ}8$ ) and on the 17th and 18th over the Central Provinces and the North Madras Coast. The cold wave succeeding this wave of heat was neither well marked nor extensive, and hence the mean temperature of the whole country for the week has been above the normal.

The following table gives the temperature variation data for the week:—

Province.	February 1899.							Mean variation of week.
	12th	13th	14th	15th	16th	17th	18th	
Burma	+1.2	+0.3	-1.2	-2.3	-1.5	+0.1	+0.5	-0.4
Assam	+2.4	-3.1	-2.6	-0.2	+1.6	+2.9	+2.7	+0.5
Bengal	+2.4	-1.9	-0.7	+0.4	+2.6	+3.7	+2.3	+1.3
Orissa	+1.3	-0.8	-1.6	+1.4	+3.5	+5.3	+3.6	+1.8
Bihar	+3.0	-1.8	+0.3	+1.8	+2.3	+2.8	+1.5	+1.4
Chota Nagpur	+2.8	-2.8	-0.2	+0.5	+5.2	+4.5	+1.4	+1.6
North-Western Provinces and Oudh	+0.4	+0.1	+1.2	+4.6	+5.0	+2.8	+2.3	+2.3
Punjab	+2.0	+1.4	+4.6	+4.5	+0.8	+2.6	+5.1	+3.0
Sind	+4.4	+4.1	+4.9	+3.1	-1.1	-1.3	+2.7	+2.4
Rajputana	+0.6	+1.8	+4.1	+6.9	-0.5	-0.5	+0.1	+1.8
Gujarat	+2.5	+2.8	+3.9	-0.6	-3.6	-3.8	-3.0	-0.3
Central India	+0.2	-0.4	+1.6	+5.5	+3.6	+0.3	-1.5	+1.3
Central Provinces	+0.5	-1.4	+1.4	+4.6	+4.4	+3.5	+2.6	+2.2
Berar	+0.4	-0.9	+1.4	+5.4	+4.1	+2.8	+1.8	+2.1
West Coast	+0.9	-0.2	+0.5	+0.2	-1.1	-1.2	-1.6	-0.4
Bombay Deccan	+1.6	+2.0	+1.9	+1.7	+0.2	+0.3	-1.7	+0.9
Mysore	-1.0	-1.0	+0.7	-0.2	-0.5	+1.4	+2.1	+0.2
Madras Coast	-0.8	+0.1	+1.4	-0.6	-0.8	-0.4	+1.3	0
Madras Deccan	-0.1	+0.9	+1.6	+2.0	+1.7	+3.0	+2.8	+1.7
South India	-0.3	-0.8	-1.4	-2.2	-2.7	-2.0	+0.2	-1.3
Mean for whole of India	+1.2	-0.1	+1.1	+1.8	+1.2	+1.3	+1.3	+1.1

The above shows that the heat was about normal on the 13th but was above the normal on all other days. The provincial variations exhibit a deficiency of temperature in South India, an excess in Bengal, Orissa, Bihar, Chota Nagpur, the North-Western Provinces, the Punjab, Sind, Rajputana, Central India, the Central Provinces, Berar and the Madras Deccan, and about normal conditions elsewhere.

**Rainfall.**—The rainfall during the week under review has been confined wholly to the more northern districts, and has fallen principally over the Punjab on the one hand and over Bengal and Assam on the other. The former was

attributable to, and fell during the existence of, a moderate double disturbance which affected the weather in North-Western India between the 14th and 16th of February when rainfall varying in amount from a few cents to 2 inches in 24 hours was received over Baluchistan, the North and West Punjab, and Kashmir. The latter fall of rain, *i.e.*, that in Bengal and Assam was due to a feeble disturbance which was transferred eastward from the North-Western Provinces to Bengal, Assam and Upper Burma on the first day of the week, and which occasioned numerous showers in Bengal, Assam, Bihar and Chota Nagpur on the 12th, and to Assam and Upper Burma on the 13th. The very light rainfall reported from some districts of the North-Western Provinces was also probably attributable to this disturbance. The rainfall table at the close of the summary shows that during the week under review effective rain, *i.e.*, rainfall averaging one-tenth of an inch or over was received in fifteen of the rainfall divisions, *viz.*, all the Assam divisions, East Bengal, Deltaic Bengal, Central Bengal, North Bengal, the Bengal Hills, both the Bihar divisions, the Central Punjab, the Punjab Hills, the North Punjab, the West Punjab, and the Baluchistan Hills. In all the remaining divisions of India the rainfall of the week was either actually or practically *nil*. The third column of the table shows that during the week there was a trifling excess of rainfall in the case of Upper Burma, Baluchistan and the West Punjab, and a moderate excess in the case of the Assam Valley and the North Punjab, but that in all other divisions the rainfall was short of the normal.

The three concluding columns of the table show that from the 1st of January to date the rainfall has been 20% or more in excess of the normal in Central Bengal, the Bengal Hills, South and North Bihar, the east of the North-Western Provinces, the East Submontane division of the North-Western Provinces, Malabar, South Central Madras, Coorg and South Madras, but that in all the remaining divisions the seasonal rainfall has been normal or in defect. Over a considerable part of Burma and of the Peninsula no rain whatever has fallen.

The more noteworthy totals recorded during the week at individual rain-gauge stations were as follows:—

	Inches.
Assam—Goalpara . . . . .	1.61
Gaubati . . . . .	1.32
Jorhat (Sibsagar) . . . . .	1.27
Bengal—Bogra . . . . .	1.31

W. L. DALLAS,

Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 23rd February 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.

### Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 25th February.*—No rain fell during the week except slight showers in the Circars. The water-supply is generally sufficient. Some sowings are being made. The standing crops are generally in fair condition. The harvest is yielding a fair to normal outturn. Pasturage is scarce, but fodder is generally sufficient. Prices have risen slightly in parts.

**Bombay.**—*For week ending 1st March.*—The standing crops have been damaged by frost, rats or white ants in parts of Sind. American cotton has been blighted in two talukas of Dharwar. Harvesting of the late crops is progressing generally and preparations for next season are being made in eight districts. Cotton-picking continues in parts of Guzerat and Kathiawar. Fodder is sufficient and agricultural stock is healthy. Prices have risen in five and fallen in six districts.

**Bengal.**—*For week ending 27th February.*—The weather during the week was unsettled, and rain is reported to have fallen in some parts of Lower Bengal. The general agricultural prospects are favourable. The spring harvest is proceeding. Poppy is in flower, and in some places lancing and collection operations have begun. Transplanting of spring rice is still going on, and ploughing for autumn rice and jute is in progress. Cattle are generally in good condition. The fodder-supply is generally sufficient. The price of common rice shows a slight rise in some districts, but is generally stationary.

**North-Western Provinces and Oudh.**—*For week ending 1st March.*—Showers are reported from a few districts, otherwise the weather has been clear. The standing crops are in good condition. Irrigation continues where necessary. Sugarcane is being pressed. The earlier sown crops are ripening and harvesting has begun in parts. Prospects are good. Markets are well stocked and fodder is sufficient. Prices are rising in a few districts but are otherwise stationary or falling.

**Punjab.**—*For week ending 1st March.*—Slight showers fell during the week in parts of the Hissar, Delhi, Sialkot and Rawalpindi districts. Rain is badly wanted in most districts. Ploughing for the extra spring crops continues. The standing crops on irrigated areas promise well, but prospects are only average on irrigated and below average on unirrigated lands. In Delhi the unirrigated crops are failing from drought. The rapeseed, barley and gram crops are being damaged by caterpillars in parts of Ferozepore and the standing crops by rats in parts of Umballa. Cattle are generally in good condition. Fodder is scarce in Delhi, Umballa, Lahore, Shahpur and Dera Ismail Khan, but is sufficient elsewhere. Prices, especially of wheat, are rising in Hissar, Delhi, Umballa, Sialkot and Peshawar, falling in Shahpur, but are unchanged elsewhere. Wheat is selling from 15½ to 20½, gram 18½ to 25, barley 29, bulrush millet 19 to 24½, maize 25 to 34, great millet 25 and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 28th February.*—The weather is clear. The nights and mornings are still cool, but the days are growing warm. The threshing of the autumn crops has almost been completed and the pressing of sugarcane continues. The reaping of the spring crops is in full swing. The estimated outturn is 60 in Betul and Bhandara, and 90 to 105 in Mandla. In the northern half of Damoh crop prospects are gloomy. The demand for agricultural labour is improving in the Khurai tahsil of the Saugor district.

Recent showers have enabled the ploughing of fields for monsoon sowings to be commenced in Mandla. In Bilaspur a good deal of field embankment is being effected. The cheapest prices are—wheat 19½, gram 30, rice 22 and *juar* 27 seers per rupee. The dearest prices are—wheat 14, gram 16, rice 11½ and *juar* 20 seers per rupee. Wheat is selling dearer than usual in Damoh, Hoshangabad, Betul and the Nagpur country.

**Burma.**—*For week ending 25th February.*—In Lower Burma threshing has been completed except in one or two districts. In Upper Burma sowing of the dry weather crops continues, harvesting of the pea and other miscellaneous crops has begun and ploughing for early wet weather paddy is progressing in Mandalay and Shwebo. Crop prospects continue unchanged. The price of paddy has fallen slightly in Rangoon and Thayetmyo and has risen in Tharrawaddy, Prome, Thongwa, Henzada, Thaton and Amherst.

**Assam.**—*For week ending 28th February.*—Rain fell in all districts except Goalpara. Land is under preparation for summer rice sowings in the Assam Valley districts and for lowland winter rice in Sylhet. Gathering of mustard and pulses, pruning of tea and pressing of sugarcane are in progress. Prospects of the mustard crop are fair and of sugarcane and pulses generally good. Fodder is scarce in the Naga, Khasi and Jaintia Hills and water insufficient in the two latter hill districts. Prices—common rice, Silchar, Sylhet, Dhubri, Gauhati, Tezpur and Nowgong 16, Sibsagar 13 and Lakhimpur 13½ seers per rupee.

**Mysore and Coorg.**—*For week ending 1st March.*—**MYSORE:** Prospects of the crops continue favourable. Paddy has been harvested in parts of Kolar, Tumkur, Mysore and Chitaldrug. Prices have fallen in Kolar, Hassan, Kadur and Shimoga.

**COORG:** The threshing of rice and coffee-picking continue in parts. Water and fodder for cattle are sufficient. Prices of food-grains are stationary.

**Berar and Hyderabad.**—*For week ending 1st March.*—The weather is warm. Harvesting of the winter crops continues and land is under preparation in all districts except Amraoti, for the ensuing rain crops. The fodder-supply is sufficient but a scarcity of water prevails in parts of three districts. Prices are fluctuating.

**HYDERABAD:** No rain fell during the week. Harvesting of the spring crops is progressing. The standing winter rice crop is in fairly good condition. Prices are falling. Prices—wheat 9½, coarse rice 10½, and *jamari* 22½ seers per current sicca rupee.

**Central India.**—*For week ending 1st March.*—No rain fell during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. Pasturage is sufficient. Prices of food-grains are above normal in Bundelkhand and normal elsewhere. The condition of opium is good in Gwalior, Bhopal and Indore.

**Rajputana.**—*For week ending 1st March.*—Agricultural operations are progressing satisfactorily and the state of the crops is generally good. The spring crops have been damaged by blight and frost in Ajmere-Merwara, Kotah and Kerowlie. Cattle are generally in good condition. A scarcity of fodder prevails in parts of Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypore and Bikanir. Prices are rising in two States, falling in Meywar and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 167 persons emigrated during the week. The total emigration from Merwara up to date amounts to 4,213 persons. 334 persons and 53 cattle have left Marwar for Sindh. The numbers employed on relief works were—243 in Ajmere, 4,278 in Merwara, and 1,036 in Marwar. Prices—Ajmere 19, Beawar 22, and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 28th February.*—The weather is fine. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE:** *For week ending 1st March.*—No rain fell during the week. The condition of the standing crops is generally fair. Fodder is sufficient. Prices are generally stationary, wheat selling at 18 and maize 24 seers per rupee.

**Nepal.**—*For week ending 25th February.*—No rain fell during the week. The wheat crop is in good condition. The price of rice is 8½ seers per rupee.

T. W. HOLDERNESS,

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## COMMUNICATES REMARKS ON THE PROGRESS REPORT OF THE IMPERIAL FOREST SCHOOL, DEHRA DUN. FOR 1897-98.

## Circular No. 5—213-2F.

*Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Forests): dated Calcutta, the 25th February 1899.*

READ Circular No. 19F., dated the 18th October 1897, communicating remarks on the Administration Report of the Imperial Forest School, Dehra Dun, for the year 1896-97.

## Read also—

- (i) Report of the Forest School for 1897-98.
- (ii) Letter from the Inspector-General of Forests, No. 1207, dated the 3rd October 1898, submitting the above Report.

## RESOLUTION.

From the commencement of the year until the 10th January 1898 the Directorship of the School was in the hands of Mr. J. W. Oliver, who was on that date relieved by Mr. J. S. Gamble, M. A., on his return from furlough. Mr. F. Gleadow continued to hold the post of Deputy Director throughout the year, and Mr. A. F. Graddon that of 1st Instructor. Mr. B. B. Osmaston continued to fulfil the duties of 2nd Instructor until the 18th April, and his successor, Mr. A. M. F. Caccia, was appointed 2nd Instructor on the 6th May. Bahu Upendra Nath Kanjilal held the appointment of Vernacular Instructor throughout the year, except from the 2nd April to end of June, when he was on privilege leave.

The School staff was also assisted by the Director, Botanical Department, Northern India, the Assistant Agricultural Chemist to the Government of India, and the officers of the School Circle. Honoraria to the amount of ₹710 were sanctioned for officers, not members of the School staff, who assisted in the teaching during the previous year.

2. The total number of students attending the School was 65, as against 75 in the previous year and 83 in the year 1895-96. Of these, 50 were in the Upper class and 15 in the Lower; whilst of the 50 students in the Upper class, 7 were students already in the Government service, 14 were private students in receipt of a stipend, 20 were private students without stipends, and 9 were students deputed from Native States. The Government of India view with some concern the steady decrease in the total number of students attending the School course. In 1893-94 the number stood at 106, and the attendance during the year under notice has, therefore, been 41 less than in that year. From Resolution No. X passed by the Board of Control of 1898, it appears that 40 students in the Upper class and 10 in the Lower is the number that can be properly admitted in any one year, i.e., that the attendance may be 100. It is evident, therefore, that the attendance at the School has fallen below what it might with advantage be. The reason clearly is the restricted grant of stipends. Of the new students admitted to the School during the year, private students without stipends formed 49 per cent. of the total, whereas in 1891 they formed only 21 per cent. This is satisfactory, but more students than come forward at present can and ought to be taught at the School. It will be necessary to carefully watch the attendance during the next few years, and not to permit it to fall below the number required for the recruitment of the service.

3. It is noticed with much satisfaction that Native States continue to send students to the School in fair numbers, and that many former students of the School are doing good work, not only in the Government of India Forest Department but in the service of Native States.

4. All the students in the Lower class passed, but of the students in the Upper class no less than 8, or 30 per cent., failed to obtain a certificate. The Government of India, though regretting the number of failures, are glad to see that suitable strictness is observed in granting certificates only to competent men. They consider, however, that candidates who, either from lack of previous training or from idleness, are unlikely to pass the final examination, should be remanded under Rule 28(5) of the School rules.

5. It is hoped that the effect given to Resolutions Nos. VIII and X of the Board of Control for 1897, whereby a stricter examination in English and a preliminary course of practical training in the forest is involved, will result in the improved educational qualifications of the students.

6. The account given in the Director's Report of the various tours undertaken and the work done by the students has been read with interest, and shows that the teaching of practical work in the forests is duly attended to. The fact that the "Brandis Prize" has again not been awarded is noticed with regret, and the want of further specimens for the School herbarium and museum is observed. The Inspector-General of Forests has been asked to bring these matters to the notice of Local Governments and Conservators.

7. The Government of India are pleased to observe that the members of the School staff have performed their duties to the Director's satisfaction, and to record their appreciation of Mr. Oliver's and Mr. Gamble's efficient management of the School. The latter officer has now relinquished the post of Director of the School, and intends shortly to retire from the service, of which he has been a member for 27 years. He has been Director for eight years, and it is mainly due to his able management that the Forest School has reached its present high standard. The Government of India desire to record their thanks to Mr. Gamble for the excellent work he has done at the School, and for the great services he has rendered to Indian forestry by the many important scientific publications associated with his name. The *Manual of Indian Timbers* is recognised in India and in Europe as the standard work on the subject of which it treats, and as a monument of laborious research and wide and accurate botanical knowledge.

ORDER.—Ordered that the above Resolution be published in the *Supplement to the Gazette of India*, and that

SUPPLEMENT TO  
**The Gazette of India.**

No. 10.1 CALCUTTA, SATURDAY, MARCH 11, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and Information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

**RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE SIX MONTHS ENDING  
WITH THE 30th JUNE 1898.**

No. 139 R. Stat., dated Simla, the 24th February 1899.

**RESOLUTION—**By the Government of India, Public Works Department.

**Read again—**

Government of India order No. 242 R. Stat., dated the 9th July 1896.

Government of India order No. 42 R. Stat., dated the 16th January 1897.

Government of India order No. 40 R. Stat., dated the 18th January 1898.

**Read also—**

The following note by the Director of Railway Traffic, dated the 17th February 1899 with abstract returns of accidents to trains, etc., on the open lines of railway in India for the six months ending with the 30th June 1898.

**I.—Accidents to trains, rolling stock, permanent way, etc.**

Accidents to trains, rolling stock, permanent way, etc., during the six months ending with the 30th June 1898, as shown under abstract No. 4 on

pages 16 and 17 of the accompanying returns, caused the death of 22 and injury to 67 persons. The table below shows that the number of deaths was in excess and the number injured below the average of the corresponding periods of the three previous years. The increase in the number killed was mainly due to the collision on the North Western State Railway on the 25th April 1898 at Jhimpir station, in which four passengers were killed and six passengers and three servants were injured. The total number of accidents was also above the average:—

	NUMBER.			NUMBER OF PASSENGERS AND OTHERS.		NUMBER OF SERVANTS.		TOTAL, ALL CLASSES.	
	Accidents reported to Local Governments under section 85 of the Indian Railways Act (IX of 1890).	Other accidents.	Total.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
<b>Standard gauge.</b>									
Six months ending with the 30th June 1898	38	1,832	1,870	(a) 9	(b) 40	9	18	18	58
Average of the corresponding periods of the three previous years	46	1,385	1,431	(a) 11	(b) 50	4	17	15	67

Average of the corresponding periods of the three previous years	103	2,561	2,664	(d) 12	(f) 58	5	22	17	80

2. The following table compares the variations in the mean mileage worked, the train-mileage run and the number of accidents with the average, and shows that, with an increase of 7.53 per cent. in the mean mileage worked and of 9.06 per cent. in the train-mileage run during the six months ending with the 30th June 1898, the number of accidents increased by 436 or 16.37 per cent., as compared with the average of the corresponding periods of the three previous years:—

	INCREASE OR DECREASE AS COMPARED WITH THE AVERAGE OF THE THREE PREVIOUS YEARS.					
	ACCIDENTS.		MEAN MILEAGE.		TRAIN-MILEAGE.	
	Number.	Per cent.	Miles.	Per cent.	Miles.	Per cent.
Standard . . . . .	+439	+30.68	+945	+8.30	+2,510,556	+10.54
Metro . . . . .	—11	—0.92	+489	+6.11	+615,368	+5.72
Special . . . . .	+8	+20.51	+46	+17.29	+30,330	+11.98
<b>Total</b>	<b>+436</b>	<b>+16.37</b>	<b>+1,480</b>	<b>+7.53</b>	<b>+3,156,254</b>	<b>+9.06</b>

(a) Out of these, three were not passengers.

(b) Out of these, five were not passengers.

(c) Not a passenger.

(d) Out of these, four were not passengers.

(e) Out of these, six were not passengers.

(f) Out of these, eight were not passengers.

3. The following table shows the principal increases and decreases in the number of accidents of different classes on the standard and metre gauge lines, as compared with the average of the corresponding periods of the three previous years. No noticeable variations occurred on the special gauge railways:—

GAUGE AND CLASSIFICATION.	INCREASE OR DECREASE.			Percentage of increase or decrease.
	Serious.	Minor.	TOTAL.	
<i>Standard gauge.</i>				
Trains running over cattle on the line . . . . .	...	+127	+127	+19'69.
The bursting of tubes, etc., of engines . . . . .	...	+62	+62	+91'18
The failure of machinery, springs, etc., of engines . . . . .	...	+67	+67	+35'45
The failure of couplings . . . . .	...	+51	+51	+124'39
Under the head " Other accidents " . . . . .	—1	+101	+100	+113'64
<i>Metre gauge.</i>				
Goods trains or parts of goods trains, engines, etc., leaving the rails . . . . .	+2	—16	—14	—27'45
Trains running over cattle on the line . . . . .	—4	—24	—28	—4'14
The failure of machinery, springs, etc., of engines . . . . .	+3	—22	—19	—21'59
The failure of axles . . . . .	+2	+11	+13	+54'17
Under the head " Other accidents " . . . . .	+1	+15	+16	+31'37

It will be observed from the foregoing that the increases on the standard gauge lines occurred under "Trains running over cattle on the line," 127 accidents or 19.69 per cent.; under "The bursting of tubes, etc., of engines," 62 accidents or 91.18 per cent.; under "The failure of machinery, springs, etc., of engines," 67 accidents or 35.45 per cent.; under "The failure of couplings," 51 accidents or 124.39 per cent.; and under the head "Other accidents," 100 accidents or 113.64 per cent. On the metre gauge railways the noticeable increases occurred under "The failure of axles," 13 accidents or 54.17 per cent. and under the head "Other accidents," 16 accidents or 31.37 per cent.

4. Under the head "The bursting of tubes, etc., of engines," the largest number, *vis.*, 53, occurred on the Madras railway; next to that line comes the North Western State railway with 42 accidents; under the head "The failure of machinery, springs, etc., of engines," the largest number, *vis.*, 85, occurred on the North Western State railway; next to that line come the East Indian with 42, the Madras railway with 40 and the Great Indian Peninsula railway with 38 accidents; under the head "The failure of couplings," the largest number, *vis.*, 43, occurred on the Bombay, Baroda and Central India railway; and under the head "Other accidents," the largest number, *vis.*, 68, occurred on the East Indian railway, and next to that line come the North Western State and the Great Indian Peninsula railways with 55 and 29 accidents on each, respectively.

5. The number of cattle accidents was largest on the South Indian railway, *vis.*, 165; next comes the Southern Mahratta railway with 156, then the Eastern Bengal State railway (standard gauge section) with 144 accidents, the East Indian railway with 125, the Bombay, Baroda and Central India railway with 106 and the North Western State railway with 97.

In relation to the train-mileage run the highest proportion was on the Bengal-Dooars railway, which gives an average of 1 accident in 4,751 train-miles run; the Assam-Bengal railway coming next with an average of 1 in 5,172; then the Eastern Bengal (standard gauge section), the Jorhat, the Rajpipla and

the East Coast State railways with averages of 1 in 6,504, 1 in 7,470, 1 in 7,944 and 1 in 8,024, respectively. The lowest proportion was on the Great Indian Peninsula railway, *vis.*, 1 in 303,268 train-miles run, the Bombay, Baroda and Central India railway coming next with 1 in 87,722, then the North Western State railway with 1 in 58,963, the East Indian railway with 1 in 57,026, the Rajputana-Malwa railway with 1 in 42,857 and the Indian Midland railway with 1 in 39,704.

6. Taking the total number of accidents to trains, rolling stock, permanent-way, etc., on each railway as given in table No. 3, the proportion of accidents to train-mileage run was highest on the Cooch Behar railway, on which 1 accident occurred on an average in 2,451 train-miles; next comes the Assam-Bengal railway with 1 accident in 3,152 train-miles; then the Bengal-Dooars, the Rohilkund and Kumaon (including the Lucknow-Bareilly section), the Tezpur-Balipara and the Dibru-Sadiya railways with averages of 1 in 3,156, 1 in 3,407, 1 in 3,846, and 1 in 4,672, respectively. The lowest proportion was on the Oodeypore-Chitor railway, *vis.*, 1 in 23,188, the Great Indian Peninsula railway coming next with 1 in 23,016, then the East Indian railway with 1 in 21,536, the Gaekwar's Dabhoi railway with 1 in 18,006, the Jodhpore-Bickaneer railway with 1 in 16,974 and the Rajputana-Malwa railway with 1 in 16,667.

## II.—Accidents from other causes not involving accidents to trains, etc.

7. The casualties to passengers, servants in the employ of railways or of contractors, and to others, from causes not involving accidents to trains (which are detailed in abstract No. 2) are compared separately, for each gauge, with the average of the corresponding periods of the three previous years in the table below:—

Gauge.	SIX MONTHS ENDING WITH THE 30TH JUNE 1898.								AVERAGE OF THE CORRESPONDING PERIODS OF THE THREE PREVIOUS YEARS.							
	PASSENGERS.		SERVANTS.		OTHERS.		TOTAL.		PASSENGERS.		SERVANTS.		OTHERS.		TOTAL.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard	28	77	64	121	105	95	207	254	24	68	59	119	164	44	267	331
Metro	9	31	19	39	88	27	116	97	9	28	21	43	70	23	100	94
Special	...	1	1	1	2	...	2	2	...	...	...	2	1	1	1	3
TOTAL	37	109	84	161	285	83	406	353	33	96	80	164	235	68	368	428

It will be seen from the foregoing table that the number of persons killed and injured, excepting in the case of servants injured, compares unfavourably with the average of the corresponding periods of the three previous years. The increase is attributable, to some extent, to the opening of new lines.

## III.—Accidents in which the movement of vehicles used exclusively upon railways was not concerned.

8. The following table shows, for the several gauges, the number of persons reported to have been killed or injured by accidents, in which the movement of vehicles used exclusively upon railways was not concerned. Comparative

average figures of the corresponding periods of the two previous years are also given :—

	SIX MONTHS ENDING WITH THE 30TH JUNE 1898.		AVERAGE OF THE CORRESPONDING PERIODS OF THE TWO PREVIOUS YEARS.	
	Killed.	Injured.	Killed.	Injured.
Standard . . . . .	24	87	22	75
Metre . . . . .	9	20	11	27
Special . . . . .	1	3	...	1
TOTAL.	34	110	33	103

IV.—Statistical results.

9. The following table gives certain statistical results for the period under review, comparing the number of passengers killed and injured by accidents to trains, and from all causes with the number carried and the number of passenger-units carried one mile. Comparative results, based on the average figures of the corresponding periods of the three previous years, are also given :—

PARTICULARS.	SIX MONTHS ENDING WITH THE 30TH JUNE 1898.				AVERAGE OF THE CORRESPONDING PERIODS OF THE THREE PREVIOUS YEARS.

Proportion of above to number carried . . . . .	1 in 1,431,168	1 in 3,050,066	...	1 in 1,762,549	1 in 1,459,845	1 in 3,183,516	...	1 in 1,849,792
Number of passengers injured from all causes . . . .	112	31	1	144	113	33	...	146
Proportion of above to number carried . . . . .	1 in 434,452	1 in 887,245	1 in 398,876	1 in 531,683	1 in 413,497	1 in 863,232	...	1 in 319,437
Number of passengers killed and injured from all causes . .	140	40	1	187	145	42	...	187
Proportion of above to number carried . . . . .	1 in 333,286	1 in 687,615	1 in 398,876	1 in 499,449	1 in 327,173	1 in 682,182	...	1 in 495,550
Proportion of passengers killed and injured from all causes to number of passenger-units carried one mile . . . .	1 in 1,079,421	1 in 245,346	1 in 9,267,713 (a)	1 in 15,977,805	1 in 14,623,057	1 in 27,089,937	...	1 in 17,476,074

(a) Excluding the Torpor-Balipara railway.

It will be seen that, except in the case of number of accidents per 100,000 train-miles run, proportion of passengers killed from all causes to number carried and proportion of passengers killed and injured from all causes to the unit mileage of passengers, the results generally compare favourably.

*V.—Number of persons killed and injured by accidents to trains, rolling stock, etc., during the second quarter of 1898.*

10. The following table gives the number of accidents, as classified in abstract No. 4 of the returns, which resulted in loss of life or injury to persons, and shows the railways on which they occurred :—

Railway.	Number of accidents reported during the second quarter of 1893.	PASSENGERS AND OTHERS.		SERVANTS.		TOTAL.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard gauge.							
East Indian . . . . .	4	1	14	1	...	2	14
North Western State . . . . .	3	4	8	2	3	6	11
Oudh and Rohilkhand State . . . . .	2	...	3	...	...	...	3
East Coast State . . . . .	1	1	...	...	...	1	...
Great Indian Peninsula . . . . .	1	...	1	...	1	...	2
Bombay, Baroda and Central India . . . . .	1	...	1	...	...	...	1
Madras . . . . .	1	...	7	...	...	...	7
Metro gauge.							
Bengal and North-Western . . . . .	1	...	...	...	1	...	1
South Indian . . . . .	1	...	...	...	1	...	1
Assam-Bengal . . . . .	1	...	...	...	1	...	1
Burma . . . . .	1	...	...	...	1	...	1
Bhavnagar-Gondal-Jamnagar-Port- blair . . . . .	1	...	1	...	...	...	1
TOTAL . . . . .	17	6	35	3	8	9	43
Average of the three corresponding quarters of 1895, 1896 and 1897 . . . . .	19	9	30	2	10	11	40

11. A brief description of some of the accidents which resulted in loss of life, or injury to persons, is given below:

*East Indian railway.*—On the 4th May 1898, the down Punjab mail

train collided with a wagon standing foul of the points at Asansol station. Two passengers were injured and the rolling stock was damaged.

On the 17th May 1898, some wagons while being shunted on to an up Patna-Gya train at Jehanabad station, collided with the coaching stock of the train. Three passengers were slightly injured.

On the 18th June 1898, an up goods train, which had been shunted into the up siding at Jāmtāra station to enable the up Bombay mail train to pass, was signalled to come out, but the driver instead of doing so backed his train, and before he had discovered his mistake a low-sided truck next the brake-van, containing cases of heavy machinery, telescoped into the latter, and both vehicles were thrown down the bank. The guard was killed and rolling stock considerably damaged.

On the 23rd June 1898, seven vehicles of the up Bombay mail train, when passing over points on entering the station at Raneegeunge, ran off the line, and five of them were overturned. The accident was due to the breakage of the heel block caused in all probability by the flange of the leading wheel of the engine. One passenger was killed and nine were injured; and rolling stock was considerably damaged.

*North Western State railway.*—On the 25th April 1898 an up mail train was admitted on the down main line at Jhimpir station through the carelessness of the pointsman and collided with a down goods train standing there. Four passengers were killed and six passengers and three railway servants were injured, and rolling stock was considerably damaged.

On the 14th June 1898, a down goods train, while entering Gillawāla station against signals, collided with the coupled engines of an up goods train which were shunting in the yard, and the latter were hurled against a truck which was being hand-shunted. Two coolies were killed and rolling stock and permanent way were considerably damaged.

*East Coast State railway.*—On the 11th June 1898, a cart, while crossing the line through the level-crossing gate at mileage 361.4 near Sompéta station, was run into by the engine of a down mixed train. The cartman was killed and the cart smashed.

*Great Indian Peninsula railway.*—On the 25th May 1898, a down Nāgpur mail train collided with some wagons standing foul of a crossing at Wardha station. The head guard and a railway mail sorter were injured.

*Bombay, Baroda and Central India railway.*—On the 9th April 1898, a third class carriage of an up ordinary train, while entering the loop platform siding at Grant Road station, was derailed at the points. One passenger was injured.

*Madras railway.*—On the 16th April 1898, a mail train, while entering Jalarpēt station, was admitted into the second instead of the main line and collided with some standing vehicles. Seven passengers were injured.

**ORDER.**—Ordered that the above note, with the abstract returns and

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, the Punjab and Burma.

The Chief Commissioners of the Central Provinces, Assam and Coorg.

The Resident at Hyderabad.

The Resident in Mysore.

The Agents to the Governor General for Rajputana, Central India, and Baluchistan.

The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.

The Managers, North Western State, Oudh and Rohilkhand State, Eastern Bengal State and East Coast State Railways.

The Engineers-in-Chief, Marā-Attok Railway, Indus Bridge Works, Bezwada-Madras, Hardwar-Dēhra and Ghazipur-Moradabad Railways.

appendices thereto, be communicated, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered, further, that the above note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

W. J. MCELHINNY, *Captain, R.E.*,  
*Offg. Under Secretary to the Government of India.*

*Documents accompanying.*

1. Abstract return of accidents for the six months ending with the 30th June 1898.

**Enclosure to Government of India Order No. 139 R. Stat., dated the  
24th February 1899.**

**ABSTRACT No. 1.**

**GENERAL TOTAL.**

NUMBER OF PERSONS reported, during the SIX MONTHS ending with the 30th June 1898, as KILLED or INJURED ON ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS TO TRAINS, ROLLING STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	STANDARD GAUGE LINES.		METRE GAUGE LINES.		SPECIAL GAUGE LINES.		TOTAL ALL GAUGES.

1. Collisions between passenger trains or parts of passenger trains.	1	1	2	4	8	1	1	2	4	8	1	1	2	4	8	1	1	2	4	8	1	1	2	4	8															
2. Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line.	2	2	4	8	16	2	2	4	8	16	2	2	4	8	16	2	2	4	8	16	2	2	4	8	16															
3. Collisions between goods trains or parts of goods trains.	3	3	6	12	24	3	3	6	12	24	3	3	6	12	24	3	3	6	12	24	3	3	6	12	24															
4. Collisions between light engines.	4	4	8	16	32	4	4	8	16	32	4	4	8	16	32	4	4	8	16	32	4	4	8	16	32															
5. Passenger trains or parts of passenger trains leaving the rails.	5	5	10	20	40	5	5	10	20	40	5	5	10	20	40	5	5	10	20	40	5	5	10	20	40															
6. Goods trains or parts of goods trains, engines, &c., leaving the rails.	6	6	12	24	48	6	6	12	24	48	6	6	12	24	48	6	6	12	24	48	6	6	12	24	48															
7. Trains or engines travelling in the wrong direction through points.	7	7	14	28	56	7	7	14	28	56	7	7	14	28	56	7	7	14	28	56	7	7	14	28	56															
8. Trains running into stations or sidings at too high a speed.	8	8	16	32	64	8	8	16	32	64	8	8	16	32	64	8	8	16	32	64	8	8	16	32	64															
9. Trains running over cables on the line.	9	9	18	36	72	9	9	18	36	72	9	9	18	36	72	9	9	18	36	72	9	9	18	36	72															
10. Ditto over obstructions on the line.	10	10	20	40	80	10	10	20	40	80	10	10	20	40	80	10	10	20	40	80	10	10	20	40	80															
11. Trains running through gates at level-crossings.	11	11	22	44	88	11	11	22	44	88	11	11	22	44	88	11	11	22	44	88	11	11	22	44	88															
12. The bursting of boilers of engines.	12	12	24	48	96	12	12	24	48	96	12	12	24	48	96	12	12	24	48	96	12	12	24	48	96															
13. The bursting of tanks, &c., of engines.	13	13	26	52	104	13	13	26	52	104	13	13	26	52	104	13	13	26	52	104	13	13	26	52	104															
14. The failure of machinery, springs, &c., of engines.	14	14	28	56	112	14	14	28	56	112	14	14	28	56	112	14	14	28	56	112	14	14	28	56	112															
15. The failure of tyres.	15	15	30	60	120	15	15	30	60	120	15	15	30	60	120	15	15	30	60	120	15	15	30	60	120															
16. Ditto of wheels.	16	16	32	64	128	16	16	32	64	128	16	16	32	64	128	16	16	32	64	128	16	16	32	64	128															
17. Ditto of axles.	17	17	34	68	136	17	17	34	68	136	17	17	34	68	136	17	17	34	68	136	17	17	34	68	136															
18. Ditto of brake apparatus.	18	18	36	72	144	18	18	36	72	144	18	18	36	72	144	18	18	36	72	144	18	18	36	72	144															
19. Ditto of couplings.	19	19	38	76	152	19	19	38	76	152	19	19	38	76	152	19	19	38	76	152	19	19	38	76	152															
20. Ditto of tunnels, bridges, viaducts, culverts, &c.	20	20	40	80	160	20	20	40	80	160	20	20	40	80	160	20	20	40	80	160	20	20	40	80	160															
21. Broken rails.	21	21	42	84	168	21	21	42	84	168	21	21	42	84	168	21	21	42	84	168	21	21	42	84	168															
22. The flooding of portions of permanent-way.	22	22	44	88	176	22	22	44	88	176	22	22	44	88	176	22	22	44	88	176	22	22	44	88	176															
23. Slips in cuttings or embankments.	23	23	46	92	184	23	23	46	92	184	23	23	46	92	184	23	23	46	92	184	23	23	46	92	184															
24. Fire in trains.	24	24	48	96	192	24	24	48	96	192	24	24	48	96	192	24	24	48	96	192	24	24	48	96	192															
25. Fire at stations, or involving injury to bridges or viaducts.	25	25	50	100	200	25	25	50	100	200	25	25	50	100	200	25	25	50	100	200	25	25	50	100	200															
26. Other accidents.	26	26	52	104	208	26	26	52	104	208	26	26	52	104	208	26	26	52	104	208	26	26	52	104	208															
TOTAL ALL CLASSES.	6	6	12	24	48	6	6	12	24	48	6	6	12	24	48	6	6	12	24	48	6	6	12	24	48															

(a) Accidents to trains, rolling stock, passengers, &c., reported during the year 1898, with the number of accidents in each class of accident—contd.  
(b) Out of these, 120 were not passengers.  
(c) Out of these, 120 were not passengers.  
(d) Out of these, 120 were not passengers.

A. STRAETTER No. 3.—Accidents to railways. Collision stock, passenger, &c., reported during the six months ending with the 30th June 1899, as having occurred on the several railways open for traffic in India, distinguishing the different classes of accidents and the number of passengers and others and of railway employees killed or injured in each class of accident.—*continued.*

[illegible]

Accident No. 3.—Accidents to trains, rolling stock, permanent-way, etc., reported during the six months ending with the 30th June 1938, as having occurred on the several railways open for traffic in India, distinguishing the different classes of accidents and the number of passengers and others, and of railway servants killed or injured in each class of accident—contd.

[illegible]

INVESTIGATOR No. 5.—ACCIDENTS IN TRAINING, ROLLING STOCK, PERMANENT-WAY, ETC., REPORTED DURING THE SIX MONTHS TERMINATING 31.12.1931.

ANNUAL No. 3.—Accidents to trains, engine stock, permanent-way, etc., reported during the year 1908, and of RAILWAY SERVANTS KILLED OR INJURED IN EACH CLASS OF ACCIDENT—contd.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

**Weather Review of India for the week ending at 8 a.m. on Saturday, February 25th, 1899.**

Fine, quiet and unusually warm weather prevailed over a large part of the country during most of the week under review. During this period there was no rain of importance throughout the Indian area while there was a fairly steady increase of heat. On Sunday the 19th the highest maximum recorded was  $99^{\circ}2$  at Cuddapah, but on the following day for the first time this season a maximum exceeding  $100^{\circ}$  was reported, and from that occasion onward to the close of the week maxima exceeding  $100^{\circ}$  were daily reported. These quiet settled conditions were disturbed towards the close of the week by a fairly considerable storm. The first indications of this storm were afforded by the Ispahan and Teheran observations on the 21st. On the 22nd the disturbance was apparently still near Ispahan and was growing deeper, while on the 23rd it was approaching Quetta, on the 24th it had reached Eastern Rajputana and on the 25th West Bengal. The disturbance was a very rapidly moving storm having a pressure deficiency near its centre of between  $0.20''$  and  $0.25''$ , but on the other hand it affected the weather only to a small extent. Dust-storms and dust-haze have been reported in the districts passed over by the storm and light rain, and snow and hail have been received in Baluchistan, Kashmir, part of the North-Western Himalayas and at the stations of Sirsa, Delhi, Dehra Dun, Meerut, Darjeeling and Sibsagar. A considerable fall of temperature occurred over Persia, Baluchistan and the Indus Valley as the storm advanced, but this fall did not extend eastward and a cold wave was never a marked feature of the disturbance.

**Daily Summary.—Sunday, February 19th.**—Pressure had fallen briskly over North-East India, thus intensifying the low pressure over Bihar and North Bengal, while it had risen in the North-West. Pressure was highest over the West Punjab and Rajputana and lowest in Bihar, and gradients were steep over the Gangetic Plain. A fresh westerly wind prevailed down the Gangetic Plain, while variable light airs prevailed elsewhere. The mean temperature was low over Bombay, the Central Provinces and Tenasserim and was normal or excessive elsewhere. A little snow and hail had fallen at Murree and Minimarg and light rain at Sibsagar and Moulmein.

**Monday, February 20th.**—There had been no important change in the general conditions. North-westerly to westerly winds light to strong in force prevailed over North-Western and Northern India and light variable breezes elsewhere. The mean temperature was low over Bombay, Tenasserim and Assam and was more or less excessive elsewhere. There had been no rain or snow.

**Tuesday, February 21st.**—Pressure had increased almost everywhere. The increase had been greatest and large over Bihar and North Bengal, so that the low pressure area in that region had filled up and pressure had become much more uniform generally. The wind directions had not changed much, but the force of the wind down the Gangetic Plain had diminished. Temperature had fallen in West Bengal and the North-Western Provinces and was below the normal in that area. It was also below the normal along the West Coast and in Tenasserim, and elsewhere it was generally excessive. Sibsagar reported a trifling shower. The most important changes on this day were in Persia where the barometer was falling rapidly with a cloudy sky.

**Wednesday, February 22nd.**—The changes over India were unimportant and pressure remained uniform throughout the country. In Persia, however, the barometer was still falling rapidly, the storm was intensifying and about  $\frac{1}{2}''$  of rain had fallen at Teheran and Bushire. In India, beyond a barometric fall in Baluchistan, conditions were unaffected by this disturbance and the weather was quiet with light and variable winds and no rain. The heat during the previous 24 hours had been less than usual over part of Burma, Bengal, the Gangetic Plain and the west and south of the Peninsula, but elsewhere the mean temperature was excessive.

**Thursday, February 23rd.**—A very rapid recovery of pressure had occurred in Persia and a rapid fall over Baluchistan and the Indus Valley. In the latter

regions the temperature was rising, the wind increasing and becoming more southerly, and the sky clouding over, but the influence of the storm was very sharply defined, and except in the extreme north-west the weather over India remained quiet, fine and settled. The weather was cooler than usual over North-East and Central India, as well as parts of Burma and the South of the Peninsula, but elsewhere the heat was excessive more particularly at Quetta.

*Friday, February 24th.*—The storm, which was passing through Eastern Persia on the 23rd, had reached Eastern Rajputana where the barometer had fallen very rapidly and was 0·23" below the normal. The winds were cyclonic and squally over North-Western India in the storm area and the temperature was very high, but the weather was less disturbed than might have been expected and the rainfall amounts were everywhere small. Light snow and rain had fallen in Baluchistan and Kashmir and rain at Sirsa. Beyond the north-west the weather over India remained quiet and fine with lower mean temperatures than usual over North-Eastern India and Burma and higher mean temperatures over the Peninsula.

*Saturday, February 25th.*—The storm, moving very quickly, had reached West Bengal. There had consequently been a rapid barometric fall over North-Eastern India and a rapid barometric recovery over North-Western India. The winds were squally and cyclonic in the north-east, while light airs and calms were reported in the north-west. Dust-storms and dust-haze were reported from the central districts of the country. Light snow and rain had been received in Kashmir, and light hail or rain at Mussoorie, Ranikhet, Delhi, Dehra Dun, Meerut, Darjeeling and Sibsagar. The weather was much cooler than usual over the east of the Punjab and the west of the North-Western Provinces and slightly cooler over Central Bengal and Burma, but elsewhere the heat was excessive. Over the Peninsula the influence of the storm was not felt and the weather was quiet and warm.

**Temperature.**—The temperature conditions have been somewhat unsteady during the week under review over Burma, North-Eastern India, the central parts of the country and South India, but has been fairly steady in most other provinces. The most marked features in the temperature conditions were—(1) the low temperatures which appeared in the Upper Assam Valley on the 20th and subsequently spread over the whole of North-East India, and (2) the hot wave which preceded and accompanied the storm that entered North-Western India towards the close of the week.

The following table gives mean temperature variation data for the week :—

PROVINCE.	FEBRUARY 1899.							Mean variation of week.
	19th.	20th.	21st.	22nd.	23rd.	24th.	25th.

Mean for whole of India . . . . .	+1·3	+1·5	+1·1	+0·7	+0·8	+2·0	+2·0	+1·3

The general temperature of the whole country was higher than usual on each day of the week, the excess being greatest and amounting to  $2^{\circ}$  on the 24th and 25th. On the latter day every province except Burma reported an excess of temperature. The provincial variations show that the heat during the week was about normal in Burma, Assam, Bengal, Bihar, Chota Nagpur, the Central Provinces, the West Coast, and South India, and was more or less excessive in all other places, the excess being as much as  $4^{\circ}$  in Sind. The maxima or day temperatures were very steadily excessive during the week, and as mentioned above the thermometer for the first time this season recorded readings exceeding  $100^{\circ}$  on several days in Southern and Central India.

**Rainfall.**—The week under review has been one of exceedingly light rainfall. Most of the light scattered showers which have been received during the week were attributable to the rapidly moving depression which crossed Northern India between the 23rd and 25th, but there was some rain due to local causes in Assam between the 19th and 22nd. As mentioned in the general summary the rainfall accompanying the depression was exceedingly slight considering the intensity of the storm and the rainfall table at the close of the summary shows that effective rain, i. e., rain averaging over one-tenth of an inch was received only in three of the rainfall divisions, *vis.*, East Bengal, the Assam Valley, and the hills of the North-Western Provinces, though rain in small and unimportant amounts was received in addition in the Surma and Hills divisions of Assam, Central Bengal, the Bengal Hills, the submontane divisions of the North-Western Provinces, the South-East and South Punjab, the Punjab Hills, the Baluchistan Hills and the north division of the East Coast. All other parts of the country were rainless throughout the week. In the case of East Bengal the average actual rainfall was slightly heavier than usual, and in the case of the Assam Valley and of Baluchistan the rainfall was exactly normal, but in all other places even where rain had been received the amount was less than the small normal fall.

As a consequence of this light and generally deficient fall the condition of the seasonal rainfall returns has not improved and indicates a considerable seasonal deficiency over a large part of the country. In the eastern and central divisions of Bengal, Bengal Hills, the Bihar division, the east of the North-Western Provinces, Malabar, South-Central Madras, Coorg and Berar, the total rainfall from the 1st of January has been more or less excessive and in the Assam Valley, North Bengal, Chota Nagpur, the Oudh divisions, the East Submontane division of the North-Western Provinces and the south of Madras, the total fall has been about normal, but in all the remaining divisions the rainfall has been short of the normal, and over a considerable part of the country no rain whatever was received during the whole period.

Provinces.	Division.	RAINFALL DATA FOR WEEK ENDING 25TH FEBRUARY, 1899.			RAINFALL DATA FROM 1ST JANUARY TO 25TH FEBRUARY, 1899.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 1st Janu- ary to 25th Feb- ruary.	Excess or defect of (seasonal) rainfall expressed as a per- centage.

W. L. DALLAS,

Asst. Meteorological Reporter  
to the Government of India.

SIMLA, the 2nd March 1899.

T. W. HOLDERNESS,

Secretary to the Government of India.

## GOVERNMENT OF INDIA.

## DEPARTMENT OF REVENUE AND AGRICULTURE.

## Weekly Report on the state of the Season and Prospects of the Crops.

**Madras.**—*For week ending 4th March.*—No rain fell during the week except scattered local showers. The water-supply is generally sufficient. Some sowings are being carried out in parts. The standing crops are generally in fair condition. The harvest is yielding a fair to normal outturn. Pasturage is scarce, but fodder is generally sufficient. Prices have risen slightly in parts of the Southern districts.

**Bombay.**—*For week ending 8th March.*—Slight rain fell in one taluka of Khandesh. The standing crops have been injured by drought in one taluka of the Upper Sind Frontier. American cotton has been blighted in two talukas of Dharwar. The reaping of the late crops continues in seventeen and preparations for next season are being made in ten districts. Cotton picking is progressing in parts of Gujarat, Kathiawar and Belgaum. Fodder is sufficient except in parts of Sind. Agricultural stock is generally healthy. Prices have fallen in five and risen in four districts.

**Bengal.**—*For week ending 6th March.*—The rain which fell during the week over a considerable part of Bengal Proper and in Orissa has benefited spring rice, which is still being transplanted, and helped the ploughing of lands for autumn rice and jute. The spring harvest is in progress, and generally promises to yield a good outturn. The pressing of sugarcane still continues in several districts. Opium is being collected in some districts, and the yield is reported to be fair. The fodder-supply is sufficient. Prices are on the whole stationary.

**North-Western Provinces and Oudh.**—*For week ending 8th March.*—With the exception of a slight shower in one district the weather has been clear and seasonable during the week. More rain is said to be needed in a few districts. The standing crops are thriving. Irrigation where necessary and the pressing of sugarcane continue. The spring crops are fast ripening and are being harvested in parts. The extraction of opium is in progress. Except for slight damage by frost and rats in places prospects are favourable. Supplies and fodder are sufficient. Prices have risen or are falling in some districts, otherwise they are stationary.

**Punjab.**—*For week ending 8th March.*—Slight rain fell in parts of the Rawalpindi and Peshawar districts, but more is badly wanted throughout the province. Ploughings for the autumn crops continue. The condition of the irrigated crops is good to average. Some of the crops on unirrigated areas have totally failed and most of them are drying up for want of rain. Crops are being damaged by rats in parts of Umballa and by caterpillars in parts of Ferozepore. Cattle are generally in fair condition. Fodder is sufficient in all districts, except Delhi, Lahore, Shahpur and Dera Ismail Khan. Prices, especially of wheat, are rising in Jullundur and Lahore, falling in Peshawar and Dera Ismail Khan and are unchanged elsewhere. Wheat is selling from 15½ to 20½, gram 19 to 25, barley 29, bulrush millet 18 to 24½, maize 25 to 33, great millet 25 and rice 13 to 14 seers per rupee.

**Central Provinces.**—*For week ending 7th March.*—The weather is generally clear and the heat is increasing steadily. Slight showers of rain fell in parts of the Chhindwara, Bhandara, Balaghat and Bilaspur districts during the week. The threshing of the autumn crops has nearly been completed and the pressing of sugarcane continues. The reaping of the spring crops is in full swing in the

north of the Provinces and has nearly been completed in the south. The estimated outturn is 45 to 60 in Bhandara, 90 to 103 in Mandla and 90 in the Chhindwara Tahsil. In the northern half of Damoh crop prospects are gloomy. Damage estimated at a lakh of rupees has been caused by the hailstorm of the 11th February to the standing crops in 50 villages of Saugor. Employment for agricultural labour is scarce in parts of Saugor and the harvest migration has brought some beggars over the border from Lalitpur and village relief has been granted to 437 destitute and infirm paupers in the Khurai and Banda Tahsils. Prices continue very easy in Saugor, thus obviating distress. Fodder is scarce in the Bargarh Tahsil of Sambulpur. Wheat is selling dearer than usual in Damoh, Hoshangabad and the Nagpur country. The rates for gram and *juar* rate very low, and rice is singularly cheap, in Seoni, Balaghat and Chhatusgarh. The cheapest prices are—wheat 19½, gram 30, rice 22½, and *juar* 27 seers per rupee. The dearest prices are—wheat 12, gram 16, rice 11½ and *juar* 10 seers per rupee.

**Burma.**—*For week ending 4th March.*—In Lower Burma threshing has been completed. In Upper Burma most of the dry weather crops have been sown or transplanted. Harvesting of maize and gram has commenced in Minbu. The standing crops are doing well. The price of paddy has fallen nearly one-tenth in Rangoon and to a less extent in Prome, Thongwa and Bassein, but has risen slightly in Pegu, Amherst and Mandalay and very considerably in the Northern Shan States.

**Assam.**—*For week ending 7th March.*—Rain fell in all districts except Goalpara and the Garo Hills. Ploughing for early rice in the Assam Valley Districts and for low land winter rice in Sylhet continues. Gathering of mustard and pulses, hoeing of tea and pressing of sugarcane are in progress. The outturn of the mustard crop is below the average and prospects of sugarcane are generally good. Pruning of tea is finished. Land is being prepared for the jute crop in Goalpara. Fodder is scarce in Cachar, the Naga, Khasi and Jaintia Hills and in parts of Sylhet and water insufficient in the two latter hill districts. Prices—common rice, Silchar, Dhubri, Gauhati, Tezpur and Nowgong 16, Sylhet 17, Sibsagar 12 and Dibrugarh 14 seers per rupee.

**Mysore and Coorg.**—*For week ending 8th March.*—The standing crops are in good condition. Paddy has been harvested in parts of Tumkur and Chitaldrug and *ragi* (*Eleusine coracana*) in Mysore. Prices have fallen in Bangalore, Tumkur, Kadur and Shimoga and risen in Kolar and Mysore.

**COORG:** The threshing of rice and coffee-picking continue in parts. Water and fodder for cattle are sufficient. Prices of food grains are stationary.

**Berar.**—*For week ending 8th March.*—The days are growing warm but the nights continue cool. Harvesting of the winter crops is well advanced and land is under preparation in all districts except Amraoti for the ensuing rain crops. Fodder and water are insufficient in parts of three districts. The price of *jowar* has fallen in Akola and Buldana.

**HYDERABAD:** Slight rain fell during the week. Harvesting of the spring crops is progressing. The standing winter rice crop is in fairly good condition. Prices of grain continue to fall in parts. Prices—wheat 9½, coarse rice 10½ and *jowari* 22½ seers per current sicca rupee.

**Central India.**—*For week ending 8th March.*—No rain fell in Central India during the week. Agricultural operations have been completed in Bundelkhand and are in progress elsewhere. Agricultural stock is healthy and pasturage sufficient. Prices continue normal. The condition of opium is fair in Bhopal and Malwa and good in Gwalior.

**Rajputana.**—*For week ending 8th March.*—Agricultural operations are progressing satisfactorily except in Merwara. The state of the crops is

generally good but they have been damaged to some extent by frost in Ajmere-Merwara. The average estimated outturn of the spring crops in Merwara is  $6\frac{1}{2}$  annas. Cattle are generally in good condition. A scarcity of fodder prevails in Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypur and Bikanir. Prices are rising in Ajmere and 3 States, falling in 3 others, and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 90 persons emigrated during the week. The total emigration from Merwara up to date amounts to 4,243 persons. The numbers employed on relief works were—349 in Ajmere, 4,807 in Merwara and 964 in Marwar. Prices—Ajmere 18, Beawar 22 and Marwar 15 seers per rupee.

**Kashmir.**—*For week ending 7th March.*—The weather is fine. Prices continue below normal. The price of rice is 27 seers per rupee.

**JAMMU PROVINCE.**—*For week ending 8th March.*—No rain fell during the week. The condition of the standing crops is generally fair. Fodder is sufficient. Prices are generally stationary, wheat selling at 18, and maize at 24 seers per rupee.

**Nepal.**—*For week ending 4th March.*—No rain fell during the week. The weather is daily getting warmer. The price of rice is  $8\frac{1}{2}$  seers per rupee.

T. W. HOLDERNESS,

*Secretary to the Government of India.*

SUPPLEMENT TO  
**The Gazette of India.**

No. 11. CALCUTTA, SATURDAY, MARCH 18, 1899.

**OFFICIAL PAPERS.**

*A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Orders of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.*

*Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

*No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.*

## APPROPRIATION REPORT ON THE ACCOUNTS OF 1897-98.

### GENERAL REVIEW.

Throughout the report the figures are tons of rupees (Rs. 1=100), with the last two figures cut off for brevity, thus, 142,7 reads — hundred and forty-nine thousand seven hundred less of rupees.

1. The Budget Estimate of 1897-98 anticipated a deficit of 2,464,0, notwithstanding that the rate of exchange, 14'46d., taken in it, resulted in an improvement of 1,360,0 as compared with the Estimate of 1896-97. Owing to a continuation of the drought of 1896, the Estimate anticipated a loss of 1,337,8 under Land Revenue and Railway earnings, while it provided 3,641,2 for actual famine relief. The expenditure however exceeded even this large provision, owing mainly to the monsoon rains being late though ultimately very favourable. There was also a renewal of plague which necessitated expenditure on preventive measures in every Province, but especially in Bombay.

2. In addition to the calamities of famine and plague, the Government of India had to meet heavy charges in repairing the damage done to buildings and Railway works by the earthquake of the 12th June 1897, which affected the north-eastern parts of the country. The earthquake was followed by trouble on the North-West Frontier, which involved additional military expenditure of 3,848,0. The expenditure on Famine Relief exceeded the Budget provision by 1,684,4, chiefly in the Central Provinces and Madras. In the former, relief had to be continued later than had been expected, because a series of bad seasons before 1896-97 had greatly impoverished the people; while in Madras the extent of the distress was under-estimated. There were excesses too in Bombay and the North-Western Provinces, mainly due to the late arrival of the monsoon rains. Altogether the loss of Revenue and additional expenditure, due directly or indirectly to famine, amounted to some 8,920,8. To meet these unforeseen demands it was found necessary to reduce expenditure on Railway Construction; to postpone till January 1898 all other expenditure that could be postponed; to stop the sale of Council Bills for 14 weeks from September 8th to December 15th, and to obtain a remittance from the Secretary of State of one crore of rupees by means of Bank drafts. There was a large falling off under Opium Revenue, and Salt yielded a worse result owing to the postponement of actual payment to the following year on the security of Government Paper under rules in force in Madras. On the other hand, there was a considerable and unexpected improvement under Railways owing to the movement of grain into the famine districts and the conveyance of troops to take part in the Frontier Operations, while the special demand for canal water resulted in a large improvement in Irrigation Revenue. The greatest improvement was however due to the rise in the rate of exchange from 14'46d. to 15'35d., which produced a saving (including exchange compensation) of 1,648,2. The net result of the year's accounts is a deficit of 5,359,2.

3. No changes in classification of Revenue and Expenditure requiring special notice were made during the year.

4. The following summary gives the Budget and Account figures of 1897-98, which are reviewed in this report. The details will be found in the statements on pages 584 to 596:—

RECEIPTS.		REVENUE AND EXPENDITURE.		OUTGOINGS.

## Comparison with the year 1896-97.

5. The comparison in respect of revenues with the year 1895-97 is as follows:—

REVENUES.	1896-97.	1897-98.	Difference. 1897-98, greater (+) or less (—).
Principal Heads of Revenue . . . . .	62,192.4	63,154.3	+961.9
Interest . . . . .	1,082.6	872.2	—210.4
Post Office, Telegraph, and Mint . . . . .	3,011.6	3,370.6	+359.0
Civil Departments . . . . .	1,678.6	1,723.5	+44.9
Miscellaneous . . . . .	1,066.6	941.0	—125.6
Railways . . . . .	20,297.8	21,260.9	+963.1
Irrigation . . . . .	3,150.7	3,569.8	+419.1
Buildings and Roads . . . . .	696.2	667.8	—28.4
Army Services . . . . .	953.3	831.9	—121.4
TOTAL . . . . .	94,129.8	96,442.0	+2,312.2

6. The important variations under *Principal Heads of Revenue* are the following:—

Land Revenue . . . . .	+1,709.2
Opium . . . . .	—1,229.4
Salt . . . . .	+172.5
Excise . . . . .	—124.7
Provincial Rates . . . . .	+186.4
Customs . . . . .	+149.8
TOTAL . . . . .	+863.8

7. The increase under *Land Revenue* occurred chiefly in the North-Western Provinces (615.3), Madras (291.7), Bombay (276.8), Burma (249.4), Punjab (176.4), and Bengal (101.3). It was due chiefly to excellent harvests and high prices having rendered it possible to collect arrears in these Provinces. The improvement under *Provincial Rates* was due to the same cause, but in both cases the comparative increase was the greater in consequence of the low collections and large remissions of the previous year. Under *Opium* there was a reduction of 859.4 under Bengal Opium owing to a large fall in price (from Rs. 1,243 to Rs. 1,023 per chest). There was also a falling off of 367.8 in Opium Pass Fees, due partly to a diminished demand in China, and partly to a reduction in the rate of duty (Rs. 600 to Rs. 500). Under *Salt* the increase was due partly to a revival of the trade after the famine disappeared, and partly to a larger proportion of cash transactions in Madras than in the previous year. The decrease under *Excise* was almost entirely due to the famine. Under *Customs* the improvement occurred chiefly in Import duties in Madras and Bombay, mainly in the duties on oils, silver bullion and coin, and articles of food and drink.

8. Under *Interest* the decrease was mainly caused by the fact that a premium was realized on loans issued both in India and in England in 1896-97, while the loan issued in 1897-98 was at a discount. There was an increase of 95,7 in *Post Office Revenue*, and of 237,8 in *Telegraph Receipts*, the latter being due to the large increase in message traffic owing to the Military Operations on the North-West Frontier, the famine, plague, and the earthquake of June 1897. There was an increase in *Mint Receipts*, due chiefly to a large dollar coinage for the Straits Settlements and a re-coinage of Kashmir and Bhopali rupees. Under *Civil Departments* the improvement occurred chiefly under Marine, and was due to larger recoveries on account of hire of vessels employed in conveying troops to the south coast of Africa, Mombassa, and Suez, and to and from the Cape and Mauritius. The decrease under *Miscellaneous* occurred chiefly under Gain by Exchange (100,2).

9. Under *Railway Revenue* the improvement was mainly due to the running of extra *Wagon* and mule trains and to the movement of food grains into the famine districts. The chief contributors to the improvement were the North-Western Railway (594,9), the Eastern Bengal Railway (477,8), and the East Indian Railway (433,6). Under *Irrigation* the improvement occurred mainly in the Direct Receipts from canals in the North-Western Provinces and Oudh (145,5), and the Punjab (120,4), owing to the drought, but partly also to the development of irrigation from the Chenab Canal. An improvement of 92,9 occurred under Indirect Receipts under the Godavari and Kistna Delta systems.

10. A comparison of the expenditure side is given below. The average rate of Exchange for the Secretary of State's drawings in 1897-98 was 15'3539d. against 14'4505d. in 1896-97. The decrease under the different heads in the exchange on the English expenditure is shown separately:—

	1896-97.	1897-98.	DIFFERENCE, 1897-98, GREATER + OR LESS —		
			In the Exchange, on English expenditure.	Due to other causes.	TOTAL
Direct Demands on the					
Revenues . . . .	10,909,7	10,816,8	— 9,0	— 83,9	— 92,9
Interest . . . . .	3,453,9	3,472,3	— 117,2	+ 135,6	+ 18,4
Post Office, Telegraph, and					
Mint . . . . .	2,711,7	2,869,5	+ 13,1	+ 144,7	+ 157,8
Civil Departments . .	15,445,2	15,739,6	— 49,5	+ 343,9	+ 294,4
Miscellaneous . . . .	5,856,7	5,716,8	— 208,6	+ 68,7	— 139,9
Famine . . . . .	2,126,4	5,363,1	— 4,5	+ 3,241,2	+ 3,236,7
Construction of Railways .	12,8	3,8	...	— 9,0	— 9,0
Railways . . . . .	22,957,8	22,693,5	— 536,9	+ 272,6	— 264,3
Irrigation . . . . .	3,251,0	3,144,1	— 4	— 106,5	— 106,9
Buildings and Roads . .	5,783,3	5,418,9	+ 8,0	— 372,4	— 364,4
Army Services . . . .	24,253,3	26,996,8	— 392,9	+ 3,134,4	+ 2,741,5
Special Defence Works .	94,6	23,7	— 19,0	— 51,9	— 70,9
<b>TOTAL</b> . . . . .	<b>96,858,4</b>	<b>102,258,9</b>	<b>— 1,316,9</b>	<b>+ 6,717,4</b>	<b>+ 5,400,5</b>

11. To the decrease in the charges for Exchange, as shown above, should be added the saving (156,5) under Exchange Compensation.

12. Under *Direct Demands* there was a decrease of 97,6 under Opium expenditure due to the smaller crop; of 49,6 under Salt due to smaller expenditure on purchase of salt and on freight in Madras; and of 43,2 under Refunds and Drawbacks, the saving being largest in Madras and Bombay. On the other hand, there was an increase of 78,0 under Land Revenue, mainly through indirect famine charges, and of 27,6 under Excise, due to a change in the distribution of the establishment charges between Salt and Excise in Madras. Under *Interest* the excess was due to the payment of discount on the loans raised both in England (117,8) and India (50,6), and to no interest having been paid in the previous year to the Uncovenanted Service Family Pension Fund; this was partly counterbalanced by a saving arising from the transfer to Railway and Irrigation Accounts of a larger portion of interest charges in India in consequence of the increase in the *capital* expenditure. The increase under *Post Office and Telegraph* was the result of normal development, while that under *Mint* was mainly due to the large re-coining of Kashmir and Bhopali rupees. Under *Civil Departments* there was an excess of 278,7 under Medical, caused chiefly by plague operations. The excesses under Police (77,3), Law and Justice—Jails (38,6), and Law and Justice—Courts of Law (38,2), were chiefly due to the high prices of food-grains and the consequent payment of grain compensation. Part of the increase under Police was however due to plague measures, and under Jails to an increase in Jail population. Against these increases there was a saving of 69,5 under Political owing to the subsidy of the Amir of Afghanistan not having been fully drawn, and to the payment in the previous year of arrears of his subsidy. There was also a saving under Marine mainly in Exchange Compensation and because of a special payment in 1896-97 to the Madras Harbour Trust Board, in satisfaction of its claim against the Madras Port Fund. Under *Miscellaneous* the increase occurred chiefly under Superannuation Allowances and Pensions both in India (42,7) and England (27,2).

13. Under *Famine* the expenditure was almost entirely for famine relief (5,325,8). There was besides a small charge (37,5) for construction of Protective Irrigation Works. The largest excesses occurred in the Central Provinces (1,042,5), Madras (849,0), Bengal (642,3) and Bombay (619,3). Under *Railways* there was an increase of 381,6 in the working expenses of State Railways due to heavier traffic, and of 259,2 in the charges for Interest in India and England, but against these there was a saving of 349,2 owing to smaller surplus profits earned by Guaranteed Railways. Under *Irrigation* the decrease was due to restriction of Minor Works and Navigation owing to famine. But this was partly counterbalanced by larger expenditure on Major Works (51,7), due to increased charges for Interest (30,8) and increased cost of maintenance (20,9). Under *Buildings and Roads* the saving was caused by the restriction of expenditure in consequence of famine, and this saving would have been larger but for the charges due to the earthquake in Assam and Bengal. The increase under *Army Services* was entirely due to the expenditure on the North-West Frontier, which involved a charge of 3,848,0. On the other hand there was a decrease of 746,7, of which 337,6 is accounted for by the mobilisation charges of the previous year and the balance by a more favourable rate for paying British Troops and Exchange compensation. The head *Special Defence Works* was kept open for the record of expenditure in connection with armaments only, the accounts of which were closed in India on the 31st March 1897; and only English transactions appear in the accounts of 1897-98.

### Comparison of Accounts with Budget Estimates of 1897-98.

14. The following figures exhibit the differences in the net accounts between the Budget and the Actuals, those due to the rise in the rate of Exchange being shown in a separate column. A comparison of the gross figures has been given before in paragraph 4:—

	Due to rise in exchange.	Better + Worse — Due to other causes.	Net.
Principal Heads of Revenue . . . . .	+ 4,2	— 211,9	— 207,7
Interest . . . . .	+ 276,9	— 168,3	+ 108,6
Post Office, Telegraph, and Mint . . . . .	+ 28,1	+ 381,4	+ 409,5
Civil Departments . . . . .	+ 52,5	— 290,0	— 237,5
Miscellaneous . . . . .	+ 202,4	— 88,3	+ 114,1
Famine . . . . .	+ 2	— 1,697,1	— 1,696,9
Construction of Railways . . . . .	...	+ 3,5	+ 3,5
Railways . . . . .	+ 565,7	+ 818,5	+ 1,384,2
Irrigation . . . . .	+ 1	+ 414,8	+ 414,9
Buildings and Roads . . . . .	+ 11,8	+ 337,6	+ 349,4
Army Services . . . . .	+ 406,6	— 3,207,3	— 2,800,7
Special Defence Works . . . . .	+ 1,7	— 6,0	— 4,3

#### COMBINED DEFICIT, IMPERIAL AND

PROVINCIAL . . . . .	+ 1,550,2	— 3,713,1	— 2,162,9
----------------------	-----------	-----------	-----------

15. The improvements, due to a rise in the rate of Exchange, require no special explanation: it is necessary to explain only the differences arising from other causes. The worse result shown above may be ascribed to famine expenditure, and to the Military Operations on the North-West Frontier.

16. The total loss due to famine has again this year been brought together as was done last year. The following table is based on local estimates, and may be accepted as giving approximately the loss of revenue assignable to this cause:—

*Estimated net Loss of Revenue due to Famine 1897-98. (In thousands of Rupees.)*

	India.	Central Provinces.	Burma.	Bengal.	North- Western Provinces and Oudh.	Punjab.	Madras.	Bombay.	Total.
<b>Loss of Revenue.</b>

17. The expenditure was chiefly upon actual relief of famine, but there were also increased charges under other heads which arose directly or indirectly out of the distress. The following table brings together the expenditure thus arising from famine, and shows that the total loss on this account may be taken as 6,552.4.

*Statement of Excess Expenditure due to Famine (In Thousands of Rupees).*

	India.	Central Provinces	Burma.	Bengal.	N.-W. P. and Oudh.	Punjab	Madras.	Bombay.	Total.
Famine Relief, including Public Works Charges . . . . .	7.5	1,345.8	62.8	886.5	1,076.7	99.3	905.3	945.0	5,322.9
Charges due to famine—									
Army . . . . .	404.1	...	...	...	...	...	116.7	160.6	681.4
Public Works Department Buildings and Roads . . . . .	4	5.9	1.0	3	3	1.3	6	12.6	22.4

Other heads . . . . .	13.8	12.8	4	22.0	10.5	3.5	6.8	41.0	110.8
<b>TOTAL . . . . .</b>	<b>466.2</b>	<b>1,421.3</b>	<b>65.9</b>	<b>1,002.5</b>	<b>1,175.5</b>	<b>133.4</b>	<b>1,049.7</b>	<b>1,237.9</b>	<b>6,552.4.</b>

The total loss of revenue and increase of expenditure due to famine may therefore be put down at about 8,930.8.

18. The chief variations between the Budget figures and the Accounts apart from exchange are explained below. The causes are in most cases the same as those already given to account for the differences between the accounts of 1896-97 and 1897-98. Under *Principal Heads of Revenue* the largest falling off occurred under Opium (370.8), the revenue of which showed a decrease of 636.4 due to the expected price for Bengal Opium not having been realized, and to a diminished demand for Indian Opium in China; while the expenditure gave a saving of 255.6, as the crop was a short one. The next largest decrease occurred under Excise, where the revenue showed a fall of 189.6 owing to the impoverished condition of the agricultural classes, and the expenditure an increase of 29.1 due to the change in Madras referred to in paragraph 12. Under Salt there was a decrease of 139.8 in the revenue due to an increase in credit transactions in Madras on the Security of Government Paper, counterbalanced by a saving of 96.4 in expenditure owing to an over-estimate. On the other hand, there were improvements in the revenue under Provincial Rates (101.6) and Customs (149.4) due to the causes mentioned in paragraph 7. There were smaller improvements under the Revenue heads of Assessed Taxes (45.2), Registration (45.6), attributed to the increased sales and mortgages of land in consequence of the famine; and under Land Revenue (37.5), due to arrear collections as stated in paragraph 7. Under *Interest* the cause of the excess is that stated in paragraph 12, to which may be added larger payments of interest in England on India Bills (63.1). On the other hand, there were reduced transfers to Railway Revenue Account (20.5), and smaller payment of interest on debt in India (109.1), besides less interest on Savings Bank Deposits (23.8). The excess under *Civil Departments* was due mainly to charges connected with the plague and famine, the largest of which occurred under Medical (278.6). There were excesses under Law and Justice—Jails (79.5), and Police (49.6), arising from the circumstances explained in paragraph 12. There were on the other hand savings under Education (45.1) spread over all the Provinces, and due chiefly to grants for special purposes not having been utilized. Political (49.8) also showed a saving owing to the subsidy of the Amir of Afghanistan not having been fully drawn. Under Marine the receipts showed an improvement of 60.4 for the reasons explained in paragraph 8. Under *Miscellaneous* the excess occurred chiefly under Superannuation both in India (22.5) and England (17.5) and under Stationery and Printing.

19. Under *Railway Revenue Account* the improvement was the net result of an increase in revenue of 578.5 and a decrease in expenditure of 240.0. The increase in revenue was due to the causes explained in paragraph 9. The increase was largest on the East Indian Railway (584.0), where it was partly due to pilgrim traffic. The other important increases were on the North-Western (482.8), Indian Midland (83.6), Madras Railway (49.7), and on the Burma Railway (109.3), the last being due to the Estimate having been kept low, as it was not considered likely that the high earnings of the previous year would be maintained. These improvements were partly counterbalanced by a falling off on some lines, the principal of which were on the Rajputana-Malwa Railway (275.5), Bombay, Baroda and Central India Railway (198.2), and the Great Indian Peninsula Railway (176.9). Under expenditure the decrease occurred under Surplus Profits of Guaranteed Railways (176.8), Land for Subsidised Companies (122.4), Interest (50.8), and under Miscellaneous Railway Expenditure (43.8), partly counterbalanced by an increase under Working Expenses of State Railways. The decrease under Surplus Profits was due mainly to the Bombay, Baroda and Central India Railway having earned no surplus during the second half of 1897 (56.9), and to the provision for land for the Calicut-Cannanore Branch of the Madras Railway having been only partially utilized (98.8). The excess under Working Expenses of State Railways occurred principally on the East Indian Railway (153.2), the Burma Railway (72.3), and the Eastern Bengal Railway (58.4). Under *Irrigation* there was an improvement in the revenue of 447.3, due to the causes stated in paragraph 9. There was an excess in the expenditure of 32.4, owing chiefly to the increase in the cost of maintenance necessitated by increased irrigation. Under *Buildings and Roads* the improvement was mainly due to restriction of expenditure in consequence of famine, and would have been larger by about 94.0 but for expenditure in Assam due to earthquake damages. Under *Army Services* the large excess was due to the Military Operations, which involved an outlay of 3,848.0. Apart from this expenditure there was a saving of 563.5, of which 109.2 occurred in England, chiefly under Indian Troop Service, due to the engagement of fewer transports, and 133.1 under Special Services, for which the Budget provided 321.6. The saving was largest in the charges on account of Occupation of Chitral and its Communications (117.6), owing to the charges for a part of the year having been shown under Military Operations on the North-West Frontier. There was a saving of 321.2 in the ordinary charges, due chiefly to smaller payments of Exchange Compensation (61.8), short strength of the army, chiefly in the British army, which was short by two battalions for a part of the year (106.9), the saving in pay, stores, and clothing due to despatch of troops to Mombassa at the cost of the Home Government (10.4), deputations to the Civil Department for plague duty (17.1), smaller purchase of remounts and to the purchase of Australian horses at more favourable rates, and saving in feed of cattle and remounts (86.9), smaller consumption of malt liquor owing to the absence of British regiments on field service (56.8), fewer movements of troops and stores in consequence of the absence of troops on field service (53.3), larger recoveries for supplies to other departments (20.2), saving in cost of clothing (13.0), less horse allowance to Artillery and Cavalry officers (11.8), and favourable rates for food supplies in the Madras Command (42.9). These savings were partly counterbalanced by increased charges elsewhere than in Madras for food supplies owing to famine and field operations on the North-West Frontier (48.8), special money grants to troops on the occasion of the Diamond Jubilee (11.7), and by 180.9 for compensation to Native troops for dearness of provisions and forage.

20. The Budget estimated for an expenditure of 3,654.0 in excess of the revenue on the whole account, but 1,190.0 of this was payable out of accumulations of Provincial and Local Balances, so that there was a net deficit on Imperial Account of 2,464.0. The accounts closed with a deficit on Imperial account of 5,359.2 and on Provincial and Local account of 457.7. The net Imperial expenditure has therefore been worse than the Budget by  $5,359.2 - 2,464.0 = 2,895.2$ , and the net Provincial and Local expenditure better by  $1,190.0 - 457.7 = 732.3$ .

21. The details of these fluctuations are given below, the sign + meaning better, and — worse, than the estimate:—

	REVENUE SIDE.			EXPENDITURE SIDE.		
	Imperial.	Provincial.	TOTAL.	Imperial.	Provincial.	TOTAL.
Principal Heads of Revenue	— 1,149.2	+ 528.9	— 620.3	+ 376.9	+ 35.7	+ 412.6
Interest	+ 24.6	+ 6.3	+ 30.9	+ 82.8	— 5.1	+ 77.7
Post Office, Telegraph, and Mint	+ 386.7	+ 1.1	+ 387.8	+ 26.3	— 4.6	+ 21.7
Civil Departments	+ 33.5	+ 8	+ 34.3	+ 69.6	— 341.4	— 271.8
Miscellaneous	— 73.1	— 9.0	— 82.1	+ 204.8	— 8.6	+ 196.2
Famine	...	...	...	— 1,747.9	+ 31.0	— 1,696.9
Construction of Railways	...	...	...	...	+ 3.5	+ 3.5

### Appropriation Audit.

24. The Budget grants have been exceeded under several heads. The excesses, distinguishing those requiring sanction from those for which extra grants have already been made, have been noticed under each head of expenditure, and the detailed reasons for the excess have been also there stated. The following table brings together the excesses under each head still requiring sanction. The Bengal Government passed an order appropriating, to meet part of the excess in the Provincial column, the savings available under other heads; but as it made no specific appropriation to meet each particular excess, it is necessary to show the total excess as uncovered by grant.

*Excess expenditure over Budget Estimate awaiting sanction of the Imperial Government.*

[illegible]

## Section A.—PRINCIPAL HEADS OF REVENUE.

1896-97. Accounts.		Budget.	1897-98, Revised.	Accounts.
62,192.4	REVENUE	63,774.6	63,425.6	63,154.3

25. The revenue in this section fell short of the Budget Estimate by 640.3, but exceeded the actuals of the previous year by 951.9. Of the decrease as compared with the Budget Estimate, 636.4 occurred under Opium, due to a fall in price and to a diminished demand for Indian opium in China; 139.8 under Salt, due chiefly to a fall in the cash and rise in the credit transactions in Madras, owing to the low price of Government paper, but partly also to smaller sales of Government salt in Madras, and a decline in duty on imported salt in Bengal; and 189.6 under Excise, due chiefly to the distressed condition of the agricultural classes; there were smaller decreases under Forest and Tributes. These decreases were counterbalanced to the extent of 379.8 by improvements under the other heads, the most important being those of 101.6 under Provincial rates, due chiefly to collection of arrears; of 149.4 under Customs, due to larger imports of oils, bullion and coins and articles of food and drink, and larger exports of rice in Madras and Bombay; Assessed Taxes and Registration contributed 45.2 and 45.6, respectively to the increase, due, under the latter, chiefly to an increase in the number of sales and mortgages of land as an effect of the famine. There was an improvement of 37.5 under Land Revenue, due to better collections consequent on the improved conditions of the latter part of the year.

26. Of the improvement as compared with the actuals of the previous year, 1,709.2 occurred under Land Revenue, due partly to the realizations of arrears, and partly to the low collections and large remissions of the previous year, 172.5 under Salt, due partly to a revival of the trade from the effects of the famine, and partly to larger cash transactions in Madras, 186.4 under Provincial Rates, 149.8 under Customs and 28.2 under Registration owing to the reasons given above, 59.3 under Stamps, due indirectly to the scarcity. These improvements were partly counterbalanced by decreases of 1,229.4 under Opium, and 124.7 under Excise, due to the reasons stated above, and of 17.7 under Tributes.

27. The actuals exceeded the Budget Estimate and the actuals of the previous year by 37.5 and 1,709.2 respectively. The improvement as compared with the Budget was small in the aggregate; there were improvements in some Provinces and falling off in others. The principal improvements were in Burma, (223.4) due to growth in the assessed area and prompt realizations of *Ordinary Land Revenue*, chiefly owing to good harvests, and larger collections of Capitation and Thathameda taxes, in the Central Provinces (67.7) and Punjab (143.4) were due chiefly to better collections of *Ordinary Land Revenue* consequent on the improved condition in the latter part of the year owing to the termination of the amine, and in Bengal (53.2) due chiefly to larger recoveries on account of survey and settlement operations in Behar. The falling off was in the North-Western Provinces (207.8), in Madras (161.9) and Bombay (57.6); in the case of the first the Budget anticipated a large deficiency in the collections owing to a continuance of famine, but the results proved even worse than the Estimate, which, it appears, did not make sufficient allowance for the balance of revenue falling due within, but not collected till after the close of the financial year; in Madras the collections were smaller owing to the unfavourable season, which necessitated the grant of remissions, and to larger remissions in 1896-97 than were anticipated in the Budget, which thus reduced the arrears expected to be collected during 1897-98. In Bombay the Budget did not allow sufficiently for the effects of the famine, owing to which the *Ordinary Land Revenue* collections fell short: other causes for the falling off in Bombay arose from the fall in price of cotton, which delayed the sale of cultivators' produce and led to outstandings to the extent of 21.4 at the end of the year: the prevalence of famine and plague led to further postponements of the revenue due in 1896-97 and to the postponement of the introduction of revised survey rates. Assam contributed 18.5 of the decrease, 16.4 of which occurred under *Ordinary Land Revenue*, due to the epidemic of Kala-Azar in the Nowgong district, and to the effects of the earthquake of June 1897 and the subsequent floods. The improvement over the previous year was due partly to the low collections and large remission of that year and partly to the realization of arrears.

28. Under *Sale of Proprietary Right, etc.*, the increases were the result of under-estimating in the North-Western Provinces, chiefly in respect of capitalized value of abatement of land revenue on lands made over to Railway Companies. Under *Capitation Tax, etc.*, in Burma the increase was due to improvement in both Capitation and Thathameda revenue, the former being due to growth in population to immigration to the delta districts from parts of Upper Burma, and to greater care in the assessment of the tax, and the latter to more households being assessed, to levy of higher rates in certain districts, and to Railway employees, hitherto exempt, being assessed. The distress in 1896-97 in Upper Burma leading to an emigration to Lower Burma, and to exemption from assessment on account of poverty, chiefly accounts for the difference between that year and the year under report.

29. The principal difference under *Miscellaneous* occurred in Bengal and has been explained above. The increase in Burma (3.6) was due to improvement in Petroleum revenue, and in jade and other revenues owing mainly to the sale of a quantity of confiscated jade, counterbalanced by decrease in the number of licenses for inland fishing, in consequence of exemption of small casting nets, and of better wages being obtainable by field labourers, and by a decrease in rents from Sea fisheries owing to the collapse of the Bassin pearl oyster beds, and the closing of two turtle-banks in Tavoy.

## Section A.—PRINCIPAL HEADS OF REVENUE—continued.

## I.—Land Revenue—continued.

The decrease in the Central Provinces was due to the scarcity, that in Assam to the earthquake and floods, and in the North-Western Provinces it was due chiefly to low Revenue Record Room and quarry receipts.

30. The following tables A and B give the usual particulars regarding the distribution of the Land Revenue between Imperial and Provincial:—

## A.—Transactions affecting the Distribution of Land Revenue in 1897-98.

PROVINCES.	CREDITS + DEBITS—TO PROVINCIAL.				
	Transfers under contract.	Subsequent Recurring Transfers.	Special Transfers.	Miscellaneous Adjustments.	Total Adjustments.
Central Provinces	+160.3	...	+81.0	...	+241.3

Bombay	+836.0	+2.0	+121.8	...	+959.8

## B.—Distribution of Land Revenue in 1897-98.

PROVINCES.	Total Revenue to be divided proportionally.	Proportion assigned to Provincial Governments.	Provincial share.	Special adjustments made above.	Revised share.	LAND REVENUE NOT INCLUDED IN THE DIVISION.			FINAL DISTRIBUTION OF LAND REVENUE.			
						Impl.	Prov.	Local.	Impl.	Prov.	Local.	TOTAL.
Central Provinces	667.7	One-half	333.9	+241.3	575.2	...	...	—	92.5	575.2	...	667.7
Burma	2,645.4	Two-thirds	1,763.6	+390.5	2,154.1	...	...	8	491.4	2,154.1	8	2,646.3
Assam	596.1	Two-thirds	397.4	+95.4	492.8	...	...	...	103.3	492.8	...	596.1
Bengal	3,855.6	One-fourth	963.9	—76.7	887.2	68.2	544	...	3,036.6	941.6	...	3,978.2
N.-W. Provinces and Oudh	5,669.3	One-fourth	1,417.3	—153.8	1,263.5	...	54.8	3.2	4,400.3	1,316.0	3.2	5,719.7
Punjab	2,506.6	Two-fifths	1,002.6	+36.6	1,039.2	...	...	4.3	1,467.4	1,039.2	4.3	2,510.9
Madras	5,384.1	Fixed amt.	1,300.2	—6.3	1,293.9	...	...	228.7	3,881.3	1,502.9	228.7	5,612.9
Bombay	3,772.2	One-fourth	943.0	+959.8	1,902.8	...	978.3	17.4	1,869.4	2,881.1	17.4	4,767.9

31. From the details of recurring and special transfers which are given in the Appendix to this Report on page 165, it will be seen that the Government of India has, in consequence of the loss to Provincial expenditure owing to agricultural distress, been compelled to make grants-in-aid of Provincial balances to the Central Provinces (81.0), and to the North-Western Provinces (102.7). To Bombay a grant (121.8) was made in aid of Plague expenditure, and to Assam (80.0) for Earthquake expenditure.

## II.—Opium.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
4850.4	Sale of Bengal Opium	4,192.5	3,992.0	3,991.0
1,334.8	Bombay Opium Pass Fees	1,400.0	1,026.0	967.0
	Excise Opium—			
21.5	Central Provinces	16.2	20.0	20.3
22.5	Burma	24.6	25.5	23.4
45.2	Assam	46.9	45.9	45.3
71.6	Bengal	72.0	70.0	70.9
48.6	North-Western Provinces and Oudh	49.0	47.5	47.3
7.7	Punjab	8.7	6.8	6.7
218.1		217.4	215.7	213.9
5.9	Miscellaneous	6.3	8.6	7.9
5,409.3	TOTAL	5,816.2	5,245.3	5,279.8

32. Under Sale of Bengal Opium the estimated number of chests (39,000) was sold, and the fall of 201.5 in the actuals was due to the average price realized being only Rs. 1,023 against an estimate of Rs. 1,075 per chest.

## Section A.—PRINCIPAL HEADS OF REVENUE—continued.

## II.—Opium—continued.

33. Under *Bombay Opium Pass Fees* the falling off (133,0) was due to a diminished demand for Indian opium in China, owing partly to the increased production in China itself, and partly to the unfavourable rate of Exchange, and to the lowering of the rate of the duty in October 1897 from Rs600 to Rs500.

34. Under *Excise Opium* the Budget anticipated a large decrease in sales owing to the famine; the falling off in Assam was due to the effects of the earthquake and subsequent floods, and partly to the unpopularity of the Malwa opium; in Bengal and the North-Western Provinces it was due to the general scarcity, and in the Punjab it is attributed to the competition of the Malwa drug, which was selling at a lower rate.

35. The following table gives the usual statistics for the last ten years of the produce and sales in Bengal, and the exports from Bombay :

Year.	BENGAL.					BOMBAY.		
	Produce of season.			Chests sold.	Average price per Chest.	Total price.	Chests.	Rate.
	For export.	For Excise.	Total.					
	Chests.	Chests.	Chests.		R			R
1887-88 . . .	57,500	4,034	61,534	57,000	1,059	6,038,0	34,884½	650

## Section A.—PRINCIPAL HEADS OF REVENUE—continued.

## III.—Salt—continued.

36. The actuals for the past nine years, during which no change in the rates of duty has occurred, have been as follows :—

	India.	Burma.	Bengal.	Madras.	Bombay.	TOTAL.
1889-90	1,959.2	132.0	2,270.7	1,756.8	2,069.0	8,187.7
1890-91	1,930.5	158.8	2,319.5	1,951.8	2,162.8	8,523.4
1891-92	1,971.2	161.0	2,404.5	1,772.9	2,326.6	8,636.2
1892-93	2,118.1	162.2	2,410.1	1,721.2	2,244.5	8,656.1
1893-94	1,838.7	167.6	2,374.1	1,629.8	2,218.7	8,228.9
1894-95	1,894.3	119.0	2,458.2	1,795.4	2,398.8	8,665.7
1895-96	1,905.3	156.0	2,488.6	1,997.5	2,314.4	8,861.8
1896-97	1,848.7	140.9	2,500.1	1,694.2	2,237.8	8,421.7
1897-98	1,947.8	156.7	2,463.3	1,717.0	2,299.4	8,594.2

37. The receipts show an improvement of 172.5 as compared with the actuals of the previous year, and a falling off as compared with the Budget Estimate of 139.8, of which 113.2 occurred in Madras, mainly under *Excise on Local Manufacture* (79.8), due chiefly to a fall in the cash and rise in the credit sales, owing mainly to the fall in the price of Government paper; the fall however was not so great as in the previous year; and under *Sales of Government Salt* (28.2) due to poor sales at the Madras Depot. Bengal contributed 41.1 of the decrease under *Duty on Imported Salt* owing to a large quantity of non-duty paid salt having been removed under bond during the year. The continued expansion of revenue under this head noticed in last year's report seems to have received a check.

38. In India the falling off under *Sales of Government Salt* occurred chiefly in Sambhar. The improvement under the second head would have been better by 19.5, but for a decrease in Kohat owing to the stoppage of traffic in consequence of hostilities on the frontier. In Burma the increase under *Duty on Imported Salt* was due to large importations of salted fish and Penang-made gnapi. In Bombay the decrease under this head was due to diminished importations of Government salt owing to the agreement between the Great Indian Peninsula and Southern Mahratta Railways to convey goods *via* Poona at low rates of freight. The improvement under *Excise on Local Manufacture* was due to a better demand in the latter half of the year owing to the effects of the famine having to a considerable extent disappeared, and that under *Sale of Government Salt* was due to the introduction of new maundage rate on salt sold in the Konkan Division and to an increased sale of Baragara Salt.

39. The increase over the previous year's actuals was contributed by all the provinces except Bengal, where the falling off occurred under *Duty on Imported Salt*. The improvement in India (99.1) is attributed to the revival of trade in the latter portion of the year from the effects of scarcity, and the frontier disturbances. In Burma (15.8) and in Madras (32.8) it was due to the causes explained above, and in Bombay (61.6) to the fact that during 1896-97 both plague and famine raged in several districts, while in the year under review famine had to a considerable extent disappeared.

## Section A.—PRINCIPAL HEADS OF REVENUE—continued.

## IV.—Stamps—continued.

40. The actuals showed an improvement over the Budget Estimate and the actuals of the previous year by 5 and 59.3 respectively. The actuals practically agreed with the Budget in the aggregate, but there were considerable differences in all the Provinces and under the several heads. In India and the Central Provinces the Estimates were pitched too high, sufficient allowances not having been made for the effects of the famine. In Burma the improved condition of the agriculturists resulted in fewer law suits and reduced the sales under *Court-fee Stamps*, while by increasing the commercial activity it improved the revenue under *Commercial and other Stamps*. In Assam the decrease was small and was due to the suspension of litigation for sometime owing to the earthquake of June 1897 and the subsequent floods. In Bengal the improvement under the first head was due to increased litigation, probably an after effect of the failure of crops in the previous year, which also led to a larger number of loan transactions, and thus improved the receipts under the second head. In the North-Western Provinces the increase under *Court-fee Stamps* was due chiefly (4.4) to the sale of plain paper to be used with Court-fee Stamps, introduced from 1st December 1897, and partly to increased litigation consequent on a return of prosperity; the decrease under *Commercial and other Stamps* was due to the large relief afforded to the distressed classes, more especially by the liberal policy of remissions and suspensions of revenue adopted to save the people from financial collapse. In the Punjab the decline under the first head was due to reduced litigation, probably the result of scarcity, while the improved condition of the agricultural classes reduced the borrowing transaction and thus decreased the receipts under the second head. In Madras the improvement was due to the increase in the amount of agricultural loans given by Government, to the indebtedness of landlords forcing them to mortgage their lands, and to tenants having to borrow on bonds to pay their *Kists*. In Bombay the decrease under the second head was due to the prevalence of plague in several districts, the mortality from which, however, brought in additional probate duties which accounts for the increase under *Court-fee Stamps*.

41. The revenue under this head showed a falling off of 189.6 as compared with the Budget Estimate and of 124.7 as compared with the actuals of the previous year. The decline occurred chiefly in Bengal, the North-Western Provinces, and Madras, due generally to agricultural distress. The falling off occurred under *License and Distillery fees, etc.*, the variations under the other heads were small. Under Opium in Burma, Assam, Bengal and Madras the revenue fell short of the estimate owing, in the last case, to famine, in Burma to over-estimate and in Assam to the earthquake and floods, while in Bengal it was due to the abolition of Chandu and Madak licenses. The improvement in the Central and North-Western Provinces was due to under-estimate, in Punjab it occurred in transit duty owing to larger consumption of opium imported from Kashmir and the Hill States, and in Bombay it was partly due to too low an estimate and partly to low prices of opium prevailing in Bombay. Punjab alone showed an appreciable improvement, which occurred chiefly under the first head, partly due to the Estimate having been

## Section A.—PRINCIPAL HEADS OF REVENUE—continued.

## V.—Excise—continued.

kept low in consequence of the universal depression which existed when it was framed, and to the unusually high level of license fees, which are the highest on record.

42. The revenue under this head showed an improvement of 101.6 as compared with the Budget Estimate, and of 186.4 as compared with the actuals of the previous year. This improvement was the result chiefly of increase in Bengal (84.2), in Punjab (33.8), and Madras (19.3), due mainly to large collection of arrears, in Bengal partly also to an increase due to re-valuations, and in Punjab to realizations on account of Patwaris' Fees Fund in the Chenab Colony. These improvements were partly counterbalanced by decreases chiefly in the Central Provinces (24.3), North-Western Provinces (6.4), and Bombay (6.0), due in the first case mainly to suspensions and remissions under the first and second heads; in the North-Western Provinces to the further postponement of reforms in the Rural Police system of Oudh under the Oudh Local Rates Act V of 1894; and in Bombay to reasons stated under I.—Land Revenue (para. 27).

## Section A.—PRINCIPAL HEADS OF REVENUE—continued.

## VII.—Customs—continued.

43. The revenue under this head showed an improvement of 149.4 as compared with the Budget Estimate, and of 149.8 as compared with the actuals of the previous year. This improvement was the result of increased receipts in Madras and Bombay and a falling off in the other Provinces. Of the improvement in Madras 28.1 was under *Import Duties* and 34.5 under *Export Duties*, the former being due to increased import of Kerosine Oil, and the latter to large shipments of rice to Ceylon owing to the supply from Bengal having failed; in Bombay 150.8 occurred under *Import Duties* chiefly in the duties on Silver bullion and coin (153.3), Oils (95.6) and articles of food and drink (22.0), partly counterbalanced by a falling off in the duties on Cotton Manufactures (18.7), other Metals and Manufactures of metals (30.4), Manufactured articles (39.8) and raw materials (15.3) due to slackness in trade owing to the prevalence of plague, and 15.8 under *Export Duties* due to large shipments of rice to Cutch and Kathiawar. The excess over the actuals of the previous year occurred mainly in Bombay (118.3) and Madras (40.9), and was due generally to the improvements noticed above.

44. Under *Import Duties* the increase in Burma (47.3) was due to the revival of the import trade following the rich rice harvest of December 1896, while the decrease in Bengal (23.4) was chiefly due to a falling off in the duties on cotton (75.7), manufactured articles (47.9) and raw materials (20.7), due to stringency in the money market and famine, partly counterbalanced by increased receipts under articles of food and drink (37.8), Silver bullion and coin (35.1), and Oils (43.7). Under *Export Duties* the decrease in Burma (64.3) was due to the diversion of a large portion of the trade to India owing to the famine, and in Bengal (61.2) owing to smaller exportations of rice. Under *Excise Duty on Cotton Manufacture* the improvement in Madras (3.6) was due to the diversion of the trade in cotton piece-goods to Calcutta and Rangoon (which are Customs ports), owing to the American competition in China, and in Bombay (6.1), to improved receipts under the Cotton Duties Act II of 1896, and activity of the Gujarat mills. Under *Land Customs and Miscellaneous* the increase was chiefly in Madras (9.6), where it was due to increased export of British rice through the French ports of Pondicherry and Karikal, and in Burma (4.8) due to overtime fees earned by preventive officers, hitherto kept out of account, having been treated as miscellaneous receipts, and the payments out of them as charges under 9.—Customs (para. 74).

## VIII.—Assessed Taxes.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
219.3	India . . . . .	222.8	217.1	221.5
49.8	Central Provinces . . . . .	49.8	47.0	47.8
78.0	Burma . . . . .	84.6	91.0	94.1
29.9	Assam . . . . .	30.3	30.2	30.6
491.8	Bengal . . . . .	490.0	490.0	494.9

364.8	Bombay . . . . .	359.8	390.0	376.5
1,872.8	TOTAL . . . . .	1,850.3	1,889.3	1,895.3

45. The receipts showed an improvement of 45.2 and 22.7 over the Budget Estimate and the actuals of the previous year respectively. The improvement, which occurred in all the Provinces except India and the Central Provinces, was due generally to under-estimates. In Burma it was partly due to the introduction of Act II of 1886 in Mandalay Town; and in the North-Western Provinces to the presence of a larger number of officers on duty in consequence of famine and plague. In Bombay the receipts would have been better but for the falling off due to the absence of surplus profits on the Great Indian Peninsula Railway, and decrease in the earning of the Bombay, Baroda and Central India and Southern Mahratta Railways owing to a decline in traffic caused by the famine and plague.

46. The *India* figures include, in addition to the collections made in the Districts directly administered by the Government of India, the recoveries of the non-Civil Departments from the salaries of Government officers. The details are given below:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
24.3	Civil Department, India . . . . .	28.8	23.0	23.0
63.0	Military Department . . . . .	63.7	63.8	64.2
54.3	Public Works Department . . . . .	52.5	52.4	56.4

47. The receipts fell short of the Budget Estimate by 16.7, but exceeded those of the previous year by 5.6. Though the difference in the total is not very large, the variations under the several heads in the various provinces are considerable. The only increases occurred in India (6.7) and Burma (144.0), the former being due to a large refund by Messrs. Ogilvy, Gillanders & Co., London, on account of sale proceeds of cargoes of Andamans timber, retained by them in 1896-97 in part payment of freight and other charges, and the latter mainly to larger extractions of timber consequent on favourable floods and high prices. The decrease in the other provinces was mainly due to the effects of famine. In Assam it was due to the earthquake, which rendered roads impassable and the rivers useless for floating purposes; and in Bengal to the reduction of royalty on produce floated down the river consequent on the cyclone of October, 1897 in Chittagong. In Madras the decrease was partly due to too sanguine an estimate.

48. Under *Timber, etc., removed by Government Agency* the only differences requiring special notice are in the Punjab, where there was a large falling off, mainly due to the small demand for fuel by the North-Western Railway owing to slackness of traffic, and the dryness of the season 1896, which prevented the timber being floated down to the sale depôts; in Bombay, where the prevalence of plague adversely affected the prices received at the auction sale of timber, and difficulty in getting carts and labour caused a falling off in the supply of fuel to the Southern Mahratta Railway; and in the North-Western Provinces, where the sale of firewood to the Commissariat Department at Chakrata and at Ranikhet and Lansdowne fell off owing to the absence of troops, while plague restrictions at Hardwar reduced the sale of bamboos.

49. Under *Timber, etc., removed by Consumers or Purchasers* the variations were mainly due to the causes stated above; the only points calling for particular notice are, that in Assam the crop of thatching grass was totally destroyed by floods and by cattle driven up into the hills by the floods, no royalty being realized owing to the prevailing distress, and that the receipts from waste land grants declined under the new rules. In the North-Western Provinces the decrease was partly due to less extraction owing to slackness of demand and to failure of purchasers of standing trees to pay in the instalments due. In Bombay the demand for fuel from the North-Western Railway fell off in consequence of the agricultural depression in Northern India, and plague quarantine rules also brought about a fall in the demands for forest produce. The small improvement in Punjab (2.8) was due to a larger demand for fodder, increased outturn of charcoal, better receipts on account of grazing, larger sales of standing trees, and the introduction of an improved method of disposing of bamboo coupes.

50. Under *Other Receipts* there was an improvement of 20.6. The increase in India has been explained above. In Burma the increase was due to larger collections under drift timber and duty on foreign timber, the receipts however fell short of those of the previous year; and in Punjab the improvement was due to larger sales of drift timber and better collections of rafting fees.

51. The revenue under this head showed an improvement of 45.6 over the Budget Estimate, and of 28.2 over the actuals of the previous year. The improvement was contributed chiefly by Bengal (46.0), Punjab (5.0), and Madras (29.0), occurring in the last under *Other Receipts* due to the system of granting certificates of previous non-encumbrance of land in connection with State Loans; in the other two Provinces it was due to the registration of a larger number of deeds, as an effect of the famine. In Burma the increase was due to more extended operations. In the Central Provinces and the North-Western Provinces the decrease was due to the assistance which both landlords and tenants received from Government, and from private charity, which served to keep them out of money-lenders' hands. The falling off in Assam was due to the earthquake and floods, and in Bombay to the combined effects of famine and plague.

52. The receipts under this head are for the most part fixed. The fluctuations that occur arise generally either from the non-payment of dues or from advance or arrear payments. There was a falling off in the actuals of 17.6 and 17.7, as compared with the Budget Estimate and the actuals of the previous year respectively. The decrease in the Central Provinces was chiefly due to the non-payment by the Khairagarh State of the tribute of 3.5; in Burma there were some remissions and postponements; and in Bombay it was chiefly due to the instalment of the subsidy from Kutch, which fell due in April 1897, having been paid in the previous year; this receipt, with arrear collections in the previous year, account for the difference in the actuals of the two years.

## Section A.—DIRECT DEMANDS ON THE REVENUE.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
10,909.7	EXPENDITURE . . . . .	11,229.4	10,842.5	10,816.8

53. The expenditure under this section showed a saving of 412.6 as compared with the Budget Estimate, and of 92.9 as compared with the actuals of the previous year. Of the saving as compared with the Budget Estimate, 265.6 occurred under Opium owing to the outturn of the crop having fallen short of the estimate; 96.4 under Salt, due chiefly to an over-estimate in Madras; 74.4 under Forests, due chiefly to provision for survey operations and certain new works in Madras and Bombay not having been fully utilized, and to re-organization of the subordinate Forest Establishment. There were other small savings, the principal being 14.3 under Refunds and Drawbacks, and 16.7 under Assignments and Compensations, the charges under the former are of a fluctuating character, and the savings under the latter occurred chiefly in Madras and Bombay. These savings were partly counterbalanced by excesses of 20.9 under Land Revenue, due chiefly to indirect famine expenditure and to payments of commission on collections in Burma, of 29.1 under Excise, due chiefly to a change in the proportion of distribution of the combined establishment charges between Salt and Excise in Madras, and of small excesses under Stamps and Customs.

54. Of the decrease as compared with the actuals of the previous year, 97.6 occurred under Opium, due to smaller payments to cultivators owing to the smaller outturn of the crop; 49.6 under Salt, due chiefly to less expenditure under Purchase of salt and freight in Madras, and partly to less expenditure charges due to the transfer of the Orissa Salt Department from Madras to Bengal; 43.2 under Refunds and Drawbacks and to smaller decreases under Assignments and Compensations, Stamps, and Provincial Rates, counterbalanced by an increase of 78.0 under Land Revenue due to indirect famine charges and large payments of commission on collections in Burma, of 27.6 under Excise, 8.0 Customs, 7.8 Forests, and smaller savings under Assessed Taxes and Registration.

55. The charges under this head are fluctuating and do not admit of an accurate forecast. The expenditure fell short of the Budget Estimate and the actuals of the previous year by 14.3 and 43.2 respectively. The decrease, as compared with the Budget, was the net result of savings of 6.5 under *Salt Refunds* and of 29.8 under *Customs Refunds*, and excesses of 13.0 under *Land Revenue Refunds* and of 9.0 under *Other Revenue Refunds*. The decrease under *Salt Refunds* in Bombay, both as compared with the Budget and the actuals of the previous year, was due to the falling off in the Salt trade in the earlier part of the year in consequence of the famine and plague. Under *Land Revenue Refunds* the excess in Bengal (4.3) was due chiefly to the refund of the balance of an estate that had been confiscated and subsequently restored; in Madras there were large refunds of Land Revenue erroneously credited in the previous year, and in Bombay there was a special refund (1.7) in the Satara District. Under *Other Refunds* the excess was contributed by all the Provinces except Bombay, where there was a small saving. In Burma 3.2 of the excess occurred under Excise, while in the North-Western Provinces it occurred chiefly under Forests. The large decrease under *Customs Refunds* in Bombay (30.4) was due chiefly to drawbacks on merchandise re-exported in consequence of the dullness of trade.

56. The expenditure under this head fell short of the Budget Estimate and the actuals of the previous year by 16,7 and 20,4, respectively.

57. The saving, as compared with the Budget, occurred chiefly in Madras (6,6) and Bombay (9,9). In Madras it occurred under *Land Revenue Compensations* (2,3), owing to the non-drawal of the allowance of the Raja of Malabar in consequence of his death (9), and of the non-payment of several pensions (1,4), and under *Salt Compensations* (3,9) owing to non-payment of the compensation for suppression of earth-salt manufacture in Pudukottai. In Bombay the saving occurred chiefly under the first head, and was due to non-payment of the grant to Shahaji Raje Bhoale Akalkotkar, pending the settlement of claim to heirship (1,1), to non-payment to small inamdars and other grantees (8,1), and to saving in the adjustment on account of alienated land revenue (2,8). The saving was partly counterbalanced by an excess of 1,1 under *Excise Compensations*, due to the payment of arrears (2,1) to the Chief of Sangli, reduced by (1,0), due to non-payments to certain Native Chiefs. There was a small saving of 1,9 in India under *Salt Compensations* due to smaller payments to the Jeypore and Jodhpore States of the Royalty under the Sambhar Lake Treaty (1,2), and of compensation payable to the Kohat Chiefs. In the Central Provinces an excess of 9 under *Excise Compensations* was due to the payment of arrears of compensation for resumption of Abkari right. The increase in Punjab under *Customs Compensations* was due to the payment of claims belonging to the previous year.

58. The fall, as compared with the previous year, occurred chiefly in the North-Western Provinces (11,5), Madras (5,8), and Bombay (9,3). In the North-Western Provinces the decrease was due to the large arrear payments in 1895-97. In Madras it was due to the causes already explained, and in Bombay it occurred partly under *Land Revenue Compensations* (7,7) for reasons given above, and partly under *Excise Compensations* (1,5), due to the payment in 1896-97 of compensations for two years to the Rewa Kantha Chiefs.

### 3.—Land Revenue—continued.

60. Under *Charges of District Administration*, the excess of 43,1 was chiefly contributed by the North-Western Provinces (14,7), Madras (36,7), Bombay (6,9), and the Central Provinces (4,9), counterbalanced by savings in the other Provinces except India, where there was a petty excess.\* The expenses were generally due to additional expenditure necessitated by the famine. In the North-Western Provinces the entertainment of temporary establishment in connection with the acquisition of land for Canal and Railway purposes, accounted for a portion (6) of the excess, and in Madras a large portion (23,6) was due to fees for searches in Registration Offices in connection with the grant of loans under the Land 'Improvement and Agriculturists' Loans Acts in districts affected by famine, and in Madras for reclamation of lands under the Periyar works. The savings in Burma (4,5), Assam (1,5), and the Punjab (1,3) occurred chiefly under Salaries and Allowances, and were due to the absence of officers on leave and a lower rate of Exchange Compensation Allowance. In Burma the saving was counterbalanced to the extent of 2,3 by excess expenditure under Survey establishment. The saving in Bengal (15,6) is nominal, being due to a change in the method of adjusting fees realized on travelling account of partition, which are now deducted from expenditure under this head instead of being credited as receipts. Disregarding this there was an excess of 1,2 under Salaries, of 3,9 under Allowances due chiefly to the payment of grain compensation allowances, and of 2,4 under Supplies and Services

## Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

## 3.—Land Revenue—continued.

and Contingencies, counterbalanced by a saving of 3.2 in Record Room charges. The variations, as compared with the previous year, are mainly due to the causes explained above.

61. Under *Survey and Settlement* the saving in most of the Provinces was due partly to less charges for professional Surveys; in Burma 7.0 of the saving was due to partial or entire postponement of Settlement Operations and Departmental Surveys in certain districts; in the North-Western Provinces the Settlement Operations were not as extensive as anticipated. In Punjab the saving (1.7) was the result of a saving of 5.7, due partly to over estimate and partly to delay in the commencement of Settlement Operations in the Muzaffargarh district, and an excess of 4.1 due to the creation of the appointment of Settlement Commissioner. In Bombay the saving was due to less expenditure under Supplies and Services on account of Cadastral Maps and to larger recoveries of contributions from Native States for Foreign service, which are deducted from charges, counterbalanced by an increase under professional surveys, due chiefly to a lump deduction ordered in the Estimate by the Government.

62. Under *Land Records and Agriculture* the saving amounted to 7.9. The excess of 2.3 in the Central Provinces and of 2.4 in the Punjab occurred in the Patwari Fund expenditure, due in the former case to famine, and in the latter to no provision having been made for the Chenab Colony Fund. The excess of 6.6 in Bombay was due mainly to temporary famine establishments (2.1), and plague establishments (5), for which no provision was made; increased travelling charges of Circle Inspectors (1.4), and to payment of grain compensation (4.0). These increases were partly counterbalanced by a saving of 9, chiefly in salaries, and 1.6 due to the establishment of tapedars and kotwars having been below the sanctioned scale. The principal savings occurred in Burma (4.3), due to provision for the supplementary survey of the Minbu and Sagaing districts having been only partially utilised. In Assam there was a saving of (3.2) due chiefly to the establishment of District Mandals and Kanungoes having been below sanctioned strength (2.4), and to the appointment of second Superintendent not having been filled up. In the North-Western Provinces the saving was (9.8) due chiefly to savings in the pay and allowances of Patwaris and Kanungoes. An increase of 3.9 in establishment charges consequent on famine has been counterbalanced by savings. In Madras the Estimate is usually pitched high. The excess over the actuals of the previous year in the Central Provinces, Punjab, and Bombay were chiefly due to the causes explained above.

63. The excess under *Commission on Collections* occurred in Burma (13.0), and was due partly to sufficient allowance not having been made for growth of revenue, and partly (1.4) to the deputation of an officer in connection with the question of the administration of inland fisheries in the Irrawaddy Division. The lower figure of the previous year was due partly to agricultural distress and partly to less collection of revenue. The decrease in the Central Provinces was due to remissions and suspensions of arrears of revenue owing to famine.

64. Under *Allowances to District and Village Officers* the excess occurred in the Central Provinces and represents remunerations of kotwars (13.8) and grain compensation allowance (3.9) in consequence of famine, for which no provision was made. In Madras the Estimate was pitched too high, and in Bombay the allowances were not fully claimed during the year, and the adjustments on account of alienated lands were less than the Estimate.

65. In England the excess was due to *Law Charges* in connection with appeals from India being larger than was anticipated.

## Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

## 4.—Opium—continued.

66. The Indian expenditure showed a saving in comparison with the Budget Estimate, and the actuals of the previous year of 267.8 and 99.0, respectively. As usual these variations were the results mainly of variations in the outturn of the crop, which in the year under review amounted to 85,176 maunds against 100,000 maunds in the Estimate, and 87,281 maunds the actual production of the previous year. The *Payments to Cultivators*, which form the bulk of the charges, fell short of the Estimates in both Agencies. Under *Opium Factory* the savings in both Agencies were due to less freight and manufacturing charges. The higher expenditure, as compared with the actuals of the previous year, in the Behar Agency, was due to larger payments for timber, and in the Benares Agency to higher manufacturing charges. Under *District Staff* the excess in the Benares Agency was due chiefly to payment of grain compensation (8) and to higher travelling charges (6). The excess over the actuals of the previous year occurred chiefly in transit and weightment charges. The excess of 9 in Bombay was due to the payment of the privilege leave allowance of the Opium Agent, Benares. This excess was covered by re-appropriation sanctioned by the Government of India.

67. The excess in England was due to larger demands than anticipated for stores. The extra expenditure due to famine is estimated at 2.5. The saving under Exchange Compensation Allowance amounted to 7.

68. The Indian expenditure, as compared with the Budget Estimate and the actuals of the previous year, showed savings of 96.7 and 30.1, respectively. The savings, compared with the Budget, occurred chiefly in Madras (60.1) due to over-estimate under *Salaries, Establishment and Contingencies* and *Purchase and Freight*. In India there was a saving of 24.1, of which 7.8 occurred under the first minor head, and was due to less outlay on petty construction and repairs (2.6) and to less expenditure on Preventive establishment (5.3), due partly to reductions in the Indus preventive line, and 16.3 under *Manufacture and Excavation* due to smaller demands for salt, chiefly in Sambhar, Didwana, and Pachbudra. Bengal contributed 8.7 of the saving and Bombay 3.7, the former due partly to savings in the provision for the new Preventive establishment, and partly (4.0) to the provision for Steam Launches for that establishment not having been utilised, and the latter to less expenditure under *Purchase and*

## Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

## 5.—Salt—continued.

*Freight* owing to slackness of trade, counterbalanced by payment of grain compensation, and of 1,2 to the Bombay, Baroda and Central India Railway Company on account of Government share of the cost of construction of a platform and siding at Bhynder railway station. The saving in Madras, as compared with the previous year, was chiefly due to less expenditure on *Purchase of Salt and Freight* and the transfer to Bengal of the Orissa Salt Department, and which also accounts for the increase in Bengal.

69. The excess in England was due to larger demands for stores than anticipated.

			...	...	...	...	...	1,7	...	...	...	3,5
			...	...	...	...	...	4,3	...	...	...	4,3

70. The actuals agree closely with the Budget, there being an excess of only 7 on the whole. This occurred under *Charges on Sale of Stamps, including discount* in Bengal (6), Punjab (3), and Madras (6), and was due to large sales of stamps, and in the North-Western Provinces (7) due to freight and other contingencies connected with water-marked paper, the use of which was introduced into the Province during the year. These excesses were counterbalanced to the extent of 1,1 by savings in Bombay owing to smaller issues of stamps of low denominations on which alone discount is allowed. Under *Stamps supplied from Central Stores* the variations in the Central Provinces (4), Assam (5), Bengal (2,1), and Punjab (5) were due to over-estimates; the increase in Madras (1,0) due to a change in the method of calculating the value of stamps issued.

71. The excess in England was due to the demand having been larger than was anticipated.

72. The Indian expenditure exceeded the Budget Estimate by 29,1 and the actuals of the previous year by 27,8. The excess occurred chiefly in Madras (36,5 and 28,6, respectively), and was chiefly nominal, being due to a change in the distribution of the charges between Salt and Excise sanctioned after the Budget was framed. The excess due to this cause was covered by re-appropriation sanctioned by the Local Government. Burma contributed 1,5 of the excess due to higher payments under rewards, owing to rigorous measures taken for the suppression of illicit trade. The saving in the Central Provinces was due chiefly to the construction of certain distilleries not having been undertaken during the year (2,0), and partly to petty saving under District Executive Establishments. In Bengal the saving occurred under contingencies (6,7), counterbalanced by higher charges under supplies and services (1,2), and under District Executive Establishment (2,9), chiefly under travelling and grain compensation allowances.

6,2	Bombay . . . . .	6,1	5,8	5,8
54,3	TOTAL . . . . .	54,6	53,1	52,5

73. The charges were less than the Budget Estimate and the actuals of the previous year by 2,1 and 1,8, respectively. The saving occurred chiefly in Bengal (1,9), and was due to a smaller outlay on re-valuation work. The excess (5) in Punjab is due to the charge to this head of the unpaid portion of Patwaris' share of mutation fees, which have been credited to Revenue Deposits for future payment. This excess requires to be sanctioned.

Extra charges due to Famine . . . . .		...	4	...	9	13
Savings under Exchange Compensation Allowance . . . . .		..	4	...	3	7

74. The expenditure exceeded the Budget Estimate by 7 and the actuals of the previous year by 8.0. The excess over the Budget occurred chiefly in Burma (3.6), and was due mainly to a change in the system of treating over-time fees earned by Customs establishment. These fees were formerly paid direct to the officers who earned them, but since June 1897 have been credited as Miscellaneous Customs Revenue, the payments made against them being charged under this head. There was a corresponding increase under VII.—Customs. The saving in Bengal was due to the establishment being below the sanctioned strength. In Madras the provision for establishment at *Other Ports* was not fully utilized. In Bombay the decrease was due to absence of officers and to lower payments of rewards in the Presidency Division.

## 10.—Assessed Taxes.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
1	India . . . . .	1	1	1
1	Central Provinces . . . . .	1	1	1
2.4	Burma . . . . .	3.5	3.3	3.3

5.3	Bombay . . . . .	5.4	5.4	5.4
30.3	TOTAL	32.7	32.3	32.3

75. The expenditure showed a saving of 4 as compared with the Budget Estimate, and exceeded that of the previous year by 2.0. The excess over the previous year in Burma was due to the introduction of the Income Tax Act into Mandalay town with effect from April 1897. In Bengal it was due to higher establishment charges in the year under review. The saving of 3 in Bengal, as compared with the Budget, occurred under Allowances. The small excess of 1 in Madras has been sanctioned by the Local Government.

Savings under Exchange Compensation Allowance		3	7	1.3	4	...	4	2	5	7	4.5

76. The Indian expenditure showed a saving, as compared with the Budget Estimate, of 77.8, and an excess over the actuals of the previous year of 14.9. The saving is spread over all the Provinces except India, where there was an excess due mainly to charges in England in connection with Padouk timber sold in the London market, 1,131 tons having been sold against an expected sale of 500 tons.

77. Under Timber, etc., removed by Government Agency the excess in India has been explained above, but was also due to a small extent to extra charges for cartage of timber from Coorg for the Ordnance Department, Madras. In Bengal the number of sleepers cut exceeded the estimate. In Bombay the excess was due to large payments of arrears and to expenditure on special famine grass having been retarded by famine; in the latter Province it was partly due to over-estimate. In Assam it was due to the suspending of departmental operations after the earthquake, which rendered cart-roads useless and the rivers unserviceable for floating purposes. In the North-Western Provinces the saving was due to smaller demands from the Military Works and Commissariat Departments, and to a delay in cutting fuel; and in Punjab to a scarcity of skilled sawyers and to unfavourable seasons for sleeper works and rafting purposes, and to smaller demands from Railways. Under Timber, etc., removed by Consumers or

## Section A.—DIRECT DEMANDS ON THE REVENUE—concluded.

## 11.—Forest Expenditure—continued.

*Purchasers*, the saving, which was contributed to by all the Provinces, was due chiefly to the reorganization of the subordinate Forest and Depot Establishment.

78. The saving occurred chiefly under *Other Charges* (38,7). The largest savings were in Madras (11,9) and Bombay (12,6). The former was due mainly to a large provision for extension and improvement, chiefly in connection with the Survey of India parties, which was not worked up to. In Bombay the provision for the erection of forest boundary marks by famine labour was not fully utilized, and certain works provided for were not carried out. These savings were counterbalanced to the extent of 3,0 by the transfer to this head of charges of grain compensation allowance provided for under *Establishment*. The savings in the other Provinces were chiefly due to works of construction and forest improvement not having been carried out to the extent proposed. Under *Establishment* the saving amounted in the aggregate to 19,1, and was spread over all the Provinces except Assam and Madras, where the effect of the reorganization of the subordinate establishment was not fully provided for. In the other Provinces the saving was due chiefly to the absence of officers on leave, to lower rates of exchange compensation, and to full effect not having been given to the reorganization scheme. In Bombay the saving, due to absence of officers and the low rate of exchange compensation allowance, was augmented by the transfer of charges on account of grain compensation referred to above. The excess over the previous year (20,7) was mainly due to the reorganization of the subordinate Forest Establishments, and to variations in the number and class of officers on duty.

79. The excess in England was due to a larger demand for stores from Bombay.

## 12.—Registration.

Extra charges due to Famine											
		...	1	...	...	1,6	...	...	1	1	1,9

80. The charges were less than the Budget Estimate by 6, and exceeded those of the previous year by 7,1. The saving, as compared with the Budget, was the result of excesses in Bengal (4,5) and Punjab (1,9), and savings in all the other Provinces, chiefly in the North-Western Provinces (9), Madras (3,0), and Bombay (1,4). The above excesses were, in both Provinces, due to the expansion of the operation of the department, to which cause the excess over the actuals of the previous year was also due. The saving in the North-Western Provinces occurred under commission to Sub-Registrars. In Madras the saving under the first head was due to the abandonment of the scheme for the revision of the Registration Manual, and to less travelling and contingent charges, and under the second head it was due to an over-estimate (3,1), counterbalanced by increased payment of commission and salaries due to the larger receipts in consequence of famine, and to the grant of privilege leave respectively (1,1), and in Bombay the saving was due to a falling off of revenue.

## Section B.—INTEREST.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
1,082,6	RECEIPTS . . . . .	841,3	868,9	872,2

81. The receipts in this section show an excess of 30.9 over the Budget Estimate, and a falling off of 210.4 as compared with the actuals of the previous year. Of the improvement, as compared with the Budget, 7.7 occurred in India, and was due to an increase of 3.3 on account of *Interest on Loans to Municipal and other Public Corporations*, and of 4.1 under *Other Items* on account of interest on arrears of Revenue and special advances to the Banks of Bengal and Bombay. The increase of 15.2 in England, excluding exchange, was due to the investment of the cash balance at a higher rate of interest during a portion of the year.

82. The decrease of 210.4 as compared with the actuals of the previous year was chiefly due to the adjustment of the premium on loans in India in 1896-97, and to the larger investment of cash balance at a higher rate of interest during that year in England.

83. As explained in previous reports, the receipts under this head in India arise from the Paper Currency Investment and from loans granted by Government to Municipalities and other public bodies, Native States and cultivators. No alteration has been made in the Paper Currency investment during the year. The interest on the investment of the nominal value of 2,048,7 made during 1896-97 did not become due till 30th June 1897, as explained in last year's report, thus increasing the interest realized and credited in the year under report. The following statement shows the balances of the different kinds of loans during the last five years:—Owing to the amalgamation of Upper and Lower Burma, the balances of loan under Mofussil Municipalities (5,1) and under Advances to Cultivators (29,8) in Upper Burma on 31st March 1897 have been transferred from Imperial to Provincial Advance and Loan Account, hence the reduction in the balances under these loans in the Imperial section of the statement on the 31st March 1898:

84. The interest paid in 1897-98 by the Local Governments to the Government of India on account of the loans held on the Provincial account amounted to 154.4, while the actual sum realised by them and credited to Provincial revenues amounted in the aggregate to 156.6. The fluctuations under the different heads are explained below.

85. Under *Interest on Loans to Native States* the receipts in India, which were on account of loans granted to Baoni States, the Maharaja of Ajaigarh and the Sultan of Muskat closely agree with the Budget Estimate. In Bengal the payment of interest, both current and arrear, on the Cooch Behar State Railway loan was deferred till 1901-1902, under orders of the Government of Bengal, No. 1829-P., dated 29th July 1898.

86. Under *Presidency Corporations* the short receipt of 2.0 in Bengal, in comparison with the actuals of the previous year, was due to the reduction of the outstanding balances of the loans to the Calcutta Municipality and the Port Trust. In Madras the increase was due to the further loan of 45.5 taken by the Harbour Trust Board in 1895-96.

87. Under *Interest on Loans to Municipal and other Public Corporations*, the increase in India was 1.5 on account of interest on advances in the Military Department, for which short provision was

Section B.—INTEREST—*continued*.XII.—Interest—*continued*.

made in the Budget Estimate. In the North-Western Provinces the excess (3.1) over the previous year's actuals was due to the low receipts of that year. The increase in Madras was the result of the grant of fresh loans.

88. Under *Interest on Loans to Landholders and other Notabilities* the excess in India was due to under-estimate. The variations in Bombay over Budget and actuals of the previous year were due to the special receipt of 9 from the Jath State on account of interest on loans granted to it during the year, for which no provision was made in the original Estimate.

89. *Interest on Advances to Cultivators*.—The small receipt in India, as compared with the Budget, was due to the repayment of advances. In the Central Provinces the receipts fell below the Budget and the actuals of the previous year owing chiefly to the prevailing scarcity, in consequence of which the cultivators were unable to meet their liabilities. In Burma and the North-Western Provinces the increase, both over the Budget and the actuals of the previous year, was due to unexpected recoveries. In Bengal the receipts from cultivators fell off by 1.7 as compared with the Budget, owing to scarcity. This decrease was partly counterbalanced by increased receipts of 1.3 on account of the Rajapur Drainage Scheme. The interest on additional investment made in 1896-97 enhanced the receipts under *Interest on Currency Investments* as explained above.

90. The variation under *Interest on Securities of Provincial Funds* in Madras was due to investment made during the year. The decrease under *Interest on Overdrawn Capital of Railway Companies* was due to smaller recoveries from the Assam-Bengal Railway, and to no adjustment having been made on account of interest payable by the Guaranteed Railways. Under *Other Items* the receipts in India and in Bombay in 1897-98 included interest on some special advances to the Banks of Bengal and Bombay. The high figure of 1896-97 was due, as explained in last year's Report, to the premium of 124.2 on the 3 per cent. loan of 1896-97, reduced by commission (6.2) on  $3\frac{1}{2}$  per cent. loans transferred to that loan. The increase in Bengal and Madras was chiefly due to receipts on account of interest on arrears of revenues.

91. In England the increase was due to the investment of cash balance at a higher rate of interest than was estimated for a portion of the year.

## Section B.—INTEREST.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
3,453,9	EXPENDITURE . . . . .	3,550,0	3,499,2	3,472,3

92. The total charges in this section showed a saving of 77,7 as compared with the Budget Estimate, and excess of 18,4 over the actuals of the previous years. As regards the former, exchange accounts for a decrease of 172,5. The increase of 94,8 under the other heads was mainly due to the payments in England (117,8) and India (50,5) on account of discount on the loans raised during the year, and to larger payments of interest in England on India Bills (63,1), counterbalanced by reduced transfer to Railway, etc., Interest (20,5), owing to reduction in Railway Capital expenditure incurred during the year, to smaller payments of interest on loans (109,1), and 23,8 in payment of interest on Savings Bank Deposits.

93. As compared with the previous year, the excess was due chiefly to the adjustments in 1897-98 of interest due to the Uncovenanted Service Family Pension Fund for 1895-97, as was explained in previous year's report, and the payment of discount on the loans raised both in India and in England, counterbalanced by the savings caused partly by the rise in the rate of exchange and partly by the transfer of a larger portion of interest charges in India to Railway Revenue Account and Irrigation Works, in consequence of the increase in the total capital expenditure on State Railways and Irrigation Works.

## 13.—Interest on Ordinary Debt.

94. Before proceeding to examine the interest charges in detail, it is usual to exhibit the amount of loans raised or discharged during the year, and the following figures supply the necessary particulars for 1896-97 and 1897-98:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
PERMANENT DEBT.				
INDIA—				
6,048,7	Debt incurred . . . . .	4,000,0	3,000,0	3,000,1
722,6	Debt discharged . . . . .	575,1	429,5	419,5
+5,326,1	NET IN INDIA . . . . .	+3,424,9	+2,570,5	2,580,6
ENGLAND—

TEMPORARY DEBT.				
ENGLAND—				
1,500,0	Temporary Loans Incurred . . . . .	2,000,0	6,000,0	6,000,0
2,500,0	Temporary Loans Discharged . . . . .	1,000,0	1,000,0	1,000,0
-1,000,0		+1,000,0	+5,000,0	+5,000,0

\* The above amounts are exclusive of 105,8 cancelled, comprising 95,0 charged to Railways on account of Sinking Fund of the East Indian, Eastern Bengal, and Sind, Punjab and Delhi Railways, and 10,8 charged to Discount Sinking Fund.

95. The Budget in India provided for a public loan of 4,000,0. Subsequently the Secretary State reduced the amount of the loan to 3,000,0, and this sum was raised in August at 3½ per cent.

## Section B.—INTEREST—continued.

## 13.—Interest on Ordinary Debt—continued.

an average rate of Rs8-5-3 per cent. Of the balance of the loans previously advertised for discharge 299,3 were paid, consisting of 8,0, 99,1, and 192,2 on account of 4½, 4, and 3½ per cent. loans, respectively, besides a payment of 2 on account of 4 per cent. India Stock notes. Of the loans bearing interest 120,0 was paid on account of Gwalior loan in accordance with the terms of the agreement with the Durbar under which the loan was originally taken.

96. In England 3,500,0 India 2½ per cent. stock was issued as provided for in the Budget Estimate. In the Budget 2,000,0 was provided for temporary loans on the Security of India Bills, of which the sum of 1,000,0 was required to pay off an equal amount of the temporary loans outstanding on 31st March 1897; but in consequence of suspension of drawing of the India Bills, it was necessary to enhance the amount to 6,000,0.

97. The total interest on debt paid in India and in England is shown below:—

1896-97. Accounts.	Rate.	DEBT IN INDIA ON 31ST MARCH 1897.	Principal.	Interest due.	Budget.	1897-98. Revised.	Accounts.

3,825,2	England	.	.	.	3,907,7	4,069,2	4,069,1
2,527,8	Exchange	.	.	.	2,579,2	2,278,8	2,291,5
6,353,0	TOTAL INTEREST PAID IN ENGLAND		.	.	6,486,9	6,348,0	6,360,6
10,106,4	GRAND TOTAL		.	.	10,365,1	10,205,0	10,180,3

98. This total amount was divided between interest on Ordinary Debt and interest on Debt for Railways and Irrigation as shown below:—

1896-97. Accounts.	Interest on Ordinary Debt—	Budget.	1897-98. Revised.	Accounts.
—1,373,5	India	—1,505,6	—1,510,4	—1,543,6
2,630,7	England	2,717,8	2,879,3	2,879,2
1,738,5	Exchange	1,793,8	1,612,4	1,621,4
2,995,7		3,006,0	2,981,3	2,957,0
	Interest on Debt for Railways and Irrigation Works—			
5,126,9	India	5,383,8	5,367,4	5,363,3
1,194,5	England	1,189,9	1,189,9	1,189,9
789,3	Exchange	785,4	666,4	670,1
7,110,7		7,359,1	7,223,7	7,223,3
10,106,4		10,365,1	10,205,0	10,180,3

99. The payment in India was less than the Budget Estimate by 58,5. The decrease chiefly occurred in payment of interest on the 3½ per cent. loans. The figure under discount on loans represents discount on the new loan of 1897-98, for which no provision was made in the Budget, as, at the time of framing the Estimate, the price of paper ruled high. In England the increase over the Budget Estimate consists of 117,8 on account of the discount on the issue of 3,500,0 India 2½ per cent. stock, 60,1 in interest on India Bills, counterbalanced by a decrease of 6,7 in interest on India 2½ per cent. stock, and 10,0 for interest on temporary loans from the Bank of England which were not required. The decrease in exchange, compared with the Budget Estimate and with the actuals of the previous year, was due to the more favourable rate of exchange obtained during the year. The large reduction in India under Ordinary Debt was due to a saving (58,5) in the payment of interest on loans, partly reduced by a smaller transfer (20,5) to interest on Railway and Irrigation Works consequent on a reduction in the Capital Expenditure, chiefly on Railways. The payment of discount both in India and England mainly explains the excess over the previous year.

100. The excess in the amounts chargeable under this head to the Central Provinces (7), Bengal (1,2), Madras (3,3), and Bombay (4,0) have all, with the exception of 1 in Bengal, been sanctioned by the Local Governments.

101. The expenditure in India was less than the Budget Estimate by 28.5, and more than the actuals of the previous year by 57.2. The savings, as compared with the Budget, occurred chiefly under Savings Bank Deposits in India on account of interest on Post Office Savings Bank Deposits (24.6) in consequence of larger withdrawals than were anticipated, of 1.0 in the interest on Regimental Savings Bank Deposits, and of 5 on other accounts. These savings were partly counterbalanced by increases of 1.6 under State Railway Provident Institutions and 7 under Civil Engineers' Provident Fund. Under *Special Loans* the decrease of 6 in India was in the annuities on account of 8 per cent. Madras Perpetual Loans, and that of 8 in North-Western Provinces was on account of lapses and undrawn arrear of Wasika pension. The saving in Bombay was caused by the transfer of some endowment funds to the hands of Trustees. The decrease under *Miscellaneous* was chiefly on account of interest on the balances of Railway Funds. The increase, as compared with the actuals of the previous year, occurred under *Treasury Notes and Service Funds*, and was on account of adjustment during 1897-98 of interest due to the Uncovenanted Service Family Pension Fund for 1896-97, as explained in last year's Report.

102. Out of the excess of 9 in Bengal, 5 have been sanctioned by the Local Government by re-appropriation, and the remaining 4, together with 1.4 in Burma and 2 in Punjab (which arose mostly in connection with the interest on the Deposits in State Railway Provident Institutions), still await sanction.

103. The usual details of the interest on Treasury Notes and Service Funds and Savings Bank deposits are noted below:—

*Interest on Treasury Notes and Service Funds.*

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
...	Bengal Uncovenanted Fund	79.7	78.8	78.8
9.1	Bombay " "	9.8	9.2	9.4
3.8	Other Funds " " "	4.1	3.6	3.4
12.9	Total	93.6	91.6	91.6

*Interest on Savings Bank Deposits.*

301.3	Post Office Savings Banks	305.0	281.3	280.4
6	Presidency Savings Banks	...	...	...
26.2	State Railway Provident Institutions	26.0	27.5	27.6
12.1	Civil Engineers' Provident Fund	12.8	13.4	13.5
6.3	Regimental Savings Banks	6.2	5.1	5.2
5.5	Other Accounts	5.3	4.6	4.8
352.0	Total	355.3	331.8	331.3

## Section C.—POST OFFICE, TELEGRAPH, AND MINT.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
3,011.6	RECEIPTS . . . . .	2,382.8	3,348.3	3,370.6
8,711.7	EXPENDITURE . . . . .	2,891.2	2,878.0	2,869.5
+ 299.9	NET . . . . .	+ 91.6	+ 470.3	+ 501.1
+ 80.4	POST OFFICE (NET) . . . . .	+ 78.0	+ 131.9	+ 149.7
+ 124.7	TELEGRAPH (NET) . . . . .	— 7	+ 252.8	+ 257.8
+ 94.8	MINT (NET) . . . . .	+ 14.3	+ 85.6	+ 93.6

104. The net receipt in this section exceeded the Budget Estimate by 409.5 and the actuals of the previous year by 201.2. The largest improvement occurred in the net receipts of the Telegraph Department, and was mainly due to the abnormally large increase in message traffic owing to the Military operations on the North-West Frontier, the famine, plague and the earthquake of June 1897 in Assam.

105. Under Post Office the growth of revenue from the sale of Postage Stamps and Money Order Receipts was much above the normal, but the improvement was partly counter-balanced by an increase (11.0) in the adjustments of exchange on the sterling payments to English, Colonial and other Foreign Post Offices.

106. The gradual improvement in the net results of the transactions of the Postal Department for the last five years is shown by the following figures:—

	Net Receipts.
1893-94 . . . . .	3.8
1894-95 . . . . .	25.5
1895-96 . . . . .	69.7
1896-97 . . . . .	80.4
1897-98 . . . . .	149.7

107. The improvement in the net receipts of the Mint over the Budget Estimate was chiefly due to an exceptionally large dollar coinage for the Straits Settlements and to the recoinage of large amounts of Kashmir and Bhopali rupees.

## Section C.—POST OFFICE, TELEGRAPH, AND MINT—RECEIPTS.

## XIII.—Post Office.

8.6	OTHER RECEIPTS . . . . .	9.9	9.9	9.9
1,773.7	TOTAL . . . . .	1,818.4	1,859.4	1,869.1

## Section C.—POST OFFICE, TELEGRAPH, AND MINT—RECEIPTS—continued.

## XIII.—Post Office—continued.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	DISTRICT POST COLLECTIONS—			
1.5	Central Provinces . . . . .	1.4	1.6	1.2
2.1	Bengal . . . . .	1.6	2.3	2.4
6.2	Punjab . . . . .	5.9	6.2	6.4
9.8	TOTAL . . . . .	8.9	10.1	10.0
1,783.5	GRAND TOTAL . . . . .	1,827.3	1,869.5	1,879.2

198. The total revenue exceeded the Budget Estimate by 51.9 and the actuals of the previous year by 95.7. The increase over the Budget occurred chiefly under *Sale of Ordinary Stamps* (30.0), *Sale of Service Stamps* (10.4), and *Money Order Receipts* (21.9), and was due to the growth of the operations of the department being much above the normal, in consequence of the famine, plague, and the Military Operations on the North-West Frontier. This improvement was partly counterbalanced by the enhanced deduction under *Payments to English, Colonial and other Foreign Post Offices* (11.0), owing to the adjustment of exchange on the sterling payments to the London Post Office for the exchange of letters and parcels, and to the payments of arrears to certain colonial and other post offices. There was a small improvement of 1.1 under *Mail Cart, Parcel Van, Passenger and Goods Service*, due to the extension of traffic on the Simla-Kalka line, but this increase was more than covered by a decrease of 1.6 under *Parcel and other Postage collected in Cash*, chiefly owing to a reduction in the amount of postage taxed on unpaid and insufficiently paid covers, and the introduction of the system of "registered" newspapers under which postage fees on these publications are realized in stamps.

199. As compared with the previous year, the improvement which occurred under all the heads was chiefly due to the famine and the Military Operations on the North-West Frontier, and to a small extent to the plague.

## XIV.—Telegraph—continued.

## Indian Telegraphs.

120. The increase over the receipts of the previous year was derived principally from State messages; the number of such messages increased from 608,612 in 1896-97 to 870,278 in 1897-98, owing chiefly to the Military Operations on the North-West Frontier. The famine, plague and the earthquake in Assam also contributed to some extent to the abnormal increase in State messages. There was besides an increase in receipts from private traffic, which, during a part of the year 1897-98, was stimulated by speculations in grain, silver, and gold, while the earthquake in June 1897 and the Military Operations on the frontier caused an increase in private telegrams. Plague and famine interfered in some places with trade and affected the receipts. The number of private messages increased from 4,468,972 in 1896-97 to 4,842,949 in 1897-98. The decrease of 9.2 in the *Rent of Wires and Instruments leased to Railways and Canals* was due to the reduction in rate sanctioned by the Government of India in Public Works Department letter No. 183T., dated 10th August 1896. The increase over the Budget Estimate was due to the causes stated above.

## Indo-European Telegraphs.

121. The increase was due to the message traffic transferred from the Indian Telegraph Department having been larger than in the previous year and than that provided for in the Budget Estimate. The falling off as compared with the Revised Estimate, was due to an interruption in the Teheran route in February 1898.

## XV.—Mint.

1896-97. Accounts.		Budget.	1897-98. Revised.	Actuals.
14.6	Seignorage on Silver . . . . .	11.3	50.0	48.7
137.6	Gain on Copper Coinage . . . . .	50.0	40.0	42.6
	Other Receipts—			
2.0	Calcutta . . . . .	4.2	21.8	23.0
2.4	Bombay . . . . .	2.0	60.0	67.8
156.6	Total . . . . .	67.5	171.8	182.1

122. The revenue under this head showed an increase of 114.6 over the Budget Estimate and of 25.5 over the actuals of the preceding year. The greater portion of the improvement in comparison with both the Budget and actuals of the previous year occurred in Bombay under *Seignorage on Silver* and *Other Receipts*. The increase under the former was due to an exceptionally large dollar coinage for the Straits Settlements to replace Japanese silver coins, and that under the latter partly to the same cause, but chiefly to the re-coinage carried out for the Kashmir and Bhopal Durbars.

123. The decrease under *Gain on Copper Coinage* was due to the unprecedentedly large absorption of copper coin in connection with famine relief works in the previous year.

124. The increase under *Other Receipts* in Calcutta was due mainly to the re-coinage of Bhopali rupees and the coinage of cents for the Straits Settlements.

115. The expenditure in India was less than the Budget Estimate by 13.2, but exceeded the actuals of the previous year by 44.0.

116. The saving (2.7) under *Chief Office, Calcutta*, as compared with the Budget, was due to leave arrangements and to a reduction in the number of Superintendents attached to the Director General's Office (7), to less exchange compensation allowance and bill journey charges (6), to savings in establishment charges in consequence of leaves and temporary vacancies (1,2), and to less charges for purchase and repair of furniture and petty contingencies (3). Under *Presidency and District Offices* the saving of 14.1 was due chiefly to the provision for revision of establishment not having been fully utilized (12.3), to leave arrangements and temporary vacancies in Post Office establishments (3.3), to gain in working of combined offices (2.7); to smaller charges for salaries of officers due to leave and deputations (1.0), to less exchange compensation allowance (6), and to savings under contingencies due chiefly to excessive provision (3.7), partly counterbalanced by larger payments of compensation for dearness of provisions (10.2), and to increased salary charges due to the entertainment of 9 additional Inspectors and privilege leave arrangements (1.3). The excess under this head over the actuals of the previous year (19.9) was due partly to the normal expansion of the Post Office establishment (13.2), and partly to higher payment of grain compensation allowances (8.8), counterbalanced to the extent of 2.0 by savings under salary charges. Under *Road Establishment and Contingencies* the excess of 2 was the chief result of excess payments for grain compensation allowance (3.9), and for extra despatch of letters (7), due to insufficient provision, and of savings due to an over-estimate under Rainy Season and Miscellaneous charges (2.2), and to the abolition of a number of contracts for conveyance of mails in Burma, and to the provision for

## Section C.—POST OFFICE, TELEGRAPH, AND MINT—EXPENDITURE—continued.

## 15.—Post Office—continued.

revision of mail lines not having been fully used (2,1). The excess over the actuals of the previous year under this head was due chiefly to the above causes and to the extension of runners' lines. The saving under *Railway Charges* occurred chiefly in the payments to the East Indian, Indian Midland, and South Indian Railways (6,8), partly counterbalanced by heavy payments (6,0) on account of the introduction of the special train service from the 17th September 1897. The increase over the actuals of the previous year was mainly due to the introduction of the special train service system and to higher payments to the Great Indian Peninsula and North-Western Railways in consequence of the development of the Railway Mail Service business. Under *Mail Cart, Parcel Van, Passenger and Goods Service Establishments and Charges*, the saving was due to excessive provision made with reference to the high prices of grain, for the maintenance of transport animals (8), and an over-estimate for contingent charges (6). The decrease, as compared with the previous year, was due to the high cost in 1896-97 of the maintenance of animals. The excess under *Other Charges*, both as compared with the Budget and the actuals of the previous year, was due to certain arrear payments to the P. and O. Company. The increase in the sale of ordinary stamps accounts for the excess under *Discount on Sale of Postage Stamps* as compared with the previous year. The saving under *Subsidies* was due to the termination of the contract with the India General Steam Navigation Company for the conveyance of Assam Mails (1,0), non-payment of small sums of 3, counterbalanced, to the extent of 9, by arrear payments and payments for additional services during the year. The excess of 9 under *Stationery and Printing* was due to an under-estimate for stationery, and the excess, as compared with the previous year, was due to larger supplies of stationery and more printing work done for the Department. Under *Miscellaneous* the excess of 4 was due to an under-estimate of payments for compensation for lost insured articles. The excesses under *Stationery and Printing* and *Miscellaneous* have been met by re-appropriations sanctioned by the Director General of Post Office.

117. Under *District Post Charges* the excesses in the Central Provinces, Bengal, and the North-Western Provinces were due chiefly to payments of grain compensation allowances, and the increase in Burma to the subsidy, sanctioned with effect from the 25th March 1897, for conveyance of mails between Taung-gup and Kalindaung, partly counterbalanced by a saving of 5 under establishments and contingencies. The excess in the Central Provinces has been met by an additional grant sanctioned by the Government of India, and those in Burma, Bengal, and the North-Western Provinces by re-appropriations sanctioned by the Local Governments. The extra charges due to famine are estimated at 25,8. The savings under *Exchange Compensation Allowance* are 7.

Section C.—POST OFFICE, TELEGRAPH, AND MINT EXPENDITURE—*continued.*46.—Telegraph—*continued.*

## Indian Telegraphs.

118. The expenditure during 1897-98 was 67.3 more than that in the previous year. The increase in the expenditure in India was due partly to a greater demand for the construction of departmental and canal lines of telegraph, and partly to increased working expenses owing to the expansion of operations of the Department. During the year 1897-98 ten new Departmental and sixty-three Postal combined offices were opened. The increase in the expenditure in England was due to larger expenditure on stores. The actual expenditure of the year fell short of the Budget Estimate, owing partly to restriction of expenditure under the orders of the Government of India, and partly to short outlay on works owing to the Railway programme of the year not having been fully worked up to. There was also a decrease in the furlough allowances paid in England, including exchange. The extra charges due to famine are estimated at 2.9. The savings under Exchange Compensation Allowance are 2.4.

## Indo-European Telegraphs.

119. The decrease in the capital expenditure was due partly to the buildings for the signalling staff at Teheran having been almost completed during 1896-97, and partly to larger issues of stores for repairs of land lines and cables in the Gulf section, while the increase under Revenue was due to an increase in the homeward traffic and in the percentage of traffic carried by the Indo-European route.

120. The increase over the Budget estimate was due to the increased payments in England in respect of revenue mentioned above.

61.8	GRAND TOTAL							53.2	86.2	88.5

121. Under Establishment the accounts showed excess of expenditure both in Calcutta and Bombay. The excess of 1.3 in Calcutta was due to increase of expenditure of 2.1 on account of extra establishment, for which an additional grant of 2.0 was sanctioned in Financial Department No. 58-A., dated 6th January 1898, partly counterbalanced by savings of 8 under Operative establishment and under Salaries, due to the absence on furlough of the Mint and the Assay Masters. The increase of 4.0 in Bombay was chiefly due to an unusually large dollar coinage and to a large coinage of small silver in connection with the famine, which led to the entertainment of large temporary establishments and to an increase of overtime allowances. The difference in the actuals of two years was due to the reasons given above, and to the fact that the actuals of 1896-97 were low on account of absentees.

122. The increase under *Loss of Weight in Coinage*, both in Calcutta and Bombay, over the Budget and in Bombay over the accounts of the preceding year was due to the re-coinage of large amounts of Kashmir and Bhopali rupees and other uncurrent coins.

123. The increase under *Other Charges*, both in Calcutta and Bombay, was the result of heavy expenditure in the purchase of Local stores. The excess of 3.2 in Calcutta was covered by an additional grant of 3.5 sanctioned in the letter quoted above.

124. In Bombay out of the excess of 20.9 over the Budget, 9.0 were covered by additional grants sanctioned by the Government of India in their letters Nos. 4796-A. and 5049 A., dated 28th October and 16th November 1897, respectively, and 11.0 were sanctioned by re-appropriation from savings under 1.—Refunds and Drawbacks, under Government of India No. 1235-A., dated 15th March 1898.

125. The excess of 1.8 in Calcutta and 9 in Bombay require sanctions of the Government of India. The extra charges due to famine are estimated at 1. The savings in Exchange Compensation Allowance are 4.

## Section D.—RECEIPTS BY CIVIL DEPARTMENTS.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
1,678,6	RECEIPTS	1,689,2	1,703,1	1,723,5

126. The receipts in this section showed an improvement of 34,3 over the Budget Estimate, and of 44,9 over the actuals of the previous year. As compared with the Budget, there was an improvement of 60,4 under Marine, due mainly to larger recoveries on account of hire of vessels employed in conveying troops to the South Coast of Africa, Mombassa, and Suez, and to and from the Cape and Mauritius, and to larger Pilotage Receipts in Bengal; and 23,9 under Police, chiefly due to recovery from the Burma Railway Company of its share of the cost of Railway Police from 1st September 1896, and to large receipts on account of private watchmen in the town of Bombay; there were also small improvements under Medical (2,6), and Scientific and other minor Departments (3,2). These increases were partly counterbalanced by decreases of 11,9 under Law and Justice—Courts of Law, due chiefly to a change in the system of realization of Kurk Amins' fees in the North-Western Provinces; of 29,0 under Law and Justice—Jails, due mainly to a smaller demand for jail manufactures, and to the admission of convicts in an enfeebled condition unfit for remunerative labour, and of 14,9 under Education, chiefly in fees and fines.

127. The increase, as compared with the actuals of the previous year, occurred chiefly under Marine (40,2), and Police (11,4), due to the causes explained above affecting the improvement over the Budget.

	Accounts .	5,1	10,5	44,0	9,2	80,3	43,8	41,2	82,8	38,4	356,9

128. The receipts under this head fell short of the Budget Estimate by 11,9, but exceeded the actuals of the previous year by 7. As compared with the Budget and the previous year's actuals there was a large decrease under *Court-fees realised in Cash*, chiefly in the North-Western Provinces, due partly to a change in the system of realization of Kurk Amin's fees, which, in certain cases, are now levied in stamps, and partly to the effects of famine. The improvement in Bengal occurred under *Amins' fees*. There was a decrease of 2,8 under *General Fees, Fines, and Forfeitures*, the receipts under

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*XVIA.—Law and Justice—Courts of Law—*continued.*

which consist chiefly of Magisterial fines, and are of an uncertain character; the Estimate in Bengal, where the largest fall occurs, seems to have been pitched too high, while in Madras the increase was partly due to large fees realized by the High Court for printing, and also partly to the transfer to this head from XXV.—Miscellaneous, of fines realized under the Police Act by Bench Magistrates. Under *Sale-proceeds of Unclaimed and Escheated Property* the decrease in India was due to the lapses of estates in the hands of the Administrator General being smaller than usual, and much below the Budget. The improvement in Madras was due to the seizure of an unclaimed sum of 1,8 from a swindler in the Tinnevely district. Under *Other Receipts* the increase in Bengal was due to larger receipts from fees for examinations of Pleaders (1,8), and from miscellaneous receipts. In Punjab the improvement occurred under "Other items."

	Accounts .		29.7	21.7	37.7	4.0	102.7	33.3	18.0	45.0	14.2	306.3

129. Under *Sale-proceeds of Jail manufactures* the decrease of 25.7, as compared with the Budget Estimate, is the net outcome of variations in all the provinces, the chief of which are a falling off of 12.8 in the Central Provinces, and of 11.5 in the North-Western Provinces, and an increase of 10.8 in Bengal; the decreases are the results of smaller demands for jail manufactures, and the admission of a large number of convicts in an enfeebled condition unfit for remunerative labour, while the increase in Bengal was due to large supplies of manufactured articles to the Police and Military Departments. In the Central Provinces the extent of the famine was not realized when the Budget was framed, which also provided for a contract which the Reformatory School failed to obtain. In Madras the decrease was due to an outbreak of cholera in three Central Jails; and that in Bombay to the release of long term prisoners, well acquainted with factory work on the occasion of the Diamond Jubilee, to the existence of plague in House of Correction, Bombay, and the difficulty in obtaining raw materials in the Yerrowda Central Prison owing to plague restrictions. The net receipts under this head, after deducting the corresponding charges under 129B, are given below:—

	Accounts		2.3	21.2	61.0	18.8	102.4	43.7	75.9	43.8	79.2	448.3

130. The receipts under this head exceeded the Budget Estimate by 23.9, and the actuals of the previous year by 11.4. Under *Police supplied to Railways* no provision was made in the Budget, as the recovery of the seven-tenths share of cost of Railway police is adjusted by deduction from expenditure; the actuals represent the excess of the recovery from the Burma Railway Company for the period from 1st September 1896 to March 1897, over the amount adjusted by deduction from expenditure in 1897-98. The Revised was an under-estimate. Under *Police supplied to Public Departments, Private Companies and Persons* the increase occurred chiefly in Bengal and Punjab, in the former being due to larger recoveries for police supplied to Railway Companies (1.0) and for Punitive Police (5), and in the latter to larger recoveries for police supplied to private persons. Under *Presidency Police*, the improvement was almost entirely in Bombay, where it was due to the large demand for Ramosis (private watchmen), owing to the absence of many of the inhabitants of the town in consequence of plague. Under *Other Receipts* the principal variations are increases in Burma (6.3), due to adjustment of value of stores returned to the Military Department, and in Punjab (7); and decreases in Assam (2.8), due to a change in the system of supplying rations and making ration recoveries from the Military Police; in Bengal (8) due to smaller recoveries on account of Village Police (1.4), counterbalanced by an increase under miscellaneous receipts (8), and in the North-Western Provinces (8) due to decrease in rewards to Police paid from sums received from other departments and the public. The decrease under *Police supplied to Municipal, Cantonment, and Town Funds* occurred chiefly in Burma (1.5), due to non-recovery from the Mandalay Municipality, and in the North-Western Provinces (7), due to over-estimate, which was corrected in the Revised; on the other hand, there was a small improvement in Bombay (8), due to receipt from the Baroda Cantonment which was not anticipated in the Budget. Under *Fees, Fines, and Forfeitures* the net decrease was 5, the variations in most cases being due to Cattle Pound receipts; in Burma the improvement was partly due to gains in gambling cases.

	Accounts .		47.7	33.0	113.9	6.1	190.7

131. The receipts under this head exceeded the Budget Estimate by 60.4, of which 36.5 was under *Dockyard Services, etc.*, due chiefly to large recoveries (31.5) on account of hire of vessels employed in conveying troops to the South Coast of Africa, Mombassa and Suez, and to and from the Cape and Mauritius, and to large receipts (5.0) for works done for private individuals, etc.; 1.7 occurred under *Sale-proceeds of Vessels and Stores* due to sales of vessels not anticipated in the Budget. Heavy shipments of rice to India and general improvement in trade brought a large number of vessels to Burma ports, and resulted in an increase of 4.0 under *Coast Light Dues*; *Pilotage Receipts* in Bengal, which are of a fluctuating character, contributed 17.4 towards the improvement. The increase (40.2), as compared with the previous year, was also due to the cause stated above.

## XIX.—Education.

	Accounts .		1.9	4.0	1.8	4.4	65.2	33.8	13.0	41.2	52.2	215.5

132. The receipts fell short of the Budget Estimate by 14.9, and of the previous year by 3.3. Of the decrease, 11.0 occurred under *Fees and Fines*; in Bengal the increase anticipated in the Budget under Government Schools was not realized; in Madras the falling off was chiefly in fees from Art Colleges and Schools; and in Bombay the decrease was attributed to the prevalence of plague; and 4.5 occurred under *Other Receipts*, chiefly in Bombay, owing to smaller sales of books at the Sind and Government Central Book Depôts.

						Accounts	1897-98 .	90.2				

133. The Indian receipts under this head exceeded the Budget Estimate by 2.8, but fell short of actuals of the previous year by 3.2. The improvement, as compared with the Budget, was mainly due to increases under *Lunatic Asylum Receipts* (1.5), chiefly in Burma (5), and the North-Western Provinces (9), the former being due to larger receipts from non-pauper patients, in consequence of the extension of the Rangoon Lunatic Asylum buildings, and the latter to improved receipts from the Dairy farm attached to the Lunatic Asylum, Bareilly; and under *Other Receipts* (2.7), contributed chiefly by Madras (1.1) owing to the transfer of this head from XXV.—Miscellaneous receipts from private scavenging fees and sale-proceeds of manure and street sweepings, and by Bombay (6), owing to the adjustment of the value of medicines returned to the Medical Store Department by Civil Officers. The small decrease of 5 under *Contributions* was the result of considerable variations in the different Provinces, the principal of which are decreases of 2.6 in the Central Provinces and of 8 in the North-Western Provinces, owing to contributions towards local dispensaries, village sanitation works, and vaccination having fallen off; and of increases of 1.4 in Bengal, owing to a special contribution paid by the Chittagong Municipality; and of 1.9 in Madras due to large contributions from private individuals, chiefly in the districts of *Vizagapatam*, *Tinnevely*, *North Arcot*, and *Trichinopoly*.

134. The Indian receipts under this head showed a small increase of (3.2) over the Budget Estimate, and of 2.1 over the actuals of the previous year. The principal variations are decreases of 1.6 in Madras under *Cinchona Plantations*, owing chiefly to a reduction in the price of quinine supplied to Government Medical Depôts, and of 1.4 under *Receipts on account of Public Exhibitions and Fairs*, owing mainly to the prevalence of famine; and increases of 2.2 under *Labour and Emigration*, chiefly in Assam, owing to the large number of labourers imported, and of 1.4 under *Sale of Maps, Instruments, etc.*, due to sale of Archaeological paintings not anticipated.

## Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
15,445,2	EXPENDITURE.	15,467,8	15,721,3	15,731,6

135. The expenditure in this section showed an increase of 271,8 as compared with the Budget Estimate, and of 294.4 as compared with the actuals of the previous year. As compared with the Budget Estimate the largest increase occurred under Medical, where there was an excess of 278,6, due to charges connected with the bubonic plague in all the provinces except Burma and Assam. There was an excess of 79,7 under Law and Justice—Jails, and of 49,6 under Police, due chiefly to the high prices of food grains and payment of grain compensation. Part of the excess under Jails was due to an increase of jail population in some provinces, and under Police, to charges connected with the plague. There was an increase of 16,2 under Law and Justice—Courts of Law, chiefly under Criminal Courts. These excesses were largely counterbalanced by savings under the other heads, the principal of which were 45,1 under Education, spread over all the provinces, and due chiefly to some special provisions not having been utilized and to loose estimating in respect of Local charges, and 49,8 under Political, due mainly to the subsidy of the Amir of Afghanistan not having been fully drawn.

136. Of the excess, as compared with the previous year, 278,7 occurred under Medical, 77,3 under Police, and 38,6 under Law and Justice—Jails, due mainly to the causes named above, and 38,2 under Law and Justice—Courts of Law, due chiefly to larger payments of grain compensation. These excesses were partly counterbalanced by decreases, the chief of which were 69,5 under Political, due partly to the subsidy of the Amir of Afghanistan not having been fully drawn and to payment of arrears of his subsidy in the previous year, 41,2 under Marine, of which 19,1 occurred in the expenditure in England and 22,1 in India, due to less payments of exchange compensation allowance and the special payment in 1896-97 in Madras to the Harbour Trust Board, in satisfaction of its claim against the Madras Port Fund, and 28,7 under General Administration in the expenditure in England.

## Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—continued.

## 18.—General Administration—continued.

137. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 11,1 and 7 respectively. The excess over the Budget occurred chiefly in India and Bombay; all the other Provinces except the Central Provinces, where there was a petty excess, showed small savings. The excess occurred chiefly under *Secretariat*, and was due in India mainly to increased telegram charges owing to famine and the disturbance on the North-West Frontier, and in Bombay to the appointment of an additional Under Secretary, and heavy expenditure on temporary establishment and telegram charges in connection with the plague.

138. Under *Salaries of Governor General, Governors, etc.*, the excess of 1,4 in Burma was due to the province having been raised to the status of a Lieutenant-Governorship with effect from 1st May 1897, and that of 1,0 in Bengal was due to arrangements consequent on the grant of medical leave to Sir Alexander Mackenzie. Under *Staff and Household* the excess of 4,8 in India was due chiefly to increased Hill Journey charges and allowances (2,7) and to heavy telegram charges (2,2); that of 6 in Burma was due to the change in the status of the Province, and that of 5,5 in Bombay chiefly to heavy telegram charges in connection with the famine and plague; against these excesses there was a saving of 1,0 in the North-Western Provinces due to low expenditure for contract contingencies. The saving under *Executive Council* was the result of the stoppage of exchange compensation allowance to Members of the Council. Under *Legislative Council* the excess in India was chiefly due to larger payments of salaries and travelling allowances of non-official members of the Viceregal Council (1,0) owing to a larger number of such members being present on duty, to the absence of an officer on privilege leave (4), and to payment of a reward for preparing an index of Enactments (5); in Burma no provision was made for a Legislative Council; and in Madras the saving was due to the non-payment of 5 provided for the Member, Viceregal Council, and to saving in the salary of the Assistant Secretary.

139. The *Secretariat* charges exceeded the Budget by 23,7, of which 16,5 was in India, 3,8 in the Central Provinces, 7 in Assam, 1,4 in Bengal, and 1,5 in Bombay, counterbalanced by savings of 1,4 in Burma, of 1,0 in the North-Western Provinces, of 1,1 in Punjab and of 8 in Madras. The details of the India Secretariat charges are given below:—

1896-97. Accounts.		Secretariat (India).	Budget.	1897-98. Revised.	Accounts.
29,8	Financial Department	. . . . .	29,7	29,7	29,3
6,9	Statistical Department	. . . . .	7,5	7,8	7,8
28,0	Home Department	. . . . .	23,9	28,0	28,9
40,1	Foreign Department	. . . . .	43,7	49,1	44,8
25,6	Revenue and Agriculture	. . . . .	23,5	28,2	27,5
7	Translator's Department	. . . . .	7	7	8
32,2	Public Works Department	. . . . .	31,3	30,1	31,9
3,3	Government Record Department	. . . . .	3,9	3,3	3,3
49,8	Military Department	. . . . .	49,5	55,7	55,9
216,4		TOTAL	213,7	232,6	233,2

140. The excess in the Home Department (5,0) was due chiefly to telegram charges connected with the famine (3,4), to the payment of arrears and transit pay of an officer, and the appointment of an officer on special duty (1,1); that in the Foreign Department (1,1) was due to heavy telegram charges (2,1), counterbalanced by savings under Salaries owing to the appointment of officers on lower pay provided for (6) and under Establishment (5). The excess over the previous year was in telegram charges. The excess in the Revenue and Agricultural Department was chiefly due to high telegram charges (3,3), and to absence of officers on privilege leave (9), and other petty excesses, partly counterbalanced by savings in the grant for special charges for famine correspondence (1,7). That in the Military Department (6,4) was due to high telegram charges chiefly connected with the North-West Frontier disturbances (5,9), and Hill Journey allowances (5). The excess over the previous year was due to the high telegram charges. The small excess of 6 in the Public Works Department was due to the absence of officers on privilege leave (1,1), to Hill Journey charges and allowances (5), counterbalanced by savings in establishment charges (1,1). The excess in the Central Provinces was chiefly due to the appointment of an additional officer for the disposal of famine work (1,5), to officers on special duty (7), and to the absence of officers on leave (9). In Assam it was due to extraordinary expenditure in consequence of the earthquake. In Bengal it was due to absence of officers on leave, and increased establishment and contingent charges, and in Bombay to increased expenditure connected with the plague, as explained above. The saving in Burma was chiefly due to the appointment of officers on lower salaries than those provided for, and to less outlay on postage telegrams and miscellaneous charges. In the North-Western Provinces it was due to the termination of the appointment of the Scarcity Secretary earlier than was anticipated.

## Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—continued.

## 18.—General Administration—continued.

(6), and to less establishment charges (4). In the Punjab the provision for the re-organization of the gazetted staff was not utilised, and in Madras it was due to savings under Establishment resulting from re-organization and the absence of an officer on leave, partly counterbalanced by the entertainment of extra establishment in connection with famine work. Under *Tour charges* the saving in India was chiefly under charges for special trains, while the excess in the North-Western Provinces was due to high tour expenses of the Lieutenant-Governor. Under *Board of Revenue and Financial Commissioner* the saving of 4.1 in Punjab was due to the abolition of the appointment of Second Financial Commissioner. In India the charge represents the arrear and transit pay of the Hon'ble Mr. Rivaz prior to his taking charge of the Home Department; and in Madras the excess was due partly to the salary of the Famine Commissioner and partly to the grant of privilege leave. Under *Commissioners* the excess in India (8) was due to the payment of arrear and transit pay of Messrs. Holderness, Fuller and James prior to their taking up appointments under the Government of India; in Bengal the excess (8) was due to the absence of officers on privilege leave, partly counterbalanced by savings under contingencies; the excess in the North-Western Provinces (1.6) was due to the absence of officers on privilege leave, and entertainment of temporary establishment for famine work (9) and to increased expenditure on contingencies (1.0); in Burma the saving (1.4) occurred chiefly under diet and travelling allowance of witnesses, contingencies, and exchange compensation allowance; the saving (7) in Punjab occurred under allowances and contingencies. Under *Inspector-General of Stamps, Registration, etc.*, the saving in Assam was due to the lower rate of pay and personal allowance drawn by the present Inspector-General. The total charges for *Account and Currency Offices* are shown below:—

		Civil Account.	Currency Offices.	Total Civil Account and Currency Offices.	Office of A. G., P. W. Dept.	TOTAL.
Accounts	1896-97	213.7	33.3	247.0	24.3	271.3
Budget		220.0	28.6	248.6	25.0	273.6
Revised	1897-98	211.6	30.4	242.0	23.7	265.7
Accounts		214.1	30.4	244.5	23.5	268.0

141. The savings under civil account offices were due to the absence of officers on furlough, deputation, and the delay in the introduction of the outside audit scheme in the North-Western Provinces and partly also to the change in system of adjusting recoveries from Incorporated Local Funds on account of audit fees now accounted for by deduction from this head by debit in the local section under *General Establishment of Local Fund Officer*. The excess under Currency offices was due to the grant of privilege leave to officers, revision of establishment in Calcutta, and high charges for extra shroff, travelling and contingencies in Bombay. Under *Allowance to Presidency Banks* the saving in India was due to the non-payment to the Bank of Bengal of the allowance for general treasury duties (4.4), while in Bombay the excess was due to the payment to the Bank of Bombay, during 1897-98, of the 2nd instalment for 1896-97 of the charge on account of public debt duties. Under *General Establishment of Local Fund Officers* the excess in the Central Provinces and Bombay was due to the change in the method of adjusting recoveries of audit fees referred to above; in Bengal the charges were exceptionally low, and in Madras the increase expected with the establishment of additional Panchayet unions was over-estimated.

142. In the expenditure in England there was an increase of 2.6 in telegram charges, and of 2.3 on account of the additional store to the India Office Building, partly counterbalanced by a decrease of 12.8 in salaries, and 1.0 in charges of the Store Department.

143. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 17.0 and 39.2, respectively. The largest difference, as compared with the Budget, occurred under *Criminal Courts* (19.4), chiefly in Bengal (5.9), North-Western Provinces (9.5), Punjab (3.5), and Madras (3.8). The excess in Bengal was due to payment of grain compensation (2.1) and to increased expenditure on travelling (3.8), these reasons also account for the increase over the previous year's actuals; in the North-Western Provinces it was due partly to the large number of officers present on duty in consequence of the famine (4.9), the prevalence of which and of plague resulted in extended tours causing an increase of travelling allowances (2.2), and more contingent expenditure (1.9); the excess over the actuals of the previous year was due chiefly to these causes; in the Punjab the increase occurred chiefly in charges for temporary establishment (1.8), for diet and road money of witnesses (1.0), and for contingencies (1.0), partly counterbalanced by a saving of (1.4) under Salaries and Exchange Compensation Allowances, and in Madras it was chiefly due to the extra expenditure entailed by the famine. There was also a small excess in the Central Provinces due to indirect famine charges. Under *High Court, etc.*, the principal variations are an excess of 1.1 in the North-Western Provinces owing chiefly to the entertainment of a second Additional Judicial Commissioner, sanctioned during the year, and of his establishment for two months; of 1.5 in Punjab due to the appointment of a sixth Judge for a portion of the year; and of 1.0 in Madras chiefly on account of printing executed by the High Court on behalf of Suitors (1.5), partly counterbalanced by savings due to the absence of two Puisne Judges on leave without allowances. The variations under *Law Officers* are chiefly due to higher payments of pleaders' and barristers'

## Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—continued.

## 19A.—Law and Justice—Courts of Law—continued.

fees for Civil and Criminal cases in Bengal (5), Punjab (3.7), and Bombay (1.0), counterbalanced by less charges on this account in the North-Western Provinces (4) and Madras (6), and to savings under salaries in Burma (1.7). In the aggregate the differences under *Civil and Sessions Courts* is a small saving of 2.6, but variations are considerable in some of the Provinces; the more important are an excess of 16.5 in Bengal, of which 12.1 was on account of grain compensation allowance, 2.2 on account of grant of privilege leave to Subordinate Judges and Munsiffs, and 1.9 on account of remuneration of copyists and temporary establishment, and savings in the Central Provinces (4.3), Punjab (3.6), Madras (7.6), and Bombay (3.6), due largely to the absence of officers on leave and to vacancies; other causes of variations are in Punjab less expenditure on grain compensation (1.1) and allowances and contingencies (1.0), and in Madras the discontinuance of the appointment of a Civilian Subordinate Judge (1.0), and less expenditure on Process-serving establishment (1.1) and contingent charges (1.1); in Bombay the saving due to the above cause and to less expenditure on temporary establishments was partly counterbalanced by higher charges for travelling, owing to judicial establishment being employed on plague duty, for grain compensation allowance, and for diet and road money of witnesses. There was an excess of 1.0 in Assam due to extraordinary expenditure in connection with the earthquake, and the grant of grain compensation allowance. Under *Courts of Small Causes* the only noteworthy differences are the savings in Bengal (1.2) and Bombay (8), the former being due to the absence of Judges on leave, and the latter to the deputation of two Judges to other appointments, owing to decrease of work in the court on account of the plague in Bombay. Under *Refunds* the charges are of a fluctuating nature, and in India proved unusually high owing to heavy refunds of lapsed estates in the hands of the Administrator-General, Bengal.

144. The Budget Estimate in England provided for the out fit of two Judges expected to come out to India, but none came.

145. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 78.0 and 35.3 respectively. The excess occurred wholly under *Other Jail Charges* (112.4), and was contributed by every province except India and Burma. It was due chiefly to high prices of food grains and to purchase of grain for stock in anticipation of a still further rise, and to high jail population in the North-Western Provinces and the Punjab. Other causes, however, contributed to this excess, the following are the most important. In Bengal there were excesses under Hospital and Sanitation charges (2.6), charges for moving prisoners (1.5), grain compensation (2.2), live stock, tools and plant (2.0), and under charges for police custody (1.4); these excesses were partly counterbalanced by savings chiefly under supplies and services (1.7), and charges for clothing and bedding for prisoners (9); in the North-Western Provinces there were increases under Hospital charges (2.8), charges for moving prisoners (2.5), and clothing and bedding of prisoners (1.5); these excesses were counterbalanced to the extent of 2.3 by savings mainly under salaries and Establishment; and in Bombay clothing and bedding charges showed an excess of (3.0). The saving in Burma was due chiefly to the release of 2,021 prisoners on the occasion of the Diamond Jubilee, and to a falling off in the number of admissions (10.4), counterbalanced by an excess of 6.8 due to purchase of grain for a reserve stock. The larger figure of 1896-97 was due to larger jail population, to heavier purchases of grain in advance, and to high prices of grain. Under *Jail manufacture* the saving in the Central Provinces (11.9) was due to the Reformatory School having failed to obtain certain contracts provided for, and to the emaciated conditions of the convicts which rendered them incapable of remunerative labour. In Burma the purchases of raw material and tools and plants were small. In the North-Western Provinces the saving (12.2) was due to less expenditure on raw materials, owing to a low demand for jail manufacture in consequence of the famine, to the admission of prisoners in a debilitated condition and incapable of productive labour, and to the system of adjusting cost of raw materials manufactured for use in Jail departments, by credit to this head and debit to *Other Jail Charges*. In the Punjab the saving (3.0) was due to non-payment to Jailors of commission provided for (6), and to less charges for raw material due partly to less demand for bricks (6), and partly to the system of adjusting cost of raw materials manufactured for Jail departments; the variations between the two years were also due to those causes. In Madras the decrease (6.5) was due to a falling off in manufacturing operations due to the prevalence of cholera in certain jails; and in Bombay it was due chiefly to the method of adjusting the cost of raw material manufactured for use in Jail departments. The excess in Bengal (4.9) was the net result of an excess of 9.2 on freight on machinery, and tools and plant, and a saving of 4.3 due to less purchase of raw materials. The decrease as compared with the previous year was due to the large purchase of raw materials in 1896-97.

146. The excess under *Convict Charges at Port Blair, etc.*, was due chiefly to increased expenditure under Commissariat Supplies due to high prices of food grains (6.0), and under Marine Supplies (5), counterbalanced by savings under Salaries and Establishment (2.0), under Forest and Medical Supplies (2.8), and under Passage Money (3). The excess over the previous year occurred chiefly under Commissariat and Forest supplies.

147. The excess in England was due to a larger demand for stores than was expected.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*20.—Police—*continued.*

150. The variations under the several heads are generally due to the charges mentioned above, to the absence of officers on leave, and to Exchange Compensation Allowance. Important variations other than these are noticed below.

151. Under *Presidency Police* the excess in Bengal over the previous year was due to larger payments of grain compensation allowance; in Bombay the recovery of the Municipal Contribution fell short by 2.5, and the charges for private watchmen exceeded the provision by 5.6; there was a corresponding increase on the receipt side on this account (*vide* para. 130). These excesses were partly counterbalanced by savings due to the absence of the Commissioner on leave and in clothing charges and rents for Municipal Police. The excess over the previous year was due to the high charges for private watchmen. Under *Superintendence* the excess in Bengal (7) and part of that in Punjab (8) was due to the purchase of tents. The excess in the North-Western Provinces, and part of that in Madras was due to high tour and contingent charges. Under *District Executive Force*, the excess was mainly due to the payment of grain compensation allowance as shown above. It was also partly due in the Central Provinces to the employment of a large number of police owing to the famine (3.7), and to high travelling charges due to large remittances of treasure and frequent transfers of policemen (1.3). In Bengal too large a deduction for probable savings (8.0), to additional police for districts affected by famine and for plague duty (2.7), and to high travelling expenses (2.9); the excess over the previous year was chiefly due to payment of grain compensation. In Madras the increase was due to payments of famine batta and additional temporary police (4.4), increased outlay on clothing, arms, and accoutrements (1.6), contingent charges (1.1), and on travelling charges consequent chiefly on the famine (2.3). These increases were partly counterbalanced by savings under petty works of construction and repair (2.3), under salaries (5) and under hospital charges due to famine (6); and in Bombay the excess was partly due to additional police for plague duty (9.5), additional police at Poona (8.0), to high travelling charges (3.1), counterbalanced by saving under salaries and Exchange Compensation Allowance (1.4), under Establishment (2.2), clothing charges (3.6). The excess over the previous year was due to higher charges connected with the famine and plague. Savings occurred in India (1.6), Burma (6.3), and North-Western Provinces (9.1). In Burma, the saving was due, in addition to the general causes mentioned above, to a revision of the police force, to the non-amalgamation of the Port Trust police with the district police, and to the force having been below strength, partly counterbalanced by heavier outlay on petty construction and repairs and on punitive police. The savings in the North-Western Provinces occurred chiefly in the charges for police force (18.1), and for arms and accoutrements (2.1), but even here the expenditure on grain compensation (7.4) materially reduced the savings, which was further reduced by travelling charges (9) and increased expenditure on police escorts (2.6), due chiefly to frequent movements of prisoners and treasure. Under *Municipal and Cantonment Police* the excess over the Budget and the actuals of the previous year in Bengal and Punjab was due to high payments on account of grain compensation, and in Bombay to the reorganization of the Baroda cantonment police. Under *Government Railway Police* the absence of expenditure in Burma is due to the adjustment of arrear contributions from the Burma Railways Company (*vide* para. 130); in the North-Western Provinces the excess was due to plague preventive measures on the East Indian Railway (2), and to payment of arrears of house-rent allowance to Railway Companies (4); in the Punjab the excess was due to the adjustment on account of quarters occupied by the North-Western Railway police (1.5), charges on account of the Kotri-Rohri Railway police (1.3), and to larger expenditure under contingencies (9). The saving in Madras (2.5) was due chiefly to the provision for the Railway police scheme not having been utilized.

152. Under *Village Police* the saving (3.7) was the net result chiefly of a saving of 7.8 in the North-Western Provinces and excesses of 2.7 and 2.0 in Bengal and Bombay, respectively. The saving in the North-Western Provinces was due to the revision of the Rural Police system in Oudh not having been carried out to an appreciable extent (8.4), partly counterbalanced by higher expenditure on rewards to chaukidars (5). The excess in Bengal both as compared with the Budget and the actuals of the previous year was due to payment of grain compensation, and to increased charges for rewards to chowkidars, and in Bombay it was due to an under-estimate of 3.7, and to payment of grain compensation allowance (8), partly reduced by savings in allowances to heads of village police and watchmen (1.1), and in the provision for reorganization of the Village Police Establishments paid from village officers' Cess Fund (Sind). The savings under *Special Police* occurred chiefly in Assam (9.8) and Bengal (17.0); in Assam it was due to a change in the free ration system (3.3), to the failure of the contractor to supply the full quantity of rations required for the Lushai Hills Battalion (5.3) and to vacancies in the Police Force (1.4); the decrease as compared with the actuals of the previous year (9.6) was mainly due to these causes also; in Bengal the saving both as compared with the Budget and the actuals of the previous year was due to smaller outlay on the purchase of rations. The excess in Burma (3.4) was due chiefly to an over-estimate of the probable savings; as compared with the previous year the increase (5.9), occurred under supplies and services, and purchase of supplies, reduced by savings in the pay of the force and Exchange Compensation Allowance. In Punjab the excess (1.3) over the actuals of the previous year

## Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—continued.

## 20.—Police—concluded.

was due to the reorganization of the Border Police, but as the grant for this purpose was not fully utilised there was a saving of 9 as compared with the Budget. Under *Cattle Pounds* the saving occurred chiefly in Madras (1,9) and Bombay (3,6); in the former it was due to an over-estimate, and in the latter it was attributed to the greater freedom allowed to the grazing of cattle in consequence of the prevalence of scarcity during the year. Under *Other Charges* the saving in India was chiefly due to short strength of the Thuggee and Dacoity Police force and less expenditure on travelling allowances.

153. The excess expenditure in England was due to a larger number of officers, than was provided for, having come out during the year.

Savings under Exchange Compensation Allowance		1.5	2	...	2	1	...	2.0

154. The Indian expenditure exceeded the Budget Estimate by 19.6, but fell short of the actuals of the previous year by 22.1. The excess over the Budget occurred chiefly under *Marine Stores and Coal for Building and Repairs of Ships*, and was due to smaller recoveries from other departments owing to works for the Eastern Bengal State Railway provided for in the Budget not having been carried out, and to large purchases of country coal for the Muscat and Bushire coal depôts.

155. Under *General Supervision and Accounts* and *Marine Survey and Establishment* the variations were due mainly to the absence of officers on leave and deputation, and to the lower rate of exchange compensation allowance. The saving under *Dockyards* was mainly the result of less expenditure on wages of hired workmen (4.9), owing chiefly to some works for the Eastern Bengal State Railway contemplated in the Budget not having been carried out during the year, and to smaller recoveries (5.9) from other departments and Local Governments. Under *Salaries and Allowances of Officers and men afloat* the excess in India occurred chiefly in pay and victualling charges (5.6), due to the employment of the Royal Indian Marine Ships *Canning* and *Dalhousie* in the conveyance of troops to the South Coast of Africa and to Mombassa during the time they should have been laid up with reduced crews, partly counterbalanced by saving in the pay and allowances of officers (3.0) due to absences and vacancies, and to less exchange compensation allowance. This excess was counterbalanced by the increased recoveries under the corresponding Revenue head (see para. 131). The saving, as compared with the previous year, was chiefly due to less payment of exchange compensation allowances. In Burma the saving was due to change of officers and less outlay on allowances and contingencies in the *B. G. S. George*, and to occasional lending of launches to other departments. In Bengal the saving occurred in the charges for salaries and victualling of officers.

156. Under *Marine Stores, etc.*, the minus entry in India was the result of the system of adjusting recoveries by deduction from charges. The charges exceeded the Budget by 9.3 due to heavy expenditure on coal for the Muscat and Bushire coal depôts, and owing to the employment of Royal Indian Marine Ships *Canning* and *Dalhousie* on trooping service outside Indian waters (5.8), and to a large purchase of steel from the Cossipore Foundry and Shell Factory, and to payment of freight on a consignment of timber supplied by the Forest Department, Burma, to the Bombay Dockyard (3.5). The recoveries fell short of the anticipations by 12.6, due chiefly to certain works for the Eastern Bengal Railway provided for in the Budget not having been carried out during the year. The difference between the two years' actuals was due to large recoveries in 1896-97, partly counterbalanced by heavy expenditure on pine planks for the Suakin expedition and a special large purchase of coir. In Burma the excess was due to a large purchase of stores and coal. The high figure of 1896-97 was due to the transfer to this head of the outstanding balance of the Marine Store and Coal advance account. In Bengal the saving was due to the small outlay on the repair of Pilot vessels and for purchase of coal. The charges under *Pilotage, Pilot Establishment, etc.*, which depend on the tonnage of vessels visiting and leaving port, were exceptionally high in Bengal during the year. Under *Other Charges* the saving in India (3.1) was due to less expenditure on hire of vessels (10.0), owing to no transport having been hired in place of the *Warren Hastings* as was anticipated in the Budget, partly counterbalanced by an excess of 1.7 due to heavy expenditure on repairs of *H. M. S. Sphinx* and to the employment of more than one vessel in Indian waters owing to disturbances in the Persian Gulf; of 1.4 due to the cost of fitting up the *Porpoise* with electric light installation; of 1.2 due to salvage and miscellaneous charges incurred in connection with the loss of the *Warren Hastings*, and for extra compensation for loss of property to officers of that vessel; of 2.4 due to payment of unusually high freight on stores sent out from England. In Burma the excess was due to a larger charge than was anticipated for the construction of the Light Vessel *Kalapauk* (3.8), and for the repairs and outfit of the Light Vessel *Kammandine* (1.3), partly counter-

## 21.—Marine—continued.

balanced by savings due to the contract for the Bhamo-Sinbo line not having been renewed, and to the provision for the river conservancy charges not having been fully utilized. In Assam the saving of 1,0 was due to the expiry and non-renewal of the contract for the Sorma Valley Mail Service. In Bengal the saving was due to less expenditure on the hire of ships and vessels. In Madras charge of the previous year represents the payment made to the Harbour Trust Board in satisfaction of its claim against the Madras Port Fund.

157. The excess in England was due to a larger demand than was anticipated for stores.

## Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—continued.

## 22.—Education—continued.

158. The Indian expenditure showed a saving of 45.2 as compared with the Budget Estimate, and an excess of 5.3 as compared with the actuals of the previous year. The saving was contributed by all the Provinces except Bengal (where there was an excess of 1.5), and occurred chiefly in Bombay (11.4), Madras (9.0), Central Provinces (6.2), and Burma (8.3). The excess of 1.5 in Bengal requires to be sanctioned.

159. Under *Inspection* the excess in Bengal was due partly to the reorganization of the Provincial Educational Department, and partly to an excessive deduction in the Budget for probable savings, and in Madras it was due to the introduction of the scheme relating to the Indian and Provincial Educational Services. To this cause the excess under *Government Colleges* in Madras is also chiefly due, it was, however, partly owing to the purchase of special furniture for the Law College. Under *Government Schools* there was a saving of 24.7, to which all the Provinces except Bengal contributed. The decrease in the Central Provinces (2.3) was due to less expenditure on petty construction and repairs of schools, in Burma it was due to the vacancies and deputation of officers; in the North-Western Provinces (1.6) it occurred chiefly in establishment charges of Primary Schools; in Punjab (2.2) the saving occurred partly in the contingent charges of Secondary Schools and of the Central Training College (1.3) and partly to an over-estimate (8) by District Boards; in Madras it was due to an over-estimate in the Local section (8.5), partly counterbalanced by excess expenditure of 1.1 under Primary Schools in the Provincial section; and in Bombay (8.2) it was also chiefly due to an over-estimate in the Local section (5.3), and to saving under establishment (1.4). Under *Grants-in-aid and Payments by Results* the saving in Burma (1.6) was due to an over-estimate; the irregularity in the payments makes an accurate forecast under this head impossible. In Assam the saving (1.4) was due to a decrease in the number of schools in consequence of the earthquake and subsequent floods. In Bengal the decrease (1.8) occurred chiefly in the grants to Middle English and Vernacular Schools (2.4), partly counterbalanced by an excess of 6 due to an excessive deduction on account of probable savings. These decreases were partly counterbalanced by excesses chiefly in Madras (2.6) and Bombay (2.0); the former occurred almost entirely in the Provincial section under payments by results. In Bombay it was partly due to the lump deduction made in the Budget in the Provincial section having proved excessive (1.0), and to a payment of arrears, in the Local section, of grants to indigenous schools (1.0). Under *Other Charges* the saving (13.3) occurred almost entirely in Madras (8.9), and Bombay (3.3). In Madras it was due chiefly to the provision (8.0) for Students' Hostels not having been utilized, and in Bombay to a decrease under supplies and services in the Sind Book Depot (7) and to less expenditure on purchase and publication of books in the Central Depot, partly counterbalanced by an excess of 9 due to a payment to the heirs of the late Mr. Pandit for editing the *Atharva Veda*.

160. The Indian expenditure was less than the Budget Estimate and the actuals of the previous year by 19.4 and 15.6, respectively. The variations under this head are due mainly to variations in the number of Senior and Junior Chaplains on duty or on leave, and in the rate of Exchange Compensation Allowance. Under *Church of England* the saving in India was due chiefly to the absence of the Lord Bishop and his Domestic Chaplain on furlough (3.1). In Burma the saving was entirely due to the absence of the Lord Bishop, and in Madras to the extent of 6. In England the Budget provided for the passage of eight Chaplains, but only five came out.

161. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 263,6 and 263,7, respectively. There would have been no excess over the Budget but for the special charges under *Grants for Medical Purposes* connected with the bubonic plague in all the Provinces except Burma and Assam. The excess over the actuals of the previous year was also due to higher expenditure connected with the plague.

162. The saving under *Medical Establishments* was contributed by all the Provinces except India and the Central Provinces, and was due chiefly to the deputation of officers on Field Service in the North-Western Frontier and on famine and plague duty. Under *Vaccine Establishments and Sanitary Commissioner* the saving in India was due chiefly to less expenditure on Cholera Inoculation Experiments; in the Central Provinces it was due partly (8) to the employment of Sanitary Inspectors as Assistant Surgeons and the debit of their pay and travelling allowances to *Medical Establishments*, and partly (4,3) to less expenditure than was expected on Village sanitation consequent on short realizations of local subscriptions; in Bengal it was due partly to the deputation of officers to Bombay in connection with the plague (1,5), and partly to savings under establishment (8) and allowances (1,4). The excess in the North-Western Provinces is due to the recoveries from Municipalities for the Sanitary Engineer's Office having been credited to Advances Recoverable against the outstanding debit under that head, which was the result of the former practice of transferring the charges on this account to Advances Recoverable instead of being deducted from the charges for the year; in Madras the excess was chiefly due to an under-estimate, and in Bombay the excess, both over the Budget and the actuals of the previous year, was due to the appointment of an additional officer in connection with the inspection of passengers by sea. Under *Medical Schools and Colleges* the savings were due chiefly to the absence of officers; but in the Punjab it was partly due to less expenditure under Supplies and Services, and in Bombay partly to less outlay on English stores. In Madras the excess was chiefly due to an excessive deduction for probable savings, and to larger expenditure on the purchase of instruments, chemicals, and Europe stores. Under *Government Hospitals and Dispensaries* the excess in Assam (3,2) was due chiefly to the earthquake, which necessitated increased grants to Dispensaries (1,2), and larger outlay on petty construction and repairs (6), and to increased immigration (1,0); in Bengal it was due chiefly to the deduction for probable savings having proved too high (3,3), and to increased charges of the Campbell Hospital (1,1), partly counterbalanced by the non-payment of grants to certain hospitals and dispensaries (2,0), and to less outlay under supplies and services of the General Hospital; in Madras (8) the excess occurred in the Provincial Section (1,4), chiefly on account of medicines supplied by the Military Department, counterbalanced by saving of 5 in the Local Section; and in Bombay the excess (6,4) was chiefly due to a lump deduction of 5,0 in the Budget ordered by the Local Government, and to heavy charges for salaries of officers on famine duty, to larger issues of medicines and instruments for famine purposes, and to temporary establishments on account of plague, partly counterbalanced by less grants to hospitals and dispensaries. These excesses were almost covered by savings in the Central Provinces (1,6), due to the deputation of officers to the Public Works Department for famine duty (6), and to the provision (8), for creating a senior grade of Hospital Assistants not having been utilised; in Burma (3,8), due to the transfer of Assistant Surgeons to medical charge of districts and to Hospital Assistants having been below the sanctioned

## 24.—Medical—continued.

strength, partly counterbalanced by increased outlay on Europe medicines and instruments (4), and on quinine obtained from the Government Quinologist, Madras, for sale in Burma (5); in the North-Western Provinces (2,2) in the grants for salaries and establishments (9), travelling allowances (4), and contingencies (5), of Local Hospitals and Dispensaries and in the grant for Female Dispensaries (4); and in Punjab (2,4) due to an over-estimate in the Local Section. The excess over the actuals of the previous year occurred chiefly in Assam (2,7), Bengal (2,9), Madras (3,0), and Bombay (2,4). In Assam and Bombay it was due to causes which caused the excess over the Budget, and in Bengal it was due to the high charges of the Campbell Hospital in diet and clothing of patients and larger grants made to Municipalities. Under *Lunatic Asylum* the excess, both as compared with the Budget Estimate and the actuals of the previous year, was chiefly due to increased expenditure on diet of patients owing to the prevailing high prices of food-grains.

163 The excess in England was due to the payment of pay, passages, etc., of Medical Officers and Lady Nurses in connection with the plague in Bombay.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*concluded.*26.—Scientific and other Minor Departments—*concluded.*

167. The Indian expenditure showed a saving of 10.4 as compared with the Budget Estimate, and an excess of 20.7 as compared with the actuals of the previous year. The saving was the result of petty differences under the various heads, which are explained below; the principal savings occurred under *Geological and other Surveys* (3.3), and *Other Charges* (4.8). The excess over the previous year occurred chiefly under *Survey of India* (10.5), *Veterinary and Stallion Charges* (4.1), and *Other Charges* (3.2).

168. Under *Survey of India* there was a saving of 1.1, due chiefly to a saving of 1.5 under Head-Quarters Offices, owing to the absence on furlough and retirement of engravers (8), and to the deputation of the Superintendent, Simla Drawing Office, with the Tirah Field Force (1.7), partly counterbalanced by increased salary and travelling allowance charges of the Trigonometrical Office, Dehra. There was a saving under Survey Parties (12.5), but this was more than counterbalanced by smaller recoveries from Local Governments (13.9). As compared with the previous year the expenditure of Survey Parties showed an increase of 2.0, while the recoveries from Local Governments showed a decrease of 14.3, the net result being an increase of 16.3, which was reduced by savings under Controlling and Administrative Staff (2.5), due to absence of officers on furlough, and under Head-Quarters Offices (1.9), due to less expenditure in the Mathematical Instrument Manufactory, counterbalanced by increased establishment charges, chiefly of the correspondence and drawing branches and of the Trigonometrical Office, Dehra. Under *Geological and other Surveys* the saving in India (2.0) was the result of a number of petty variations, the principal of which occurred under travelling allowances of Geologists, and the Inspector of Mines and their establishments (6), under the grants for Working and Transport of boring rigs (2), for publication of special works in Europe (3), and for additional grant for works executed by Dr. Waagen (2). In Burma the provision of 5 for preservation of archaeological remains, 1 for travelling allowances, and 1 for contingencies of the Archaeological Department was not utilized, and in Madras the saving was due chiefly to the non-utilization of the provision of 3 for revision of the establishment of the Archaeological Survey. Under *Other Scientific Departments* the saving in India was due chiefly to the post of second Assistant Superintendent in the Central Museum having remained vacant, and the excess in Madras was due to the cost of Europe stores supplied to the Kodaikanal Observatory not provided for (1.2), counterbalanced by a saving due to the absence on leave of the Superintendent of the Museum. Under *Veterinary and Stallion Charges* the saving of 3.0 was contributed chiefly by Burma (2.1), and Punjab (1.0), due in both Provinces chiefly to the grants for purchase of bulls and stallions not having been utilized, and in Burma partly also to the full number of Veterinary Assistants not having been entertained. The excess in Burma, as compared with the previous year, was due to the number of such Assistants employed in 1897-98 being larger than in the previous year, and to a larger outlay on medicines and instruments. The saving in Madras was due to less expenditure on pony and mule breeding, and to the employment of officers on famine duty, and in Bombay it was due to the grant for purchase of stallions not having been utilized and to less outlay on the maintenance, etc., of stallions. The increase in India (6) was due chiefly to more expenditure on feed of stallions (1.1), owing to high prices of grains, to payment of grain compensation (3), and to larger contingent expenditure of the Imperial Bacteriologist (4), partly counterbalanced by savings under District Native Establishment (3), and under construction, repairs, and purchase of stables (3); and in Bengal the excess (5) occurred chiefly under contingencies. The excess in Bengal over the actuals of the previous year (1.0) was chiefly due to increase in the pay of lecturers, to larger outlay on hospital necessaries, and in the purchase and keep of cattle. Under *Other Charges* the saving in India (2.0) was due partly to the post of the Agricultural Chemist being vacant for some months, and partly to the grant for miscellaneous expenditure not being fully utilized. The saving in Bombay (1.7) was due chiefly to less expenditure on agricultural experiments (1.0), and to no provincial grants for Public Fairs having been paid to smaller grants for horse and cattle shows. The other variations under this head are not important. Under *Labour and Emigration* the saving in Assam (1.1) was due partly (7) to over-estimate of fees for inspecting tea gardens, and (4) to smaller recoveries from the Assam Administration for the deficit in the transactions of Inland Labour Transport Fund. Under *Statistics* the excess in Burma is due to the expenditure in connection with the preparation of the Upper Burma Gazetteer.

169. In England there was a decrease of 9 in grants for objects of a literary, scientific, or antiquarian character, of 1.0 in the purchase of stallions, and of 2 in the value of stores sent out.

## Section E.—MISCELLANEOUS.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
1,066,6	RECEIPTS . . . . .	1,083,1	899,5	941,0

170. The receipts under this head fell short of the Budget Estimate by 82,1 and the actuals of the previous year by 125,6. The decrease, as compared with the Budget, was chiefly under Exchange (116,0), counterbalanced by an increase of 38,8 under miscellaneous, due to the revaluation of gold coins (12,6), to receipts from unclaimed deposits lapsing to Government (15,0), to fines realized from Frontier tribes and to the commutation value of lapsed Wasika pensions under the first and sixth Oudh Loans (31,0) reduced to the extent of 25,9 by a change in the method of adjusting recoveries on account of partition fees. The falling off, as compared with the actuals of the previous year, occurred chiefly under Exchange (100,2), and under Receipts in aid of Superannuation, Retired and Compassionate allowances (14,7) mainly in England.

171. The receipts under this head are of a fluctuating character. The only variation which calls for notice is the increase under *Contributions for Pensions and Gratuities* in Burma which was due to contributions paid by officers lent to the Burma Railways Company not having been allowed for in the Budget.

172. In England the falling off was in the receipts of the Military Funds and subscriptions to Indian Civil Service Family Pensions.

	Accounts .	11.8	1.7	3.1	6	24.9	8.7	6.0	11.8	11.4	80.0

173. The variations under this head are not large, but it may be explained that the increase under *Receipts from Sale of Stationery* was chiefly in the value of stationery supplied to State Railways. Under *Other Press Receipts* the variations are mainly due to over or under estimates, but in the North Western Provinces the decrease was chiefly due to the High Court now getting private appeals printed at private presses instead of through the Government Press as formerly, and in Punjab it was partly due to a reduction in the rates for printing by the Jail Department.

				TOTAL	+144.2	+160.0	+60.0

174. It is somewhat difficult to compare the Budget Estimate and the accounts owing to the lump reduction on the total of the Budget Estimate. Taking, however, the detailed figures as they stand, apart from the lump deduction, the principal changes are explained below. Under *Guaranteed Companies* the reduction was mainly due to larger receipts for stores both on cash payment and by transfer to Revenue Account of the Bombay, Baroda and Central India (45.7) and the Great Indian Peninsula Railways (101.5), and to an over-estimate of the expenditure on stores and works on the Madras Railway (52.5). The reduction would have been larger by 35.0, but for the improvement in the rate of exchange. The principal variations under *Subsidised Railways* occurred on the Southern Mahratta (including Mysore)

## Section E.—MISCELLANEOUS—continued.

## XXV.—Miscellaneous—continued.

175. The Indian revenue under this head exceeded the Budget Estimate by 38.4 and the actuals of the previous year by 25.8. These improvements were mainly the results of increases of 12.6 in India under *Gain by Exchange on Transactions in India* owing to the re-valuation of gold coins, of 15.0 under *Unclaimed Deposits* and of 31.0 under *Extraordinary Items* in the North-Western Provinces (12.1) and Punjab (19.9), due in the former case to the adjustment of the commutation value of Waseka pensions lapsed to Government under the first and sixth Oudh Loans, and in the latter to fines realized from Frontier tribes in consequence of the recent expeditions, and the decrease of 25.9 under *Miscellaneous Fees, Fines and Forfeitures*, chiefly in Bengal, due to recoveries on account of partition fees being adjusted by deduction from charges under 3.—Land Revenue (para. 60) instead of by credit to this head as hitherto.

176. Under *Unclaimed Deposits* the increase occurred chiefly in Bengal, Punjab and Bombay; in Assam the refunds of lapsed deposits exceeded the amount which lapsed to Government and the excess was debited to 32.—Miscellaneous. Under *Government Audit Fees* the increase was due to the transfer in the Central Provinces and Burma to this minor head from *Other Items* of recoveries from Local Funds of the cost of local audit. The increase under *Contributions* was also due chiefly to the transfer from *Other Items* of recoveries from Incorporated Local Funds for cost of management and Local Audit in the Central Provinces, Assam and Bengal. The decrease under *Rents* was due to the transfer of receipts from staging bungalows to XXXII.—Civil Works. In Madras notwithstanding this transfer the receipts exceeded the Budget chiefly in choultry rents.

177. Under *Other Items* the increase was wholly in Bengal (10.9) and Madras (1.4), in the former 1.6 occurred in the Provincial Section and 11.4 in the Local, partly counterbalanced by the transfer referred to above, and in the latter in the Local Section due to larger sales of avenue clippings and larger receipts under sundries. The decrease in the other Provinces was mainly due to the transfers referred to above. In the North-Western Provinces the fall was chiefly under *Miscellaneous Nazul Receipts*, and in Punjab partly to the closing of the Khyber route (4.0) in consequence of the Afridi rising.

## Section E.—MISCELLANEOUS.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts
5,856,7	EXPENDITURE . . . . .	5,913,0	5,724,5	5,716,8

178. The total expenditure in England and India was less than the Budget Estimate and the actuals of the previous year by 196,2 and 139,9. Apart from Exchange, to which the saving is mostly due, the expenditure in India exceeded the Budget Estimate and the actuals of the previous year by 28,8 and 62,0, respectively, and the sterling charges showed a decrease of 8,3 as compared with the Budget, and an increase of 6,7 when compared with the previous year's actuals. Under Civil Furlough and Absentee Allowances the sterling charges fell short of the Budget by 38,3; under Superannuation the sterling and Indian expenditure exceeded the Budget by 17,5 and 22,5, respectively; under Stationery and Printing there was an excess in India of 13,6 and in England of 6,7, and under Miscellaneous there was a saving in India of 14,7 owing to the transfer to 45.—Civil Works of charges on account of staging bungalows, while the expenditure in England showed an excess of 5,9, chiefly in the cost of Insignia of Indian Orders.

" awaiting sanction of Imperial Government . . . . .		...	...	...	...	5	...	2,7	...	4,6	7,8

179. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 7,6 and 6,4, respectively. The excess occurred in Bengal (4,9), Punjab (2,7), and Bombay (4,6), being due in the first two cases, chiefly to arrear payments, but in Punjab the excess was partly due to a payment of 1,2 to Malik Mani Khan, under the orders of the Government of India. In Bombay the increase was due to the adjustment in connection with the advance for liquidating the debts of Zai-ul-Nissa Ladi Begum, the daughter of Mir Jafar Ali Khan of Surat, partly counterbalanced by the postponement of the grant to the Angria family. The saving in the other Provinces was chiefly due to lapses, but in the North-Western Provinces it was partly counterbalanced by payment of Wasika pensions for an extra month in consequence of the lunar leap year (2,1), and in Madras it was enhanced by a Tanjore pensioner not having drawn her pension for nine months. The excess over the actuals of the previous year was due mainly to the above causes, and in Bengal was enhanced by payment of pension of the

## 27.—Territorial and Political Pensions—continued.

### 28.—Civil Furlough and Absentee Allowances.

180. The charges incurred in this country depend on the number and grade of officers lent to foreign service who happen to be on leave. The figures do not call for any remark save that the trifling excesses in India and the North-Western Provinces require formal sanction. In England the saving (38,3) occurred mainly in the absentee allowances of officers of the Indian Civil Services. The small excesses of 1 in India and 1 in Punjab require to be sanctioned.

185. The Indian expenditure under this head exceeded the Budget Estimate and the actuals of the previous year by 13.6 and 28.9, respectively. The excess occurred mainly under *Purchase of Stationery* (17.5), chiefly in Bengal (16.3) and Madras (3.2); the former was partly covered by an additional grant of 15.0 sanctioned by the Government of India, Finance and Commerce Department letter No. 947-A., dated 24th February 1898, and the latter was covered by an additional grant of 5.0 sanctioned by the Government of India. The excess over the actuals of the previous year also chiefly occurred under this head.

186. Under *Government Presses* the increase in India (3.9) was due to more printing work done in the Central Press in consequence of famine, plague, and the frontier disturbances. In the Branch Press at Simla there was higher expenditure on temporary establishment and overtime allowances. In Assam the excess (1.0) was chiefly due to expenditure incurred in connection with the earthquake, and in Bombay (1.7), it was due chiefly to heavy freight charges on stores received from Europe, to forwarding charges, and to grain compensation. These excesses were more than covered by savings in the other Provinces, the principal being 6.5 in Burma, due to less outlay on extra and overtime establishment (3.2), and to the non-utilization of the provision of 2.0 for stores and stock from England, 1.5 in the North-Western Provinces due to the High Court getting private appeals printed at private presses instead of through the agency of the Government Press as formerly, and 1.4 in Punjab due chiefly to a reduction in the rates for lithographic printing (2.5), counterbalanced by higher charges for temporary establishments in the Civil Secretariat Press, owing mainly to increase in printing work due to famine. Under *Stationery supplied from Central Stores*, the Budget was exceeded in all the Provinces due to under-estimate, the excess in the Central Provinces and Bombay was no doubt largely due to the increased demand in consequence of the famine; and in Madras the high demand is attributed to the completion of the previous year's indents and fuller compliance with indents for 1898-99, to the supply of special water-marked paper for plaints to the Superintendent of Stamps, to famine and to large supplies of type-writers. Under *Other Charges* the only important variations occurred in the

## Section E.—MISCELLANEOUS—continued.

## 20.—Stationery and Printing—continued.

Central Provinces, Bombay and Madras; the excesses (2.3) and (9) in the first two cases respectively were under *Printing at Private Presses*, due in the former to the transfer to the *Pioneer Press* of work formerly done in the Government Press, while in Madras the saving was due chiefly to the provision for printing Settlement Registers not having been utilised.

187. In England the demand for stores was larger than anticipated.

188. The Indian expenditure fell short of the Budget Estimate and the actuals of the previous year by 14.7 and 15.9, respectively. The decrease occurred chiefly under *Petty Establishments*, and was due mainly to the transfer of charges on account of staging bungalows to 45.—Civil Works. Compared with the previous year the decrease was also mainly due to this transfer.

189. Under *Remittance charges* there was an increase of 8.3, contributed mainly by Bombay (4.0), Punjab (2.5), Madras (3.1), and Bengal (1.1), being due in the last two cases, chiefly to transfers to districts affected by the famine, and in Bengal partly also to the removal of money held in Currency chests to Calcutta. In Bombay there were large remittances for resource purposes, and in Punjab in connection with the Frontier disturbances. Under *Charitable Donations* the excess in the Central Provinces was due to payments made for the support of famine orphans. Under *Special Commissions of Enquiry* the expenditure in India represents charges on account of the Indian Famine Commission. Under *Other Items* the excess in India (6) represents the loss incurred by the exchange of Bhopali rupees for Government rupees; the saving in the Central Provinces was due to no adjustment having been made for rent of Telegraph lines; in Assam the excess (1.5) was due to the special contributions of 2.0 and 1 made to the Welsh and the Roman Catholic Missions respectively for the restoration of schools and hospitals in the Khasi Hills destroyed by the earthquake; and in the North-Western Provinces the saving (4.0) was due partly to expenditure on account of plague provided for under this head having been transferred to 24.—Medical (2.5), and partly to savings under books and periodicals (7), and other petty items (8).

190. The increase in England was due to higher expenditure on Insignia of Indian Orders (4.0) and to charges in connection with the Royal Commission on Indian Expenditure, mainly owing to the detention on duty of the Comptroller and Auditor General in England (9), and to larger refunds of fines and penalties incurred by contractors (2.9), partly counterbalanced by smaller payments in respect of stores lost in transit to India (1.8).

## Section F.—FAMINE RELIEF AND INSURANCE.

1896-97. Accounts. 2,126,4 EXPENDITURE Budget. 3,666,2 1897-98. Revised. 5,414,2 Accounts. 5,363,1

191. The failure of crops during the years 1896 and 1897 having necessitated heavy expenditure, provision of 3,641,2 was made in the Budget Estimate for expenditure on direct Famine Relief. An accurate forecast of the expenditure was not possible at the time the Budget was framed owing to the absence of any reliable data regarding the extent to which and the time over which relief operations would be necessary. There being considerable excess of expenditure in many Provinces, the Revised Estimate was raised to 5,391,8 to meet this calamity, which, however, proved to be more than sufficient. As the charges for actual Famine Relief works were expected to exceed the limit fixed in normal years for the Famine Insurance Grant, the charges for the construction of Protective Railways was shown under 48.—State Railways. Provision of 25,0 was made for the construction of *Protective Irrigation Works*. The net charge on the revenues (456,5) for Protective Railways, constructed through the agency of the Companies which is shewn under Railway Revenue Account, brought the Famine Insurance Grant to 4,122,7.

192. The following statement shows the total amount chargeable to this grant, and its distribution:—

*Famine Relief and Insurance.*

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
2,079,5	Famine Relief	3,641,2	5,391,8	5,325,6
46,9	Construction of Protective Irrigation Works	25,0	22,4	37,5
2,126,4	TOTAL	3,666,2	5,414,2	5,363,1

## Section F.—FAMINE RELIEF AND INSURANCE—continued.

## 33.—Famine Relief—continued.

193. The actuals show an excess of 1,681,7 over the Budget Estimate. Of this excess 1,200,1 occurred in the Public Works portion. In Burma, Bengal, and Punjab the Estimates on the whole were sufficient, but in the last two there were excesses in the Provincial portion. There were considerable excesses in the other Provinces, the largest of which occurred in Madras and Central Provinces. The variations were chiefly due to the fact that the Estimates were based on insufficient data.

194. The charges in India are due to the deputation of Mr. James as Vice President of the Charitable Relief Fund, the office expenses of that fund, and the employment of officers on famine duty in Native States. The excess of 54,3 in Punjab under Provincial was due to the transfer of the Famine charges, not falling under Local, from Imperial to Provincial under orders of the Government of India. The following table shows the grants made to cover excess expenditure and the amounts still requiring formal sanction :—

	India.	Central Prov- inces.	Burma.	Assam.	Bengal.	N.W. P. and Oudh.	Punjab.	Mad- ras.	Bom- bay.	TOTAL.
Excess over Budget Grant	4,2	667,1	...	...	...	220,7	...	715,7	372,3	1,980,0
	...	...	...	...	6,2	...	54,3	...	...	60,5
Excess sanctioned by Imperial Government	...	610,0	...	...	...	220,7	...	657,7	295,0	1,782,8
" awaiting sanction of the Imperial Government	6,2	57,1	...	...	...	...	...	56,6	77,3	197,2
Imperial Government { Provincial	...	...	...	...	6,2	...	54,3	...	...	60,5

## 35.—Construction of Protective Irrigation Works.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
...	INDIA	...	...	...
...	N-W. PROVINCES AND OUDH—	...	...	...
4,4	Betwa Canal	2,2	2,7	2,0
...	PUNJAB—	...	...	...
20,3	Swat River Canal	1,0	2,8	2,1
...	MADRAS—	...	...	...
20,4	Rushikulya project	16,9	13,9	14,4
...	BOMBAY—	...	...	...
1,3	Nira Canal	6	6	4
...	Mhasvad tank	5	...	...
4	Chankapur tank	3,8	...	2,1
1	Other Works	...	2,4	16,5
46,9		25,0	22,4	37,5

195. The decrease was due chiefly to the Kalpani Rajbaha of the Swat River Canal having been nearly completed during 1896-97, and partly to the approaching completion of the Rushikulya project. The increase over the Budget and Revised Estimates was mainly due to the transfer to this head of the normal expenditure on famine relief work done on the Chankapur, Maladevi, and Shetphal tanks in Bombay. The excesses of 1,1 in Punjab, and 14,2 in Bombay require to be sanctioned.

**Section G.—37.—CONSTRUCTION OF RAILWAYS (charged against Revenue in addition to that under Famine Insurance).**

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
12.8	EXPENDITURE . . . . .	7.3	4.7	3.8

196. The following are the details of the amount spent under Provincial, nothing having been charged to this head under Imperial, and the explanation of the differences between the Actuals of 1896-97 and 1897-98, as well as between the Actuals and the Budget Estimate of the last-named year :—

PROVINCIAL.							
1896-97. Accounts.			Budget.	1897-98. Revised.	Accounts.		
6.6	ASSAM—						
	Jorhat Railway . . . . .		3.1	1.5	7		
—8	Cherra-Companygunj Railway . . . . .		...	—4	—5		
5.8	TOTAL . . . . .		3.1	1.1	2		
	MADRAS—						
6.9	Mayavaram-Mutpet Railway . . . . .		3.4	2.8	2.8		
	BOMBAY—						
5.2	Hyderabad-Shadipalli Railway . . . . .		8	8	8		
12.8	GRAND TOTAL, PROVINCIAL . . . . .		7.3	4.7	3.8		

197. The net decrease occurred chiefly on the Jorhat Railway, owing to the purchase in the previous year of two locomotive engines and to certain adjustments in connection with English Stores.

## Section H.—RAILWAYS.

198. The following is a general statement of the Revenue Account, taking the gross figures for Guaranteed Railways instead of the net figures shown in the Finance and Revenue Accounts:—

1897-98.	State Railways.	Guaranteed Railways.	Subsidised Companies.	Miscellaneous.	TOTAL.
GROSS RECEIPTS .	19,044.5	5,414.6	15.0	...	24,474.1
WORKING EXPENSES .	8,713.4	3,213.2	...	...	11,926.6
Surplus Profits .	487.8	110.3	...	...	598.1
Interest .	7,182.3	3,377.1	...	...	10,559.4
Annuities .	2,676.7	...	...	...	2,676.7
Land and Supervision .	...	15.9	113.8	...	129.7
Miscellaneous Railway Expenditure .	...	...	...	16.2	16.2
TOTAL EXPENDITURE .	19,060.2	6,716.5	113.8	16.2	25,906.7

## NET GAIN OR LOSS TO GOVERNMENT—

1897-98 .	15.7	-1,301.9	-98.8	-16.2	-1,432.6
1896-97 .	-1,096.7	-1,438.4	-61.0	-63.9	-2,660.0
1895-96 .	493.9	-1,061.8	+7.0	-71.6	-1,620.3
1894-95 .	737.5	-1,535.7	+25.0	-100.3	-2,348.5
1893-94 .	666.3	-778.9	+13.1	-103.4	-1,535.5

199. These figures show that *State Railways* did better than in 1896-97. Under *Receipts* there was an increase of 1,404.9 due to a revival of traffic after the Famine and to the Frontier Expedition, and though the *Expenditure* was more by 323.9 the net result was better than the previous year's by 1,081.0.

200. There was an increase of 276.8 in *Working Expenses* due to increased train mileage run, and a decrease of 57.7 for *Interest* and *Annuities* owing to improvement in Exchange; and there was an increase of 104.8 in the surplus profits paid to companies, consequent on increased earnings.

201. The working of *Guaranteed Railways* resulted in a loss of 1,301.9, which was less by 136.5 than the loss of the preceding year. There was a decrease of 432.8 in the *Net Traffic receipts*, whilst the charge for *Interest* was less by 220.1 by reason of the rise in Exchange.

202. The net loss to Government on the Revenue Account of Railways, as shown above, is considerably affected by the fluctuations in the rate of exchange, which are eliminated in the following figures, showing in each year the net loss or gain for State and Guaranteed Railways, if the rate of exchange had not varied from that of 1886-87:—

	State Railways.	Guaranteed Railways.	TOTAL.
1897-98 .	+ 674.0	-898.8	-224.8
1896-97 .	- 63.1	-823.0	-886.1
1895-96 .	+ 882.2	-232.4	+ 649.8
1894-95 .	+ 856.7	-553.4	+ 343.3
1893-94 .	+ 316.6	-188.9	+ 127.7
1892-93 .	- 234.1	-321.7	-555.8
1891-92 .	+ 315.5	-210.2	+ 105.3
1890-91 .	- 552.5	-262.0	-814.5
1889-90 .	- 746.0	-529.6	-1,275.6
1888-89 .	- 991.1	-682.1	-1,673.2
1887-88 .	-1,002.0	-811.4	-1,813.4
1886-87 .	- 375.1	-675.6	-1,050.7

203. The figures show that the net results, apart from variations in Exchange, improved steadily year by year from 1887-88 to 1895-96, with the single exception of 1892-93, when there was a serious falling off in the wheat export traffic. In 1896-97 traffic receipts were injuriously affected by famine and plague. In the past year, however, owing to a revival of traffic after the famine and to the Frontier expedition, there was an improvement, apart from Exchange, of 661.3.

## Section H.—RAILWAYS—RECEIPTS.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
20,297.8	RECEIPTS . . . . .	20,682.4	21,167.3	21,260.9

204. The following are the items comprised in this group, particulars of which are given in the succeeding statements :—

1896-97. Accounts.		Budget.	1896-97. Revised.	Accounts.
17,639.6	State Railways (gross) . . . . .	18,023.7	18,995.0	19,044.5
2,634.2	Guaranteed Railways (net) . . . . .	2,630.0	2,160.0	2,201.4
24.0	Subsidised Companies . . . . .	28.7	12.3	15.0
20,297.8	TOTAL . . . . .	20,682.4	21,167.3	21,260.9

205. *State Railways.*—The gross receipts were better by 1,404.9 than those of the previous year. The principal increases occurred on the East Indian, North-Western, Oudh and Rohilkhand, Bengal and North-Western, Indian Midland, and Burma Railways.

206. On the East Indian Railway the increase was due chiefly to pilgrim traffic during October and December 1897, which were considered auspicious months for religious ceremonies, as well as during January 1898 in connection with the solar eclipse and the *Māgh mela*; to large despatches of Ordnance and Commissariat stores, and to the running of a great number of troop, extra and mule trains in connection with the North-West Frontier expeditions; to increased traffic in rice, wheat, cotton piece-goods, coal, and railway materials carried for foreign lines. On the North-Western Railway the increase was due chiefly to the Frontier expedition, assisted by the revival of the wheat trade. The increase on the Oudh and Rohilkhand Railway was due to a return to ordinary traffic, the depressing effects of the famine having ceased, and to the Military traffic in connection with the operations on the North-West Frontier. The increase on the Bengal and North-Western Railway was due to the earnings of the previous year having been reduced below the average by reason of the prevailing famine; to the line having been extended; and to the development of traffic *via* Burhwal during 1897-98. The increase on the Indian Midland Railway was due to an improvement in traffic in wheat, oil-seeds, sugar and jagree, salt and piece-goods, the traffic increasing as times became easier, and to increased receipts on account of mileage and demurrage due to the revival of the export trade, as well as to the adjustment of arrears of shunting at joint stations. The increase on the Burma Railway was due to the continued prosperity of Lower Burma, the result of the good crops, the high price of paddy and consequent good trade, and to the general development of the railway.

207. Compared with the Budget Estimate there was an increase of 1,020.8, of which 584.2 occurred on the East Indian Railway, and was due to pilgrim and military traffic receipts; the increases of 482.8 and 83.6 on the North-Western and Indian Midland Railways were due to the same causes which led to the increase as compared with the actuals of the previous year. The increase of 109.3 on the Burma Railway was due to the Budget Estimate having been kept at a moderate figure, as it was considered unlikely that the earnings of the previous year, which were greatly in advance of those of the year before that, would be maintained; a second year, however, of general prosperity made the estimate incorrect.

208. *Guaranteed Railways.*—The net receipts were 432.8 below those of the previous year, the falling off occurred on the Bombay, Baroda and Central India, and Great Indian Peninsula Railways, and was the result of a decrease in the traffic and increase in working expenses of both the Railways. The falling off in traffic was due to famine and plague, and the increase in expenses to heavy outlay in connection with the renewal of carriage and wagon stock.

## Section H.—RAILWAYS—RECEIPTS—continued.

## STATE RAILWAYS—IMPERIAL.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
1,700.2	Coaching . . . . .	1,737.3	1,726.6	1,749.8
3,671.8	Goods . . . . .	3,479.8	4,075.6	4,065.7
78.9	Miscellaneous and Suspense . . . . .	93.2	98.1	69.0
5,450.9	TOTAL . . . . .	5,300.3	5,900.3	5,884.5

209. The receipts, compared with the actuals of the previous year, show an increase of 433.6. There was an increase under *Coaching* of 49.6, the reasons for which have already been given in para. 206. Under *Goods* there was an increase of 393.9, due largely to traffic in rice, wheat, cotton piece-goods, coal and railway materials carried for foreign railways. Compared with the Budget Estimate there was an increase of 584.2. The Budget Estimate was placed at a very low figure, owing to uncertainty as to the prospects of the year in consequence of the plague and the scarcity that prevailed at the time. The famine, however, instead of adversely affecting the traffic, contributed most favourably towards developing the *Goods* traffic of the line by the movement of imported food-grains to the famine-stricken districts. Although the famine and plague affected ordinary *Coaching* traffic to a certain extent, the loss was more than compensated for by the pilgrim and military traffic referred to already. The total receipts of the year would have been still greater had the outstandings on traffic account been realized to the extent anticipated.

## Eastern Bengal Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
522.5	Coaching . . . . .	520.0	483.0	491.8
888.4	Goods . . . . .	920.0	939.2	949.5
89.7	Miscellaneous and Suspense . . . . .	80.0	97.8	88.9
1,500.6	TOTAL . . . . .	1,520.0	1,520.0	1,530.2

210. The receipts were better than those of the previous year by 29.6. There was a decrease of 30.7 under *Coaching* traffic, due, in a great measure, to the stoppage of traffic owing to damages caused by the earthquake of 12th June 1897, and to the famine of 1896-97, which materially affected the 3rd class passenger traffic, plague regulations also affected this traffic. The increase of 61.7 under *Goods* traffic occurred in the last quarter of the year, and was due partly to the splendid jute crop of the year 1897, and partly to the carriage of construction stores for the Hajipur extension of the Tirhoot State Railway, and for the branch lines in connection with the Eastern Bengal Railway. The same causes account for the variations as compared with the Budget and Revised Estimates. No share of net earnings was creditable to the Local Government under the Provincial Contract from 1st April 1897: the year 1896-97 was the last in which a moiety of net receipts was so credited.

## Rajputana-Malwa Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
684.9	Coaching . . . . .	680.0	600.0	610.4
1,265.8	Goods . . . . .	1,540.0	1,317.5	1,326.1
60.3	Miscellaneous and Suspense . . . . .	30.0	42.5	38.0
2,011.0	TOTAL . . . . .	2,250.0	1,960.0	1,974.5

211. Contrasted with the actuals of the previous year the receipts showed a net decrease of 36.5. Under *Coaching* traffic there was a decrease of 74.5, due partly to the stringent measures adopted to restrict the movement of passengers from areas affected by the plague, and partly to the period, April to September 1897, having been considered unpropitious for marriages. There was an increase of 60.3 under *Goods*, due to an improvement in traffic in grain and pulse, salt and sugar, owing to the revival of trade after the famine of 1896. Compared with the Budget Estimate, there were decreases of 69.6 and 213.9 under *Coaching* and *Goods*, respectively, due to the expected improvement in traffic not having been realized.

Section H.—RAILWAYS—RECEIPTS—*continued.*

## North-Western Railway.

1897-98. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
1,065.5	Coaching . . . . .	1,080.0	1,284.0	1,291.7
1,720.5	Goods . . . . .	1,850.0	2,150.0	2,154.6
101.9	Miscellaneous and Suspense . . . . .	70.0	66.0	36.5
2,887.9	TOTAL . . . . .	3,000.0	3,500.0	3,482.8

212. The receipts, as compared with the actuals of the previous year, show an increase of 594.9, due mainly to the Frontier expedition and to the revival of the wheat trade after the famine. The increase would have been still larger, but for the heavy outstandings with the Commissariat. Department in connection with the Frontier expedition. Compared with the Budget Estimate there was an increase of 482.8 due to the same causes.

## Oudh and Rohilkhand Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
	Coaching . . . . .	360.0	380.0	375.2
425.3	Goods . . . . .	480.0	445.0	435.2
98.1	Miscellaneous and Suspense . . . . .	40.0	75.0	71.7
818.6	TOTAL . . . . .	880.0	900.0	882.1

213. Compared with the actuals of the previous year there was an increase of 63.5. The increases under *Coaching* and *Goods* are attributable to a return to ordinary traffic and to the military traffic in connection with the operations on the North-West Frontier. The increase under *Miscellaneous and Suspense* was due almost entirely to receipts for hire of stock lent to the East Indian and Eastern Bengal Railways, and to mileage and demurrage of stock on foreign lines. The actuals approximate closely to the Budget Estimate.

## Bengal-Nagpur Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
154.6	Coaching . . . . .	155.0	132.2	132.7
409.9	Goods . . . . .	447.0	411.0	434.7
48.4	Miscellaneous and Suspense . . . . .	48.0	46.8	47.9
612.9	TOTAL . . . . .	650.0	590.0	615.3

214. Compared with the Budget Estimate there was a decrease of 34.7 due to short export of grain and to plague precautions. Compared with the Revised Estimate there was an increase of 25.3 of which 23.7 occurred under *Goods* traffic, due to the revival of traffic towards the close of the year.

## Section H.—RAILWAYS—RECEIPTS—continued.

## Bengal and North-Western and Tirhoot Railways.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
217.9	Coaching . . . . .	240.0	240.0	240.5
271.9	Goods . . . . .	310.4	290.0	306.2
25.2	Miscellaneous and Suspense . . . . .	69.6	90.0	78.5
<u>565.0</u>	TOTAL . . . . .	<u>620.0</u>	<u>620.0</u>	<u>625.0</u>

215. Compared with the actuals of the previous year there was an increase of 60.0, due to the earnings of 1896-97 having been below the average owing to famine, and to the line having been extended. The variations from the Budget and Revised Estimates are small.

## Indian Midland Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
219.0	Coaching . . . . .	218.7	220.0	221.4
318.5	Goods . . . . .	310.2	368.9	374.3
7	Miscellaneous and Suspense . . . . .	11.1	14.6	21.3
<u>538.2</u>	TOTAL . . . . .	<u>540.0</u>	<u>613.5</u>	<u>617.0</u>
52.5	Deduct -Bhopal Railway earnings . . . . .	55.0	48.5	48.4
<u>485.7</u>	Total Indian Midland Railway proper . . . . .	<u>485.0</u>	<u>565.0</u>	<u>568.6</u>

216. Compared with the actuals of the previous year there was an increase of 82.9, of which 55.8 occurred under *Goods* earnings, due to an improvement in traffic in wheat, oil-seeds, sugar and jagree, and salt and piece-goods. Under *Miscellaneous and Suspense* the increase was due chiefly to receipts on account of mileage and demurrage having increased, and to the adjustment of arrears of shunting at joint stations. Compared with the Budget Estimate, there was an increase of 83.6 due to the causes stated above.

## Southern Mahratta Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
230.9	Coaching . . . . .	240.0	165.0	164.5
409.5	Goods . . . . .	400.0	440.0	443.5
18.4	Miscellaneous and Suspense . . . . .	10.0	10.0	9.5
<u>658.8</u>	TOTAL . . . . .	<u>650.0</u>	<u>615.0</u>	<u>617.5</u>

217. The receipts, as compared with the actuals of the previous year, show a net decrease of 41.5. There was a decrease of 66.4 under *Coaching*, due to a fall in passenger traffic on account of the measures adopted by Government for the prevention of the spread of the plague. Under *Goods* there was an increase of 34.0, due to the larger movements of food grains, owing to the famine. Compared with the Budget Estimate, there was a net decrease of 32.5 due to the same cause which led to the variations as compared with the actuals of the previous year.

## South Indian Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	EARNINGS—			
486.2	Coaching . . . . .	481.0	475.0	475.3
397.6	Goods . . . . .	415.0	389.0	390.0
15.5	Miscellaneous and Suspense . . . . .	14.0	26.0	29.1
<u>899.3</u>	TOTAL . . . . .	<u>910.0</u>	<u>890.0</u>	<u>894.4</u>

218. The variations are not important.

## Section H.—RAILWAYS—RECEIPTS—continued.

Burma Railway.				
1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
EARNINGS—				
405,1	Coaching . . . . .	391,0	425,0	424,7
388,6	Goods . . . . .	355,0	400,0	421,1
10,6	Miscellaneous and Suspense . . . . .	14,0	20,0	13,5
804,3	TOTAL . . . . .	760,0	845,0	869,3

\* Includes Mu Valley and Provincial receipts.

219. Compared with the actuals of the previous year there was an increase of 65,0, of which 29,6 and 32,5 occurred under *Coaching* and *Goods*, respectively, due to the continued prosperity of Lower Burma, the result of the good crops, the high price of paddy and consequent good trade, and to the general development of the Railway. Compared with the Budget Estimate, the increase was 109,3. It was thought to be improbable that the earnings for the year would keep up to the standard of 1896-97.

## Other State Railways—Imperial.

1896-97. Accounts.	Budget.	1897-98. Revised.	Accounts.
888,6	940,8	1,035,9	1,042,0

220. Compared with the actuals of the previous year there was an increase of 153,4, the principal being those of 24,9 on the Bengal Central Railway, of 40,2 on the Assam Bengal Railway, of 10,6 on the Lucknow-Bareilly Railway, of 15,0 on the Guntakal-Mysore Frontier Railway, and of 31,5 on the Mysore State Railway, due to the development of passenger and goods traffic and of 40,2 on the East Coast Railway, due to development of traffic on the sections recently opened to traffic. There were other small increases and decreases, which are unimportant.

221. The actuals exceeded the Budget Estimate by 101,2. There were increases, aggregating 138,7, of which the principal were 23,4 on the Bengal Central Railway, 18,7 on the Guntakal-Mysore Frontier Railway, 39,9 on the Mysore State Railway, and 46,2 on the East Coast Railway, due to general development of passenger and goods traffic; whilst the decreases amounted to 37,5, of which 23,4 was on the Assam-Bengal Railway, due to the great loss in the earnings caused by the earthquake of June 1897 and the severe cyclone which visited the Chittagong end of the line in October of the same year.

## STATE RAILWAYS—PROVINCIAL.

1896-97. Accounts.	Budget.	1897-98. Revised.	Accounts.
56,0	57,6	53,8	58,3

\* Omitting Eastern Bengal and Burma Railways.

222. The variations are small.

## Section H.—RAILWAYS—RECEIPTS—continued.

## XXVII.—Guaranteed Companies—Net Traffic Receipts.

ACCOUNTS, 1896-97.			GUARANTEED RAILWAY COMPANIES.	BUDGET, 1897-98.			REVISED, 1897-98.			ACCOUNTS, 1897-98.			Guaranteed interest, 1897-98.	Total Receipts less Charges.
Gross Receipts.	Working Expenses.	Net.		Gross Receipts.	Working Expenses.	Net.	Gross Receipts.	Working Expenses.	Net.	Gross Receipts.	Working Expenses.	Net.		
1,321,6	716,3	805,3	Bombay, Baroda and Central India	1,600,0	800,0	800,0	1,390,0	770,0	620,0	1,401,2	780,0	611,2	681,6	36.27
3,063,8	1,784,0	1,379,8	Great Indian Peninsula	3,030,0	1,750,0	1,300,0	2,830,0	1,800,0	970,0	2,873,1	1,873,7	999,4	1,863,3	67.23
1,099,8	550,7	549,1	Madras	1,090,0	560,0	530,0	1,140,0	570,0	570,0	1,139,7	550,6	589,1	833,2	48.39
5,485,2	3,051,0	2,434,1	Total	5,720,0	3,110,0	2,630,0	5,360,0	3,200,0	2,160,0	5,414,0	3,213,3	2,200,7	3,377,1	56.34

## Gross Receipts.

223. The actual receipts during the year under review fell short of those of the previous year by 270,6. The decrease occurred on the Bombay, Baroda and Central India and Great Indian Peninsula Railways due to famine and plague, while on the Madras Railway there was an increase, owing to the improvement in traffic in grain and pulse.

The total gross receipts have fallen short of the Budget Estimate by 325,4 as under:—

Bombay, Baroda and Central India Railway . . . . .	—198,2
Great Indian Peninsula Railway . . . . .	—176,9
Madras Railway . . . . .	+49,7

224. The decrease on the Bombay, Baroda and Central India Railway occurred both under *Coaching* and *Goods*, but principally in *Coaching*, due to the movements of the population being restricted by the plague regulations. On the Great Indian Peninsula Railway famine, combined with plague, was the cause of the decrease. The increase on the Madras Railway is attributed chiefly to large movements of grain owing to the famine.

## Working Expenses.

225. The total working expenses were more than those of the previous year by 162,2. The increase on the Bombay, Baroda and Central India Railway is accounted for chiefly by the heavy expenditure in connection with the renewal of carriage and wagon stock, and that on the Great Indian Peninsula Railway is attributed to heavier replacements of axles, and to repairs and renewals of a larger number of vehicles.

The actual expenses exceeded the provision made in the Budget Estimate by 103,2, as follows:—

Bombay, Baroda and Central India Railway . . . . .	—11,1
Great Indian Peninsula Railway . . . . .	+123,7
Madras Railway . . . . .	—9,4

226. The increase on the Great Indian Peninsula Railway is accounted for by the abnormal expenditure on the replacement of axles and by increased traffic in the last three months of the year.

## Section H.—RAILWAYS—RECEIPTS—concluded.

## XXVIII.—Subsidised Companies (Repayment of Advances of interest).

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	INDIA—			
24.0	Mysore Railway . . . . .	28.7	10.3	13.0
	ENGLAND—			
...	Rohilkund-Kumaon Railway . . . . .	...	1.3	1.3
...	Exchange . . . . .	...	7	7
24.0	TOTAL . . . . .	28.7	12.3	15.0

227. The credit under India represents the amount recoverable from the Mysore Durbar in settlement of the net charge for interest paid to the Southern Mahratta Railway Company in connection with the Mysore Railway. The details of the amounts recoverable are given below:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	INDIA—			
	MYSORE RAILWAY—			
79.7	Interest on Capital . . . . .	79.7	74.9	75.0
6.5	Less—Charge for interest borne by Government for the unexpended balance of the Capital retained in its hands . . . . .	6.0	4.6	5.4
73.2		73.7	70.3	69.6
49.2	Net receipts . . . . .	45.0	60.0	56.6
24.0	Net charge for interest recoverable from the Mysore Durbar . . . . .	28.7	10.3	13.0

228. The credit under England represents the Government share of surplus profits of the Rohilkund-Kumaon Railway paid to the Secretary of State in England.

## Section H.—RAILWAYS—EXPENSES.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
22,957.8	EXPENDITURE . . .	23,499.2	22,801.3	22,693.5

229. The actuals were less than those of the previous year by 264.3, and than the Budget Estimate by 805.7. The charges on account of exchange were, however, lower than the actuals of the previous year by 536.8 and than the Budget Estimate by 585.7. The following figures detail the expenditure under the several heads, exchange being shown separately so as to bring out the variations apart from that item :—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>STATE RAILWAYS—</b>

<b>SUBSIDISED COMPANIES—</b>				
85.0	Land . . . . .	236.2	110.8	113.8
63.9	<b>MISCELLANEOUS RAILWAY</b>			
	<b>EXPENDITURE . . .</b>	60.0	23.6	16.2
<u>22,957.8</u>		<u>23,499.2</u>	<u>22,801.3</u>	<u>22,693.5</u>

230. Under *State Railways*, compared with the actuals of the previous year, there was an increase of 381.6 in Working Expenses due to the heavier traffic worked; and of 154.5 in Interest on Debt resulting from the progress of State Railway construction; while under *Guaranteed Companies* there was a decrease of 349.2 in Surplus Profits, etc., due chiefly to the Great Indian Peninsula Railway not having earned any surplus in the first half of 1897, and to the share paid to the Bombay, Baroda and Central India Railway Company being less than in the previous year by 120.2.

231. The increase compared with the Budget Estimate under Working Expenses of State Railways 173.9 was due to improvement in traffic. Under Guaranteed Railways the decrease was chiefly due to the Bombay, Baroda, and Central India Railway having earned no

## Section H.—RAILWAYS—EXPENSES—continued.

surplus during the second-half of 1897, and to the provision for land to be acquired for the Calicut-Cannanore Branch of the Madras Railway having been only partially utilized owing to delay in commencement of construction operations.

## 38.—State Railways—Working Expenses.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
8,819,6	EXPENDITURE	9,027,3	9,299,1	9,201,2

232. The details of these amounts by individual railways are given on page 87. An explanation of the increases over the actuals of the previous year, and over the figures of the Budget Estimate is given below. There was an excess of 168,5 under Imperial, which was covered by an additional grant sanctioned in Finance and Commerce Department No. 5430-A., dated 16th December 1897. Under Provincial there was an excess in Assam of 5,5, of which 5,3 was sanctioned by the Local Government, and a still require to be sanctioned; in Bombay there was an excess of 1,8, which still awaits sanction.

## STATE RAILWAYS—IMPERIAL.

## East Indian Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
WORKING EXPENSES—				
457,7	Maintenance	462,6	450,0	403,0
454,8	Locomotive	448,9	461,0	472,4
165,8	Carriage and Wagon	160,7	170,0	146,7
332,7	Traffic	320,0	350,0	352,8
277,7	General, Miscellaneous and Suspense	250,8	276,0	304,9
1,688,7	TOTAL WORKING EXPENSES	1,643,0	1,707,0	1,679,3
160,3	Share of surplus profits paid to the Company, and contribution to Provident Fund	157,0	273,0	273,9
1,849,0	TOTAL	1,800,0	1,980,0	1,953,2

233. The chief variations were increases in *Locomotive and Traffic* expenses, owing to increased traffic and improved lighting of vehicles, and decreases in *Maintenance and Carriage and Wagon*, due to various petty causes. Under *Company's Share of Surplus Profits, etc.*, the increase was due to increased earnings.

## Eastern Bengal Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
WORKING EXPENSES—				
126,0	Maintenance	123,8	137,7	135,0
147,0	Locomotive	165,4	171,0	166,1
47,2	Carriage and Wagon	58,0	43,0	48,2
139,9	Traffic	136,7	145,0	147,2
150,0	General, Miscellaneous and Suspense	124,1	173,3	164,9
604,1	TOTAL	608,0	670,0	666,4

234. The main variations were the increases under *Maintenance* due to repairs of damages caused by the earthquake of 12th June 1897, under *Locomotive* expenses due to the replacement of 6 broad-gauge locomotive engines, and increase under *General, Miscellaneous and Suspense* due to increases under Secretary of State's charges, salaries of management and accounts establishment; to hire of locomotives from the Oudh and Rohilkhand Railway, and to mileage and demurrage of foreign vehicles owing to the increased traffic.

## Section H.—RAILWAYS—EXPENSES—continued.

## Rajputana-Malwa Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
191.2	Maintenance . . . . .	187.1	217.3	202.2
354.2	Locomotive . . . . .	412.3	354.1	341.2
88.8	Carriage and Wagon . . . . .	98.6	93.4	92.4
156.6	Traffic . . . . .	162.3	159.0	161.0
152.0	General, Miscellaneous and Suspense . . . . .	148.2	144.0	139.2
942.8	<b>TOTAL WORKING EXPENSES</b>	1,008.6	967.8	936.0
	Share of surplus profits paid to the Bombay, Baroda and Central India Railway Company, and contribution to Provident Fund . . . . .	101.4	47.2	56.1
84.1				
1,026.9	<b>TOTAL</b>	1,110.0	1,015.0	993.0

235. Compared with the actuals of the previous year there was a decrease under *Locomotive* expenses 13.0, due to reduced consumption of coal and to the carriage of less coal, and under *General, Miscellaneous and Suspense* 12.8, due chiefly to fluctuations in suspense accounts. The decrease of 28.0 in *Surplus Profits, etc.*, was due to the result of the year's working having proved less favourable than that of 1896-97. Compared with the Budget Estimate the principal variation was under *Locomotive* expenses, where there was a saving of 71.1, due mainly to excess provision having been made under running expenses, fuel, and unclassified expenditure. The decrease of 43.3 under *Surplus Profits, etc.*, was due to the net result of the year's working having proved much less satisfactory than anticipated.

## North-Western Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
589.2	Maintenance . . . . .	622.0	610.1	558.8
590.5	Locomotive . . . . .	572.6	663.0	691.7
123.3	Carriage and Wagon . . . . .	157.4	126.2	121.4
260.2	Traffic . . . . .	275.0	279.4	277.6
147.4	General, Miscellaneous and Suspense . . . . .	173.0	191.3	180.8
1,710.6	<b>TOTAL</b>	1,800.0	1,870.0	1,830.2

236. There was a decrease under *Maintenance*, due to the rush of traffic in connection with the Frontier expedition, and the general restriction of expenditure ordered by the Government of India having interfered with work. The increases under other heads were due to increased traffic.

## Oudh and Rohilkhand Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
132.2	Maintenance . . . . .	124.0	121.5	115.7
108.9	Locomotive . . . . .	166.5	160.0	154.7
82.6	Carriage and Wagon . . . . .	38.0	46.0	43.7
77.4	Traffic . . . . .	78.5	78.5	77.4
49.0	General, Miscellaneous and Suspense . . . . .	63.0	69.0	70.0
450.1	<b>TOTAL</b>	472.0	475.0	461.5

237. Contrasted with the actuals of the previous year the decrease under *Maintenance* was due to less extensive renewals of permanent-way and girders, while under *Locomotive* the increase was due entirely to special renewals of locomotives. Under *Carriage and Wagon* the decrease was due to reduced outlay on renewals of coaching and goods stock.

## Bengal-Nagpur Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
104.0	Maintenance . . . . .	97.0	70.3	70.2
98.4	Locomotive . . . . .	93.5	93.7	92.8
26.8	Carriage and Wagon . . . . .	26.2	25.0	25.0
33.4	Traffic . . . . .	55.2	57.0	56.8
69.9	General, Miscellaneous and Suspense . . . . .	68.1	64.0	72.3
332.5	<b>TOTAL</b>	340.0	310.0	317.1

238. Reduced expenditure on relaying the Katni-Umaria Section accounts for the decrease under *Maintenance*.

## Section H.—RAILWAYS—EXPENSES—continued.

## Bengal and North-Western and Tirhoot Railways.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
71.0	Maintenance . . . . .	71.0	71.3	71.6
51.2	Locomotive . . . . .	56.0	53.0	54.5
16.3	Carriage and Wagon . . . . .	17.0	15.2	15.5
44.8	Traffic . . . . .	43.6	47.2	46.1
76.0	General, Miscellaneous and Suspense . . . . .	71.4	74.1	69.3
176.0	Share of net earnings paid to the Company, and contribution to Provident Fund . . . . .	197.4	199.2	184.3
437.3	<b>TOTAL</b> . . . . .	458.4	460.0	443.3

239. Compared with the actuals of the previous year and the Budget Estimate the variations under the several heads of expenditure are small.

## Indian Midland Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
60.1	Maintenance . . . . .	63.0	68.5	66.4
112.8	Locomotive . . . . .	110.0	120.0	119.4
26.0	Carriage and Wagon . . . . .	25.0	26.0	26.7
46.2	Traffic . . . . .	45.0	48.3	49.7
77.2	General, Miscellaneous and Suspense . . . . .	77.0	75.5	77.3
322.3		320.0	338.8	341.5
32.4	<i>Deduct—Working expenses of Bhopal State Railway</i> . . . . .	30.0	28.8	28.9
289.9	<b>Total Indian Midland Railway</b> . . . . .	290.0	310.0	312.6

240. The increase as compared with the actuals of the previous year was due to renewals of rails on the Scindia Section, to payment of grain compensation to gangmen, to heavier train mileage and to larger expenditure on repairs.

## Southern Mahratta Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
84.9	Maintenance . . . . .	84.5	84.5	83.7
132.6	Locomotive . . . . .	132.0	129.7	125.2
28.2	Carriage and Wagon . . . . .	34.5	26.6	26.7
65.2	Traffic . . . . .	67.0	63.0	61.8
61.3	General, Miscellaneous and Suspense . . . . .	64.5	63.9	68.1
372.2	<b>TOTAL WORKING EXPENSES</b> . . . . .	382.5	367.7	365.5
75.6	Share of net earnings paid to the Company, and contribution to Provident Fund . . . . .	67.5	72.3	72.4
447.8	<b>TOTAL</b> . . . . .	450.0	440.0	437.9

241. The variations are unimportant and are due to falling off in traffic.

## South Indian Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES—</b>				
209.4	Maintenance . . . . .	216.5	200.4	203.0
173.9	Locomotive . . . . .	194.0	169.4	168.3
48.1	Carriage and Wagon . . . . .	63.3	52.0	51.3
80.6	Traffic . . . . .	84.5	82.0	81.5
74.7	General, Miscellaneous and Suspense . . . . .	71.5	70.3	69.0
486.7	<b>TOTAL WORKING EXPENSES</b> . . . . .	530.0	475.0	473.1
30.2	Share of net receipts paid to the Company, and contribution to Provident Fund . . . . .	25.0	35.0	34.8
516.9	<b>TOTAL</b> . . . . .	555.0	510.0	507.9

## Section H.—RAILWAYS—EXPENSES—continued.

## South-Indian Railway.—continued.

242. The *Working Expenses* show a decrease under *Maintenance* due to smaller renewals with 50 lbs. rails, and under *Locomotive* to the cheaper rate at which coal was obtained, and to five engines ordered from England to replace condemned ones not having arrived owing to the engineers' strike. The increase in the Company's share of net receipts and contribution to Provident Fund was due to the increased net earnings of the year.

## Burma Railway.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>WORKING EXPENSES.</b>				
123.6	Maintenance . . . . .	110.0	118.8	131.7
147.9	Locomotive . . . . .	140.0	153.0	155.3
37.6	Carriage and Wagon . . . . .	40.0	42.3	40.8
85.0	Traffic . . . . .	82.0	90.0	90.4
67.8	General, Miscellaneous and Suspense . . . . .	75.5	84.4	85.0
461.9	<b>TOTAL WORKING EXPENSES</b> . . . . .	447.5	498.4	503.2
...	Share of surplus profits, etc. . . . .	...	16.6	16.6
461.9	<b>TOTAL</b> . . . . .	447.5	515.0	519.8

\* Includes Ma Valley and Provincial share.

243. Compared with the actuals of the previous year there was an increase in the working expenses of 41.3. The increase under *Maintenance* 81 was due to very heavy repairs to bridges and lines which were damaged by floods; to the reconstruction of station buildings at Katha which were burned down, and to the payment throughout the year of contribution for leave and pension against payment for only a portion of the previous year; the increases under the other heads were due to opening of new stations and increased traffic, and to increased running expenses consequent on increased train mileage; to charges for police pertaining to the entire period from the transfer of the Railway to a company up to 31st March 1898 having been adjusted in the accounts for 1897-98, and to a large increase under Home Board and Government supervision.

## Other State Railways—Imperial.

1896-97. Accounts.	Budget.	1897-98. Revised.	Accounts.
602.2	633.0	666.1	679.6

244. The actuals exceeded those of the previous year by 77.4. The heavier traffic mileage on the Assam-Bengal, Bengal Central, Lucknow-Barcilly, Guntakal-Mysore Frontier, Mysore State, and East Coast Railways accounted for the greater part of the increases. As compared with the Budget Estimate there was a falling off on the Assam-Bengal Railway, 14.2, due to portions of the line being closed to traffic owing to damage done by the earthquake of June 1897 and the cyclone of October of the same year.

## State Railways—Provincial.

1896-97. Accounts.	Budget.	1897-98. Revised.	Accounts.
37.6	39.3	42.3	44.7

\* Excludes Burma Railway.

245. The variations are unimportant. The excess has been partly covered by additional grants, vide para. 232.

## Section H.—RAILWAY EXPENSES—continued.

## 3A.—State Railways.

	Stock issued for purchase of Railway and in Redemption of Debentures and Debenture Stock—			
—5	3½ per cent. . . . .	312.3	312.3	—5
310.0	3 " . . . . .			310.0
2.2	Sinking Fund . . . . .			2.2
	South Indian Railway—			
24.2	Debenture Stock . . . . .	16.7	16.7	24.2
3.8	Stock issued in Redemption of Debentures . . . . .			7.6
119.9	Stock issued for purchase of Railway and in Redemp- tion of Debentures . . . . .			119.9
4,807.8	TOTAL INTEREST ON CAPITAL . . . . .	4,988.2	4,968.1	4,968.3
644.7	EXCHANGE . . . . .	640.9	543.8	546.8
5,452.5	TOTAL INTEREST ON DEBT . . . . .	5,629.1	5,511.9	5,509.1

246. There was a decrease in the actuals as compared with those of the previous year and with the Budget Estimate in charges for exchange owing to the rise in the rate of exchange. Omitting exchange, the charges approximate closely to the Budget but exceed those of the previous year as the Capital found by Government is increasing year by year with the progress of construction.

## Interest on Capital found by Government.

247. The following statement shows how the interest charged in the accounts of 1897-98 has been calculated:—

CAPITAL EXPENDITURE ON WHICH INTEREST IS CHARGEABLE.					
	E. I. Ry. 3½ per cent.	E. B. Ry.	Other State Railways.	TOTAL.	
Capital Expenditure at end of 1896-97 . . . . .	363.2	3,994.3	7,695.3	82,293.9	93,420.3
Capital Expenditure during 1897-98 . . . . .	308.7	—	399.4	2,927.7	3,635.8
Capital Expenditure at end of 1897-98 . . . . .	254.5	3,994.3	8,094.7	85,221.6	97,056.1
Debentures discharged . . . . .	—	3,546.7	815.6	—	4,362.3
INTEREST.					
Interest on Capital Account at beginning of the year . . . . .	19.7	159.8	307.8	3,191.8	3,739.7
Interest on Debentures, etc., discharged . . . . .	—	141.9	32.6	—	174.5
Half a year's interest on Capital spent during the year . . . . .	3.4	—	8.1	58.6	72.1
TOTAL . . . . .	14.3	301.7	348.5	3,250.4	3,986.3
24d—½ per cent. on the Holkar Loan of a crore, which bears 4½ per cent. interest . . . . .	—	—	—	5.0	5.0
TOTAL INTEREST CHARGED, 1897-98 . . . . .	14.3	301.7	348.5	3,255.4	3,991.3
" " " 1896-97 . . . . .	5.9	301.7	331.9	3,204.5	3,832.2

## Section H.—RAILWAYS—EXPENSES—continued.

## Annuities in Purchase of Railways (including Sinking Funds).

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
ENGLAND—				
1,161.3	East Indian Railway . . . . .	1,178.6	1,178.6	1,178.6
121.7	Eastern Bengal Railway . . . . .	121.9	121.9	121.9
409.6	Sind, Punjab and Delhi Railway . . . . .	412.0	412.0	412.9
1,712.6	TOTAL ENGLAND . . . . .	1,712.5	1,712.5	1,712.4
1,131.7	EXCHANGE . . . . .	1,130.2	959.0	964.3
2,844.3	GRAND TOTAL . . . . .	2,842.7	2,671.5	2,676.7

248. The sterling payments agree closely with the actuals of the previous year and the Budget Estimate, but the charge for exchange was lower than the actuals of the previous year and the Budget Estimate, owing to the rise in the rate of exchange.

## Interest chargeable against Companies on advances.

363.5		363.4	341.5	341.2
404.7	TOTAL . . . . .	445.0	417.7	429.9

## Interest.

249. The interest chargeable against the Companies on the advances made by the Secretary of State from funds raised under the provisions of the Oudh and Rohilkhand Railway Purchase Act is shown under this head in England. There is no variation in the sterling amounts. The figures under "India" represent interest on the expenditure incurred in India on the extensions of the Bengal Nagpur and Indian Midland Railways, which is met from rupee advances.

## Section H.—RAILWAYS—EXPENSES—continued.

## Interest on Capital Deposited by Companies.

477.5	EXCHANGE . . . . .	518.0	439.5	441.9
1,215.2	Total . . . . .	1,347.5	1,240.6	1,243.3

## Interest.

250. The increase in the sterling payments over the actuals of the previous year occurred on the Assam, Bengal, Southern Mahratta, Burma and Bengal-Nagpur Railways, consequent on the additional capital paid up by the Companies; and under the East Indian Railway on account of capital raised by the issue of debentures.

28.1	TOTAL LAND AND SUPERVISION . . . . .	145.4	28.6	15.9
475.4	GRAND TOTAL . . . . .	303.0	145.8	126.2

## Section H.—RAILWAYS—EXPENSES—continued.

## 39.—Guaranteed Companies—Surplus Profits, Land and Supervision—continued.

## Surplus Profits.

251. The decrease, as compared with the actuals of the previous year, was due to no surplus having been earned by the Great Indian Peninsula Railway during the half-year ended 30th June 1897, and to the share of profits paid to the Bombay, Baroda and Central India Railway being less owing to a fall in traffic; there was, however, an increase in the share of profits paid to the Madras Railway Company. Contrasted with the Budget Estimate the decrease was due to the Bombay, Baroda and Central India Railway Company having earned no surplus in the second-half of 1897.

## Land and Supervision.

252. The decrease, as compared with the actuals of the previous year, was due to the formation of a separate Consulting Engineer's Office in Rangoon; and to payments for land required for the "Sal Cotlaur junction arrangements" in Madras having been for the most part liquidated in 1896-97. The lapse on the Budget Estimate was due principally to the provision made for the cost of land to be acquired for the Calicut-Cannanore Branch of the Madras Railway, not having been utilized in full owing to delay in the commencement of construction operations.

## 39.—Guaranteed Companies—Interest.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
INTEREST—				
8,2	India	7,2	8,8	8,9
2,161,0	England	2,169,4	2,154,8	2,154,8
2,169,2		2,176,6	2,163,6	2,163,7
7,418,0	EXCHANGE	7,431,8	7,406,7	7,413,4
3,597,2				
	TOTAL	3,608,4	3,370,3	3,377,1

253. The increase in the charges in India, compared with those of the previous year, was due to the Railway Companies having overdrawn their capital to a greater extent than in 1896-97.

## 40.—Subsidised Companies—Land, Subsidy and Interest.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
IMPERIAL—				
...	Bhagulpur-Bansi-Baidyanath Railway—(Land)	51,5	...	...
...	Brahmaputra-Sultanpur Railway—(Land)	30,0	5,0	2,5
4	Mymensingh-Jamalpur Railway—(Land)	21,5	7,0	5,8

10,1	TOTAL PROVINCIAL	10,1	10,2	10,2
85,0	GRAND TOTAL	236,3	110,8	113,8

## Section H.—RAILWAYS—EXPENSES—continued.

## 40.—Subsidised Companies—Land, Subsidy and Interest—continued.

254. Compared with the actuals of the previous year there was a net increase of 28.8. Of this increase is due to the acquisition of land for new railway lines, and the balance for old lines, chiefly the Nagal and North-Western and South Behar Railways. Compared with the Budget Estimate the outlay was due chiefly to amounts set aside for the Bhagalpur-Baidyanath, Hardwar-Dehra and Jhansi-Quilon Railways not having been utilized, and to the provision for the Brahmaputra-Sultanpur, Jhansi-Jabalpur, Nagal and North-Western, and the Tapti Valley Railways having been only partly utilized. The small excess of 1 under Provincial requires to be sanctioned.

## 41.—Miscellaneous Railway Expenditure.

63.9	<b>TOTAL IMPERIAL AND PROVINCIAL</b> . . . . .	60.0	23.6	16.2

255. The total outlay under *Imperial* is less than that of the previous year by 48.2. No useful comparison can be made between the outlay of the two years by individual projects, as surveys are being completed and new surveys are being started every year. During the year new surveys were taken in hand, and others, for which provision was made in the Budget Estimate, were not commenced, the result being that the expenditure was less by 44.5 than the Estimate. The excess of 7 under Provincial was covered by additional grants.

## Section J.—IRRIGATION.

256. The following is a general summary of the results under the head Irrigation :—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<i>Major Works—</i>				
2,068,0	Direct Receipts . . . . .	1,918,1	2,435,1	2,377,7
871,8	Land Revenue due to Irrigation . . . . .	940,5	925,1	964,7
<u>2,939,8</u>	<b>TOTAL RECEIPTS</b> . . . . .	<u>2,908,6</u>	<u>3,360,2</u>	<u>3,342,4</u>
871,2	Working Expenses . . . . .	859,8	887,9	892,1
1,253,5	Interest . . . . .	1,285,0	1,284,1	1,284,3
<u>2,124,7</u>	<b>TOTAL EXPENDITURE</b> . . . . .	<u>2,144,8</u>	<u>2,172,0</u>	<u>2,176,4</u>
<u>815,1</u>	<b>Net Receipts (Major Works)</b> . . . . .	<u>763,8</u>	<u>1,188,2</u>	<u>1,166,0</u>
<i>Minor Works and Navigation—</i>				
210,9	Receipts (excluding Land Revenue) . . . . .	213,9	230,9	227,4
1,126,3	Expenditure . . . . .	966,9	966,2	957,7
<u>915,4</u>	<b>Net Expenditure (Minor Works)</b> . . . . .	<u>753,0</u>	<u>735,3</u>	<u>740,3</u>
<u>-100,3</u>	<b>Net Revenue (Irrigation)</b> . . . . .	<u>10,8</u>	<u>452,9</u>	<u>425,7</u>

257. The final net result of the year was better than the actuals of the previous year by 526,0 and than the Budget Estimate by 414,9. This was due principally to the large increase of revenue from major works owing to the seasons having been very favourable for canal irrigation on account of drought.

## Section J.—IRRIGATION—RECEIPTS.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
3,150.7	REVENUE . . .	3,122.5	3,591.1	3,569.8

253. The actual receipts in 1897-98 exceeded those of the previous year by 419.1, and the Budget Estimate by 447.3. The increase was due chiefly to the exceptionally dry nature of the seasons, and partly to the development of irrigation from the Chenab Canal and the Godavari and Kistna Delta systems. The increase, due to the latter cause, was to a large extent provided for in the Budget Estimate.

## XXIX and 42.—Major Works.

## Section J.—IRRIGATION—RECEIPTS—continued.

## Direct Receipts—Imperial Works.

259. The gross revenue in 1897-98 exceeded that of the previous year by 136,2 and the Budget Estimate by 179,2. Of these increases 120,4 and 176,1 respectively occurred in the Punjab, due chiefly to the unusually dry nature of the seasons, and partly to the development of irrigation from the Chenab Canal. Of the increase over the previous year 5,4 occurred in the North-Western Provinces and Oudh owing to the recovery of outstanding balances of the previous year, and 9,9 in Bombay, contributed chiefly by the Nira and Krishna Canals, owing partly to a larger area having been brought under the influence of irrigation and partly to scanty rainfall on lands watered by the Nira Canal.

## Direct Receipts—Provincial Works.

260. The gross revenue in 1897-98 was better than that of the previous year by 173,5 and the Budget Estimate by 230,4. The increase was due to the very large demand for canal water both in Bengal and the North-Western Provinces and Oudh, owing to the unusually dry nature of the *rabi* season of 1896-97 and the larger area irrigated during the *kharif* season of 1897.

## XXIX.—Major Works—Indirect Receipts.

## Portion of Land Revenue due to Irrigation.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
117,5	N.-W. Provinces and Oudh . . . . .	117,5	117,5	117,5
53,1	Punjab . . . . .	52,3	57,0	57,9
604,3	Madras . . . . .	676,3	650,0	675,1
96,9	Bombay . . . . .	94,4	100,6	114,8
871,8	TOTAL . . . . .	940,5	925,1	964,7

261. The share of land revenue credited to irrigation works during 1897-98 exceeded that of the previous year by 92,9 and the Budget Estimate by 24,2. The increase over the previous year occurred mainly in Madras, and was due chiefly to the development of irrigation from the Godavari and Kistna Delta systems and the Periyar project. The increase, as compared with the Budget Estimate, in the Punjab was due to the revenue credited to the Swat river canal having been transferred to this head after the Budget Estimate had been prepared; and in Bombay to favourable inundation and better working of canals.

## XXX.—Minor Works and Navigation.

1896-97. Accounts.			Budget.		1897-98. Revised.		Accounts.

A.—Imperial.

B.—Provincial and Local.

## Imperial Works.

262. The actual receipts during 1897-98 exceeded those of the previous year by 6,8, and the Budget Estimate by 4,2. The increase occurred in India and the Punjab. The increase in India occurred in Baluchistan, where the revenue is recovered in kind, and was due to a larger area having been irrigated, and to rates for grain having slightly increased. In the Punjab it was due to the revision of settlement in the Dera Ghazi Khan District.

## Provincial and Local Works.

263. The actual collections of the year 1897-98 were better than those of the previous year by 9,7 and than the Budget Estimate by 9,3. The increase was contributed chiefly by the North Western Provinces and Oudh and the Punjab. In the former it was due to the great demand for canal water owing to drought, and in the latter it occurred in the revenue from the canals and bunds in charge of Civil officers.

## Section J.—IRRIGATION—EXPENDITURE.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
3,251,0	EXPENDITURE . . . . .	3,111,7	3,138,2	3,144,1

264. The expenditure in 1897-98 was less than that of the previous year by 106,9. The decrease was due to the restriction of expenditure during 1897-98 on works classed as "Minor Works and Navigation" owing to famine. The decrease would have been larger had it not been for an increase in the cost of working and maintenance necessitated by increased irrigation, and an increase in the interest charges on the Capital outlay of the year. The increase over the Budget Estimate was mainly due to the increased maintenance charges referred to above.

## 42.—Major Works—Working Expenses.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
504,5	Imperial Works . . . . .	475,0	503,9	506,2
366,7	Provincial Works . . . . .	384,8	384,0	385,9
871,2	TOTAL . . . . .	859,8	887,9	892,1

(For details see page 106.)

## Imperial Works.

265. The total expenditure in 1897-98 was only 1,7 more than that of the previous year; but compared by Provinces there were some large variations, as shown below:—

*Punjab.*—The increase of 8,9 was due to increased maintenance charges on the Chenab canal owing to the expansion of irrigation from the canal.

*Madras.*—The decrease of 17,8 was due to the expenditure in 1896-97 on repairs to damages caused by floods having been very large.

*Bombay.*—The increase of 8,9 was due partly to special repairs on the Begari canal, and partly to the transfer to this head of the normal expenditure on famine relief work on the Lakh canal and the Ekruk and Mhasvad tanks.

266. The Budget Grant was increased to 503,9 by additional grants\* sanctioned during the course of the year to meet the cost of urgent repairs necessitated by increased irrigation and increased collection charges. Against this the actuals show an excess of 2,3; made up of a decrease of 5,5 in the Punjab and of increases of 2, 2,0 and 5,5 in North-Western Provinces and Oudh, Madras and Bombay respectively. The decrease in the Punjab is ascribed principally to savings on maintenance estimates and transfer of establishment charges to capital account, and partly to short payment of *Lambardars'* fees owing to a large amount of revenue having remained unrealized at the close of the year. The increase in Madras and Bombay was mainly due to the adjustment of the normal value of work done by famine relief labour. Of the excess, 28,9 has been sanctioned by the Government of India, and 2,3 still requires sanction.

* Sanctioned by the Finance Department . . . . .	20,1
Grant transferred from 16.—Telegraph . . . . .	0,6
Do. from 43.—Minor Works and Navigation . . . . .	2,2

## Provincial Works.

267. The expenditure in 1897-98 exceeded that of the previous year by 19,2. Of this increase 1,0 occurred in Bengal and 12,2 in the North-Western Provinces and Oudh. The former being due to increased establishment charges and to heavier charges for collection of revenue, and the latter to higher maintenance and collection charges owing to increased irrigation. Compared with the Budget Estimate the actuals show an increase of 1,1, which is made up of a decrease of 9,4 in Bengal and an increase of 10,5 in the North-Western Provinces and Oudh. In Bengal the requirements of the year were over-estimated. The increase in the North-Western Provinces and Oudh was due partly to additional collection charges on account of increased receipts, partly to repairs to training works on the Ganges river, and partly to the completion of the construction of the channel of the Lower Ganges canal. The excess was covered by an additional grant.

## Imperial Works.

269. The expenditure in 1897-98 was less than that of the previous year by 111.6. The decrease was mainly due to the expenditure on Minor Irrigation Works in Upper Burma having been met from Provincial Funds from 1st April 1897, and partly to a smaller programme of expenditure in Bombay. The actuals on the whole compare favourably with the Budget Estimate. The increase of 7.9 in the Punjab was due partly to increased expenditure on works, for which an additional grant of 2.5 was sanctioned during the year, and partly to the transfer to this head of the normal value (5.4) of works on the Ghaggar canal from 33.—Famine Relief. The decrease in Bombay was due to the Establishment charges having been over-estimated. The excess of 5 was covered by additional grants.

**Section J.—IRRIGATION EXPENDITURE—concluded.****43.—Minor Works and Navigation—continued.****Provincial and Local Works.**

270. Although the expenditure in Upper Burma was made Provincial, the total expenditure of the year fell short of that of the previous year by 47,0. The decrease was due to the grants made available by the several Local Governments for expenditure during 1897-98 being considerably smaller than in the previous year. On the whole, the Budget Estimate was closely worked up to. The increase of 17.4 in Bengal was due partly to the construction of additional works sanctioned by the Government of Bengal during the course of the year, and partly (10.3) to the transfer of the value of the surplus stock of the Dehri Workshops from "49.—Irrigation" to this head. The decrease of 4.6 in the Punjab was mainly due to the special grant of 3.9 provided for the extension of the Hazur-Khani Branch of the Michni-Nowshera canal, which is in charge of Civil officers, not having been utilized. The decrease in Madras was chiefly due to the outlay on works and repairs in charge of Civil officers having been over-estimated. The excess of 3 in the total has been covered by additional grants.

## Section K.—BUILDINGS AND ROADS—RECEIPTS.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
696,2	RECEIPTS	679,6	660,5	667,8

271. The receipts in 1897-98 fell short of those of the previous year by 28,4. There was a decrease of 8,7 under Military Works owing to a special credit of 9,0 obtained in 1896-97 by the sale of certain buildings. The decrease under Civil Works was due to several small variations in the different Provinces, the most important of which was a falling off under Road Tolls, Contribution for Public Works and Ferry receipts in Bombay, consequent on the prevalence of famine and plague. The falling off from the Budget Estimate is also attributable to this cause.

## XXXI.—Military Works.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
51,2	India	40,3	43,8	41,9
6,2	Upper Burma	6,0	6,8	7,5
7	Lower "	8		
5	Assam	4	4	5

26.2	EXCHANGE	18.2	15.9	16.3
17.3	GRAND TOTAL	629.6	609.7	615.2
634.9				

A.—Public Works in charge of Departmental Officers. B.—Public Works in charge of Civil Officers.

## Imperial Works.

273. The decrease in the receipts during 1897-98, as compared with those of the previous year, was due to the provincialization of Civil Works in Upper Burma with effect from 1st April 1897.

## Provincial Works.

274. The receipts by departmental officers during 1897-98 were less than those of the previous year by 9.3. The decrease is principally the net result of increases of 9.3 in Burma and 4.7 in the Punjab, and of decreases of 6.9 and 16.5 in Bengal and Bombay, respectively. The increase in Burma was due partly to the cause stated above, partly to additional rentable quarters having been provided and to the revision of rents, and partly to the recovery of 1.3 from the lessee of the Government Saw Mills at Mandalay on its destruction by fire. The increase in the Punjab was due to the sale of the site of the Lunatic Asylum at Lahore to the North-Western Railway. The decrease in Bengal was due partly to the abolition of the Calcutta Workshops and partly to the Government share of the profits from the Darjeeling-Himalayan Railway having been smaller than in the previous year. The decrease in Bombay was mainly due to famine and plague having affected the Toll receipts. The actuals fell short of the Budget Estimate by 5.5. The variations by Provinces occurred in Burma, the Punjab, and Bombay, and were due to the causes explained above.

275. The receipts by Civil Officers exceeded those of the previous year by 8.0. The increase was due mainly to an improvement in the receipts from ferry tolls in the North-Western Provinces and Oudh and partly to transfers to this head of receipts relating to staging bungalows and encamping grounds in accordance with the revised classification. Owing mainly to the latter cause the Budget Estimate was also exceeded by 3.2. In the Revised Estimate the receipts from ferry tolls in Bengal were underestimated.

## Local Works.

276. The revenue realized by Civil officers in 1897-98 fell short of that of the previous year by 14.3 and the Budget Estimate by 12.2. The decrease occurred chiefly in Bombay, and was mainly due to a falling off under road tolls, contribution for Public Works and ferry receipts, consequent on the prevalence of famine and plague. The increase in Burma was mainly due to an improvement in ferry receipts and partly to the transfer of staging bungalow rents from "XXV.—Miscellaneous" to this head. The increase in the North-Western Provinces and Oudh and the Punjab was mainly due to the transfer to this head of receipts relating to staging bungalows and encamping grounds.

## Section K.—BUILDINGS AND ROADS—EXPENDITURE.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
5,783.3	EXPENDITURE . . . . .	5,780.1	5,464.0	5,418.9

277. The expenditure during 1897-98 was less than that of the previous year by 364.4 and fell short of the Budget Estimate by 361.2. This was mainly due to the restriction of expenditure in consequence of famine. The decrease would have been larger had it not been for repairs to earthquake damages in Assam and Bengal.

278. The actual expenditure during 1897-98 exceeded that of the previous year by 11.4, made up of a decrease of 56.4 in the Indian expenditure, and of an increase of 67.8 in the expenditure in England including exchange. The decrease in India is attributable mainly to restriction of expenditure in smaller requirements in connection with the occupation of Chitral and its communications, the major portion of the cost of fortified posts, bridges, accommodation of troops, etc., having been charged in the accounts to end of 1896-97, and to the employment of Royal Engineer officers and departmental subordinates on the North-West Frontier operations, in consequence of which their pay was not charged to the Military Works grant. The decrease in Burma was due to considerable expenditure having been incurred in the previous year on the construction of temporary barracks for a regiment of Native Infantry at Keanglung. The increase of 14.0 in Assam was due partly to larger expenditure on the project for providing accommodation for the permanent garrison of Native Infantry at Manipur, and partly (4.7) to expenditure in restoring and repairing the damages caused by the earthquake of the 12th June 1897. The increase of 18.4 in the Punjab was due to the outlay incurred on the construction of Military roads and outposts in the Tochi Valley. The increase in the expenditure in England was due to larger payments by the Secretary of State on account of water pipes and other English stores.

279. Compared with the Budget Estimate the actuals show a decrease of 62.8, made up of a decrease of 147.7 in the Indian expenditure, and of an increase of 84.9 in the expenditure in England including exchange. The decrease in the Indian expenditure was due partly to transfers of grant from India to England (73.7) and to "47.—Special Defence Works" (11.7), and partly (62.5) to savings from the grants owing to the curtailment of expenditure until the month of January 1898 under the orders of the Government of India. In Assam there was an excess of 8.7 due chiefly to the causes explained above. The increase in England was due to the larger demand for stores as explained in the foregoing paragraph.

## Imperial Works.

280. *Departmental Officers.*—The expenditure in 1897-98 was less than that of the previous year by 357.0. The decrease was mainly due to the expenditure on works in Upper Burma, which had hitherto been met from Imperial funds, having been transferred to Provincial, with effect from 1st April 1897. Excluding Burma, the expenditure during 1897-98 was 50.0 less than that of the previous year. The decrease occurred chiefly in Assam (12.7) and the Punjab (33.1). The former was principally due to less expenditure on the construction of the Nichuguard-Manipur road, which is approaching completion, and to the expenditure on repairs of this road having been charged to Provincial in 1897-98; and the latter was due to the large expenditure incurred in the previous year on the re-construction of the Public Works Department Secretariat Buildings at Simla. The increase of 12.7 in India was the net result of an increased expenditure of 51.5 on the Bangalore water-works and of a reduction of expenditure aggregating 38.8 in the minor provinces classified under "India General and Political," owing chiefly to the grants made available being smaller than in the previous year. The decrease in the remaining provinces was due to a smaller programme of works in 1897-98.

281. The actuals fell short of the Budget Estimate by 20.2. The decrease was due partly to a write-back of 10.8 from Imperial to Provincial on account of suspense balances appertaining to Civil Works in Upper Burma, and partly to the requirements in Bengal, Madras and Bombay having been over-estimated. The increase of 9.4 in Assam was due partly (about 5.8) to the re-construction and repairs of Imperial Buildings damaged by the earthquake, and partly (about 3.6) to irregular expenditure towards the close of the year on the Nichuguard-Manipur road.

## Provincial Works.

282. *Departmental Officers.*—The expenditure in 1897-98 exceeded that of the previous year by 181.5. The increase was due chiefly to the expenditure on Civil Works in Upper Burma having been made Provincial, with effect from 1st April 1897. The increases of 20.5 in the Central Provinces and of 11.2 in the North-Western Provinces were due to larger grants having been made available. The increase of 72.7 in Assam was due to the restoration and repairs of buildings damaged by the earthquake. The decrease of 40.7 in Bengal was due to a smaller programme of works. The decrease would have been larger by 16.4 had it not been for repairs to earthquake damages to buildings. The decrease in the Punjab (16.0), Madras (64.5), and Bombay (49.8) was due to restriction of expenditure owing to famine in the former two provinces and plague and famine in the latter. Compared with the Budget Estimate, the actuals show a decrease of 23.3; the net result of an increase of 88.0 in Assam due to repairs of earthquake damages and to savings aggregating 111.3 in other provinces, owing mainly to the restriction of expenditure in consequence of famine and plague. The excess in Assam was covered by additional grants.

283. *Civil Officers.*—The decrease of 55.3 in expenditure, as compared with that of the previous year, was due chiefly to smaller grants for repairs to roads and new works of Miscellaneous Public Improvement in Bengal and to Municipalities in Madras for water-supply and drainage works. The lapse of 16.4 from the Budget Estimate in Madras was due to the progress on the construction of the Mount Capper Jail not having been so great as anticipated, and to smaller allotments to Municipalities for water-supply and drainage works.

## Local Works.

284. *Departmental Officers.*—The expenditure in 1897-98 was less than that of the previous year by 65.8. The decrease was mainly due to smaller grants having been assigned by the several Local Governments. The lapse from the Budget Estimate was due to an over-estimate of expenditure. The increase of 9.8 in Bombay was due to outlay incurred against supplementary grants aggregating 25.9 sanctioned by Local Boards; this grant was not, however, fully utilized owing to failure of contractors to complete works and to non-payment of compensation for land.

285. *Civil Officers.*—The expenditure in 1897-98 was less than that of the previous year by 55.3 and the Budget Estimate by 198.8. The decrease occurred in all the provinces except Punjab, where there was a small excess of 2.6. The saving was mainly due to the restriction of expenditure in consequence of famine. The excess in Assam has been covered by additional grants sanctioned by the Government of India and the Local Government.

<u>24,255.3</u>	TOTAL . . .	<u>24,195.5</u>	<u>27,027.0</u>	<u>26,996.8</u>

287. The receipts in India fell short of the Budget Estimate and of the actuals of the previous year by 5.2 and 14.7 respectively. The variations do not call for any special remarks.

288. The receipts in England exceeded the Budget Estimate chiefly by larger receipts on account of the Indian Troop Service and increase in the subscriptions to the Pension Fund.

289. The following statement shows separately the ordinary and special charges included under expenditure in India :—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
SPECIAL ITEMS :—				
...	Military operations on the			
...	N.-W. Frontier . . .	3,864.0	3,848.0	
352.7(a)	Other special services . . .	187.6(b)	188.5	
337.6	Mobilization arrangements . . .	...	...	
<u>690.3</u>		<u>321.6</u>	<u>4,051.6</u>	<u>4,036.5</u>
16,571.0	Other Charges . . .	16,647.3	16,248.7	16,326.3
<u>17,261.3</u>	TOTAL . . .	<u>16,958.9</u>	<u>20,300.3</u>	<u>20,362.8</u>

(a) Includes charges for Waziristan Field Force and Chitral Relief Force } both classified in the Financial Statement  
(b) " provision for Chitral Relief Force. } as warlike operations.

290. Under the head "Military Operations on the North-West Frontier" are shown charges incurred in connection with the Tochi Field Force, the Malakand Field Force and North-West Frontier disturbances, and the force sent to Mekran. These operations commenced in June 1897, and, for the first two, extra grants of 341.8 and 3,350.0, respectively, were sanctioned by the Finance Department in August 1897 and January 1898. A further grant of 146.2 will therefore be necessary.

## Section L.—ARMY SERVICES—continued.

291. The total Budget provision and actual expenditure for Other Special Services are shown in detail below :—

Charges for—	1897-98.	
	Budget.	Accounts.
Occupation of Chitral and its communications . . . . .	182,6	65,0
Chitral Relief Force . . . . .	6,5	2,8
Wano Garrison . . . . .	30,8	32,0
Tochi Garrison . . . . .	46,0	43,7
Gilgit Agency . . . . .	32,8	14,2
Kajuri Kach and Jondola Garrisons . . . . .	10,4	11,2
Kengtung Garrison . . . . .	11,5	19,4
Las Bela Escort . . . . .	1,0	2
	<u>321,6</u>	<u>188,5</u>

292. The saving under "Occupation of Chittal and its communications" and "Tochi Garrison" was partly nominal, as the extra expenditure incurred on account of the normal garrisons in Chitral, the Malakand and the Tochi Valley was compiled for a part of the year under the head "Malakand Field Force, etc.," in the first two cases and under "Tochi Field Force" in the other case. The decrease under "Gilgit Agency" was in Commissariat charges, and was due to the reduction of the garrison and to recoveries on account of the year 1896-97 having been adjusted by deduction from expenditure in 1897-98. The small excess under the head "Kengtung Garrison" was due to *atta* having been issued to the Native troops stationed there instead of rice.

293. The cause of the reduction of 321,2 in the ordinary expenditure, as compared with the Budget, is shown by the following figures :—

	Budget.	Accounts.	Excess + Reduction—
Army and Garrison Staff . . . . .	551,2	533,0	—18,2
Regimental Pay . . . . .	8,404,7	8,266,4	—138,3
Commissariat . . . . .	3,616,2	3,611,1	—5,1
Remount . . . . .	366,8	303,3	—63,5
Clothing . . . . .	259,7	245,0	—14,7
Medical . . . . .	746,4	748,6	+2,2
Ordnance . . . . .	882,8	851,9	—30,9
Miscellaneous . . . . .	94,4	76,3	—18,1
Other heads . . . . .	1,725,1	1,690,5	—34,6
<b>TOTAL</b> . . . . .	<u>16,647,3</u>	<u>16,326,1</u>	<u>—321,2</u>

The principal savings are tabulated below :—

(1) Smaller payments of Exchange Compensation Allowance, owing to the actual payment rates of exchange being higher than the Budget rate . . . . .	61,8
(2) Savings in pay, stores and clothing secured by the despatch to Mombassa of the 27th Bombay Infantry and Head-Quarters Wing, 4th Bombay Rifles, at the cost of the Home Government . . . . .	10,4
(3) Savings from the short strength of the Army, due chiefly to the establishment of British Infantry in India having been short by two battalions for a part of the year . . . . .	106,9
<b>Carried over</b> . . . . .	<u>179,1</u>

Section L.—ARMY SERVICES—*concluded.*

	Brought forward	179,1
(4) Transfer to the Civil Department of the charge for the pay of soldiers and medical officers on plague duty		17,1
(5) Savings due to the purchase of a smaller number of remounts and young stock and to the purchase of Australian animals at a more favourable rate of exchange		34,5
(6) Smaller consumption of malt liquor, owing to the absence of several British regiments on field service and reduction in price from 1st January 1898 under a new contract		56,8
(7) Less expenditure for movement of troops and stores in consequence of troops being on field service		53,3
(8) Lapse of the special grant for the purchase of camels for mobilization purposes		10,1
(9) Less charge for camps of exercise, owing to troops being on field service		8,1
(10) Savings in the cost of feed of cattle and remounts		52,4
(11) Recoveries by deduction from charge of the value of supplies to other departments		20,2
(12) Savings in the cost of clothing		13,0
(13) Less charge for horse allowance to Artillery and Cavalry officers		11,8
(14) Favourable rates of food supplies in the Madras Command		42,9
(15) Savings under Reserve Force, Ambulance Transport, war service materials, cultivation expenses and contingencies		37,1
		<u>536,4</u>

## The only considerable excesses are—

(1) Increased cost of food supplies owing to famine and field operations on the North-West Frontier	48,8
(2) Special money grants to European and Native troops on the occasion of the Diamond Jubilee	11,7
(3) Compensation to Natives for dearness of provisions and forage.	180,9
	<u>241,4</u>

294. As compared with the actuals of the previous year, the excess was due to the expenditure on the Military Operations on the North-West Frontier. Rejecting these charges, there was a decrease due mainly to the mobilization charges of the previous year (337,6) and the balance to the adoption of a more favourable rate of exchange for paying British troops, and Exchange Compensation Allowance; to less clothing charges, due to the introduction of the new clothing scheme in 1896-97 having resulted in heavy charges during that year; and to smaller local purchases of supplies for Ordnance Factories, owing mainly to the employment of the factories to manufacture supplies required for the operations on the North-West Frontier, the cost of which was charged to Special Services. These decreases were partly counterbalanced by larger expenditure on account of food supplies in consequence of the famine.

295. The expenditure in England showed a saving, as compared with the Budget, chiefly under Indian Troop Service and Stores. Under the former, it was due to the engagement of smaller transports, and under the latter to a smaller demand for stores. Less charges for Deferred pay caused a saving under Home charges of British forces serving in India; and the absence of fewer officers on furlough in England resulted in a decrease under Furlough Allowances of Officers of the Indian service.

296. In the Indian Receipts the total decrease, as compared with the Budget, is only 5.2. There was a heavy decline under *Commissariat*, which is explained below. The falling off under *Clothing Establishments* was due to smaller receipts from sales of part-worn cloths under the new clothing scheme, according to which all personal clothing becomes the property of the soldiers, and to smaller issues of regimental necessaries. The special recovery of 73.6 on account of the Tochi and Malakand Field Forces, classed under "*Military Operations on the North-West Frontier*," largely reduced the falling off.

297. The details of the receipts under *Commissariat* are as follows:—

1896-97. Accounts.		1897-98. Budget. Revised. Accounts.	
317.7	Sale of malt liquor . . . . .	319.8	261.1 263.0
72.9	Sale of provisions and stores . . . . .	68.7	73.4 77.0
19.9	Sale of rum . . . . .	15.8	19.0 16.4
29.8	Other heads . . . . .	39.7	26.7 26.4
12.0	Special Services . . . . .	15.9	6.9 6.7
452.3	TOTAL . . . . .	459.9	387.1 389.5

298. The falling off in the sale-proceeds of malt liquor was due to smaller consumption owing to the absence of a large number of British troops on field service, where malt liquor is not issued. Under *Other heads* the largest decrease was due to the sale of fewer elephants than anticipated. The receipts under *Special Services* for a part of the year were classified under "*Military Operations on the North-West Frontier*". The decrease, as compared with the previous year, was also the result of the causes explained above.

## Section L.—ARMY SERVICES—RECEIPTS—continued.

## XXXIII.—Army—continued.

299. The receipts in England exceeded the Budget Estimate by 2,8 under *Effective Services*, due to increased receipts on account of the Indian Troop Service (7,8) and to larger sales of unserviceable stores (1,7), counterbalanced by a decrease of 5,8 in the value of clothing, etc., in possession of Regiments on their transfer from the Indian to the British Establishment, and by 3,4 under *Non-Effective Services*, due chiefly to sufficient provision not having been made for the growth of receipts under the Indian Military Service Family Pensions.

3	Staff Miscellaneous . . . . .	1	3	2
5.3	Special Services . . . . .	5.5	3.6	4.2
<u>553.1</u>		<u>556.7</u>	<u>532.3</u>	<u>535.2</u>

300. Of the total saving of 21.5 under this head, as compared with the Budget, 10.5 was due to less payment of salaries and 5.8 to less payment of Exchange Compensation Allowance. The large saving was under the sub-head *Hill Sanitaria*, due chiefly to the closing of hill depôts in the Bengal and Punjab Commands during the winter months. There was also a saving of 4.0 in the tour expenses of the Commander-in-Chief in India, and of Lieutenant-Generals Commanding the Forces. Under *Special Services* the expenditure for a part of the year on account of the "Occupation of Chitral" and "Tochi Garrison" was shown under Military Operations on the North-West Frontier.

## Administrative Staff.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
15.8	Personal Staff of the Governor-General, Governors, and Lieutenant-Governors . . . . .	15.9	15.9	16.2
17.0	Accountant General, Military Department . . . . .	17.0	17.0	17.6
	Controller of Military Accounts—			
27.6	Central Branch . . . . .	27.2	26.9	27.6
14.1	Accounts Branch . . . . .	14.4	14.3	14.0
43.1	Pay Branch . . . . .	43.1	44.6	45.1
34.2	Commissariat Branch . . . . .	34.0	34.8	34.2
7.6	Commissariat Branch, Rangoon . . . . .	7.4	7.8	7.6
19.4	Ordnance and Clothing Branches . . . . .	18.5	19.2	19.3
17.6	Circle, Field and Pension Pay Officers . . . . .	14.9	14.2	13.9
6.6	Inspections, Special Duties, and Probationers . . . . .	10.4	7.8	8.2
1.3	Special Services . . . . .	1.7	6	6
<u>204.3</u>		<u>204.5</u>	<u>203.1</u>	<u>204.4</u>

301. The variations under this head are small and do not require any explanation.

## Regimental Pay.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
4,260.6	European Army . . . . .	4,079.5	3,994.9	3,956.0
4,308.9	Native Army . . . . .	4,325.2	4,279.4	4,310.4
29.2	Special Services . . . . .	27.7	13.3	11.8
<u>8,598.7</u>	<b>Total</b>	<u>8,432.4</u>	<u>8,287.6</u>	<u>8,278.2</u>

302. The saving under this head of 154.2, as compared with the Budget Estimate, was due chiefly to a decrease of 40.9 under Exchange Compensation Allowance, of 85.8 under pay due to the short strength of British troops in India, of 14.6 under salaries due chiefly to the absence of officers on leave, and to deputations to the Civil Department for employment on plague duty. The saving of 320.5, as

Section L.—ARMY SERVICES—EXPENDITURE—continued.

Regimental Pay—continued.

compared with the actuals of the previous year, was due chiefly to the adoption of more favourable rates of exchange for payment of British troops, to less Exchange Compensation Allowance, to the British Infantry having been below the authorized strength by two battalions for a part of the year, and to other British troops having been less in excess of the authorized strength than in the previous year.

303. The details of the principal sub-heads of the European Army are given below:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
1,074.5	Artillery . . . . .	1,019.2	1,012.8	1,006.0
441.1	Cavalry . . . . .	408.2	409.0	405.0
5.5	Engineers . . . . .	5.9	4.9	3.9
2,640.7	Infantry . . . . .	2,548.0	2,474.4	2,442.7
4.2	Invalid and Veteran Establishment . . . . .	3.8	3.5	3.5
49.8	Staff Corps, General List Officers, Unattached and Unemployed Officers . . . . .	48.2	41.2	45.1
7.2	Colonel's Allowances . . . . .	9.6	4.3	5.4
37.6	Other Charges . . . . .	36.6	44.8	44.4
4,260.6	TOTAL . . . . .	4,079.5	3,994.9	3,956.0

304. Under *Artillery* the saving, as compared with the Budget Estimate, was due chiefly to an insufficient deduction having been made on account of officers absent in Europe (3.7), to less Exchange Compensation Allowance (4.6), to the replacement of Civilian Ordnance artificers by sergeant armament artificers on lower rates of pay, and to vacancies in the permanent establishment of lascars and followers, etc., (6.9), and to less charges for horse allowance (4.9), partly counterbalanced by increased charges for good conduct pay (3.6), and deferred pay (3.5). Under *Cavalry* the saving due to absence of officers in Europe (2.1), and to Exchange Compensation Allowance (1.5) was more than counterbalanced by an excess of 6.5 in the pay of warrant and non-commissioned officers, rank and file, and native artificers and followers due to excessive deduction for probable savings; but the charge for horse allowance was less by 6.8. Under *Infantry* there was a saving of 13.8 in the pay of officers, and of 72.0 in that of warrant and non-commissioned officers, rank and file, due chiefly to short strength of the British Infantry by two battalions for a part of the year, and of 10.9 in Exchange Compensation Allowance. Under *Staff Corps*, etc., the largest saving was under General Officers unemployed, due to retirements. Under *Colonel's Allowances* the saving was due chiefly to fewer recipients. Under *Other charges* the excess was mainly the result of money grants to troops on the occasion of the Diamond Jubilee. The decrease, as compared with the previous year, has been explained above.

305. The details of the principal sub-heads under the Native Army are as follows:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
56.6	Artillery . . . . .	57.0	56.3	57.4
13.7	Body-Guard . . . . .	15.0	15.0	14.8
1,284.9	Cavalry . . . . .	1,287.8	1,280.3	1,276.4
139.0	Sappers and Miners . . . . .	134.7	138.2	136.0
2,587.6	Infantry . . . . .	2,594.6	2,563.0	2,596.9
53.0	Annual grant-in-aid of half-mounting . . . . .	49.7	52.8	57.0
28.0	Kit-money for Recruits . . . . .	34.6	29.0	26.2
32.5	Hutting-money . . . . .	28.7	29.0	27.5
69.9	Reserve Forces . . . . .	77.2	70.0	72.3
43.7	Other Charges . . . . .	45.9	45.8	45.9
4,308.9	TOTAL . . . . .	4,325.2	4,279.4	4,310.4

306. The variations were not large under any of the sub-heads, and it is only necessary to specify a few of them. Under *Cavalry* there was a saving of 11.4 as compared with the Budget Estimate, 8.8 of which was due to the absence of officers on furlough in England, recovery of home advances, and the deputation of officers on plague duty at the cost of the Civil Department, and 6.5 to less Exchange Compensation Allowance. These savings were partly counterbalanced by an increase of (3.8) in the pay of native commissioned and non-commissioned officers, due to an advance payment of salary to certain corps, and to an over-estimate of probable savings in the Budget. Under *Annual Grant-in-aid of Half Mounting* the Budget provision was insufficient. The saving under *Kit money for Recruits* was due to the enlistment of fewer recruits than anticipated.

307. The decrease under *Special Services* is due to the causes already explained.

**Section L—ARMY SERVICES—EXPENDITURE—continued.**  
**Commissariat Charges.**

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
505.2	Establishment . . . . .	528.4	501.8	513.1
1,742.2	Supplies . . . . .	1,779.0	1,753.0	1,870.8
863.1	Services . . . . .	938.9	895.4	905.3
338.4	Transport Branch . . . . .	369.9	346.3	321.9
247.1	Special Services . . . . .	236.8	131.5	136.5
204.6	Mobilization . . . . .	...	...	...
<u>3,990.6</u>	<b>TOTAL . . . . .</b>	<u>3,853.0</u>	<u>3,628.0</u>	<u>3,747.6</u>

308. The saving under this head (105.4) was the result chiefly of an excess under *Supplies* and savings under all the other heads. The excess was due to large payments of compensation to Native troops for dearness of provisions and forage owing to high prices in consequence of famine, partly counterbalanced by small local purchases of malt liquor due to the absence of a large number of troops on field service. The saving under *Services* occurred chiefly in Railway, and Sea and Inland water charges, owing to fewer movements of troops and smaller consignments of stores due to the large number of troops on field service. Under *Transport* there were smaller purchases of animals, and under *Special Services* the decrease was due chiefly to the expenditure on the "Occupation of Chitral and its Communications" for a part of the year having been charged under Military Operations in the North-West Frontier.

309. The decrease, as compared with the previous year, was due to absence of mobilization expenditure. Rejecting this item there was an excess of 51.6, chiefly due to higher prices for food supplies and forage, counterbalanced by the decrease under *Special Services* due to the reasons stated above.

310. The details of the expenditure under *Establishment* are given below:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
53.0	Supervising Staff . . . . .	51.6	49.1	47.8
236.9	Executive Establishment . . . . .	242.1	230.9	234.1
43.2	Ambulance Transport . . . . .	46.0	43.4	42.1
161.5	Subordinate Establishment . . . . .	177.3	166.8	173.5
9.9	Khedda Establishment . . . . .	7.7	8.4	11.1
1.7	Other Heads . . . . .	3.2	3.2	4.5
<u>505.2</u>		<u>528.4</u>	<u>501.8</u>	<u>513.1</u>

311. Under *Supervising Staff* the saving was due chiefly to absence of officers on furlough and to savings in Office Establishments, etc., (2.0), to less Exchange Compensation Allowance (5), and less travelling and out-station allowances (1.4). Under *Executive Establishment* the saving was due chiefly to insufficient deduction having been made in the Budget for probable savings (2.5), to less Exchange Compensation Allowance (1.8), and to smaller charges for contingencies and advertisements (1.1). Under *Ambulance Transport* the reduction was due to short strength of bearers. Under *Subordinate Establishment* the saving was due principally to less expenditure for water gear and establishments and for supply of water, owing chiefly to the absence of a number of troops on field service. Under *Khedda Establishment* the increase was due to the entertainment of a larger temporary establishment for hunting operations than was provided for, and to hire of elephants, boats, and carts to a larger extent than anticipated.

312. Under *Supplies* the details are as follows:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
701.2	Provisions for Europeans . . . . .	765.4	730.0	748.5
155.6	Provisions for Natives . . . . .	188.0	173.5	178.9
	Compensation to Natives—			
405.6	(a) for dearness of provisions . . . . .	371.7	396.0	481.1
107.8	(b) for dearness of forage . . . . .	80.0	138.0	151.5
16.1	Purchase of Reserve Stock . . . . .	19.5	17.2	13.7
353.3	Malt Liquor purchased locally . . . . .	350.1	293.6	293.3
7.4	Rum . . . . .	5.7	5.5	3.1

<u>1,742.2</u>		<u>1,779.0</u>	<u>1,753.0</u>	<u>1,870.8</u>

## Section L.—ARMY SERVICES—EXPENDITURE—continued.

## Commissariat Charges—continued.

313. There was an increase of 95.8 in the aggregate, made up chiefly of increased payments of compensation to Native troops, counterbalanced by savings under Malt Liquor. The excess under *Compensation*, etc., was due to the prevalence of high prices of both food supplies and forage on account of the famine. The saving under *Malt Liquor* was due to the absence of a large number of British troops on field service, where malt liquor was not issued, and to a more favourable contract for supplies. The savings under *Provision for Europeans* and *Provision for Natives*, due to short strength of troops and favourable rates of food supplies, were reduced to a certain extent by larger purchases for stock purposes. The excess over the previous year (128.6) occurred chiefly under *Provisions for Europeans* (47.3) and *for Natives* (23.3), and under *Compensation to Natives, etc.* (119.2), due chiefly to high prices due to famine, counterbalanced chiefly by a decrease under *Malt Liquor* (60.0), due to the reasons explained above.

314. Under *Services*, excluding Special Services, the following details are supplied:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
33.4	Hire of Transport . . . . .	39.0	32.0	41.4
18.7	Sea and Inland Water Charges . . . . .	23.7	22.6	21.5
347.2	Railway Charges . . . . .	409.4	349.8	357.4
57.0	Grass Cultivation . . . . .	86.2	83.7	76.6
312.8	Feed of Horses, Battery Mules, Yabooks, Bullocks and Elephants . . . . .	267.2	311.5	319.7
9.1	Regimental Equipment and Camp Contingencies . . . . .	12.0	8.4	7.4
24.9	Implements, Godown Furniture, etc. . . . .	27.4	27.1	31.8
60.0	Other Heads . . . . .	74.0	60.3	49.7
863.1		938.9	845.4	905.3

315. Under the first head the small excess of 2.4 was due to more movements of European troops by route march and to less utilization of Government transport, partly counterbalanced by less charges for the conveyance of stores due to smaller consignments of Commissariat and Miscellaneous stores. Under the next two heads the saving was due to fewer movements of European and Native troops and to the conveyance of smaller consignments of stores, especially Commissariat and Ordnance stores. Under *Grass Cultivation* the saving was chiefly under Establishments. Under feed of *Horses, Battery Mules, etc.*, the excess, both over the Budget (52.5) and the actuals of the previous year, was due to higher prices owing to scarcity and to field operations on the North-West Frontier. The saving under *Regimental Equipment* (4.6), due to the absence of several regiments on field service, was nearly covered by the excess under the next head (4.4) caused by larger purchases of dead stock articles and more contingent charges incurred in Commissariat Godowns. Under *Other Heads* the saving occurred chiefly under Cattle Farm (Hissar) (18.4), and was due chiefly to issues of food supplies to cattle having been made from reserve stock and to a number of cattle having been sent to other districts to graze owing to scarcity of fodder at Hissar. There was also a saving of 1.3 in the charges for feed of elephants under Khedda charges (Dacca), due to casualties among Khedda elephants, and of 1.2 on account of smaller purchases of battery bullocks and savings in the purchase and repair of gear. The excess, as compared with the actuals of the previous year under the first three heads, was due chiefly to larger movements of troops and stores, and that under *Grass Cultivation* to a change in classification in the Madras and Bombay Commands.

316. The details of the charges in the *Transport Branch* are as follows:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
333.6	Depôt and Regimental . . . . .	363.0	339.1	315.8
4.8	Ambulance Transport . . . . .	6.9	7.2	6.1
338.4	TOTAL . . . . .	369.9	346.3	321.9

317. Under *Depôt and Regimental* the large saving was chiefly due to fewer purchases of animals, to the cost of replacement of animals killed and articles issued on field service having been charged to the service concerned, and to smaller charges for food.

318. Under *Special Services* the saving was due mainly to the causes already explained (86.4), and to the reduction of the Gilgit Garrison (15.9), partly counterbalanced by higher charges on account of "Wano Garrison," "Tochi Garrison," and "Kajuri Kach and Jandola Garrisons," due to high prices of food supplies.

## Section I.—ARMY SERVICES—EXPENDITURE—continued.

## Remount and Veterinary.

319. The details are given below:

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
3.5	Supervising Staff . . . . .	3.4	3.3	3.3
27.9	Depôt Establishments . . . . .	35.2	34.6	33.5
9.3	Veterinary Inspection . . . . .	8.8	8.5	9.0
34.0	Station Veterinary Hospitals . . . . .	35.3	33.7	31.8
5	Veterinary Schools . . . . .	4	5	4
2.4	Remount Depôt, Garden Reach . . . . .	2.7	2.1	2.3
121.7	Purchase of Remounts . . . . .	140.0	117.3	118.7
30.2	Feed of Cattle and Remounts . . . . .	93.0	63.3	65.1
37.3	Miscellaneous . . . . .	48.0	43.9	39.2
187.5	Total excluding mobilization . . . . .	366.8	307.2	303.3
27.4	Mobilization . . . . .	...	...	...
364.9	Total including mobilization . . . . .	366.8	307.2	303.3

320. The total saving (63.5) under this head as compared with the Budget was mainly caused by the purchase of fewer remounts and young stock and at lower rates (13.7) by purchase of Australian animals at more favourable rates of exchange (7.7) and by less feed charges and cultivation expenses (34.5).

## Clothing Establishments.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
11.3	Superintending Establishments . . . . .	11.5	10.9	10.4
26.7	Manufacturing and Store Establishments . . . . .	6.4	6.2	6.1
	Supplies and Services—			
199.4	Factories . . . . .	152.8	143.3	143.9
43.0	Regimental . . . . .	41.2	42.0	33.2
43.6	Compensation in lieu of clothing . . . . .	47.8	48.8	51.4
1.7	Special Services . . . . .	6	8	8
305.2		260.3	252.0	245.8

321. The saving under this grant (14.5) was spread over most of the sub-heads, but occurred mainly under *Factories* (8.9), due to fewer garments having been made up and smaller charges for local purchases; and under *Regimental* (8.0) owing to a reduction in the rates of making clothing, and to claims held over on account of absence of troops on field service. The provision under *Compensation in lieu of clothing* was partly an under-estimate. The larger expenditure of the previous year was mainly under the first two heads named above, and was due to the introduction of the new clothing scheme which resulted in large purchases locally and in the making up of a larger number of garments.

## Barrack Establishments.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
4.3	Executive Establishments . . . . .	4.5	4.2	4.1
98.0	Subordinate Establishments . . . . .	55.1	54.0	33.0
13.6	Station Conservancy . . . . .	15.6	15.7	15.3
11.1	Barrack Furniture . . . . .	9.9	10.9	13.1
42.5	Barrack Bedding . . . . .	52.0	48.6	50.3
41.6	Lighting Charges . . . . .	36.5	35.3	35.5
62.2	Miscellaneous . . . . .	58.5	56.4	59.7
1.3	Special Services . . . . .	2.6	7	2.1
234.6		234.7	225.8	233.1

322. The variations from the Budget are generally unimportant, the only items worth mentioning being the saving under *Subordinate Establishments* (2.1) and under *Barrack Bedding* (1.7) against an excess of 3.2 under *Barrack Furniture*. Under the first, it was due to the absence of troops on field service, which caused a saving of 1.1 in the punkha-pulling establishment, and to the extra conservancy establishment not having been entertained to the estimated extent. Under the second, the saving was also partly due to the absence of troops on field service (3.4), and partly to fewer new issues of bedding under the four

## Section L.—ARMY SERVICES—EXPENDITURE—continued.

## Barrack Establishment—continued.

years, rate (3.0), counterbalanced to the extent of 4.5 by the outlay in the Bengal Command to replace condemned bedding. The excess under *Barrack Furniture* was due to increased charges for washing and repair of punka fringes and to the supply of a larger number of bamboo blinds necessitated by fair wear and tear.

## Administration of Martial Law.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	Judge Advocate-General's Department—			
5.7	Head-Quarters . . . . .	6.0	5.8	5.7
15.4	Commands . . . . .	15.7	15.3	14.7
21.1	Miscellaneous . . . . .	20.9	21.0	20.4
42.2		42.6	42.1	40.8

323. There is a trifling saving under this grant head, due chiefly to the absence of officers on furlough and smaller contingent charges.

## Medical Establishments.

324. The charges are classified under the following heads:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	Medical Establishment—			
28.1	Head-Quarters and Commands	28.2	27.1	26.9
436.8	Districts . . . . .	446.7	425.0	449.3
11.3	Nursing Service . . . . .	12.9	11.9	12.0
28.6	Army Hospital Corps . . . . .	28.3	28.3	27.7
18.8	Medical Store Depôts . . . . .	19.8	19.0	18.6
1.0	Followers' Hospitals . . . . .	1.3	1.0	9
7.9	Miscellaneous . . . . .	10.2	8.3	7.1
225.8	Medical Supplies . . . . .	221.0	220.0	234.7
	Deduct—			
28.1	Issues to other Departments	22.0	26.6	28.6
197.7		199.0	193.4	206.1
730.2	Total excluding Special Services	746.4	714.0	748.6
	Special Services—			
20.5	Mobilization . . . . .	—	—	—
4.4	Other . . . . .	5.1	3.0	3.0
755.1	GRAND TOTAL . . . . .	749.5	716.0	750.6

325. There were savings in all the minor heads with the exception of two, the excesses under which caused a net increase of 1.1 over the Budget. The savings were in almost all cases unimportant, and were due chiefly to variations in salaries and contingencies. The only saving which calls for special notice is that of 3.1 under *Miscellaneous*, which was due principally to fewer Military pupils having been under tuition in Medical Colleges and Schools (1.7), to the closing of certain Cantonment hospitals in the Madras Command (6), and to smaller purchases of books and periodicals (4). The excesses occurred under *Medical Establishment, Districts* and *Medical Supplies*. Under the first the increase (2.6) was the result of an over-deduction in the Budget for probable savings in salary, and of higher charges for temporary establishment and travelling than estimated, partly counterbalanced by savings due to the deputation of officers to the Civil Department for Plague duty and in Exchange Compensation Allowance. The excess under *Medical Supplies* was due to increased expenditure on medical comforts and diet in consequence of increased sickness of troops, and higher rates of articles of diet owing to scarcity. About half of this excess was covered by the increased credit (taken in the accounts by deduction from the charge) under *Issues to other Departments*, owing to larger supplies to Civil hospitals and dispensaries, to famine and plague hospitals, and to troops sent out to Mombassa. The excess under this head (1.1) requires to be sanctioned.

326. The decrease, as compared with the previous year was due chiefly to the absence of mobilization charges in 1897-98. Disregarding this item there was an excess, which occurred mainly under *Medical Establishment, Districts* (12.5), due to the presence of a larger number of officers on duty and to the higher rate of pay granted, with effect from 1st April 1897; and under *Medical Supplies* due to increased sickness of troops and higher price of articles of diet.

## Section L.—ARMY SERVICES EXPENDITURE—continued.

## Ordnance.

327. The charges are sub-divided below, the mobilization charges in 1896-97 being shown separately:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
<b>ESTABLISHMENTS—</b>				
39.4	Supervising Staff . . . . .	41.1	40.7	41.1
197.8	Arsenals and Depôts . . . . .	201.5	198.0	199.2
208.8	Factories . . . . .	226.1	225.1	222.4
11.9	Fort Armaments . . . . .	11.6	10.8	10.9
<b>STORES—</b>				
164.6	For Arsenals and Depôts . . . . .	147.1	147.4	161.9
196.8	For Factories . . . . .	172.6	165.9	163.1
13.8	Freight . . . . .	11.8	10.6	12.2
47.6	Camp Equipage . . . . .	57.0	55.5	53.9
83.3	Line Gear . . . . .	13.9	13.1	12.8
35.1	Other Charges . . . . .	35.6	35.6	34.1
<b>Deduct—</b>				
46.9	Supplies to other Departments . . . . .	35.5	41.1	59.7
888.0	Total excluding Special Services . . . . .	882.8	861.6	851.9
<b>Special Services—</b>				
33.0	Mobilization . . . . .	—	—	—
—	Other . . . . .	—	1	1
921.0		882.9	861.7	852.0

328. The most important excess is that of 14.8 under *Stores for Arsenals and Depôts*, due chiefly to the purchase of stores for Colonial and other Governments. This was, however, more than met by larger recoveries (24.2) under *Supplies to other Departments*, resulting chiefly from the issue of a large quantity of old shot and shell to the Eastern Bengal State Railway (5.0), issue of stores to the Native troops sent to East Africa (6.6), and despatch of stores to Cairo, Malta, etc., (9.7). Under *Stores for Factories*, the provision for local supplies to the Foundry and Shell Factory, Gun Carriage Factories, and to the Kirkee Small Arms Ammunition Factory was over-estimated. The saving under *Factories* was in Salaries and Exchange Compensation Allowance. Under *Camp Equipage* the charges for purchase and repair were less than estimated. As compared with the actuals of 1896-97, almost half the decrease was due to the special expenditure in that year for mobilization. There was a large decrease under *Stores for Factories*, due to smaller purchases owing to the stoppage of ordinary work in consequence of factories being fully occupied for some time in meeting the requirements of the forces on the North-West Frontier. There were larger recoveries in the year under report from other departments, but the decrease due to this cause was more than covered by an increase under *Establishments—Factories*, due to the employment of more extra temporary artificers owing to larger outturn.

## Other Effective Charges.

329. Under *Sea Transport charges* the increase was mainly due to the grant of passages to the British and Native Officers who proceeded to England to form part of the Guard-of-Honour to Her Majesty the Queen on the occasion of the Diamond Jubilee “(2.6),” to more charges for passages from port to port in India (7.9), and to the employment of the R. I. M. S. *Clive* for conveyance to England of the surplus troops of 1896-97 (1.7), partly counterbalanced by a saving in the charges for articles of sea kit supplied to troops on their voyage to England (2.4). The decrease under *Volunteer Corps* was due chiefly to insufficient deduction made in the Budget for probable savings in salaries, and to certain appointments having been held by Civilians (7.4). Savings under Contingencies and Exchange Compensation Allowance (1.8) were more than covered by an excess under travelling (2.1), due to more frequent inspections.

330. The excess of 9.3 under *Sea Transport Charges* requires sanction. A report that the grant was likely to be exceeded was made to Government.

The figures under *Miscellaneous Services* may be sub-divided as follows:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
62.2	Special charges . . . . .	43.4	36.0	32.2
78.9	Other items . . . . .	94.4	81.7	76.3
141.1		137.8	117.7	108.5

Section L.—ARMY SERVICES EXPENDITURE—*concluded.*Other Effective Charges—*continued.*

331. Under *Special charges* the expenditure for a part of the year on account of the Occupation of Chitral and its communications was compiled under Malakand Field Force. There was also a saving under Chitral Relief Force, owing to smaller arrear charges (3,7), and an excess under Kengtung Garrison (7,4), due to *atta* instead of rice having been supplied for the use of Native troops. Under *Other Items* the saving was due chiefly to an over-estimate for contingencies (6,1), to the non-utilization of the grant for camps-of-exercise (8,1), owing to the withdrawal of troops for operations on the North-West Frontier, and to less extra staff and command allowances (2,2).

## Military Operations on the North-West Frontier.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts
	Military Operations on North-West Frontier—			
...	Malakand Field Force and North-West Frontier			
...	Disturbances . . . . .	...	3,451,0	3,468,1
...	Tochi Field Force . . . . .	...	400,0	369,1
...	Mekran . . . . .	...	12,0	10,8
...		...	3,864,0	3,848,0

332. As stated in paragraph 290, 3,701,8 of this excess has been sanctioned, and the balance 146,2 still requires to be sanctioned.

## Non-effective Charges.

333. Under *Rewards for Military Services* the increase (1,8) was wholly in the Native Army, and was due chiefly to the grant of concessions to troops in commemoration of the Diamond Jubilee, and to new awards of the Order of Merit for service on the North-West Frontier. Under *Military Pensions to Europeans* the decrease (13,3) was due chiefly to less capitalised payments (9,8) to British officers than anticipated. Under *Military Pensions to Natives* there were increased payments of compensation for dearth of provision to Madras pensioners owing to scarcity (12,5). Under *Widows' Pensions and Compassionate Allowances* the increase was due mainly to the operations in the North-West Frontier, partly counterbalanced by savings under widows' pensions caused by casualties. The excesses under *Rewards for Military Services* (1,8), *Military Pensions to Natives* (14,1), and *Widows' Pensions and Compassionate Allowances* (9), and under *Superannuation Pensions and Gratuities* (3), require to be sanctioned.

## Expenditure in England.

334. The saving in the Home effective charges (92,2) occurred mainly under *Stores for India* (42,1). There was under this head a decrease of 72,8 in Ordnance Stores and an increase of 25,1 for stores in connection with the Malakand and Tochi Field Force. The saving (32,8) under *Indian Troop Service* was mainly owing to the engagement of smaller transports. There was also a large decrease under *Furlough Allowances* (34,2). The fluctuations in non-effective charges were unimportant.

## Section LL.—SPECIAL DEFENCE WORKS—EXPENDITURE.

## 47.—Special Defence Works.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
94.6	EXPENDITURE . . . . .	19.4	35.4	23.7

335. The distribution of expenditure is noted below:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
21.7	India . . . . .	...	2.0	—4.0
43.9	England . . . . .	11.7	21.4	17.7
29.0	Exchange . . . . .	7.7	12.0	10.0
94.6	TOTAL . . . . .	19.4	35.4	23.7

336. This major head was kept open during 1897-98 for the record of expenditure in connection with armaments only; the accounts of works and suspense transactions pertaining thereto were closed on the 31st March 1897; this circumstance, coupled with the fact that the Secretary of State's payments for armaments are approaching completion, accounts for the large decrease in expenditure during 1897-98. The excess was sanctioned by the Government of India.

337. The Secretary of State continued to debit under the head "Special Defences" payments in England on account of works the accounts of which had been transferred to "44.—Military Works," with effect from the 1st April 1897; these payments were, therefore, adjusted by credit to expenditure in England under "Special Defences" and debit to "Military Works" through the Indian accounts. A sum of about 4.3 was so adjusted, which accounts for the greater portion of the lapse of 6.0 from the Revised Estimate of expenditure in India. The balance of the lapse was mainly due to over-estimates of the expenditure likely to be incurred in Ordnance Factories in connection with the equipment of the North-West Frontier Defences, and of charges for freight payable in India. The Budget Estimate did not provide for any such charges. The increase in the expenditure in England, as compared with the Budget Estimate, was due to the Secretary of State having paid some arrears claims.

## Section M.—PROVINCIAL ADJUSTMENT.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.

338. The figures shown under this head represent the surplus or deficit of each Provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The differences between the Estimates and Accounts under the various Revenue and Expenditure heads have been explained in detail in the foregoing pages, and the share of these pertaining to the Provincial and Local sections of the accounts for the several groups is given below separately for each province. The Budget provided for an expenditure from Provincial balances of 71 lakhs and from Local balances of 48 lakhs; but the accounts show the net Provincial expenditures less by 24 lakhs and the net Local revenue more by 49 lakhs. The actual decrease in the Provincial balance in the course of the year therefore amounted to 47 lakhs, and the Local revenue was increased by 1 lakh, consequently the Provincial and Local balances being taken together, the actual decrease was 46

## Section M.—PROVINCIAL ADJUSTMENT—continued.

lakhs. These figures do not, however, give a true idea of the actual transactions of the year, for, in order to produce even this result, Imperial Revenues had to bear about eight-ninths of the charge for direct Famine Relief (5,325,6) for which Provincial and Local Revenues are in the first instance responsible, and had also to make special grants amounting to 183,7, to the Central Provinces (81,0) and to the North-Western Provinces (102,7). The Imperial Government also made a special assignment of 80,0 to Assam for expenditure due to the Earthquake, and a special contribution of 121,8 to Bombay in aid of Plague expenditure. It will be seen that even with these grants the Central Provinces and the North-Western Provinces closed the year without any Provincial balances, and that the other Local Governments, except Burma, with the consent of the Imperial Government, were compelled to close their Provincial account with balances much below the prescribed minima.

339. As compared with the Budget Estimate, the improvement was contributed to by all the Provinces except Central Provinces and Assam. In the Central Provinces the Provincial account of the year was closed without any balance, as was explained above. In the Local Section there was a falling off under all the Receipt heads, counterbalanced by savings in expenditure chiefly under Civil Departments and Buildings and Roads. In Assam the special assignment of 8 lakhs mentioned above mainly explains the increase in Revenue. The increase in expenditure occurred chiefly under Buildings and Roads (94,1), and was due to charges in connection with the Earthquake; this excess was partly counterbalanced by savings under direct demands on the Revenue (11,6) and under Civil Departments (12,0). In Burma, where the largest increase appears, the improvement occurred under all the heads, both in the Receipts and the Expenditure. In Bengal the increase of 108,5 in the Provincial Revenue under all the heads was counterbalanced by increased expenditure of 101,1, chiefly under Civil Departments (93,1) and Famine Relief (52,1). In the Local Section the improvement occurred under almost all the heads. In Punjab and Madras the improvement occurred chiefly under Principal heads of Revenue, and Buildings and Roads. These improvements were partly counterbalanced by Famine Relief charges, which were subsequently transferred to Provincial. In Bombay the improvement occurred in the Local Section partly counterbalanced by increased expenditure in the Provincial section due to the Plague.

340. As compared with the actuals of the previous year, the improvement was mainly due to increased collections of Revenue owing to the better agricultural prospects in the latter part of the year.

342. Owing to the disturbance of working arrangements caused by the restriction of expenditure on the construction of railways rendered necessary by the depletion of cash balances, and owing to strikes in England having materially affected the expenditure on stores in that country, as well as to the fact that the Assam-Bengal Railway Company raised debentures not contemplated when the Budget Estimate was framed, the provision was reduced in the Revised Estimate, but it was not found possible to work up even to the reduced figure of the Revised Estimate for State Railways on which there was a lapse of 271.4, part of which (175.7) was caused by the credit under Burma Railways for the value of stores balances transferred to the Company.

343. On account of heavy expenditure on actual Famine Relief the whole of the Capital Expenditure for construction of State Railways was charged under 48—State Railways, and no portion was transferred to Famine Insurance Grant.

344. As regards *Lines under Construction*, the lapse on the Assam-Bengal Railway, Part I, was due to the estimates by land acquisition officers having been in excess of actual requirements. The expenditure on the Assam-Bengal Railway, Part II, in excess of the Company's paid-up capital during 1897-98 was less than anticipated for the reasons explained in paragraph 342. The excess on the Rae Bareilly-Benares Railway was due to additional works having been found necessary. The lapse on the Kotri-Rohri Railway and Indus bridge and the East Coast Railway was due to English stores and girders not having arrived in time owing to the engineers' strike in England. The lapse on the Mari-Attock Railway and the Bezwada-Madras Railway was due to the restriction of expenditure ordered by the Government of India during the middle of the year, and on the latter partly to the failure of contractors to supply sleepers, thus retarding construction considerably. The excess on the Lyallpur-Khanewal Railway was due to work having been pushed on vigorously. The lapse on the Hajipur-Katihar Extensions was due to the general restriction of expenditure, to the question of the alignment from Kosi to Katihar not having been settled, and to bridge and permanent-way materials not having been issued to works to the extent anticipated. During the year a small sum was sanctioned to admit of brick burning on the Shadipalli-Balotra Railway, and a sum of 3.0 was spent on the Agra-Delhi Chord, but the construction of no other new Railway-projects was commenced during the course of the year.

345. As regards *Open Lines*, the amount spent by the East Indian Railway in excess of the sum raised by the issue of debentures, was 308.7. There was a lapse on the Rajputana-Malwa Railway due to short expenditure on the proposed new works at Cawnpore, and to the transfer of outlay on works at Ujjain to the Nagda-Ujjain and Ujjain-Bhopal Railways, and to the sale of Locomotive and Carriage and Wagon stock to the Mombassa-Uganda and Hyderabad-Godavery Valley Railways. The credit under Burma Railways represents the value of stores transferred to the Company on its formation in September 1896. The excess on the Eastern Bengal Railway was due to increased work in connection with doubling the line between Ranaghat and Poradaha, to works at Pachooria, Lalgola, Chitpur and Naihati, and to an increase in the English cost of additional rolling-stock. The lapse on the Tirhoot Railway was due to the cost of certain works being over-estimated, to the Barowni junction not having been taken in hand, and to the materials for the erection of Engines not having been received from England. The lapse on the Oudh and Rohilkhand Railway and on the North-Western Railway was due to the general restriction of expenditure, and on the latter to the transfer of sleepers and permanent-way material to the Lyallpur-Khanewal Railway. The lapse on the South Indian Railway was due to the postponement of several large works and to the non-arrival of English stores from England. On *Other Railways* the principal lapses occurred on the Dhond and Manmad and Wardha Coal Railways and the Warora Colliery. The lapse on the Dhond and Manmad Railway was due to the additions to bridges from Ahmednagar to Kopergaon not having been put in hand, and to outlay on fencing having been deferred pending completion of connection with the Hyderabad-Godavery Railway at Manmad. The lapse on the Wardha Coal Railway was due to the provision for strengthening bridges and for the construction of staff quarters not having been utilized for want of sanction to the works. The lapse on the Warora Colliery was due to the transfer of a drilling machine and a hauling engine to the Umaria Colliery.

1.7	Exchange . . . . .	3.4	3.9	3.7

346. The grant made available for expenditure in 1897-98 was not worked up to, owing partly to restriction of expenditure on the Mandalay Canal in Burma, partly to a transfer of 10.3 from expenditure previously recorded under this head to "43.—Minor Works and Navigation," on account of suspense balances of the Dehri workshops in Bengal, and partly to the grants assigned for the works in the North-Western Provinces and Oudh and Madras not being fully utilized.

## 50.—Miscellaneous Public Improvements.

											+ 5,000,0

348. Detailed explanation of the various entries under this head has already been given in paras. 95 and 96, where the interest charges were considered.

## Section P.—UNFUNDED DEBT.

	Budget.	1897-98. Revised.	Accounts.
Special Loans . . . . .	..	..	—12,1
Treasury Notes and Service Funds, India . . . . .	+48,4	+29,6	+28,9
Savings Bank Deposits . . . . .	+454,0	—393,3	—325,0
TOTAL . . . . .	+502,4	—363,7	—308,2

349. Under *Special Loans* the debit of 12,1 represents the commutation value of Wasika pensions lapsed to Government. The large falling off of 19,5 under *Treasury Notes and Service Funds* was partly due to the debit of 10,0 for the purchase of a building for the Uncovenanted Service Family Pension Fund office, and partly to an over-estimate. The details of *Savings Bank Deposits* transactions are as follow :—

	Budget.	Revised.	Accounts.
- Post Office Savings Banks . . . . .	+305,0	—427,8	—352,0
State Railway Provident Institutions . . . . .	+60,0	+10,5	+12,4
Civil Engineers' Provident Fund . . . . .	+30,0	+29,5	+23,1
Regimental Savings Banks . . . . .	+18,0	—21,5	—22,8
Special accounts . . . . .	+26,0	+7,2	+5,1
Forest Officers' Provident Fund . . . . .	+6,0	+8,2	+9,2
TOTAL . . . . .	+454,0	—393,3	—325,0

350. The heavy net withdrawal of 352,0 under *Post Office Savings Banks* was due to short receipts and increased withdrawals, chiefly on account of high prices of food due to famine. The decrease under the *State Railway Provident Institution* was chiefly due to large withdrawal for investment in Government Securities of the deposit of the Burma State Railway Provident Institution on its transfer to a private company. The variations under Regimental Savings Bank depend to a great extent on the transfers of British Regiments between India and England, and therefore an accurate estimate cannot be made. The difference under *Special Accounts* was chiefly due to purchase of Government Securities on account of General Family Pension and the Hindu Family Annuity Funds. Bombay and Madras made no provision in their Estimates for deposits in *Forest Officers' Provident Fund*.

ENGLAND	1.4	...	+ 1.4	2.5	2.3	+ 2	2.2	1.9	+ 3
<b>Total</b>			<b>+1,497.5</b>			<b>+3,386.7</b>			<b>+2,944.6</b>

351. The net credit to *Provincial Balances* has been explained in paragraph 338. Under *Excluded Local Funds* the net debit was contributed chiefly by Punjab, due to the high charges of the Famine Fund, and by Bombay, where heavy expenditure was entailed on the Cantonment Funds, especially at Panna and Kirkee, owing to the plague. The net debit against *Railway Funds* was due to an over-estimate of receipts. The character and magnitude of the transactions recorded under *Departmental and Judicial Deposits* render an accurate forecast impossible. The net credit was contributed chiefly by India in Military and Railway Deposits, by the North-Western Provinces in Personal and Civil Courts Deposits, and by Punjab in Revenue and Personal deposits. There were large payments in Bengal under Revenue, Civil Courts and Personal Deposits, and in Bombay under Personal Deposits due to famine, and under Municipal Deposits in connection with expenditure on account of the plague. The other fluctuations are not sufficiently important to require special explanation.

352. The net figures entered against the head *Advances* may be divided as follows :—

	Budget.	Revised.	Accounts.
Coinage Accounts	...	—160.0	—598.7
Other Advances	+123.9	—255.9	—250.1
	<b>+123.9</b>	<b>—415.9</b>	<b>—848.8</b>

353. Under *Coinage Account* the difference between the actuals and the Budget was due chiefly to a net debit of 433.1 under *Bullion Advances* by reason of increase in the balance of Bullion at the Mints on account both of Government silver and of the silver tendered for re-coinage by the Bhopal and Kashmir States. There was also a net credit of 11.8 on account of Mint certificates issued for silver tendered for the coinage of British dollars at the Bombay Mint. The Budget anticipated a reduction in the small coin depot balances of 36.3, but the actuals show an increase of 166.4 owing to the return into Government Treasuries of copper coin issued during the preceding year on account of famine. There was a net debit of 11.0 under *Copper Coinage Account* due to a debit of 46.1, being the amount by which the stock of coin and copper at the Mints and small coin depôts at the close of the year was increased, counterbalanced by a credit of 35.1 owing to the consequent increase of the balance at credit of the Mint Profit Account.

354. The net debit under *Other Advances* is the final outcome of a number of transactions; the cause of the net debit of 250.1 is however brought out by the following figures :—

Special Advances	+17.5
Permanent Advances	+92.9
Other Advances	—155.7
Account with Foreign States.	—204.8

355. The credit under *Special Advances* was due to the adjustment of the discount on the stock certificate issued to the Currency Department in 1896-97, and debited to this head temporarily as explained in last year's report, partly counterbalanced by a debit in the North-Western Provinces on account of advances to landholders for village famine relief works. The net credit under *Permanent Advances* was chiefly the result of the recovery of the special advances made to officers employed on Famine Relief Works. Under *Accounts with Foreign States* the large debit occurred mainly in India (103.1) and Punjab (93.5).

## Section Q.—DEPOSITS AND ADVANCES—continued.

356. Under *Suspense Account* the variations are chiefly on account of fluctuations in the balances in the hands of departmental officers. The main differences were the decrease in the balances of the Buildings and Roads Branch of the Public Works Department (127,0), especially in the North-Western Provinces and Oudh, the Central Provinces and Bombay, and the increase in the balances in the hands of Civil Departmental Officers (45,0), chiefly Opium Agents in Bengal.

357. The gross credits and debits working up to the net figures under *Exchange on Remittance Accounts* are as follows:—

Budget, 1897-98.			Accounts, 1897-98.		
Sterling Amount.	Exchange.		Sterling Amount.	Exchange.	
	Cr.	Dr.		Cr.	Dr.
Permanent Debt—

...	3,395,7	797,6	Department . . . . .		
			Net . . . . .	...	4,665,2
	2,598,1				

358. The following is a statement of the adjustments in the accounts by which the above result was obtained:—

1897-98. Budget.		1897-98. Accounts.	
Sterling.	Exchange.	Sterling.	Exchange.
+13,000,0	8,580,0	Bills drawn by the Secretary of State . . . . .	9,506,1 5,306,7
+177,1	116,9	Net remittances of Railway Capital to India . . . . .	166,6 93,8
—728,5	—480,8	Miscellaneous remittances . . . . .	—1,137,1 —593,9
...	471,0	Withdrawals by Railway Companies against	
		Rupee advances . . . . .	...
Deduct—			
—16,998,6	11,219,1	Net expenditure in England . . . . .	16,820,2 —9,471,8
...	66,1	Lump alteration by the Financial Department . . . . .	...
	2,598,1	Difference, being exchange brought to account in	
		excess of that involved in the Remittances from	
		India during the year . . . . .	... 4,665,2

359. The difference under *Miscellaneous* was chiefly due to exchange on the Rupee advances to the Bengal-Nagpur and Indian Midland Railway Extensions and the Rohilkund-Kumaon Railway.

## Section R.—IMPERIAL LOANS AND ADVANCES.

	1897-98.		1897-98.	
	Budget.		Accounts.	
Imperial Loans and Advances . . . . .	107,6	—16,1	100,1	—55,1

360. The following are the details:—

1897-98.		1897-98.	
Budget.		ACCOUNTS.	
Amount advanced.	Amount repaid.	Amount advanced.	Amount repaid.
2,3	27,7	26,5	22,9
7,8	58,1	7,9	58,1
...	1,8	2,0	1,9
...	9,4	11,5	9,9
...	6	7	5
6,5	10,5	6,5	6,8
16,1	107,6	55,1	100,1
		TOTAL AS ABOVE	

361. The payment under *Loans to Native States* represents loans to the Sultan of Muskat (6,0), Cooch Behar State for Railway (20 0) and Sikkim State (5), against 2,3 only on account of Loans to Cooch Behar State provided in the Budget. The amount repaid was 15,0 against a provision of 25,4 in the Budget on account of repayment of loans by the Maharaja of Cooch Behar, and the remainder 7,9 includes the actual amount repaid by the Sultan of Muskat (2,1), and by the Saoni State (3), for which provisions were made in the Budget. The Maharaja of Ajaigath repaid the full amount of the loan 5,0 advanced to him in previous year, and the Sikkim State repaid the loan (5) mentioned above, which were not anticipated in the Budget. Under *Presidency Corporations and Port Trusts*, the Bombay Port Trust took the loan for the extension of the Victoria Dock provided in the Budget. The repayments correspond with the amount provided in the Budget. No provision was made in the Budget for the advance of 2,0 to the Ajmere Municipality, which was sanctioned in Financial Department No. 2359-A., dated 26th May 1897. The advance of 11,5 under loans to *District and other Local Committees* represents advances of 2,1 to Cantonment Committee, Secunderabad, granted in Financial Department No. 1887-A., dated 28th April 1897, and of 8,4 advanced in the Military Department not provided for under this head. The repayments almost correspond with the Budget. Under *Loans to Landholders, etc.*, a sum of 7 was advanced to Arbah Badal Khan, Ahmed Khanzai, of Baluchistan, under Financial Department Resolution No. 5458-A., dated 18th December 1897. Under *Advances to Cultivators* the accounts include chiefly the advances and repayments, in India, and the variations, which are small, call for no remark.

Bengal . . . . .	30,0	7,9	24,3	7,6	—5,7	—3
North-Western Provinces and Oudh . . . . .	30,0	18,6	27,8	15,3	—2,2	—3,3
Punjab . . . . .	12,0	11,2	13,0	9,8	+1,0	—2,0
Madras . . . . .	15,0	2,9	11,5	4,8	—3,5	+1,9
Bombay . . . . .	57,7	2,7	48,3	4,3	—9,4	+1,6
TOTAL . . . . .	157,7	51,8	134,1	49,4	—23,6	—2,4

364. In the advances there were savings in all the Provinces except Punjab, where there was a small excess. The principal savings occurred in Bengal (5,7), Madras (3,5), and Bombay (9,4). In Bengal the loan granted to the Darjeeling Municipality was 3,8 below the Estimate, and out of the reserve of 4,5 to meet unforeseen requirements only 3,3 were utilized. In Madras and Bombay the actual requirements of Municipalities fell short of the Estimate. Advances to Municipalities were restricted chiefly to requirements in connection with famine and plague.

365. Under *Port Funds* the Chittagong Port Fund was permitted to defer payment of the instalment of the loan granted to it, which fell due during the year. Under *District Committees* the larger receipts were due to an arrear recovery in Bengal from the Durbhanga District Board, and to the advance payment in Bombay by the Ahmedabad District Local Board of an instalment due on 1st April 1898. Under *Landholders, etc.*, only 15,0 were advanced to the Jath State, against a provision of 22,5.

366. Under *Advances to Cultivators* the following are the details :—

	Budget, 1897-98.		Accounts, 1897-98.		Difference Advanced.	Difference Repaid.
	Advanced.	Repaid.	Advanced.	Repaid.		
Central Provinces . . . . .	110,0	61,2	152,7	74,8	+42,7	+13,6
Burma . . . . .	66,0	31,9	37,9	33,7	—28,1	+8
Assam . . . . .	5	1	4	1	—1	...
Bengal . . . . .	50,0	16,2	216,6	119,6	+166,6	+103,4
North-Western Provinces and Oudh . . . . .	140,4	72,3	172,4	107,8	+32,0	+135,5
Punjab . . . . .	50,0	31,1	176,9	143,5	+126,9	+91,4
Madras . . . . .	25,0	27,5	178,4	27,8	+153,4	+3
Bombay . . . . .	117,7	67,3	267,5	162,0	+149,8	+94,7
TOTAL . . . . .	559,6	327,6	1,202,8	767,3	+643,2	+439,7

Section RR.—PROVINCIAL LOANS AND ADVANCES—*continued.*

367. The advances exceeded the Estimate in all the Provinces, except Burma and Assam. The increase was due to famine, in consequence of which large advances were made under the Land Improvements and Agriculturists' Loans Act, and the following additional grants were sanctioned by the Government of India to meet them, *viz.* :—Bengal (142,5), Punjab (100,0), Madras (33,0), and Bombay (121,5). In Bombay, in addition to the above grant, 7,5 from the head *Loans to Landholders, etc.*, was transferred to this head. In the Central Provinces the figures shown under "Advanced" and "Repaid" include 41,7 and 42,4, respectively, on account of advances to officers for making advances to cultivators. In Bengal both the charges and receipts were swelled by 64,5 by an incorrect adjustment. The larger recoveries represent payment of advances made on account of the famine:

368. Under *Advances under Special Laws* the increase in advances occurred in Bengal, and was due to the transfer to this head of the capitalized value (47,1) of the Rajapur drainage scheme. The increased receipts also occurred in Bengal, and were due chiefly to larger recoveries on account of the advances for the Howrah and Rajapur drainage works.

369. As explained in former reports, these are all net sums. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them, chiefly on account of stores used on revenue account. The English figures represent the difference between the capital deposited by the companies with the Secretary of State, and the withdrawals for expenditure on stores, establishment charges, etc. These figures are necessarily liable to great fluctuations. But the following general explanations are furnished. Under *Guaranteed Companies* the difference in India under the Bombay, Baroda and Central India Railway was due chiefly to larger sale of stores and to larger deposits by outsiders for works to be done. The improvement under the Great Indian Peninsula Railway was due to heavier consumption of stores by revenue for replacement of Cammell's axles and for renewals of carriages and wagons, and to larger sales of obsolete and other stores. The net credit under the Madras Railway was mainly due to the postponement of several large works in consequence of financial pressure and to large deposits received from outsiders for work to be done. In England there was a saving of 437.5 for charges on account of establishment and cost of stores, etc., under all the lines, while the receipts on account of subscribed capital were 904.0 less than was anticipated, and the renewal of the Railway debentures (amounting to 1,439.4) involved the payment of 9.6 to the holders as discount.

370. Under *Subsidised Companies* the lapse on expenditure in India on the *Southern Mahratta and Mysore Railways* was due chiefly to restriction of expenditure and to the postponement of the construction of a part of the additional rolling stock owing to late arrival of materials from England. In the case of the *Indian Midland Railway*, the excess in India was due to greater progress having been made on formation and bridgework on the Saugor-Katni extension, to a portion of the cost of the new engines having been brought to account in 1897-98 owing to late arrival and to smaller issues of stores to Revenue. The Estimates did not provide for the issue of debentures in England by the *Assam-Bengal Railway*, and consequently no provision for expenditure was made in India under this head. Debentures were however raised and the expenditure was debited to this head by a corresponding reduction of charges under 48.—State Railways—Construction. Adjustment of unexpected debits for cost of surveys undertaken by Government in previous years in connection with the Sini-Cuttack-Calcutta extension and the rapid progress of work on extensions account for the excess charge in India under the *Bengal-Nagpur Railway*. The *Branch line Companies* deposit capital in Government treasuries, and draw against these deposits for expenditure on construction according to their requirements. The *South Behar* deposited 280.0 and withdrew 245.2 in 1897-98 against 300.0 and 326.5 provided in the Estimates. In England there was a saving of 418.3 for cost of stores, establishment charges, etc., and the receipts on account of subscribed capital were more by 42.5. The receipts on account of transfer fees, etc., which are very uncertain, also exceeded the Estimates by 1.0, while the renewal of debentures (amounting to 1,000.0) involved the payment of 12.5 to the holders as discount.

## Section T.—REMITTANCES.

	Budget.	1897-98. Revised.	Accounts.
Money Order (net) . . . . .	...	...	—1
Other Local Remittances (net) . . . . .	...	...	—244.5
Other Departmental Accounts (net) . . . . .	...	...	—5.8
Accounts between Civil and other Departments (net)—			
Post Office . . . . .	...	...	...
Guaranteed Railways . . . . .	...	...	...
Telegraph . . . . .	...	...	...
Marine . . . . .	...	...	—3.0
Military . . . . .	...	...	...
Public Works . . . . .	...	...	—69.6
Remittance Account between England and India (net) . . . . .	—15.0	—5.7	—10.8
<b>TOTAL</b> . . . . .	<b>—15.0</b>	<b>—5.7</b>	<b>—333.8</b>

371. The figures entered in this group are the net result of very large transactions, but there is nothing special to record in respect of them. The Money Order transactions continue to show a rapid growth as will be seen from the following figures :—

	Issued.	Paid.
1890-91	16,484.7	16,485.6
1891-92	17,365.8	17,349.3
1892-93	18,117.7	18,098.9
1893-94	19,290.8	19,294.5
1894-95	20,452.8	20,430.8
1895-96	21,757.8	21,739.6
1896-97	23,195.0	23,142.7
1897-98	25,714.4	25,714.5

## Section U.—SECRETARY OF STATE'S BILLS.

	Budget.	1897-98. Revised.	Accounts.
Drawings . . . . .	13,000.0	9,378.0	9,506.1
Payments . . . . .	13,025.3	9,385.2	9,472.8

372. The following are the amounts of bills and transfers drawn during the year by the Secretary of State :—

	£	Rs.	Rate in pence.
April 1897 . . . . .	865.2	1,383.3	15.01
May " . . . . .	802.8	1,333.0	14.45
June " . . . . .	930.5	1,516.2	14.63
July " . . . . .	949.5	1,519.1	15.00
August " . . . . .	641.6	994.5	15.48
September " . . . . .	63.3	96.0	15.82
October " . . . . .	...	...	...
November " . . . . .	...	...	...
December " . . . . .	793.6	1,236.7	15.41
January 1898 . . . . .	931.9	1,397.2	14.29
February " . . . . .	1,520.0	2,291.3	15.92
March " . . . . .	2,007.7	3,035.5	15.87
	<u>9,506.1</u>	<u>14,812.8</u>	<u>15.40</u>

373. The payment account of the year is as follows :—

	£	Rs.
Bills of 1896-97 outstanding on 1st April 1897 . . . . .	470.1	749.1
Bills drawn in 1897-98 as entered above . . . . .	<u>9,506.1</u>	<u>14,812.8</u>
<b>TOTAL BILLS FOR PAYMENT</b> . . . . .	<u>9,976.2</u>	<u>15,561.9</u>
Bills paid in 1897-98 . . . . .	<u>9,472.8</u>	<u>14,794.9</u>
<b>Bills outstanding on 1st April 1898</b> . . . . .	<u>503.4</u>	<u>767.0</u>

## Section V.—CASH BALANCE.

	Budget.	1897-98. Revised.	Accounts.
BALANCE ON 1ST APRIL 1897—			
India . . . . .	13,465,8	13,873,7	13,873,7
England . . . . .	2,814,7	2,832,4	2,832,4
TOTAL . . . . .	16,280,5	16,706,1	16,706,1
BALANCE ON 31ST MARCH 1898—			
India . . . . .	13,311,7	16,722,3	15,982,4
England . . . . .	2,271,3	2,168,3	2,534,3
TOTAL . . . . .	15,593,0	18,890,6	18,516,7
Increase (+) or decrease (—) of balance on 31st March 1898 . . . . .	—687,5	+2,184,5	+1,810,6

374. The above difference is distributed between India and England in the following proportions:—

	Budget.	1897-98. Revised.	Accounts.
India . . . . .	—144,1	+2,848,6	+2,108,7
England . . . . .	—543,4	—664,1	—298,1
TOTAL . . . . .	—687,5	+2,184,5	+1,810,6

375. Taking India and England together, the net transactions of the year were better than expected in the Budget by the sum of 2,498,1. The variations which brought about this result are as follows:—

	Better.	Worse.
Increase in Imperial Deficit . . . . .	...	2,895,2
Decrease in Provincial Deficit . . . . .	752,3	...
Decrease in Capital Expenditure of State Railways and Irrigation works not charged to Revenue . . . . .	2,260,1	...
Decrease under Permanent Debt incurred . . . . .	...	847,1
Increase under Temporary Debt incurred . . . . .	4,000,0	...
Decrease in deposits of Savings Banks . . . . .	...	779,0
Increase under Departmental and Judicial Deposits . . . . .	222,1	...
Net excess payment under Advances . . . . .	...	973,0
Net excess credit under Exchange on Remittance Account . . . . .	1,517,2	...
Net excess payments under Loans and Advances by Provincial Governments . . . . .	...	216,7
Larger withdrawals by Railway Companies . . . . .	...	132,8
Improvement in the balance of Secretary of State's Bills remaining unpaid at the end of the year . . . . .	17,9	...
Larger withdrawals under remittances . . . . .	...	318,8
Minor variations . . . . .	...	88,9
	8,749,6	6,251,5
NET BETTER . . . . .	+2,498,1

GOVERNMENT OF INDIA.  
DEPARTMENT OF REVENUE AND AGRICULTURE.**Weather Review of India for the week ending at 8 a.m. on  
Saturday, March 4th, 1899.**

Quiet weather has prevailed during the week under review, with hardly any rainfall and very few local storms, but the temperature in many parts of the country has been unsteady and the range of temperature in many of the provinces has been larger than usual. The storm which crossed Northern India during the latter half of last week lay over Lower Bengal at the commencement of the week under review, and light to moderate thunder showers and dust storms occurred in different parts of North-East India on the 26th, 27th and 28th, due to the action of this storm. On the 1st and 2nd, the weather was fine and quiet generally, but on the 3rd and 4th slightly unsettled conditions appeared simultaneously in the north-east and north-west and light local showers occurred in these two areas. Except in the north-west and north-east, the weather over India was fine and rainless, but in the south of Tenasserim and also in parts of Ceylon some rain was received during the week. The mean temperature of the week was very nearly normal, but as mentioned above, the temperature was unsteady varying in the different provinces from considerably below to considerably above the normal average.

**Daily Summary.—Sunday, February 26th.**—The storm which had crossed Northern India during the preceding week was shown over Lower and South-West Bengal. The winds were hence feebly cyclonic and a few scattered showers had fallen over North-Eastern India. Elsewhere pressure was uniform, though lower than usual, the winds light and variable, and the weather settled, though Cochin reported a local shower and there had been a trifling fall of snow in parts of Kashmir. The heat was low for the time of year in Bombay, in Lower Burma and in Assam, but was more or less excessive elsewhere, more particularly so within the region covered by the barometric depression, where the principal variations from the normal were Balasore  $+8^{\circ}9$  and Burdwan  $+7^{\circ}3$ .

**Monday, February 27th.**—The barometer had fallen over the west of the Peninsula, but had risen elsewhere, more particularly in the north-west and centre. The depression over Bengal was still fairly discernible, though it had nearly filled up. The winds throughout the country were light and rather variable. The mean temperature had decreased over by far the greater part of the country. All over the Bombay Presidency, Rajputana, Central India, the west of the Central Provinces, and part of Madras as well as over Lower and Central Burma and Assam, the heat was low for the time of year, while in the intervening region it was higher than usual. The following variations exhibit the distribution of temperature relatively to the normal: Malegaon  $-7^{\circ}1$ , Chaibassa  $+6^{\circ}5$  and Mymensingh  $-2^{\circ}6$ . The weather in North-East India had been more unsettled than on the previous day, and the thunder showers over that region had been both more extensive and heavier.

**Tuesday, February 28th.**—The observations showed that the barometer had continued to rise. The storm over Lower Bengal had wholly disappeared, and the ordinary cold weather distribution of pressure, which consists of a high pressure area over North-West India and a low pressure area over the South of the Bay, had been established. Northerly breezes prevailed over parts

of North-West India, southerly winds on parts of the Madras Coast and variable airs and calms elsewhere. There had been further showers in parts of Bengal, but both the amount and the extent of the rainfall had diminished. The mean temperature had generally fallen and was very low for the season in parts of Bombay, Central India and the Central Provinces.

*Wednesday, March 1st.*—The barometer changes had been unimportant, and pressure continued to decrease from a high pressure area in the West Punjab to a low pressure area over the centre of the Bay. South-easterly breezes were blowing down the Gangetic Plain, north-easterly winds over the central parts of the country and variable airs elsewhere. Calms were reported from Bengal. The only rainfall was a light shower in Baluchistan. The principal change in the temperature conditions was a brisk rise in Baluchistan and North-West India. The heat had been excessive over the Indus Valley Districts and in Burma, and less than usual over part of the Central Provinces, but elsewhere the variations from the normal were small.

*Thursday, March 2nd.*—The pressure conditions were practically unchanged and the high pressure area in the north-west was as marked as on the 1st. The winds blew from the usual cold weather directions—from north-west and west down the Gangetic Plain, from north-east over the Central Provinces, and from south-east and east over the Peninsula. Calms were reported from Bengal. Fine cloudless weather prevailed with no rain. The temperature had risen over some central districts and exceeded the normal over the Central Provinces and Berar.

*Friday, March 3rd.*—The barometer had fallen everywhere and over Northern India and the East of the Peninsula, briskly to rapidly. A storm was appearing over the western desert, while at the same time low pressures were developing along the foot of the Himalayas. The wind had shifted to the southward over the western desert, but the Westerly and West-North-Westerly wind down the Gangetic Plain and the North-East wind over the Central Provinces still held. Light snow had fallen over Kashmir and light rain in parts of Bengal and Assam. Temperature had risen in the extreme west and south of India, and the heat was greater than usual over the Punjab and Sind.

*Saturday, March 4th.*—The depression over the western desert had apparently filled up, while on the contrary the low pressure area along the foot of the hills had developed and become more marked. Westerly winds prevailed over a large part of Northern India and breezes between north-west and north-east in most other places, but in North Bengal an easterly wind was appearing. Cloudy weather was reported both from the north-west and north-east, and while light snow had fallen at Minimarg and Srinagar, light rain had been received at Bhamo, Barisal and Jessore. The heat was greater than usual over North-Western India, the south of the Peninsula and the greater part of Burma, the principal variations being  $+9^{\circ}2$  at Jacobabad,  $+3^{\circ}1$  at Bellary and  $+1^{\circ}3$  at Minbu. Elsewhere the weather was cool, the principal temperature variations being  $-8^{\circ}4$  at Kindat,  $-6^{\circ}6$  at Sibsagar, and  $-4^{\circ}1$  at Jubbulpore.

**Temperature.**—As mentioned above, the temperature has been changeable and unsteady during the week, more particularly in North-Western and North-Eastern India. Thus at the commencement of the week temperature was largely above the normal in Bengal. This excess gradually diminished till by the 1st it had practically disappeared and subsequently was replaced by a deficiency of temperature. In the north-west the variations from the normal were irregular, until the 2nd, when the temperature rose above the normal and the rise holding, by the close of the week, there was a large excess of heat all over the north west.

The following table gives the temperature variation data for the week:—

Province.	February 1899.			March 1899.				Mean variation of week.
	26th	27th	28th	1st	2nd	3rd	4th	
Burma	-1.7	-1.1	+1.2	+1.9	+1.3	+1.0	+0.6	+0.5
Assam	0	-0.6	+1.2	-1.0	-1.4	-0.6	-1.1	-0.9
Bengal	+3.7	+2.1	+0.6	+0.2	+0.2	-0.3	-2.9	+0.5
Orissa	+5.6	+5.2	+2.3	+1.1	+0.1	+1.4	-1.0	+2.1
Bihar	+2.2	+1.3	+0.4	+0.2	-0.7	-1.3	-1.3	+0.1
Chota Nagpur	+4.2	+3.3	+0.5	+0.8	+1.1	+0.2	-2.2	+1.1
North-Western Provinces and Oudh	+0.8	+0.5	-0.2	-1.0	+0.2	+0.1	+2.0	+0.3
Punjab	+1.1	+0.6	+0.6	+0.9	+0.4	+3.6	+3.0	+1.5
Sind	-2.0	-3.6	-2.4	+3.2	+0.9	+3.7	+5.7	+0.8
Rajputana	+0.6	-2.5	-1.8	-0.1	-0.6	-0.8	+4.9	0
Gujarat	-2.6	-3.1	-2.5	+0.2	+1.1	+0.3	+2.8	-0.5
Central India	-0.1	-1.8	-2.9	-1.5	-0.9	-2.4	-1.8	-1.6
Central Provinces	+1.7	-0.4	-2.1	-0.6	+2.1	-0.7	-2.3	-0.4
Berar	+1.5	-3.2	-1.9	+0.1	+4.8	+0.5	-1.2	+0.1
West Coast	-0.3	-2.0	-0.5	+0.3	-0.9	+0.3	+0.3	-0.1
Bombay Deccan	-1.3	-5.6	-3.6	-0.3	-0.1	-0.9	-0.3	-1.8
Mysore	+3.6	+2.3	+2.6	-1.4	-1.9	-0.8	+1.1	+0.7
Madras Coast	+0.9	+3.4	+1.7	0	-1.6	-1.6	+0.8	+0.6
Madras Deccan	+5.2	-1.0	+1.6	+0.4	-2.4	-0.7	+2.0	+0.3
South India	+2.6	+2.8	+0.2	-0.7	-0.7	-0.2	-1.1	+0.4
Mean for whole of India	+1.2	-0.2	-0.3	+0.1	+0.1	0	+0.5	+0.2

The above shows a slight excess of temperature on the 26th, but a normal temperature on all the other days. The provincial variations exhibit an excess in Orissa, Chota Nagpur, and the Punjab, a deficiency in Central India and the Bombay Deccan, and normal temperature conditions elsewhere. In the case of Bengal, Orissa, Chota Nagpur, etc., the range of temperature during the week was large. The following are the highest maximum temperatures recorded on each day:—

Sunday, 26th February—Cuddapah	101.57
Monday, 27th " do.	102.03
Tuesday, 28th " do.	100.77
Wednesday, 1st March—Trichinopoly	99.01
Thursday, 2nd " —Toungboon	99.87
Friday, 3rd " —Rangoon	99.06
Saturday, 4th " —Cuddapah	101.62

**Rain.**—Nearly the whole of the rainfall which occurred over India during the week under review was attributable to the action of a single depression. This depression, which crossed Northern India very quickly during the last two days of the previous week, lay over Lower Bengal on the first day of the present week. It drew the wind into cyclonic directions over North-Eastern India, so that south-west to south-east winds prevailed at the head of the Bay and in Lower Bengal. These winds brought up a good deal of moisture, and showers were reported from a few places in East Bengal and Assam. By the following morning, the 27th, the Bengal depression had to a considerable extent filled up but fresh to strong southerly winds continued to carry much moisture from the northern part of the Bay into Bengal and Assam, and the rainfall area notwithstanding the dispersion of the depression had increased and the rainfall itself had been heavier. Light showers continued to be received in this area until the 28th, but on the 1st and 2nd March, the weather was fine and settled. On the 3rd, however, a small local depression appeared over the Sunderbuns, and on that and the following day light thunderstorms gave trifling showers to a few

places in Lower Bengal. Except in North-East India and more particularly in Deltaic and East Bengal and Assam there has been practically no rain during the week. During the greater part of the period a large high pressure area overlay North-Western and Central India, and the weather was fine with dry winds, and though on the 3rd these conditions changed somewhat and a storm appeared on the north-west frontier, the weather over North-Western India was hardly affected thereby, though in Kashmir light snow or rain showers were reported.

The table at the close of the summary shows that effective rain, *i.e.*, rain of one-tenth of an inch or more was received in eight of the rainfall divisions, *vis.*, East Bengal, the Surma, Hills and Brahmaputra divisions of Assam; Deltaic Bengal, Central Bengal, the Bengal Hills and Orissa, and light unimportant showers in six other divisions, *vis.*, Malabar, South Central Madras, the centre and east of the Central Provinces, the Baluchistan Hills, and the north of the East Coast. In all other parts of the country the weather has been rainless. The rainfall of the week exceeded the normal average in East Bengal, all the Assam divisions, Deltaic and Central Bengal and the Bengal Hills. The excess amounted to nearly one inch in East Bengal and to about half an inch in Assam.

With the present rainfall return, a new rainfall period has commenced, and the information contained in the three last columns of the table is practically the same as that given in the three first columns.

The only noteworthy totals recorded during the week at individual rain-gauge stations were as follow :—

	Inches.
Chandpur—Comillah . . . . .	3'23
Munshiganj—Dacca . . . . .	2'47
Sylhet . . . . .	3'05
Sibsagar . . . . .	3'21
Contai—Midnapore . . . . .	3'20
Durawan . . . . .	2'45
